# annual report of the directors of the british columbia power corporation for the year ending december 31, 1946

The 1945 annual report referred to the Companies' \$50,000,000 programme for the betterment and extension of properties and services. Delays in deliveries of materials and equipment, caused by strikes in the country's basic industries, hampered the progress of the programme in 1946. Nevertheless, a substantial beginning has been made, as will be seen by comparing the capital expenditures, amounting to \$9,155,330, in 1946 with the corresponding expenditures of \$2,420,383 in

1945. The solid progress that has been made on various major projects is shown by the photographs at the middle of this report.

The prospects are good for carrying out a substantially increased instalment of the Companies' development programme in 1947.

During 1946, also, an important bond refunding was successfully undertaken, which took advantage of lower interest rates and the reduced cost of retiring sterling issues.

## results of operations

The earnings on the "A" shares were \$1,987,917, which represents \$1.99 per share as compared with \$1,525,490 or \$1.52 per share in 1945. Dividend payments during 1946 were at the rate of \$1.60 per share.

#### Gross Revenues

The gross revenues from operations for the year amounted to \$30,344,589, an increase of \$3,552,212, or 13.3 per cent, over 1945. The various services contributed as follows:

	1945	1946
Electric	\$11,500,152	\$13,376,919
Railway—Passenger and Freight	10,869,934	11,638,514
Stages, Taxis and Motor		2,349,446
Gas	2,392,907	2,590,786
Miscellaneous	375,951	388,924
Total	\$26,792,377	\$30,344,589

The corresponding figures for the volume of services rendered are as follows:

	1945	1946
Kilowatt Hours	743,051,415	794,075,011
Passengers—		
Railway	144,376,774	156,091,301
Stages and Taxis	3,723,590	5,410,758
Railway Freight		
Tonnage	833,017	786,099
Cubic Feet of Gas	2,494,695,000	2,740,622,000

The comparison of Electric service gross revenues should allow for the "free billing" ordered by the Public Utilities Commission of British Columbia in the year 1945. This matter is referred to again under the heading of Rates. In the Railway passenger service the comparison between the two years should take into account the 10-day strike which occurred in January, 1945. The sharp increase in stage revenues reflects the opening of new routes and the increasing of service on existing

## source and disposition of 1946 revenue

THE YEAR'S GROSS REVENUES		100%	\$30,970,121
EMPLOYEES' SALARIES, WAGES, PENSIONS, Etc.		43%	\$13,237,462
MATERIALS & SERVICES PURCHASED		22%	6,695,683
WEAR & EXHAUSTION OF PROPERTY		10%	3,023,660
REQUIRED FOR GOVERNMENT		11%	3,547,696
- INTEREST ON BONDS, Etc., OF 4.12%		6%	1,886,827
DIVIDENDS ON PREFERRED STOCKS - AV. RATE 4.93%		2%	590,876
DIVIDENDS ON COMMON STOCK, RATE \$1.60 PER SHARE		5%	1,600,000
RETAINED FOR EXPANSION OF SERVICES AND IMPROVEMENTS	1	1%	387,917

lines made possible by the removal of wartime restrictions on interurban travel and the placing in service of new equipment delivered in 1946. The freight revenues were maintained despite lower tonnage; the loss in lumber traffic, which again moves by water from the coast, was virtually offset by an increased westbound movement of diversified commodities on which the rates are higher. In the Gas service the increase resulted from natural growth coupled with the coldest winter in many years; the completion of new manufacturing capacity was delayed beyond the end of 1946 by strikes in the steel industry, but ingenious improvisations and the tireless efforts of the members of the gas workers' union were successful in meeting the increased demands.

In September, 1946 the Companies announced their final withdrawal from the direct sale of gas and electric appliances, leaving this field completely to retail appliance dealers. This withdrawal was accompanied by increased activities to strengthen the dealers' organizations, in the form of training courses for their salesmen and business management courses for the dealers.

#### Rates

In the years 1943, 1944 and 1945 the Public Utilities Commission of British Columbia ordered that electrical energy be supplied for a period without charge to domestic users and other specified classes of consumers. This was recognized by the Commission to be a wartime device suitable for a time when taxation made the usual processes of regulation impossible. No such order, therefore, was made in 1946.

During that year the Companies decided, in respect of domestic consumers, to discontinue taking security deposits and to refund those on hand. Approximately 50,000 customers are affected and the refunding should be completed during the current year.

The study of rate structures, referred to in last year's report, has now reached the stage where it is expected that the experts of the Public Utilities Commission will, later in the year, be able to begin their investigation of the study, which step will precede the formal review of the Companies' rates by the Commission.

During 1946 the structure of street lighting contracts was simplified to a pattern of four basic contracts in place of the previous multitude which had been for varying terms with varying methods of calculating charges. The new contracts distinguish only urban areas, where there are two rates, and suburban and rural areas, and provide reduced rates of a promotional character to encourage higher wattage and better illumination.

