20 YEAR SUMMARY

GROSS AUCTION SALES in millions of US dollars

On December 7, 2000, in Olympia, Washington, we held our 2000th auction. Demonstrating the diversity of a typical Ritchie Bros. bidding audience, this map shows where the buyers came from and the value of what they bought. More than half the equipment was purchased by buyers from outside of Washington State.

To Our Fellow Shareholders

IN 2000, WE GREW THE BUSINESS AND PREPARED FOR THE FUTURE

We held our 2000th auction in the year 2000, a significant milestone after 37 years in the industrial auction business. More important, 2000 was a great year for Ritchie Bros. in terms of investment and expansion. In fact, we are now nearing the completion of a three-year period unlike any in the Company's history. Our capital assets, for example, reached \$140 million by the end of 2000 – up from \$27 million at the end of 1997, reflecting significant additions to our international network of auction facilities. During 2000, we opened new full-service auction facilities in Perris, California; Chicago, Illinois and Montreal, Quebec. New facilities were also opened at our regional auction units in Singapore and Dubai. We now have a network of over 80 offices, including 25 auction sites, in 21 countries around the world.

Internet Broadcast	3

YEAR 2000 BY THE NUMBERS:

- 121 auctions in 8 countries
- \$1.23 billion in gross auction sales
- 122,000 registered bidders
- 42,000 buyers
- 18,000 consignments
- totaling over 127,000 lots

We have also added significantly to our team of sales representatives, and expanded our technology infrastructure, all with an eye to laying the foundation for future growth.

These long-term investments were not expected to generate immediate sales growth or margin expansion; however, we believe they are critical for positioning us for future growth and maintaining our competitive posture. They will enable us to take advantage of market opportunities and to provide a superior and increasingly unique level of service to both buyers and sellers of used equipment. As the Company's largest shareholders, we share your interest in and are firmly committed to achieving results that enhance shareholder value. And as we move forward, we expect our sales and revenue growth to out-strip expense growth, leading to better net margins and strong bottom-line performance.

At the start of 2000 we had expected a weakening of the US economy to generate a significant surge in business for us, just as similar slowdowns had done over the past four decades. But this time, perhaps because the predicted slowdown was coming on the heels of an unprecedented period of expansion, equipment owners did not react by selling their idle and underutilized equipment in volumes we had hoped for.

What will it take for this underutilized equipment to come to market? It's hard to say. Contributing factors have historically included interest rates, commodity prices, construction activity, contractor and consumer confidence levels, inventory levels and dealer balance sheets. In our opinion, the US economic environment gives us good reason to be optimistic about 2001. When the supply of equipment begins to loosen, as we believe it will, we are positioned to grow our sales without capacity constraints. Our intimate knowledge of this market and our experience in past cycles have convinced us that we are on the right track, and we firmly believe that we are better positioned than ever. We've seen these cycles play out before and we are ready to provide the marketplace.

So our 2000th auction in 2000 was just the beginning. Thanks to the committed efforts of the more than 500 outstanding members of the Ritchie Bros. team – who define the Ritchie Bros. difference day in and day out – we believe that 2001 will be an exciting year for your company.

WHY DO WE CONDUCT ONLY UNRESERVED AUCTIONS?

At Ritchie Bros., 'unreserved' means there is no artificial price manipulation. There are no minimum prices or buy-backs by consignors. Every bid is a real bid and everything sells to the highest bidder on sale day.

To us, 'unreserved' is more than an auction style – it's a fundamental principle. It's why bidders from all corners of the world want to participate in our auctions. By attracting a large number of bidders, and allowing them to compete in an open and transparent environment, we are able to transcend local market conditions and deliver fair market prices. The fact that we sell everything on an unreserved basis is one of our most significant competitive advantages.

**Part of the Olympia auction team

OUR INDUSTRY

THE HIGHLY FRAGMENTED USED EQUIPMENT MARKETPLACE

Understanding RBA means understanding the used equipment market. This market includes mobile and stationary equipment used in the construction, mining, forestry, petroleum, agriculture and transportation industries, among others. Much of the equipment is used in

diverse industries and locations. Over \$1 trillion of it is estimated to be in circulation worldwide, with approximately \$100 billion worth being bought and sold each year.

The vast majority is sold through brokers and dealers; less than 5% is currently traded through auctions.

We believe that the amount of used equipment sold at auction has doubled in the last 5 to 7 years, and that auction transactions now represent more than \$4 billion per year. Ritchie Bros. conducts about 25% of this business, and we estimate that we are larger than our next 50 competitors combined.

When we started doing business in the 1960's, an auction was typically viewed as a method of last resort for selling equipment: "auction" was often associated with "bankruptcy." Fortunately, this impression no longer prevails. Largely due to our proven ability to deliver a global marketplace, people who were reluctant to talk to us 20 years ago now occupy the front rows at our auctions, bidding on equipment as it crosses the ramp. It was a long time coming, but over the last 5 to 10 years, buyers and sellers of used equipment have embraced unreserved auctions in a significant way. We estimate that in our most mature markets, auctions now capture up to a quarter of the used equipment transactions. That's a level of penetration we aim to achieve in all our markets.

#2000
IN 2000

WHAT WE SELL AND WHERE IT COMES FROM.

Typical of Ritchie Bros. auctions, the December 7 Olympia auction featured a wide variety of trucks and equipment including 40 crawler tractors, 45 hydraulic excavators, 35 mini-excavators, 45 highway tractors, 20 dump trucks, 20 loader backhoes and 35 hi-boy flatbed trailers, manufactured by companies such as Caterpillar, Komatsu, Case, Hitachi, Mack, Volvo and Freightliner.

Some of the equipment in our auctions comes to us when a contractor upgrades or realigns his fleet, or when a large project is completed – a dam, bridge, road or pipeline, for example, where the owner doesn't need the equipment for his next job. In addition, we sell equipment for rental companies and equipment dealers and brokers. Less than 5% of the equipment we sell comes from receivership and bankruptcy situations. In Olympia, the largest consignments were attributable to dealer inventory reductions, contractor retirements and fleet realignments.

"I've been to Ritchie Bros. auctions all over the States. We like to deal with Ritchie Bros. because their auctions are un-reserved and we know that we're bidding against other bidders and not phantoms. We've toured several heavy equipment auction companies and decided to stick with Ritchie Bros."

— Lloyd Merrill
J. K. Merrill & Sons —
Idaho-based sand and
gravel business

Within the used equipment market, the auction channel continues to grow in popularity for several reasons:

- Auctioneers are not restricted to selling equipment produced by a particular manufacturer or manufactured for a specific industry, or to holding auctions in a particular geographic region. We can provide comprehensive and convenient service to buyers and sellers.
- Used equipment is well suited to the auction channel because its value is highly condition-sensitive and cannot be assessed on a commodity basis. The unreserved auction method gives buyers and sellers confidence that the equipment has traded for a fair market price.
- Sellers are showing an increasing preference for achieving a sale at fair market value quickly and with a minimum investment of time and effort on their part.

Historically, the volume of used equipment brought to auction has increased during periods of economic uncertainty. Factors such as financial pressure and decreased contracting work typically increase equipment supply. At the same time, the demand side of the market expands due to an increasing preference amongst equipment buyers for high quality used equipment instead of more expensive new equipment. In prior cycles, macro economic factors like the ones we are seeing at the start of 2001 prompted an increase in used equipment transactions. Thus while an uncertain economy may stall new production, it can make the used market – in terms of both volume and pricing – quite strong.

