

ICG UTILITIES (ONTARIO) LTD
DIVISION OF INTER-CITY GAS CORPORATION

Annual Report
1986

Business of the Company

ICG Utilities (Ontario) Ltd (formerly Northern and Central Gas Corporation Limited), a wholly owned subsidiary of Inter-City Gas Corporation, owns and operates, either directly or through subsidiaries, natural gas distribution facilities in the provinces of Ontario and Manitoba. The Ontario operation serves approximately 100 communities in northwestern, northern and eastern Ontario. In Manitoba, Greater Winnipeg Gas Company operates gas distribution facilities in the greater Winnipeg area and adjacent communities.

Report to Shareholders

Revenues and Earnings

Net income increased to \$30.3 million from \$27.0 million in 1985 due to higher contributions from the Ontario operations offset by lower contributions from Manitoba.

Gas sales and other revenues decreased to \$694.5 million from \$774.6 million as a result of the effect of warmer weather, price decreases, and certain industrial customers changing from gas sales to transportation service contracts, partly offset by customer growth. Volumes of gas sold decreased to 4,221 10^6m^3 from 4,530 10^6m^3 . The number of customers increased during the year by approximately 8,900 to 327,214.

Investment income declined to \$14.2 million from \$20.1 million due to lower Gaz Métropolitain inc. (GMi) and Noverco dividend and interest income as a result of the 1985 exchange of GMi common shares for \$26 million of the Company's long term debt and the 1986 sale of the Company's investment in long term debt of GMi.

Financial expenses decreased to \$38.3 million from \$43.4 million, primarily due to the \$5.1 million gain on the sale of GMi U.S. debt.

Ontario Operations

Income from the Ontario operations increased by \$6.5 million to \$25.6 million. Residential and commercial sales volumes decreased by 44 10^6m^3 to 958 10^6m^3 because of the effect of 5% warmer weather partly offset by more customers. Industrial and other sales declined by 190 10^6m^3 to 1,974 10^6m^3 because of replacement by transportation service and competitive fuels. At year-end, the number of customers increased to 154,312 from 149,465 a year earlier.

Total capital expenditures, after deducting grants and other contributions, totalled \$35.8 million, down from a 1985 high of \$50.7 million.

Effective May 5, 1986 the Company's name was changed from Northern and Central Gas Corporation Limited to ICG Utilities (Ontario) Ltd.

Manitoba Operations

Income from the Manitoba operations declined by \$3.2 million to \$4.7 million due to lower gas sales volumes partly offset by more customers. Residential and commercial sales

volumes decreased by 59 10^6m^3 to 1,009 10^6m^3 . The effect of 7% warmer weather than last year was modified by customer growth. Industrial sales volumes decreased by 16 10^6m^3 to 280 10^6m^3 . At December 31, 1986 there were 172,902 customers, compared with 168,844 the previous year.

Capital expenditures were \$13.1 million in 1986 compared with \$10.7 million in 1985.

Regulation

In June 1986, the Ontario Energy Board released its final decision with respect to the 1986 test year. The Company was granted a final revenue deficiency of \$7.1 million which included \$6.5 million awarded on an interim basis January 1, 1986. The Board decreased the allowed rate of return on common equity from 15.75% to 15.00%.

In October 1986, the Company applied to the Ontario Energy Board for a rate increase for the 1987 test year to recover increased operating and financial expenses. The Company is seeking an additional \$19.2 million in revenues to enable it to earn a return of 14.75% on common equity.

Greater Winnipeg Gas has filed a rate application based on a historical test year and hearings are expected to commence in June, 1987. The current allowable rate of return on common equity is 14.25%.

Market Responsive Pricing

The October 31, 1985 "Agreement on Natural Gas Markets and Prices" between the governments of Canada and the three western gas producing provinces set the natural gas industry on a path of more flexible and market-oriented pricing. This Agreement permitted certain end users of gas to purchase their gas directly in a producing province and then have it transported to their facilities by the pipeline.

By year-end, transportation service was being provided to four large industrial customers in our service area in Ontario.

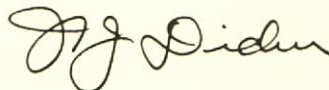

Late in 1986, the Company signed agreements with Western Gas Marketing, a subsidiary of TransCanada PipeLines, which would effectively set gas prices payable by our customers in Manitoba and Ontario beginning on November 1, 1986. The Ontario agreement was approved by the Ontario Energy Board for a term of one year pending further review at that time. At the time of writing, the Manitoba agreement is under review by the Public Utilities Board.

Outlook

For the future, our Company remains convinced that, over the long term, deregulation will be the best path for the industry. It will be particularly advantageous for us in that it will offer a stronger competitive position in industrial markets. However, in the short term transitional period, a number of complex issues remain to be sorted out—making both planning and decision making more difficult.

With the help of the Company's many dedicated and enthusiastic employees, we are sure to be able to meet the challenge of 1987 and beyond.

On behalf of the Board of Directors,

R. G. Graham,

N. J. Didur,

Chairman of the Board

President

April 14, 1987.