#### Operating Expenses

The total cost of operation amounted to \$26,-504,501, an increase of \$3,386,359, or 14.6 per cent, over 1945.

The largest single item in this increase was wage costs, resulting from the fact that all union agreements were renegotiated during 1946. . . . Maintenance costs in the railway operations have continued to increase, as the delays in deliveries of new equipment necessitated keeping old equipment in service. . . . Cost of coal for the gas operations was again on a mounting scale, and the operating costs of this service were further increased by the emergency measures which had to be taken when

the completion of the new manufacturing capacity was delayed.

The amount provided for depreciation in 1946 is, as in former years, based on the allowances authorized by the Public Utilities Commission of British Columbia. That Commission has completed its investigation of the Companies' operating results, as reported to it, to the end of the year 1945.

On the accounting treatment of operating practices, including depreciation accounting, the broad policies followed by the Companies have been directed and approved by the Public Utilities Commission. The Company's returns for taxes on income have not yet been reviewed by the taxation authorities for the years subsequent to 1939 and those of some important subsidiary companies have not yet been reviewed for the years subsequent to 1940. Provision for taxes on income has been made by the Companies on the basis of the operating results as stated in the annual accounts, and the reserves for taxes on income carried in the attached Consolidated Balance Sheet reflect this position.

## transportation franchises

A new exclusive franchise agreement, permitting the operation of trolley coaches and motor buses as well as street cars, was signed with the City of Vancouver at the end of the year; it awaits formal ratification by the Provincial Legislature. . . . An exclusive franchise agreement was signed with the City and District of North Vancouver, providing for a bus operation to replace the existing street railway. The enabling by-law was carried in September by a large majority. . . . An exclusive bus franchise agreement was signed with the Municipality of Richmond, and the enabling by-law was similarly carried in September by a large majority. . . . Each of the above agreements is for a period of twenty years and confers upon the municipality

the right, exercisable at the end of any five-year period, to purchase at a fair price the transportation system within its boundaries. . . . An agreement for an exclusive bus franchise reached with the Council of the Municipality of Burnaby, where no such franchise had previously been held, failed to receive the necessary majority when the by-law was put to the voters. . . Negotiations with the four municipalities comprising Greater Victoria, for an exclusive transportation franchise providing for unified operation, were carried to the point of acceptance of the agreement by the respective Councils. The by-laws failed to receive the necessary majorities, but the Companies have been approached to resume negotiations.

## plant additions, property programmes

888,940

The net additions to property account for the year totalled \$9,155,330, as compared with \$2,420,383 in 1945. The following table shows the major expenditures on the larger projects:

Electric Extensions-Mainland and Van-

couver Island

To connect 11,724 additional customers \$2,135,864

Gas Extensions—Mainland and Vancouver Island

Buses-Mainland and Vancouver Island

52 units

To connect 1,399 additional customers 332,506
Bridge River Power Development 1,526,107
City Substation—Vancouver 782,539
Carburetted Water Gas Plants
Vancouver 340,721
Victoria 189,567

Work on the Bridge River project was undertaken last June as scheduled, and satisfactory progress has been made on the construction of the diversion dam, and on preparation of foundations for the transmission line towers. Efforts are being made to have the first unit completed to permit delivery of electrical energy into the Lower Mainland system by the Fall of 1948 instead of in 1949 as previously planned. . . . A start has been made on the new distribution system for the Fraser Valley, and construction of new substations to serve

as sources for the new system is about to begin.

... It is expected that the new carburetted water gas plant at Vancouver will be completed in July, 1947; the corresponding plant at Victoria was completed and went into operation February 21, 1947.... 254 free wheeling transportation vehicles comprising 42 trolley coaches and 212 motor buses are scheduled to arrive in 1947.... Towards the close of the year construction was begun on a new bus terminal at Larwill Park in downtown Vancouver. Its completion will bring great benefit to the stage and bus services as well as to other vehicles using the city streets.

During the year several important steps were taken for the purpose of simplifying the operations and confining them to our basic areas and services. One example has already been referred to, namely, the withdrawal from the direct sale of gas and electric appliances. An important example was the disposal to the B. C. Power Commission of outlying electrical properties at Kamloops and in the central portion of Vancouver Island, which are our only properties completely separated from the main systems. This disposal, which took the form of an expropriation as required by the Electric Power Act under which B. C. Power Commission operates, was worked out in co-operation with the Commission, and the properties and operations were taken over as of January 1, 1947. A third example was the sale of our investment in coffee shops and news-stands to concessionnaires who pay rentals for the right to operate.