USED EQUIPMENT ON THE INTERNET

While the used equipment business has not been transformed into a virtual trading community, the Internet has proven its worth as a marketing tool. But despite the fact that many websites list equipment for sale (essentially on-line classified advertising) and provide information to equipment owners and operators, it appears that dot.com companies trying to sell equipment on-line have learned that the used equipment market is quite unlike the markets for commodities and collectibles. Used equipment buyers like to kick tires.

That's why most used equipment business is still conducted in traditional ways. Success in our market continues to be based largely on personal relationships and trust.

Nonetheless, the Internet is proving to be a great information equalizer for buyers and sellers of equipment. The increased transparency it affords has made the used equipment market more efficient – a very positive development for Ritchie Bros.

THE RITCHIE BROS. DIFFERENCE

WHY PEOPLE CHOOSE RITCHIE BROS.

In the highly fragmented used equipment market, buyers and sellers have many choices. We are the world's largest industrial auctioneer and we handle more used equipment transactions than the vast majority of brokers and dealers, but we are not without competition. Fortunately, the way we do business, combined with our depth of industry knowledge and experience, has given us significant competitive advantages and provides compelling reasons for customers to choose RBA.

WHY EQUIPMENT BUYERS CHOOSE RITCHIE BROS.

Everything is sold on an unreserved basis

Bidders at a Ritchie Bros. auction do not need to be concerned about artificial price manipulation because we go to great lengths to ensure that only legitimate bidders compete for the equipment we sell. Neither the auctioneer nor the sellers are allowed to bid. Our large and active bidding audiences generate market values for our consignors legitimately. While some auctioneers openly permit owners to bid on their own equipment, or will bid on it themselves, we are well known for our strict position against consignors bidding on their own equipment, either directly or through agents.

Fair market prices

Because everything is sold unreserved, buyers at a Ritchie Bros. auction always pay a fair market price, irrespective of their negotiating skills or purchasing power, because all bidders compete on an equal basis. We don't promise any bargains, but our buyers can always be confident that they are paying fair market value.

Guarantee of clear title

Buyers who don't get clear title to their used equipment are running the risk of having the equipment repossessed by the bank that financed the previous owner – something many buyers don't think about until it's too late. Our Search Department goes through an exhaustive process to identify and coordinate the release of all liens before we sell the equipment. As a result, buyers at our auctions don't need to be concerned about the financial condition of the sellers.

Everything sells

Everything sells on sale day to the highest bidder. The buyer simply pays Ritchie Bros. and takes possession of the equipment without any need to negotiate payment or delivery terms.

Efficient use of time

Our average auction includes over 1000 lots from 150 different consignors, covering a considerable array of truck and equipment categories and manufacturers. By attending a Ritchie Bros. auction, an equipment buyer can inspect in one day what might have taken him weeks if the equipment were being offered for sale by a number of vendors in various locations. He is able to buy all manner of equipment and attachments in one place, in one day, with one invoice – rather than having to negotiate with multiple vendors. This one-stop-shopping approach addresses the needs of our customers, most of whom are contractors who can only afford to spend a limited amount of time away from their jobsites.

The opportunity to inspect, test and compare

We recognize that a piece of used equipment needs to be inspected and compared to other units before being purchased, particularly when the buyer is an end user who intends to take the equipment to his jobsite and use it to earn income. We do everything we can to help our customers accurately determine the value of the equipment so they can bid with complete confidence. In addition to facilitating on-site inspection and comparison of the equipment, we arrange for transportation, finance and other service companies to be present at our auction sites so our customers can get quotes before they bid. And our staff is always available if bidders need any additional information.

"There is more to selling used equipment than simply bringing buyers and sellers together. We go out of our way to provide the services that buyers and sellers want. This lets us deliver a global marketplace and a very compelling value proposition."

– Russ Cmolik

Remote bidding

Customers who inspect the equipment and satisfy themselves as to the value of particular pieces, but can't be at the auction site on sale day, can still participate. Proxy bids from qualified bidders can be submitted via our website, via fax, or by calling the sale site. A customer placing a proxy bid specifies the maximum he is willing to pay for a given lot. The bid is confidential and the proxy bidder is inserted into the auction process just as he would have done if he had been able to attend the auction in person.

For example, if a proxy bidder's maximum bid is \$80,000 and the highest bid received from the live crowd is \$60,000, the proxy bidder will buy the lot for one increment over \$60,000 (in this example, probably \$62,500). Thus, the auctioneer ensures that the proxy bidder never pays more than if he had been there to place his own bids on auction day. To expand the service we provide to bidders who aren't able to attend our auctions in person, we have been developing and testing a sophisticated Internet-based, real-time bidding system.

WHY EQUIPMENT SELLERS CHOOSE RITCHIE BROS.

Exposure to a global marketplace

By marketing our auctions directly to a strategic selection from our proprietary database of 340,000 potential customers in over 190 countries, we are able to expose equipment to a large and geographically diverse audience. In addition, all of the equipment is listed on our highly trafficked website, and our auctions are advertised in trade journals and industry publications. And at each of our auctions we promote our forthcoming auctions. All told, we are able to market the equipment in our auctions to a larger base of potential purchasers than could be reached by any of our competitors.

The ability to transcend local market conditions

Our auctions attract a large number of foreign and out-of-state/out-of-province participants, most of whom tend to be very serious bidders, having committed significant time and expense to attend. Transportation costs are frequently not an issue for these buyers because, compared to the value of the equipment, such costs are not that significant – particularly the costs of oceanfreight. As a result, we are often able to deliver world market prices for our consignors' equipment regardless of local market conditions. For example, even if we are holding an auction in an area where the forest industry is in crisis, we can generally achieve solid pricing on logging equipment by attracting buyers from regions or countries whose forest industries have remained relatively robust.

"Just look around this auction yard - if you can't find what you're looking for then you probably don't need it."

- Dave Curtis

Excavators Inc. - Montana-based residential/commercial contractor

Fort Worth, Texas - March 14-16, 2000

Gross Auction Sales: \$36 million

On average, over 50% of the trucks and equipment sold at our auctions goes to buyers from outside the region in which the auction is held. This is particularly appealing to consignors who would prefer not to sell their equipment into their home markets.

Superior selling prices

An average of over 1000 bidders participate in each of our auctions. Bidders participate aggressively because they know our auctions are fair and open. On sale day, our experienced

auctioneers and ringmen create an exciting atmosphere and a rapid pace, selling up to 100 lots per hour. And with the majority of our buyers being end users, pricing can often be closer to retail than wholesale.

One-stop hassle-free service

We can coordinate transporting the equipment to the auction site and we look after any cleaning, refurbishing or painting required to make the equipment auction-ready. At many of our auction yards, we have made substantial investments in environmentally certified refurbishing facilities and we do all necessary work right on site. As environmental regulations tighten in many of the jurisdictions in which we operate, these facilities are becoming an increasingly significant competitive advantage for Ritchie Bros.

In addition to getting the equipment sale-ready, we handle questions from prospective bidders, we take care of the marketing and title searches, and we set up the auction yard so bidders can inspect, test and compare the equipment. Perhaps most important, we help our consignors with all of their equipment — any make, model or manufacturer, high-value or low-value, big or small, young or old.

After the auction, we handle the collections and we pay out the net proceeds. Our consignors don't have to negotiate with multiple buyers or worry that a deal might fall apart at the last minute. We take care of selling the equipment so our customers can concentrate on their business.

HOW DO WE MANAGE THE 'AT-RISK' BUSINESS?

About 70% of our consignments are done on a straight commission basis. In these cases, consignors risk selling their equipment for less than they expect, but enjoy maximum upside potential if it sells for more.