Summary of Accounting Policies

Year ended December 31, 1986

The Company and its subsidiaries are engaged primarily in regulated gas distribution operations in Manitoba through Greater Winnipeg Gas Company and in Ontario through ICG Utilities (Ontario) Ltd which are classified as one business segment for financial reporting purposes.

The principal accounting policies followed by the Company and its subsidiaries are summarized here to facilitate a review of the consolidated financial statements.

Principles of consolidation

The consolidated financial statements include the accounts of the Company and its subsidiaries.

The excess of acquisition costs over underlying value of net assets at date of purchase in respect of companies amalgamated on January 1, 1968 are included in "Other Assets" and are not being amortized.

Foreign currency translation

Long-term debt and investments denominated in U.S. dollars are translated at the rates of exchange prevailing at the balance sheet date. Any exchange gains or losses arising on translation of these amounts are deferred and amortized over the remaining term to maturity.

Inventories

Gas in storage is carried at cost which includes transportation and storage. Supplies are carried at the lowest of historic cost, replacement cost and net realizable value.

Properties, plant and equipment

Properties, plant and equipment are carried at cost which includes direct costs, overhead attributable to construction and interest on funds used during construction, less contributions in aid of construction.

Contributions in aid of construction are represented primarily by non-refundable grants from governmental bodies in support of specific transmission and distribution facilities.

Depreciation is provided on the straight-line method at rates approved by regulatory authorities. The application of such rates is equivalent to a composite rate of approximately 3.25% (3.24% in 1985).

The original cost of property retired is removed from plant accounts and charged to accumulated depreciation, which is credited with the salvage proceeds less removal costs. Under this method, no profit or loss is recognized on ordinary retirements of depreciable property.

Maintenance, repairs and minor renewals are charged to maintenance expense accounts. Renewals and betterments of property are capitalized.

Deferred charges

Costs of issuing long-term debt are deferred in the year incurred and amortized against income over the term of the applicable issue.

The Companies defer, in the year incurred, certain expenses which the regulatory authorities require or permit to be recovered from future revenues; such charges are being amortized over various time periods.

Income taxes

The Companies' rates and revenues, established for regulatory purposes, include recovery of only such income taxes as are currently payable or are recoverable through the rates charged to customers. Accordingly, the Companies provide for income taxes on this basis and do not provide for income taxes which may be payable in future years as a result of current differences in timing of deductions, principally in respect of depreciation and amortization, for financial reporting and income tax purposes. Such income taxes not provided and not recovered in revenues amounted to \$7,578,000 in 1986, (\$4,500,000 in 1985) and \$83,178,000 in total to December 31, 1986. The Companies do provide for income taxes which result from a difference in the timing of income recognition on unbilled sales.

Auditors' Report

To the Shareholders of
ICG Utilities (Ontario) Ltd

We have examined the consolidated balance sheet of ICG Utilities (Ontario) Ltd as at December 31, 1986 and the consolidated statements of income, retained earnings and changes in financial position for the year then ended. Our examination was made in accordance with generally accepted auditing standards, and accordingly included such tests and other procedures as we considered necessary in the circumstances.

In our opinion, these consolidated financial statements present fairly the financial position of the company as at December 31, 1986 and the results of its operations and the changes in its financial position for the year then ended in accordance with generally accepted accounting principles applied, after giving retroactive effect to the change in the method of recording revenues as explained in note 2 to the financial statements, on a basis consistent with that of the preceding year.

Notes to Consolidated Financial Statements

Year ended December 31, 1986

(Tabular amounts are in thousands of dollars)

1. Accounting policies

The summary of the principal accounting policies presented elsewhere is an integral part of these consolidated financial statements.

2. Change in accounting policy

Effective January 1, 1986, the Company changed its accounting policy with respect to the recording of gas sales revenue of the Manitoba operations, making it consistent with the accounting policy for the Ontario operations. The gas sales revenue is now recorded on the basis of meter readings plus an estimate of customer usage since the last meter reading to the end of the reporting period. In prior years, such revenue was recorded on the basis of meter reading only. This change in accounting policy has been retroactively applied, and 1985 earnings and the balance of retained earnings at December 31, 1984 have been restated.

The effect of this change is shown in the following table:

	1986	1985	Prior
Unbilled sales at end of year	\$ 13,689	\$ 17,654	\$ 20,151
Unbilled sales at beginning of year	(17,654)	(20,151)	
Increase (decrease) in revenue	(3,965)	(2,497)	20,151
Less applicable income taxes	(1,837)	(1,140)	10,479
Increase (decrease) in net income and retained earnings	\$ (2,128)	\$ (1,357)	\$ 9,672
Decrease in earnings per common share	\$ 0.12	\$ 0.08	

3. Investments

	1986	1985
Investment in Noverco (i)		
Common shares of Noverco (ii)	\$ 55,016	\$ 55,016
Preference shares of Gaz Métropolitain, inc.		
5.4% 1965 series, issue price \$100		1,389
5.5% 1966 series, issue price \$100		1,459
7.85% 1978 series, issue price \$ 25	14,258	15,058
Debt (iii)		64,105
	69,274	137,027
Demand note from ICG (iv)	47,300	47,300
Mortgages receivable	5,347	6,654
Finance contracts	16,152	16,080
Other	37	37
	\$138,110	\$207,098

(i) Effective June 16, 1986 the Company's common shares of Gaz Métropolitain, inc. (GMI) were exchanged for an equal number of common shares of Noverco, GMI's newly formed parent company.