## power supply

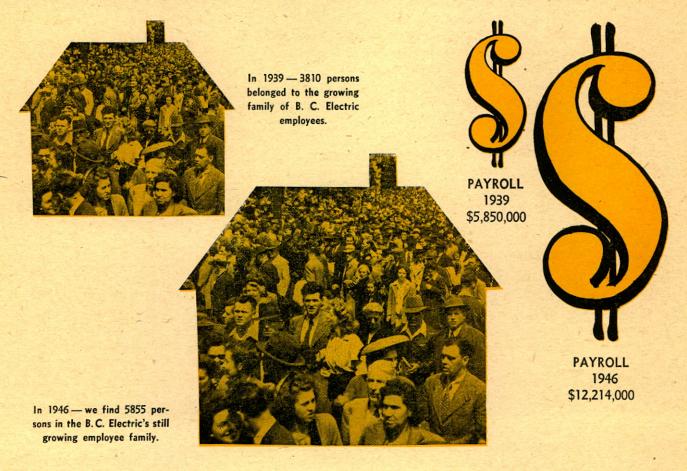

Total kilowatt-hours generated and purchased for the whole system increased by 6.1 per cent over 1945, but peak loads show an even higher rate of increase. On the Lower Mainland system the maximum one-hour peak load was 12.4 per cent higher than in 1945.

While a contract has been signed in 1945 with the Bonneville Power Administration, calling for the delivery of 22,000 kilowatts of firm power in the early Autumn of 1946, delays in deliveries of equipment caused by unsettled conditions in the electrical manufacturing industry left the interconnection, by which this power is to be delivered, uncompleted at the year-end. The Bonneville interconnection is now scheduled for completion in June, 1947.

## financing

To take advantage of the lower interest rates available and of the reduced cost of sterling the 4 per cent and 4½ per cent First Refunding and Collateral Trust Bonds of B. C. Power Corporation, outstanding to the amount of \$25,010,000, and the 4½ per cent Perpetual Guaranteed Debenture Stock of Vancouver Power Company, outstanding to the amount of £1,500,000, were called towards the year-end for redemption early in 1947. To finance the redemption \$33,000,000 First Mort-

gage Bonds, 3½ per cent Series "A" of British Columbia Electric Company Limited (the renamed British Columbia Electric Power & Gas Company Limited), were issued on January 2, 1947. This refinancing brings the system a significant saving in interest costs at a time when it is facing vast increases in its costs of operation. The new bonds are issued under a trust deed with flexible provisions for permitting its use as a continuing vehicle in financing the Companies' expansion.

## litigation

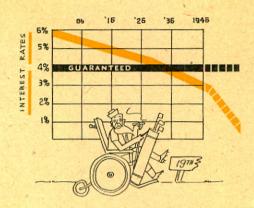

Reference has been made in the annual reports for a number of years to an action by the Crown against British Columbia Electric Railway Company, Limited, to recover tax (and interest thereon) which the Federal authorities claimed should have been withheld from dividends paid to non-resident holders of the 5 per cent Cumulative Perpetual Preference Stock of that Company. At the date of the last Annual Report the Company was

seeking leave of the Privy Council to appeal to it. On July 31, 1946, the Privy Council rendered a decision favourable to the Crown, leaving for ascertainment the amount to which the Crown was entitled. The claim has been settled for an amount of \$185,000, and the disposal of this lengthy litigation is reflected on the attached Consolidated Statement of Income and Surplus Earned.

## employee relations

During 1946 negotiations were opened with each of the five unions and one association representing the employees, and in each case new agreements were concluded. The increased payrolls and salary rolls resulting from these agreements have already been referred to. What remains to note here is that, in a year of extreme labour unrest in this country, the new agreements were concluded without strikes or threats of strikes, and that the negotiations have resulted in improved labour relations.

A contributory pension plan, underwritten by the Dominion Government Annuities Branch, was offered to all employees, and, of those having at least three years' service and being twenty-one or more years of age, and thereby being eligible, more than 95 per cent have, to date, enrolled. The plan provides for larger pensions for future service than those provided by the Companies' former non-contributory plan, and, unlike the former plan, is guaranteed as to amount and conditions by the Dominion Government.

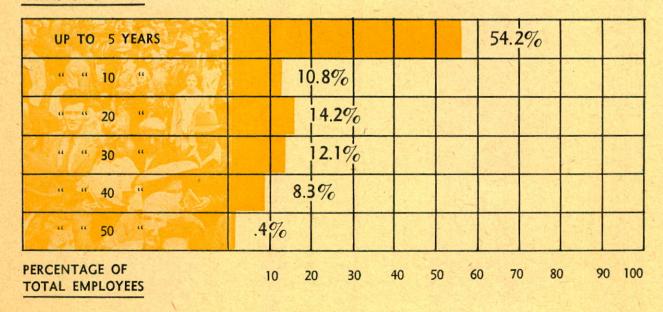

In the negotiations with two unions, representing slightly more than half the total of employees, a contributory welfare plan was agreed to. This covers medical and surgical expenses, hospitalization, and a weekly indemnity of \$20 payable from the first day of accident incurred away from work or the eighth day of sickness.