The other 30% of our consignments involve either a guarantee of minimum proceeds to the consignor or an outright purchase by Ritchie Bros. We mitigate our risk in these situations by charging higher commission rates. We also take advantage of our proprietary appraisal database and our knowledge of most major equipment deals around the world, which combine to give us excellent visibility into the pipeline of equipment coming to market. Further mitigating the risk is our limited exposure to changes in equipment values — usually between 30 and 60 days.

Compelling value proposition

Not only do we help our consignors sell their equipment quickly and efficiently, we help them achieve the highest net return on the sale.

Compared to other sales channels, we run a very lean operation with no warranty programs, inventory, or other overheads typically associated with equipment sales. We also sell everything as-is-where-is. As a result, we are able to position ourselves as a low-cost intermediary, minimizing the amount we need to earn on each transaction. We do charge slightly higher commissions than some other auctioneers, but we offer a higher level of service in order to achieve higher prices. To the 18,000 consignors who chose Ritchie Bros. in 2000, that's what counts.

International Network of Auction Sites

With regularly scheduled auctions at 25 auction sites and numerous off-site sales, we enable owners to sell their equipment when and where they want — a particularly compelling feature for customers operating in multiple locations around the nation or around the world.

Flexible contract options

We are willing to consider underwriting the sale of a substantial fleet, either by providing a guarantee of gross proceeds or by purchasing it outright. In either case, we assume the risk.

We can also prepare custom contracts to suit the needs of our customers, and we regularly offer cash advances. We can comfortably do these things because we are confident in our auctions' ability to deliver fair market value.

A reputable business partner

Ritchie Bros. is listed on the New York Stock Exchange and has a strong balance sheet as well as a 37-year history in the industrial auction business. Our customers are always treated fairly and they know we have the financial strength to live up to our commitments.

#2000
IN 2000

"I'm a consignor with about 35 machines in this sale. Usually we're buyers. As buyers, we find it's a very easy auction to come to. It's user-friendly, especially the permanent sites with their own buildings and nice auditoriums to sit in. It's also easy to sell here. As sellers, we were on a tight time schedule, so we just brought the equipment to the auction, ran it through their paint and refurb facilities and had it fixed and ready for sale. We didn't have to spend all that money on advertising because Ritchie Bros. advertises internationally, including on the Internet. That's what will bring the market to you. Ritchie Bros. is becoming the standard of prices. The banks are using these prices for financing. The finance companies are using them. And dealers are obviously using the prices that are achieved here to set where we will be at retail."

**– Dale Uri
Techs Equipment Sales –
Oregon-based
equipment dealer**

OUR GROWTH STRATEGY

OUR PLAN FOR GROWING EARNINGS

WHY OUR QUARTERS ARE SO LUMPY

Our business is seasonal, with mid-December through mid-February and July/August being traditionally slow periods, and it is event-driven, dependent on the timing of fleet upgrades and realignments, contractor retirements and the completion of major projects. Auction dates (there were 121 in 2000) are often set with as little as four to six weeks lead time. In addition, most of our customers don't buy or sell consistent amounts of equipment each year. Plus, our auction revenue rate (essentially our commission rate) fluctuates each quarter depending on the performance of our at-risk business.

As a result, our quarters are not predictable and forecasting is difficult – a reality which gives our accountants headaches but which is consistent with our focus on long-term growth rather than smooth quarters.

During the last several years, the main contributor to quarterly earnings volatility has been our auction revenue rate which has, on a quarterly basis, fluctuated between 7.5% and 9.5% but has continued to revert to a remarkably consistent average of about 8.8%. We are not seeing any trends that would lead to a material change in our average auction revenue rate.

We have achieved a certain degree of momentum over the past 37 years. The success of one auction attracts equipment to the next auction, which attracts buyers, which attracts equipment and so on. It's a self-reinforcing process that has

created what is now a tremendous competitive advantage. When a potential consignor weighs his options, he is hard pressed to identify an alternative that offers a better net return. And a buyer is unlikely to find a better selection of equipment without spending several days in numerous locations.

Our task is straightforward: to harness that momentum, fuel it, and grow the business. But we are determined that faster growth must never come at the expense of the high standards of customer service that have brought us to this point. The initiatives undertaken by each of our regions and departments are consistent with the following inter-related strategies that we believe will allow us to achieve reasonable earnings growth without risking the core values on which our business is based.

1. Increase our Customer Base

While our customer base of over 340,000 truck and equipment owners in 190 countries is already substantial, we must continually work to expand it. And in a relationship business like ours, the best way to do that is for sales representatives to personally introduce our services to the truck and equipment owners who don't yet know us.

In terms of sourcing consignments, we will continue to concentrate on our core customer base of contractors and equipment dealers. We will also be spending considerable time with manufacturers of new equipment; because of our ability to provide international distribution for a cost that is well below the cost of an in-house sales and marketing operation, we have become an important distribution arm for some manufacturers.

2. Expand our Network of Auction Sites

To better serve our customers and enhance our market position, we intend to continue expanding our international network of auction facilities. In most cases, we will follow the five-stage approach we have been following since the inception of the Company.

Stage 1: Identify patterns of bidder travel and the regions that are home to new bidders and equipment owners.

Stage 2: Hold auctions at temporary 'off-site' locations in those regions in order to introduce our auctions to more people and expand our customer base.

Stage 3: Establish a modest sales office and staff it with one or two territory managers, who will develop the region, hold additional off-site auctions and source equipment for other sites.

Stage 4: Develop a Regional Auction Unit. At this stage we lease a yard, deploy additional people and typically hold auctions every three to six months.

Stage 5: In areas where our market assessment leads us to expect an appropriate return on investment (and where the potential exists for even stronger returns), we purchase land and construct purpose-built auction facilities. These Permanent Auction Sites help us mount larger auctions with lower costs.

Expanding our network of auction sites reinforces one of our main competitive advantages: our purpose-built auction theatres and environmentally certified refurbishing facilities enable us to meet the needs of equipment owners better than our competitors.

We expect to spend in the range of \$40 million over the next 18 months to complete our current capital expenditure program. Then we will likely scale back our capital expenditures to about \$20 million per year on average, the plan being to add one or two permanent auction sites to our network each year.

3. Expand our Geographic Reach

Although the United States is already our largest market, we continue to see significant growth opportunities in almost every part of the country. In Europe and the Middle East, we are looking for meaningful growth at our facilities in The Netherlands and Dubai and in countries where to date we have not been holding auctions. We hope to establish a regular schedule of auctions in several countries throughout Europe and the Middle East.

#2000
IN 2000

OLYMPIA CASE STUDY

The permanent auction site in Olympia was opened in 1994. During the three years prior to the opening of this facility, annual gross auction sales in the region averaged approximately \$25 million. In the three years following, sales averaged approximately \$40 million. While gross auction sales increased by 50%, operating income increased by almost 100% because of the new economies of scale and operational efficiencies. The best part of this case study: gross auction sales at the Olympia facility continue to grow. And this success has enabled us to host off-site sales in neighboring states, with the result that regional gross auction sales now exceed \$60 million per year.

Asia was admittedly a disappointment in 2000 due to stagnant economic conditions and depressed purchasing power throughout the region. We nonetheless remain confident that our Singapore auction site will ultimately be a valuable and integral part of our network, and we plan to further expand our footprint in Asia in the coming years.

We have also commenced activity in Latin and South America. Much like Asia, these markets produced hardly any business for us in 2000, but we intend to maintain a presence in these regions and to take advantage of opportunities when they present themselves.

4. Expand into Related Markets

To boost our sales of agricultural equipment and over-the-road trucks and trailers, we have been hiring people with expertise in both of these market segments and adding "truck days" and "ag days" to some of our auctions. Both segments are complementary to our core business and allow us to increase the utilization of our auction facilities.