## management and direction

At the Annual Meeting of the Shareholders in April, 1946, Mr. W. G. Murrin, who had been President of the British Columbia Power Corporation since 1929, announced his decision to retire as President. The Directors wish to record their appreciation of the valuable contribution which Mr. Murrin made to the Company during his long association with it. In particular, he piloted the

#### YEARS OF SERVICE

Company safely through the very difficult periods of the depression and the war. The best wishes of the Directors go to Mr. Murrin in his well-earned retirement from the Presidency. Mr. A. E. Grauer, formerly Executive Vice-President, was elected President to succeed Mr. Murrin. In May, 1946, Mr. T. M. Moran was appointed a Vice-President.

## personnel

During the year Mr. V. Laursen retired as General Solicitor of the British Columbia Electric Railway Company after thirty-seven years' service. The year also saw the retirement of Mr. M. B. Barwick, Revenue Accountant; Mr. A. C. Eddy, Chief Engineer, Maintenance of Way; Mr. W. Gordon, Purchasing Agent; Mr. A. D. King, Solicitor, Vancouver Island Division; Mr. B. de M. Mertens, Superintendent of Substation Operations; Mr. A. Richardson, Purchasing Agent, Vancouver Island Division; Mr. J. H. Wharmby, Gas Distribution Superintendent; these had given good service to the organization over a long period. The Directors also wish to record their appreciation of the long

and faithful service of the many other employees who retired on pension during the year.

Several important appointments were made in the British Columbia Electric Railway Company during the year. Mr. T. M. Moran was appointed Vice-President and Assistant to the President; Mr. A. B. Robertson was appointed General Solicitor; Mr. L. B. Jack was made General Secretary; Mr. Harold Merilees was appointed to the new position of Public Information Manager.

The Directors desire to record their appreciation of the loyal and energetic manner in which all members of the organization have carried out their responsibilities during a difficult operating year.

## the b.c. electric and the community

The B. C. Electric provides numerous free services to make domestic life more comfortable and to improve the agricultural and industrial strength of the community. The following are examples: professional advice on agricultural methods given by graduate farm economists . . . advice on recipes, kitchen planning and other phases of homemaking . . . advisory service on residential and commercial lighting . . . window displays for community projects . . . research advisory service for industries to provide information on new processes

developed elsewhere and to provide solutions for production problems.

1947 is the Jubilee Year of the B. C. Electric. It was founded in 1897, although the history of some of its predecessors goes back much further. Its life and those of the communities it serves had almost equally early beginnings. These communities constitute the fastest growing part of this country, and the B. C. Electric enters 1947 with accomplishments and projects to match, anticipate, and encourage the growth and expansion of the areas it serves.

## financial statements

A consolidated balance sheet and statement of income and earned surplus of British Columbia Power Corporation, Limited, and subsidiary companies with the report thereon of the auditors is attached. Since this report is to be mailed also

to the preferred shareholders of the British Columbia Electric Company Limited, there is included also a consolidated balance sheet of that Company and its subsidiaries.

Vancouver, B. C. March 27, 1947. A. E. GRAUER, President.

#### BRITISH COLUMBIA POWER CORPORATION, LIMITED

AND SUBSIDIARY COMPANIES

#### NOTES TO CONSOLIDATED BALANCE SHEET AS AT DECEMBER 31, 1946

Note (1)-Employees' Pension Fund:

In each of the years 1943 to 1945 inclusive, the companies made annual payments to The Royal Trust Company, as trustee, for the purpose of establishing a fund on an actuarial basis to provide for pension payments. The amount of \$3,176,671 recorded in the attached balance sheet is the sum of these payments, together with interest earned on investments made by the trustee, less a proportion of payments to pensioners.

The companies made no payments to The Royal Trust Company in 1946, but entered into a contract with the Dominion Government Annuities Branch as of October 1, 1946, for a contributory pension plan, and made payments thereto of \$735,498 in respect of employees' services in past years. It is the intention of the companies to make further substantial payments over a period of years in respect of such services. In addition, the companies made or provided for payments totalling \$487,396 to the Annuities Branch in respect of services rendered by employees during 1946.

Note (2)-Property Account:

The properties comprising lands, franchises, water rights, plants for the generation, transmission and distribution of electric energy and gas, electric railways, motor coaches and buses, etc., are included at cost to the subsidiary companies (which includes discount on bonds of \$728,671 charged to construction accounts), plus the excess of the cost of acquiring the shares of such companies over the net book values of such shares at date of acquisition (including an amount of \$631,721 added under this category to the consolidated property account in 1946); in addition, there is recorded in the property account on the consolidated balance sheet and per contra stated as capital surplus, an amount of \$6,115,765, which represents the surpluses of subsidiaries as at the date of the acquisition of their capital stocks by British Columbia Power Corporation, Limited at May 19, 1928.

As part of the programme of simplifying the operations and confining them to distinct areas, the companies agreed to the disposal to the British Columbia Power Commission of outlying electrical properties at Kamloops and in the central portion of Vancouver Island, which are the only properties completely separated from the main systems. This disposal, which took the form of an expropriation as required by the Electric Power Act under which the Brifish Columbia Power Commission operates, was worked out in co-operation with the Commission and the

properties and operations were taken over as of January 1, 1947. As the selling price of the properties has not yet been determined, the transaction is not reflected in the accompanying financial statements.

A valuation for rate-making purposes was made by the Public Utilities Commission of British Columbia as at June 30, 1939, and this, when brought up to date, amounted at December 31, 1946, to approximately \$129,340,000; to this should be added the book value of properties outside the Commission's jurisdiction and not so valued, amounting to \$3,835,000, making a total of approximately \$133,175,000 before providing for depreciation. The existing reserves for depreciation were found adequate for rate-making purposes by the Commission as at June 30, 1939, and such reserves when brought up to date (as well as the reserves applicable to properties not valued by such Commission) amounted at December 31, 1946, to \$43,119,705. The foregoing amounts represent the valuation for rate-making purposes and neither they nor the amounts at which properties are carried in this balance sheet purport to represent present realizable or replacement value. Subsequent to June 30, 1939, the provisions for depreciation recorded in the accounts have been based on the gross property valuation made by the Public Utilities Commission.

An appraisal of the properties made by Stone & Webster Engineering Corporation of Boston, Massachusetts, as of December 31, 1936, shows a total replacement cost as at that date (after a deduction for existing physical depreciation) of \$131,802,312. This foregoing total includes an amount of \$15,000,000 for going concern value. The balance in the property account as at December 31, 1936, after deducting the reserve for depreciation, was \$113,739,799.

Note (3)-6% Cumulative Preference Shares of British Columbia Electric Company Limited:

The company has the right to redeem these shares at a premium of 5% at any time subject to the sanction of the Supreme Court of British Columbia.

Note (4)—Commitments:

As at December 31, 1946, subsidiaries of British Columbia Power Corporation, Limited had contracts and commitments for construction and other capital expenditures which aggregated approximately \$18,000,000, and covered deliveries in some cases running into two or more years.

#### AUDITORS' REPORT TO THE SHAREHOLDERS

We have examined the consolidated balance sheet of British Columbia Power Corporation, Limited and subsidiary companies as at December 31, 1946, and the consolidated statement of income and earned surplus for the year ended on that date, and we have obtained all the information and explanations which we required. Our examination was made in accordance with generally accepted auditing standards applicable in the circumstances, and included such tests of the accounting records and other supporting evidence and such other procedures as we considered necessary.

The Corporation's returns for income and excess profits taxes have been assessed up to and including the year 1939, and those of its important subsidiary companies up to and including the year 1940. The returns for the subsequent years have not yet been reviewed by the taxation authorities and the adequacy of the year's provision and that of the tax reserve shown in the consolidated balance sheet is subject to acceptance by the taxation authorities of the companies' returns and of the accounting policies on which they are based.

There is recorded in the property account on the consolidated balance sheet and per contra stated as capital surplus, an

amount of \$6,115,765, which represents the surpluses of subsidiaries as at the date of acquisition of their capital stocks by British Columbia Power Corporation, Limited on May 19, 1928.

Subject to the questions of income and excess profits taxes and of the accounting treatment accorded the surpluses of subsidiaries as at the date of their acquisition, referred to in the foregoing paragraphs, we report that, in our opinion, and according to the best of our information and the explanations given to us and as shown by the books of the companies, the accompanying consolidated balance sheet and related consolidated statement of income and earned surplus, supplemented by the notes appended thereto, are properly drawn up so as to exhibit a true and correct view of the financial position of the combanies as at December 31, 1946, and the results of the companies' operations for the year ended on that date, after giving effect to the financial transactions as set forth at the top of the said consolidated balance sheet.

PRICE, WATERHOUSE & Co.,

Chartered Accountants.

Vancouver, B. C., March 27, 1947.

Note: The explanatory notes supplementing the accompanying consolidated balance sheet of British Columbia Power Corporation, Limited and subsidiary companies as at December 31, 1946, apply equally to the relevant items in the above consolidated balance sheet.

#### BRITISH COLUMBIA ELECTRIC COMPANY LIMITED

AND SUBSIDIARY COMPANIES

Auditors' report to the Shareholders:

We have examined the consolidated balance sheet of British Columbia Electric Company Limited and subsidiary companies as at December 31, 1946, and have obtained all the information and explanations which we required. Our examination was made in accordance with generally accepted auditing standards applicable in the circumstances, and included such tests of the accounting records and other supporting evidence and such other procedures as we considered necessary.

The company's returns for income and excess profits taxes and those of its important subsidiary companies have been assessed up to and including the year 1940. The returns for the subsequent years have not yet been reviewed by the taxation authorities and the adequacy of the tax reserve shown on the consolidated balance sheet is subject to acceptance by the taxation authorities of the companies' returns and of the accounting policies on which they are based.

There is recorded in the property account on the consolidated balance sheet and per contra stated as capital surplus, an amount of \$6,115,765, which represents the surpluses of subsidiaries as at the date of acquisition of their capital stocks by British Columbia Power Corporation, Limited on May 19, 1928.