5. Recruit, Train and Develop the Best People

Closely related to our other growth strategies is our plan to build our team of sales representatives and support personnel. In our business, nothing is more important – or difficult. We are a unique company in a unique industry, and people with the skills needed to be successful at Ritchie Bros. are not readily available. We screen very carefully before adding new members to our team because we will not compromise our customer relationships or hard-earned reputation. At December 31, 2000, we had a total full-time staff of 515 people, including 177 front line sales representatives, up 14% and 16% respectively from December 31, 1999 levels. We grew our team significantly in 2000 but still run a lean operation considering our volume of business.

It takes a while for our new sales representatives to earn the level of trust necessary for our customers to see them as a valued partner who can help with the management of their fleet. We expect the large number of new hires in 2000 to become more productive and to generate increasing amounts of business. By adding more people every year, albeit probably at a slower pace than in 2000, we expect to be able to fuel ongoing sales and earnings growth.

6. Use the Internet to Enhance our Business

The Internet is not a disruptive technology that threatens our business. It is a valuable tool we can use to further differentiate ourselves from our competition and ensure that we continue to provide the best venue for the purchase and sale of used equipment. Rather than using the Internet to replace our auctions, we are using the Internet to enhance our auctions.

Our customers have told us that 100-point inspection reports, digital photos and independent appraisals do not eliminate the need for tire-kicking. For most of our customers, bidding top dollar on a piece of used equipment without personally inspecting the equipment would be equivalent to buying a used car without taking it for a test drive. For this reason we decided early on not to hold the virtual auctions that some dot.com companies have attempted. But as a service to those customers who have satisfied themselves as to the quality of a particular piece of equipment but for one reason or another are unable to attend the auction, we are enhancing our auctions by allowing these customers to participate over the Internet.

During 2000 we broadcast several of our auctions over the Internet using the **rbactionView** service on our website. We also successfully tested our real-time Internet bidding software, launching on a controlled basis a new service called **rbactionBid-Live**. This service, which we will be refining and improving in 2001, is a complement to the increasingly popular **rbactionBid-Proxy** service that has been in place for over a year. By the end of 2000, we had sold over \$5.0 million worth of trucks and equipment to customers who placed their bids using the **rbactionBid-Proxy** service on our website – an impressive number by dot.com standards but representing less than half of one percent of our gross auction sales.

During 2000 we also provided our customers other on-line services to help them manage their fleets of equipment. The most significant of these initiatives was the launch of **rbactionRe\$ults**, an rbaction.com premium service that, for the first time, gives our customers access to our historic auction results. Other services in development and scheduled for launch in the coming months share the goal of making rbaction.com “the place to go for the tools you need to manage your fleet”.

We are committed to remaining at the forefront of technology in the used equipment industry and we will continue to take advantage of the Internet to achieve that goal.

WHAT YOU CAN DO @ rbaction.com

- **Equipment Search** – a sophisticated tool that allows you to search through all items consigned to upcoming auctions
- **Sale-Day catalogs** – on-line access to auction catalogs with all lots listed in sale order
- **rbactionRe\$ults** – access to 24 months of Ritchie Bros. auction results
- **rbactionView** – live Internet broadcasts of selected Ritchie Bros. auctions
- **rbactionBid-Proxy** – a tool for submitting bids in advance of the live auction
- **rbactionBid-Live** – a tool, tested on a controlled basis in 2000, to allow customers to place live real-time bids over the Internet
- **rbactionConsign** – a streamlined consignment process for customers with annual contracts

For further information about these services, please visit rbaction.com

“Even before the advent of the Internet, we provided a global marketplace for used equipment. The Internet is giving us new opportunities to grow our business and improve the services we offer our customers.”

– Dave Ritchie

THE RITCHIE BROS. AUCTION PROCESS

STEP 1 Getting to know the owner and his equipment

The auction process begins when an equipment owner meets with one of our territory managers. We get to know the owner's needs and, if necessary, we appraise his equipment. An appraisal starts with a field inspection of the equipment. Photographs and particulars of the equipment are noted. The photographs and equipment descriptions are circulated to the people participating in the appraisal; typically the appraisal team includes two people from the local area, two from head office and, if necessary, additional people with relevant expertise. After their individual appraisals are complete, the appraisal team compares notes and concludes on a final appraised value for the fleet.

STEP 2 Drafting the auction contract

We sit down with the consignor and work out the details of his individual auction contract. Straight commission contracts are the most common. If we have performed an appraisal, we may also offer the consignor a guarantee of gross proceeds or an outright purchase contract. In certain circumstances, we offer cash advances and other options. Long story short: we draft a contract tailored to the consignor's individual needs and requirements.

STEP 3 Getting the equipment "auction ready"

Once the equipment arrives at the auction site, we coordinate any cleaning, refurbishing, repairwork or painting that is required in order to get the equipment ready for the auction. All of this is done in consultation with the consignor.

STEP 4 Marketing the equipment to the world

Marketing is done through full-colour auction brochures that are mailed to a targeted selection from our extensive customer database (an average of 50,000 are mailed for each auction). In addition, every piece of equipment is posted on our website at rbauction.com. Our auctions are also advertised through trade journals and press releases, and we promote them at all intervening Ritchie Bros. auctions, ensuring that the equipment is exposed to the widest possible audience of potential buyers.

STEP 5 Searching the equipment for liens

To ensure that buyers can purchase with confidence, we guarantee the clear title of everything we sell. Our search department identifies and arranges for the release of all liens and encumbrances.

STEP 6 Setting up the auction yard

The equipment is sorted and displayed in logical groupings so prospective buyers can easily inspect, test and compare similar pieces. We have knowledgeable staff on hand to answer bidders' questions. And to make the process even easier for the bidders, we arrange for caterers, finance company representatives, customs brokers, transportation companies and other services to be present on the site.

STEP 7 Auction Day

On auction day, our auctioneers, ringmen, yard staff and administrative team conduct an efficient and exciting auction. We sell up to 100 lots every hour.

STEP 8 Taking care of business

After the auction is over, we collect the proceeds from the buyers, coordinate the release of the equipment to its new owners, and disburse the proceeds (along with detailed settlement statements) to the consignors.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Overview

The following discussion summarizes the significant factors affecting the consolidated operating results and financial condition of Ritchie Bros. Auctioneers Incorporated ("Ritchie Bros." or the "Company") for the year ended December 31, 2000 compared to the year ended December 31, 1999. This discussion should be read in conjunction with the consolidated financial statements and notes thereto included herein. The Company prepares its consolidated financial statements in accordance with generally accepted accounting principles in Canada which, except as set out in note 9 to the consolidated financial statements, result in materially consistent financial position and results of operations to that which would be reported under generally accepted accounting principles in the United States. Amounts discussed below are based on consolidated financial statements prepared in accordance with Canadian accounting principles.

Ritchie Bros. is the world's leading auctioneer of industrial equipment. At December 31, 2000, the Company operated from over 80 locations in North and Central America, Europe, Asia, Australia, Africa and the Middle East. The Company sells, through unreserved public auctions, a broad range of used equipment, including equipment utilized in the construction, transportation, mining, forestry, petroleum and agricultural industries.