Subject to the questions of income and excess profits taxes and of the accounting treatment accorded the surpluses of subsidiaries as at the date of their acquisition, referred to in the foregoing paragraphs, we report that, in our opinion, and according to the best of our information and the explanations given to us and as shown by the books of the companies, the accompanying consolidated balance sheet, supplemented by the notes appended thereto, is properly drawn up so as to exhibit a true and correct view of the financial position of the combined companies as at December 31, 1946, after giving effect to the financial transactions as set forth at the top of the said consolidated balance sheet.

Vancouver, B. C., March 27, 1947.

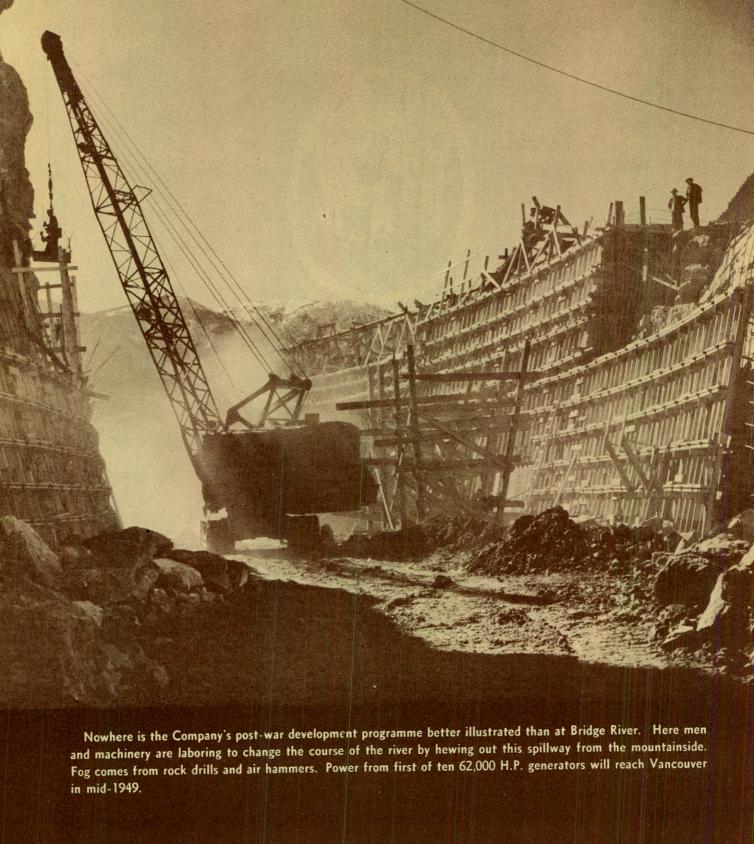

> PRICE, WATERHOUSE & Co., Chartered Accountants.

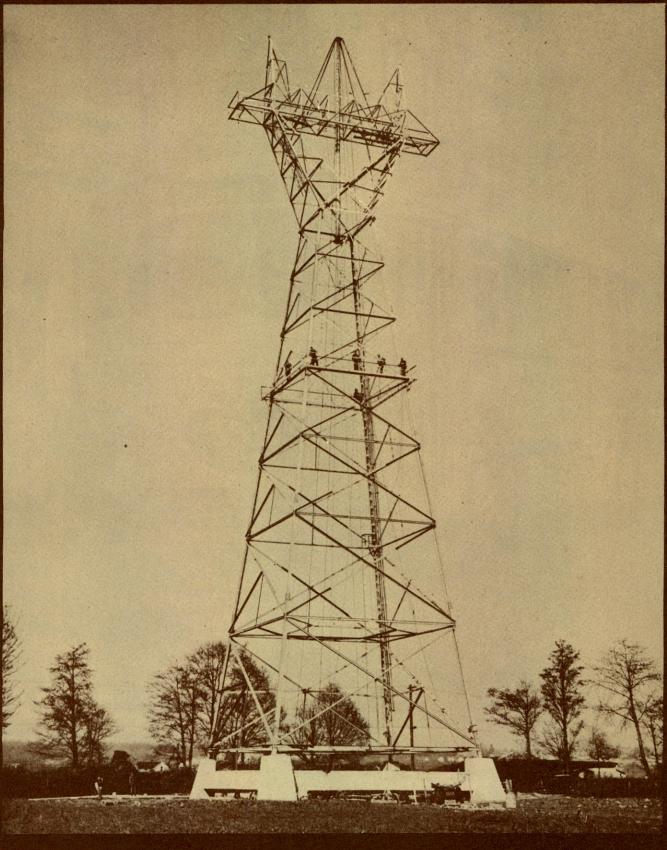

50th Year of Progress

progress
report on
construction

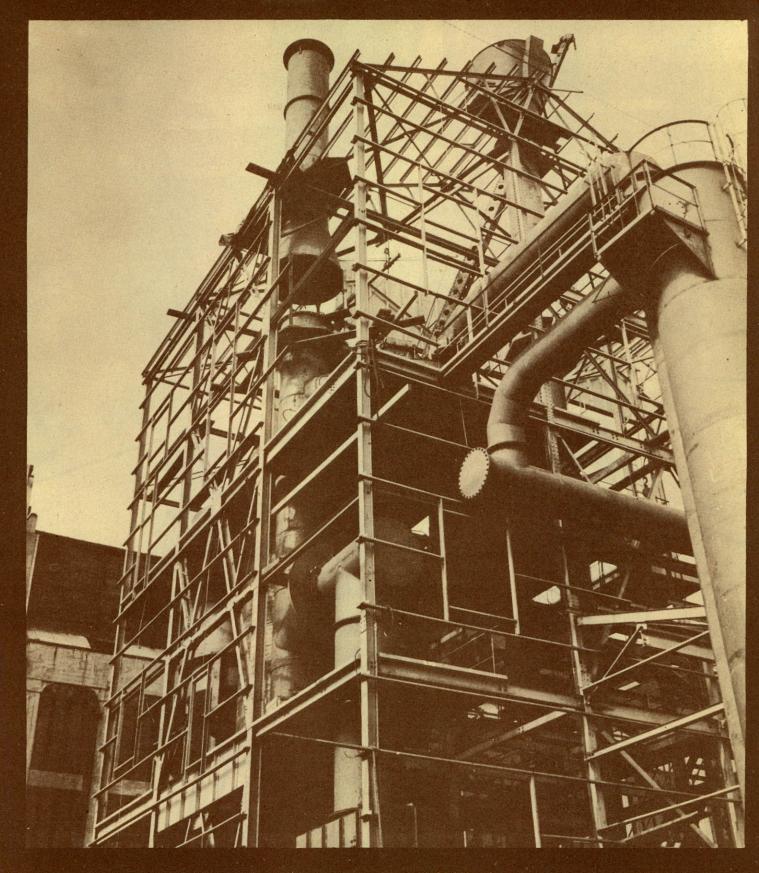

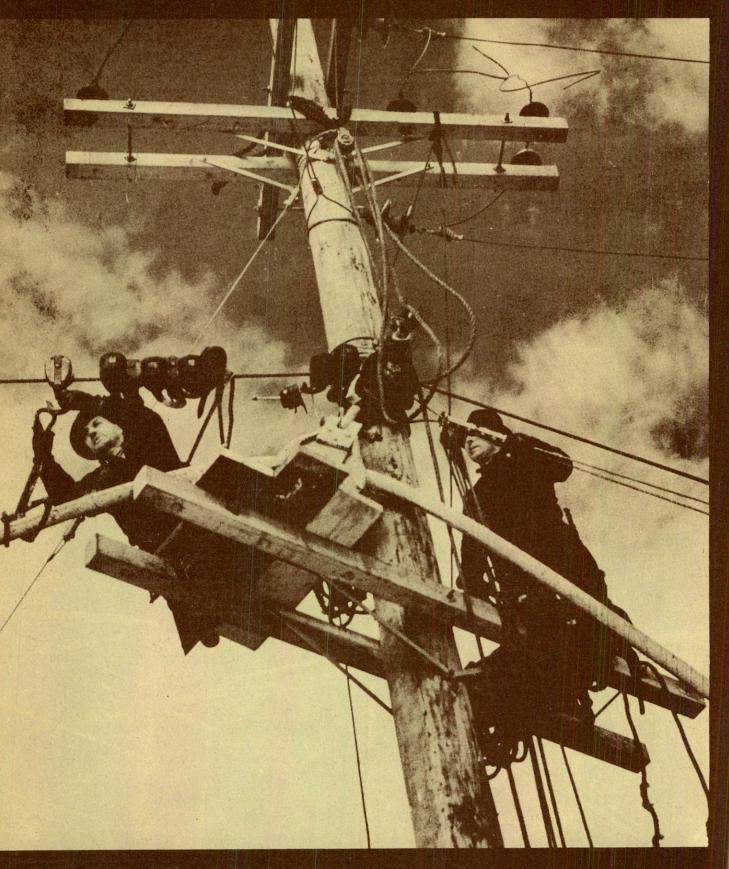

British Columbia's growing industrial strength is demonstrated by the building here of the steel towers for the Northwest Power Pool inter-connection and Bridge River transmission line. For the latter line 660 towers are required. This is the first time in history B. C. fabricators have tackled a job of this size.