Gross auction sales represent the aggregate selling prices of all items sold at Ritchie Bros. auctions during the periods indicated. Gross auction sales are key to understanding the financial results of the Company, since the amount of auction revenues and to a lesser extent, certain expenses, are dependent on it. Auction revenues include commissions earned as agent for consignors through both straight commission and gross guarantee contracts, plus the net profit on the sale of equipment purchased and sold by the Company as principal. Under a gross guarantee contract, the consignor is guaranteed a minimum amount of proceeds on the sale of its equipment. When the Company guarantees gross proceeds, it earns a commission on the guaranteed amount and typically participates in a negotiated percentage of proceeds, if any, in excess of the guaranteed amount. If auction proceeds are less than the guaranteed amount, the Company's commission would be reduced, or, if sufficiently lower, the Company would incur a loss. Auction revenues are reduced by the amount of any losses on gross guarantee consignments and sales by the Company as principal. Auction revenues also include interest income earned that is incidental to the auction business.

The Company's gross auction sales and auction revenues are affected by the seasonal nature of the auction business. Gross auction sales and auction revenues tend to increase during the second and fourth calendar quarters during which the Company generally conducts more auctions than in the first and third calendar quarters. The Company's gross auction sales and auction revenues are also affected on a period-to-period basis by the timing of major auctions. In newer markets where the Company is developing operations, the number and size of auctions and, as a result, the level of gross auction sales and auction revenues, is likely to vary more dramatically from period-to-period than in the Company's established markets where the number, size and frequency of the Company's auctions are more consistent. Finally, economies of scale are achieved as the Company's operations in a region mature from conducting intermittent auctions, establishing a regional auction unit, and ultimately to developing a permanent auction site. Economies of scale are also achieved when the size of the Company's auctions increases.

The Company is aware of potential restrictions that may affect the ability of equipment owners to transport certain equipment between some jurisdictions. Management believes that these potential restrictions have not had a significant impact on the Company's business, financial condition or results of operations to date. However, the extent of any future impact on the Company's business, financial condition or results of operations from these potential restrictions cannot be predicted at this time.

Although the Company cannot accurately anticipate the future effect of inflation, inflation historically has not had a material effect on the Company's operations.

During 2000 the Company held its first auction in Spain and opened sales offices in Spain, Saudi Arabia, Jordan and several cities in North America. In addition, new permanent auction sites were opened in Perris, California; Morris, Illinois; and Montreal, Quebec. The Company also opened new auction facilities at its regional auction units in Dubai, the United Arab Emirates and Singapore. Also during 2000, the Company purchased 318 acres of land (with plans to develop approximately 125 acres) in Edmonton, Alberta with the intention of constructing a permanent auction site to service the Edmonton market. The new site is expected to replace the existing 24 acre Edmonton permanent auction site in the second half of 2001. The Company also purchased two acres of land in Richmond, British Columbia with the intention of constructing a new administrative head office building. The new head office is expected to be complete in June 2001.

Also during 2000 the Company hosted several live auction broadcasts over the Internet and continued its work on other Internet initiatives designed to enhance the Company's auction business.

Results of Operations

Auction Revenues

Auction revenues of \$106.1 million for the year ended December 31, 2000 increased by \$1.5 million, or 1.4%, from 1999 due to increased gross auction sales, partially offset by a lower average percentage of auction revenues earned by the Company on gross auction sales. Gross auction sales of \$1.23 billion for the year ended December 31, 2000 increased \$62.4 million, or 5.3%, over the prior year, primarily as a result of increased gross auction sales in Canada and the United States, partially offset by decreased gross auction sales in other parts of the world. Results for 2000 included significant auctions in Fort Worth, Texas; Ocala, Florida; Toronto, Ontario and in the Port of Moerdijk, the Netherlands. In addition, the Company held its first auction in Spain. Auction revenues as a percentage of gross auction sales have averaged approximately 8.80% on a long-term basis. In the year ended December 31, 2000, the auction revenue rate of 8.61% was lower than the long-term average and lower than the 8.94% rate experienced in the year ended December 31, 1999. Management's expectations with respect to the long-term average auction revenue rate remain unchanged.

Direct Expenses

Direct expenses are expenses that are incurred as a direct result of an auction sale being held. Direct expenses include the costs of hiring personnel to assist in conducting the auction, lease expenses for temporary auction sites, travel costs for full time employees to attend and work at the auction site, security hired to safeguard equipment while at the auction site and advertising specifically related to the auction. Direct expenses of \$17.9 million for the year ended December 31, 2000 increased by \$0.5 million compared to 1999 due to increased auction activity generated by the Company in 2000. As a percentage of gross auction sales, direct expenses were 1.45% for the year ended December 31, 2000, roughly consistent with the 1.49% ratio experienced in the prior year. Direct expenses as a percentage of gross auction sales fluctuate based on the size and location of auctions held each period. Management expects that, on average, direct expenses as a percentage of gross auction sales will be approximately 1.50% in 2001.

Depreciation and Amortization Expense

Depreciation is calculated on capital assets employed in the Company's business, including buildings, certain site improvements, automobiles, yard equipment, and computer hardware and software. Amortization results from expensing, over 20 years, the \$33.0 million of goodwill recorded as a result of the acquisition of the auction business of Forke in April 1999. In the year ended December 31, 2000, depreciation and amortization expense was \$7.8 million, compared to \$5.6 million in 1999. This increase is primarily the result of the depreciation of new auction facilities constructed over the past year. Management anticipates that depreciation expense will increase as existing auction sites are improved and additional permanent auction sites are acquired and developed.

General and Administrative Expense

General and administrative expense ("G&A") includes employee expenses such as salaries, wages, performance bonuses and benefits, non-auction related travel, institutional advertising, insurance, general office, and computer expenses. For the year ended December 31, 2000, the Company incurred G&A of \$52.9 million, as compared to \$47.3 million in 1999. This increase in expenditures is attributable to an increase in employee numbers and infrastructure to support the growth initiatives of the Company, and costs associated with a Company-wide meeting held in January 2000. Future levels of G&A will be affected by infrastructure and workforce expansion necessary to support the Company's growth plans and other factors.

Income from Operations

Income from operations was \$27.5 million for the year ended December 31, 2000 compared to \$34.2 million in 1999. This decrease is primarily the result of increased G & A and depreciation and amortization expenses.

Interest Expense

Interest expense includes interest and bank charges paid on term bank debt. Interest expense for the year ended December 31, 2000 was \$3.4 million, compared to \$1.7 million incurred in 1999. The increase resulted primarily from debt incurred by the Company in April 1999 and June 1999 in connection with the acquisition of the auction business and certain assets of Forke, as well as debt incurred over the past year to finance the development of additional permanent auction sites. During the year, the Company capitalized \$1.1 million (1999-\$0.9 million) of interest related to properties under development. Management anticipates that interest expense will increase further as debt is incurred to finance the development of additional permanent auction sites. See "Overview" and "Liquidity and Capital Resources."

Other Income

Other income arises from equipment appraisals performed by the Company, and other miscellaneous sources. Other income for the year ended December 31, 2000 was \$1.3 million compared to \$1.2 million in 1999.

Income Taxes

Income taxes of \$8.2 million for the year ended December 31, 2000 have been computed based on rates of tax that apply in each of the tax jurisdictions in which the Company operates. The effective tax rate of 32.2% on net income for the year ended December 31, 2000 is lower than the 33.9% rate the Company experienced in 1999 primarily due to the different jurisdictions in which the Company operates and earns its income.

Liquidity and Capital Resources

The Company's cash can fluctuate significantly from period to period, largely due to differences in timing of receipt of gross sale proceeds from buyers and the payment of net amounts due to consignors. If auctions are conducted near a period end, the Company may hold cash in respect of those auctions that will not be paid to consignors until after the period end. Accordingly, management believes a more meaningful measure of the Company's liquidity is working capital, including cash.

At December 31, 2000, working capital including cash was \$30.9 million, compared to \$26.0 million at December 31, 1999. This increase of \$4.9 million during the year is primarily a result of the reclassification of redundant property from capital assets to current assets partially offset by an increase in current portion of bank debt. The redundant property is presently being marketed for sale. The increase in debt was incurred to finance the acquisition and development of certain permanent auction sites.

Net capital expenditures by the Company during the year ended December 31, 2000 were \$46.5 million as compared to \$55.2 million for the year ended December 31, 1999. In 2000, the Company acquired land for use as permanent auction sites and an administrative head office and incurred related development costs in Canada and the United States. In addition, the Company continued to incur site development costs in the United States, Canada, Singapore and the United Arab Emirates. The Company is continuing with its plan to add additional permanent auction sites in selected locations and is presently in various stages of commitments to acquire land for development in the United States. The Company expects that it will incur capital expenditures of approximately \$40 million during 2001 and the first half of 2002. In subsequent years, the Company expects to incur in the range of \$20 million per year in capital expenditures. Actual expenditure levels will depend on the Company's ability to identify, acquire and develop suitable auction sites.

The Company has established credit facilities with financial institutions in the United States, Canada, Europe, and Australia. The Company presently has access to credit lines for operations of approximately \$97.2 million and to credit lines for funding property acquisitions of approximately \$91.9 million. At December 31, 2000, the Company had bank debt of \$2.1 million related to operations, and bank debt related to property acquisitions totaled \$65.1 million, leaving a net credit line of \$95.1 million available for operations and net credit lines of \$25.7 million available for property acquisitions. See "Overview".

Forward-Looking Statements

This Annual Report, including this Management's Discussion and Analysis of Financial Condition and Results of Operations, contains forward-looking statements that involve risks and uncertainties. These statements are based on current expectations and estimates about the Company's business. These statements include, in particular, statements relating to auction revenues, direct expenses, G&A, income taxes, the anticipated improvement, acquisition and development of permanent auction sites, and the financing available to the Company. Words such as "expects", "intends", "plans", "believes", "estimates", "anticipates" and variations of such words and similar expressions are intended to identify such forward-looking statements. These statements are not guarantees of future performance and involve certain risks, uncertainties and assumptions that are difficult to predict. The following important factors, among others, could affect the Company's actual results and could cause such results to differ materially from those expressed in the Company's forward-looking statements: the many factors that have an impact on the supply of and demand for used equipment; fluctuations in the market values of used equipment; potential inability to achieve and manage growth; periodic and seasonal variations in operating results or financial conditions; the timing and location of auctions; potential delays in construction or development of auction sites; actions of competitors; adverse changes in economic conditions; restrictions affecting the ability of equipment owners to transport equipment between jurisdictions; potential losses from price guarantees, purchases of inventory, advances by the Company and guarantees of clear title; risks of noncompliance with governmental and environmental regulation; potential inadequacy of insurance coverage; risks of international operations; dependence of key personnel; and other risks and uncertainties as detailed in the Company's periodic filings with the United States Securities and Exchange Commission including its annual return for 2000 filed on Form 40-F in March 2001. The Company undertakes no obligation to update publicly any forward-looking statements, whether as a result of new information, future events or otherwise. Forward-looking statements should be considered in light of these factors.

INDEPENDENT AUDITORS' REPORT

We have audited the consolidated balance sheets of Ritchie Bros. Auctioneers Incorporated (the "Company") as at December 31, 2000 and 1999 and the consolidated statements of income, shareholders' equity and cash flows for each of the years in the three-year period ended December 31, 2000. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these consolidated financial statements present fairly, in all material respects, the financial position of the Company as at December 31, 2000 and 1999 and the results of its operations and its cash flows for each of the years in the three year period ended December 31, in accordance with Canadian generally accepted accounting.

Canadian generally accepted accounting principles vary in certain significant respects from accounting principles generally accepted in the United States. Application of accounting principles generally accepted in the United States would have affected results of operations for each of the years in the three year period ended December 31, 2000 and shareholders' equity as at December 31, 2000 and 1999 to the extent summarized in note 9 to the consolidated financial statements.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Tabular dollar amounts expressed in thousands of United States Dollars)

Years ended December 31, 2000, 1999 and 1998

1. Significant accounting policies:

(a) Basis of presentation:

These consolidated financial statements present the financial position, results of operations and changes in shareholders' equity and cash flows of Ritchie Bros. Auctioneers Incorporated (the "Company"), a company incorporated in July 1997 under the Canada Business Corporations Act, and its subsidiaries. All significant intercompany balances and transactions have been eliminated.

The consolidated financial statements of the Company have been prepared in accordance with generally accepted accounting principles in Canada which, except as disclosed in note 9, also comply, in all material respects, with generally accepted accounting principles in the United States.

(b) Cash and cash equivalents:

Cash equivalents consist of highly liquid investments having an original term to maturity of three months or less when acquired.

(c) Inventory:

Inventory is primarily represented by goods held for auction and has been valued at the lower of cost, determined by the specific identification method, and net realizable value.

(d) Capital assets available for sale:

Capital assets available for sale are valued at lower of cost and net realizable value.

(e) Advances against auction contracts:

Advances against auction contracts represent funds advanced to consignors against proceeds from future auctions.

(f) Capital assets:

All capital assets are stated at cost and include capitalized interest costs on property under development. Depreciation is provided to charge the cost of the assets to operations over their estimated useful lives based on their usage predominantly as follows:

Improvements	30 years straight-line
Buildings	30 years straight-line
Automotive equipment	30% declining balance
Computer equipment	30% declining balance
Computer software	3 years straight-line
Yard equipment	20-30% declining balance
Office equipment	20% declining balance
Leasehold improvements	Terms of leases

(g) Goodwill:

Goodwill, which represents non-identifiable intangible assets acquired, is being amortized on a straight-line basis over the expected period to be benefited, which is 20 years. The Company periodically assesses the recoverability of goodwill by determining whether the amortization of the carrying value over its remaining life can be recovered through estimated undiscounted future operating cash flows.

(h) Revenue recognition:

Auction revenues are recognized when the specific items are sold and title passes to the purchaser and are represented by the commissions received from the consignor and the net proceeds received from the sale of self-owned equipment.

(i) Income taxes:

Income taxes are accounted for using the asset and liability method whereby future taxes are recognized for the tax consequences of temporary differences by applying enacted statutory tax rates applicable to future years to differences between the financial statement carrying amounts and the tax bases of existing assets and liabilities. The effect on future taxes of a change in tax rates is recognized in income in the period that includes the enactment date of future tax benefits. To the extent that realization of future tax assets is not considered to be more likely than not, a valuation allowance is provided.

(j) Foreign currency translation:

The Company's reporting currency is the United States dollar. The functional currency for each of the Company's operations is the currency of the country of residency. Each of these operations is considered to be self-sustaining. Accordingly, the financial statements of operations of the Company that are not located in the United States have been translated into United States dollars using the exchange rate at the end of each reporting period for asset and liability amounts and the average exchange rate for each reporting period for amounts included in the determination of income. Any gains or losses from this translation have been included in the foreign currency translation adjustment account which is included in shareholders' equity.

Monetary assets and liabilities recorded in foreign currencies are translated into the appropriate functional currency at the rate of exchange in effect at the balance sheet date. Foreign currency denominated transactions are translated into the appropriate functional currency at the exchange rate in effect on the date of the transaction. Any exchange gains and losses on these are included in the determination of income.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Tabular dollar amounts expressed in thousands of United States Dollars)

Years ended December 31, 2000, 1999 and 1998

1. Significant accounting policies (continued):

(k) *Use of estimates:*

The preparation of financial statements in conformity with generally accepted accounting principles requires the Company to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from such estimates and assumptions.