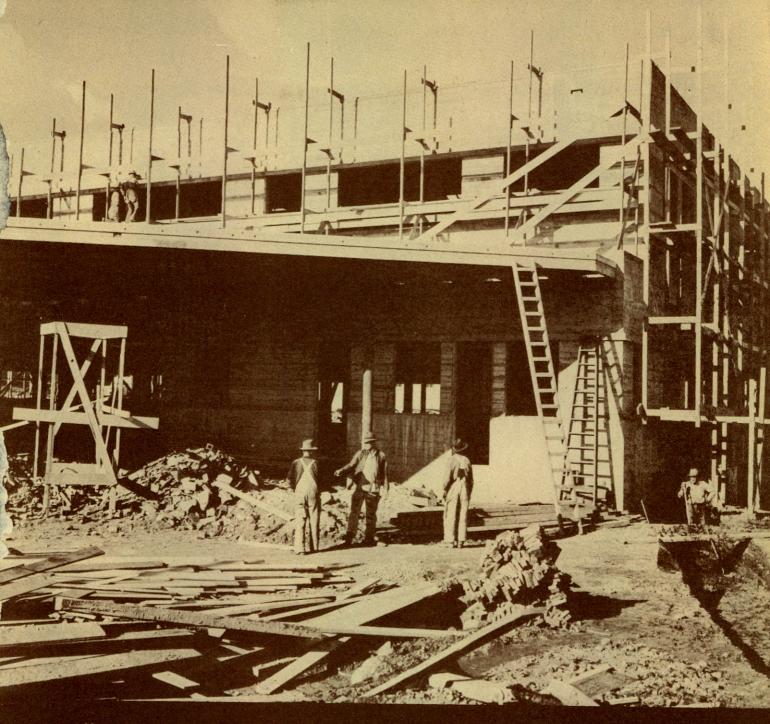

Fresh from the factory, the first bus to bear the Company's new color scheme—Rinaux cream set off by red thunderbird emblems—rolls down Hastings Street in Vancouver. Manufacturers have promised delivery of 254 buses this year, including 42 trolley coaches.

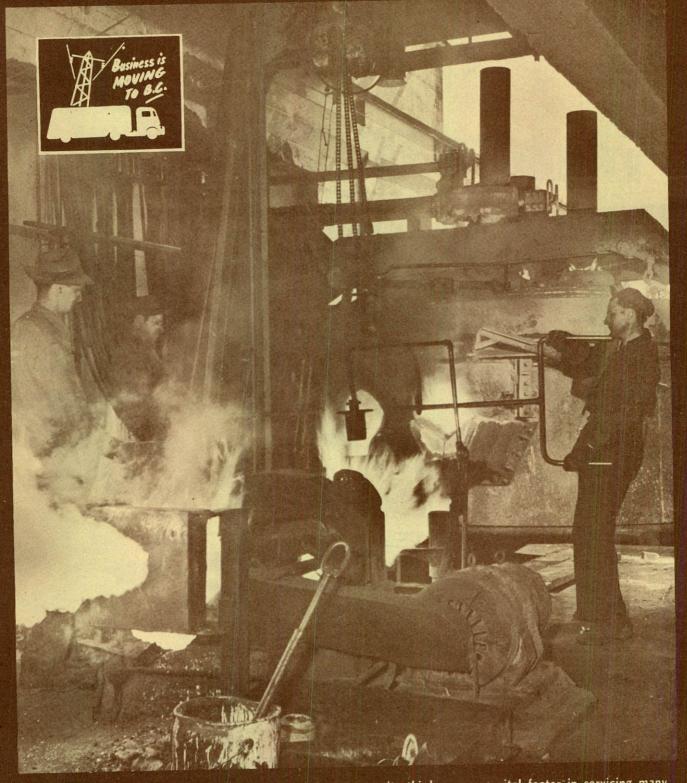

Work on the new Vancouver gas plant, which will turn out 4,500,000 cubic feet of gas daily, is rapidly nearing completion. Scheduled to open last November, project was delayed months owing to critical steel shortage. Company's gas programme also includes nearly 60 miles of new mains for Greater Vancouver. Plant of similar type to one shown above began operating in Victoria a few weeks ago.

Symbolic of the Company's drive to complete rural electrification in the Fraser Valley are these linemen working on a circuit near Abbotsford. Despite shortages of wire, transformers, line hardware, 3,705 customers were connected in 1946, up nearly 2,000 from 1945. The Company's programme will bring about complete electrification of the Valley by 1950.

Nerve-centre of B. C. Motor Transportation's inter-city bus operations will be this new depot at Larwill Park in downtown Vancouver. Ultra-modern in design, the building will be completed late this summer. A 240-foot concourse immediately south of the terminal will permit simultaneous loading of 25 buses, which can be routed through several entrances and exits to avoid traffic congestion on bordering streets.

The Company's Industrial Development Department enters its third year as a vital factor in servicing many inquiries from prospective new industrialists. Our now famous "Business Is Moving To B. C." national advertising campaign continues on an international basis.

Close to 50 separate examples of both new and expanded industries were responsible for new plant investment to the value of \$8,000,000. Industries represented everything from pig iron, natural resources, by-products and processed products, furniture, bath tubs, and matches. These 50 examples are the major undertakings and are supplemented by hundreds of smaller developments.

20,000 copies of this report have been circulated to shareholders, to employees and those on pension, to mayors, reeves, councillors and members of the legislature, to union executives and service club officials, and to the spokesmen of all segments of the population of the community.