(l) *Financial instruments:*

Carrying amounts of certain of the Company's financial instruments, including cash and cash equivalents, accounts receivable, auction proceeds payable, accounts payable and accrued liabilities and short-term debt, approximate their fair value due to their short maturities. Based on borrowing rates currently available to the Company for loans with similar terms, the carrying value of its bank term loans approximates fair value.

(m) *Credit risk:*

The Company does not extend credit to purchasers of auctioned items. Equipment is not normally released to the purchasers until it is paid for in full.

(n) *Net income per share:*

Net income per share has been calculated based on the weighted average number of common shares outstanding. Diluted net income per share has been calculated after giving effect to the outstanding options and warrants.

(o) *Stock-based compensation:*

The Company has a stock-based compensation plan, which is described in note 6(e). No compensation expense is recognized for this plan when stock or stock options are issued to employees. Any consideration paid by employees on exercise of stock options or purchase of stock is credited to share capital. If stock or stock options are repurchased from employees, the excess of the consideration paid over the carrying amount of the stock or stock option cancelled is charged to retained earnings.

(p) *Comparative figures:*

Certain comparative figures have been reclassified to conform with the presentation adopted in the current year.

2. Capital assets:

December 31, 2000	Cost	Accumulated depreciation	Net book value
Land and buildings under development	\$ 13,854	\$ —	\$ 13,854
Land and improvements	62,291	1,755	60,536
Buildings	58,639	5,011	53,628
Automotive equipment	7,821	2,839	4,982
Computer equipment	2,942	1,531	1,411
Computer software	2,261	621	1,640
Yard equipment	4,317	1,802	2,515
Office equipment	3,421	1,685	1,736
Leasehold improvements	520	201	319
	<u>\$ 156,066</u>	<u>\$ 15,445</u>	<u>\$ 140,621</u>

December 31, 1999	Cost	Accumulated depreciation	Net book value
Land and buildings under development	\$ 12,764	\$ —	\$ 12,764
Land and improvements	48,723	1,426	47,297
Buildings	43,808	3,535	40,273

Computer software	525	185	340
Yard equipment	3,474	1,391	2,083
Office equipment	2,999	1,329	1,670
Leasehold improvements	380	118	262
	<u>\$ 121,798</u>	<u>\$ 11,339</u>	<u>\$ 110,459</u>

During the year, interest of \$1,141,007 (1999 - \$918,581) was capitalized to cost of the buildings.

3. Goodwill:

	2000	1999
Goodwill	\$ 33,003	\$ 33,003
Accumulated amortization	2,887	1,236
	<u>\$ 30,116</u>	<u>\$ 31,767</u>

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Tabular dollar amounts expressed in thousands of United States Dollars)

Years ended December 31, 2000, 1999 and 1998

4. Short-term debt:

Short-term debt consists of a draw on lines of credit in the amounts of AUD \$1,900,000 and \$1,000,000 with a weighted average interest rate of 8.35%.

5. Bank term loans:

	2000	1999
Term loan of NLG 9.6 million, secured by deeds of trust on specific property, bearing interest at the Amsterdam Interbank Offered Rate plus 7/8%, due in quarterly instalments of NLG 125,000 including interest, with the final payment occurring in 2013	\$ 3,890	\$ 4,395
Term loan, unsecured, with \$25 million bearing interest at 7.21% and \$10 million bearing interest at 7.10%, due in minimum annual instalments of \$5 million (\$1.75 million towards principal, \$3.25 million towards a sinking fund), with the final payment occurring in 2004	33,250	35,000
Term loan of AUD \$2.7 million, secured by deeds of trust on specific property, with \$1.7 million bearing interest at 6.5% and \$1 million bearing interest at the Australian prime rate, due in quarterly instalments of AUD \$75,000, including interest, with final payment occurring in 2010	1,321	1,758
Term loan, unsecured, of \$5 million bearing interest at 7.81%, due in minimum annual instalments of \$250,000, with final payment occurring in 2005	5,000	—
Term loan, unsecured, of \$5 million bearing interest at 7.91%, due in minimum annual instalments of \$250,000, with final payment occurring in 2005	5,000	—
Term loan, unsecured, of \$5 million bearing interest at 7.91%, due in minimum annual instalments of \$714,300 (\$250,000 towards principal, \$464,300 towards a sinking fund), with the final payment occurring in 2005	5,000	—
Term loan, unsecured, of \$5 million bearing interest at 7.15%, due in minimum annual instalments of \$714,300 (\$250,000 towards principal, \$464,300 towards a sinking fund), with the final payment occurring in 2006	5,000	—
Term loan, unsecured, of CAD \$10 million bearing interest at 7.195%, due in monthly instalments of interest only, with the full amount of the principal due in December, 2004	6,669	—
	65,130	41,153
Current portion	7,309	5,425
	<u>\$ 57,821</u>	<u>\$ 35,728</u>

As at December 31, 2000, principal repayments including sinking fund requirements are as follows for the next five years:

2001	\$ 7,309
2002	7,309
2003	7,309
2004	27,227
2005	11,237
Thereafter	4,739
	<u>\$ 65,130</u>

6. Share capital:

(a) Authorized:

Unlimited number of common shares, without par value
 Unlimited number of senior preferred shares, without par value, issuable in series
 Unlimited number of junior preferred shares, without par value, issuable in series

(b) Issued:

Issued and outstanding, December 31, 1997	13,213,666
Number of common shares issued during the year ended December 31, 1998:	
Pursuant to an equity offering	3,335,000
Issued and outstanding, December 31, 1998	16,548,666
Number of common shares issued during the year ended December 31, 1999:	
For cash, pursuant to stock options exercised	34,598
Employee share compensation (note 6(e))	50,000
Pursuant to acquisition of goodwill (note 6(f))	100,000
Issued and outstanding, December 31, 1999	16,733,264
Number of common shares issued during the year ended December 31, 2000:	
For cash, pursuant to stock options exercised	15,299
Issued and outstanding, December 31, 2000	<u>16,748,563</u>

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Tabular dollar amounts expressed in thousands of United States Dollars)

Years ended December 31, 2000, 1999 and 1998

6. Share capital (continued):

(c) Options:

The Company has a stock option plan which provides for the award of stock options to selected employees, directors and officers of the Company and to other persons approved by the Board of Directors. At December 31, 2000, there were 1,162,667 (1999 – 1,240,667) shares authorized for grants of options under the stock option plan. Stock option activity for 1998, 1999 and 2000 is presented below:

	Number of options outstanding	Weighted average exercise price
Outstanding, December 31, 1997	196,333	\$ 0.10
Granted	36,000	26.12
Cancelled	(25,333)	0.10
Outstanding, December 31, 1998	207,000	\$ 4.67
Granted	27,000	31.23
Cancelled	(4,166)	0.10
Exercised	(34,598)	0.10
Outstanding, December 31, 1999	195,236	9.20
Granted	78,000	26.66
Cancelled	(16,301)	5.00
Exercised	(15,299)	0.10
Outstanding, December 31, 2000	241,636	\$ 15.70
Exercisable, December 31, 2000	163,636	\$ 9.89

The options outstanding at December 31, 2000 expire on dates ranging to April 26, 2010.

The following is a summary of stock options outstanding and exercisable at December 31, 2000.

Range of exercise prices	Number Outstanding	Options outstanding		Options exercisable	
		Weighted average remaining life (years)	Weighted average exercise price	Number exercisable	Weighted average exercise price
\$0.10	103,636	3.58	\$ 0.10	103,636	\$ 0.10
\$26.12 - \$38.625	138,000	7.56	\$ 27.41	60,000	\$ 26.79
	241,636			163,636	

With respect to the options granted in 1999 and 2000, the current market price did not exceed the exercise price at the grant date, therefore, no compensation expense has been recorded.

(d) Warrants:

	2000	1999
Warrants outstanding (note 6(f))	400,000	400,000

(e) Employee share compensation:

During 1999, the Company issued 50,000 common shares to an employee. The transaction was recorded at the market value of the common shares on the issuance date of \$26.88 per share. Compensation expense of \$1,344,000 has been recorded for this issuance.

(f) Acquisition of goodwill:

During 1999, the Company acquired non-identifiable intangible assets related to an auction business through the payment of \$25 million cash and the issuance of 100,000 common shares and 400,000 warrants to acquire common shares of the Company. The warrants are fully vested and have an exercise price of \$26.69 per share and expire on April 1, 2001. The shares have been valued using the market price of \$30.55 per share and the warrants have been valued at \$4,332,000 using an option pricing model.

7. Segmented information:

The Company's principal business activities include the sale of consignment and self-owned equipment at auctions. This business represents a single operating segment.

Summarized information on the Company's activities generated by geographic segment are as follows:

	United States	Canada	Other	Combined
Year ended December 31, 2000:				
Auction revenues	\$ 66,425	\$ 18,517	\$ 21,183	\$ 106,125
Capital assets and goodwill	109,376	30,005	31,356	170,737
Year ended December 31, 1999:				
Auction revenues	64,766	17,110	22,748	104,624
Capital assets and goodwill	94,662	17,463	30,101	142,226
Year ended December 31, 1998:				
Auction revenues	49,747	16,105	29,047	94,899
Capital assets	31,529	9,203	20,592	61,324

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Tabular dollar amounts expressed in thousands of United States Dollars)

Years ended December 31, 2000, 1999 and 1998

8. Income taxes:

Income tax expense differs from that determined by applying the United States statutory tax rates to the Company's results of operations as follows:

	2000	1999	1998
Statutory tax rates in the United States	39%	39%	39%
Expected income tax expense	\$ 9,890	\$ 13,155	\$ 15,017
Differences:			
Different tax rates in non-U.S. jurisdictions	(2,052)	(1,289)	(2,028)
Other	317	(414)	681
Actual income tax expense	\$ 8,155	\$ 11,452	\$ 13,670
Future income tax assets and liabilities are as follows:			
		2000	1999
Future income tax assets:			
Tax deductible benefit of options granted		\$ 579	\$ 652
Tax deductible financing costs incurred in the course of the Company's initial public offering in March 1998		880	1,305
Unused tax losses, expiring on December 31, 2004 to 2007		1,327	543
Accounts payable		-	20
Total future income tax assets		2,786	2,520
Less valuation allowance		(458)	-
Net future income tax assets		2,328	2,520
Future income tax liabilities arising from temporary differences between the tax basis of net assets and their carrying value:			
Capital assets		(211)	(441)
Goodwill		(376)	(162)
Total future income tax liabilities		(587)	(603)
		\$ 1,741	\$ 1,917

9. United States generally accepted accounting principles:

The consolidated financial statements are prepared in accordance with generally accepted accounting principles ("GAAP") in Canada which differ, in certain respects, from accounting practices generally accepted in the United States and from requirements promulgated by the Securities and Exchange Commission. Material measurement differences to these consolidated financial statements are as follows:

Consolidated statements of net income per share:

	2000	1999	1998
Net income per share in accordance with United States GAAP:			
Basic	\$ 1.03	\$ 1.34	\$ 1.56
Diluted	1.02	1.32	1.54

Consolidated statements of comprehensive net income:

	2000	1999	1998
Net income in accordance with Canadian GAAP	\$ 17,205	\$ 22,280	\$ 24,834
Effect of differences in accounting for reorganization costs (note 9(a))	-	-	(20)
Net income in accordance with United States GAAP	17,205	22,280	24,814
Other comprehensive loss (note 9(b)):			
Foreign currency translation adjustment	(2,838)	(791)	(210)
Comprehensive income in accordance with United States GAAP	\$ 14,367	\$ 21,489	\$ 24,604

(a) Reorganization costs

In accordance with generally accepted accounting principles in Canada, costs incurred with respect to a reorganization undertaken by the Company were charged, net of tax, against equity. Under generally accepted accounting principles in the United States, such amounts are required to be charged against income.

(b) Other comprehensive loss

Comprehensive loss includes the change in equity or net assets of the Company during the period from non-owner sources, including foreign exchange adjustments, and reflected as a separate component of shareholders' equity.

Number of permanent auction sites (end of year)	20	17	13	13	13	12	11

Note: Information for periods prior to 1998 has been omitted if it is not meaningful for comparative purposes. See Management's Discussion and Analysis of Financial Condition and Results of Operations.

- (1) Diluted net income per share has been calculated in accordance with United States GAAP.
- (2) Other income in 1998 includes \$1.8 million of non-recurring income.
- (3) 1998 net income per share is not comparable to 1999 net income per share because the average number of shares outstanding changed significantly between the two periods due to the impact of the Company's initial public offering in March 1998.

SUPPLEMENTAL QUARTERLY DATA

(Unaudited; tabular dollar amounts expressed in thousands of United States Dollars, except per share data)

2000	Gross	Auction	Net	Net Income Per Share		Closing Stock Price
	Auction Sales	Revenue	Income	Basic	Diluted(1)	
1st quarter	\$ 289,928	\$ 26,769	\$ 3,609	\$ 0.22	\$ 0.21	\$ 25.50
2nd quarter	353,354	29,570	6,109	0.36	0.36	23.94
3rd quarter	231,550	21,554	1,503	0.09	0.09	21.38
4th quarter	358,142	28,232	5,984	0.36	0.36	20.75
	\$ 1,232,974	\$ 106,125	\$ 17,205	\$ 1.03	\$ 1.02	

1999	Gross	Auction	Net	Net Income Per Share		Closing Stock Price
	Auction Sales	Revenue	Income	Basic	Diluted(1)	
1st quarter	\$ 201,764	\$ 18,013	\$ 1,632	\$ 0.10	\$ 0.10	\$ 33.69
2nd quarter	387,288	35,589	10,471	0.63	0.62	38.13
3rd quarter	219,024	20,699	2,146	0.13	0.13	38.00
4th quarter	362,453	30,323	8,031	0.48	0.47	27.75
	\$ 1,170,529	\$ 104,624	\$ 22,280	\$ 1.34	\$ 1.32	

1998	Gross	Auction	Net	Net Income Per Share		Closing Stock Price
	Auction Sales	Revenue	Income	Basic	Diluted(1)	
1st quarter	\$ 227,637	\$ 21,229	\$ 3,377	\$ 0.24	\$ 0.24	\$ 24.06
2nd quarter	339,219	29,188	8,492	0.51	0.51	26.56
3rd quarter(2)	183,633	13,869	2,004	0.12	0.12	22.13
4th quarter	337,311	30,613	10,961	0.66	0.65	26.94
	\$ 1,087,800	\$ 94,899	\$ 24,834	\$ 1.56(3)	\$ 1.54(3)	

- (1) Diluted net income per share has been calculated in accordance with United States GAAP.
- (2) Net income for the third quarter of 1998 includes non-recurring income of \$1.2 million or \$0.07 per share.
- (3) 1998 net income per share on a full year basis does not equal the sum of the quarterly amounts because the number of shares outstanding changed significantly in March 1998 when the company completed its initial public offering.