(ii) In 1980 and 1981, the Company issued two series of exchangeable subordinated debentures. The issues conferred upon the holders the right to vote the shares subject to exchange during the terms of the issues and prior to exercising the exchange right. As a result, the Company no longer has a voting interest in Noverco. Accordingly, the Company accounts for its investment in Noverco by the cost method.

During 1985, the first issue of \$26,000,000 principal amount of 12% exchangeable subordinated debentures due in 2000 was exchanged into 3,250,000 common shares of GMI, resulting in a loss on the exchange of shares of \$603,000 after income taxes payable of \$1,396,000.

The second issue of \$55,016,000 of 13% exchangeable subordinated debentures redeemable in 1988 are exchangeable at any time into 6,877,049 common shares of Noverco (13.28% interest at December 31, 1986). The Company has the option to pay the redemption in cash or by tendering the common shares of Noverco subject to the exchange right. In 1988, the Company intends to tender the common shares of Noverco. As a result, the Company will incur a loss on the exchange of the shares of \$1,604,000, after income taxes payable of \$2,954,000, which was recorded in 1985.

(iii) During 1986, the Company's investment in GMI debt was sold for net proceeds of \$67,077,000. A foreign exchange gain of \$5,077,000 was recorded on the transaction and income taxes of \$2,390,000 resulted in a net gain of \$2,687,000.

- (iv) The subordinated demand note from the Company's parent, Inter-City Gas Corporation bears interest at 7.6% per annum and is subject to minimum annual repayments of \$1,672,000 in 1988 and \$4,148,000 from 1989 to 1999. Annual interest of \$3,595,000 is included in investment income in 1986 and 1985. Interest receivable of \$1,049,000 is included in accounts receivable at December 31, 1986 and 1985.

4. Properties, plant and equipment

	1986			1985
	Cost	Accumulated Depreciation	Net	Net
Gas storage	\$ 20,470	\$ 7,171	\$ 13,299	\$ 13,749
Gas distribution	473,713	90,859	382,854	357,337
Rental equipment	47,717	19,980	27,737	24,977
General and other plant	38,257	13,556	24,701	20,593
	<u>\$580,157</u>	<u>\$131,566</u>	<u>\$448,591</u>	<u>\$416,656</u>

5. Other assets

	Basis of Period of Amortization	1986	1985
Intangible assets arising from acquisitions		\$ 8,833	\$ 8,833
Unrealized foreign currency translation losses (i)	*	7,953	5,554
Long-term debt issue expense	*	2,121	1,820
Sales promotion expense	5 years	1,934	1,489
Gas storage exploration costs		936	1,051
Other		458	356
		<u>\$22,235</u>	<u>\$19,103</u>

*Amortized over term of applicable issue.

- (i) Represents the unrealized foreign currency loss on translation of long-term debt denominated in U.S. dollars \$43,061,000 U.S. (\$48,251,000 U.S. in 1985) net, in 1985, of the unrealized gain on translation of investments in GMI debt denominated in U.S. dollars (\$26,658,000 U.S.) and amortization. The exchange rate as at December 31, 1986 was \$1.38 (\$1.40 in 1985).

6. Long-term debt

	Due within one year	1986	1985
Bank loans, unsecured, bearing interest at the prime bank rate .			\$116,953

9¾% - 14% senior debentures, 1991-2008	2,625	178,603	108,654
6% subordinated notes, 1987	415	415	967
6½% - 11¼% debentures, 1988-1991	740	12,851	14,001
13% exchangeable subordinated debentures, 1988 (note 3(ii)) .		55,016	55,016
	<u>\$14,139</u>	<u>344,983</u>	<u>405,779</u>
Deduct			
Current maturities on long-term debt		14,139	14,129
		<u>\$330,844</u>	<u>\$391,650</u>

The first mortgage bonds are secured by specific mortgage on real and immovable property, franchises, gas purchases and sales contracts, monies deposited under Trust Deed, securities, appliances and equipment and additional property pledged with Trustee and a floating charge on all other assets.

Long-term debt maturities and sinking fund requirements for each of the four years subsequent to 1987 are as follows:

1988	\$81,424 (note 3(ii))	1990	\$15,204
1989	\$31,194	1991	\$38,425

7. Capital stock

Authorized

510,717	First preference shares issuable in series
3,598,075	Second preference shares issuable in series
184,000	Third preference shares issuable in series
2,500,000	Junior preference shares issuable in series
34,622,139	Common shares

First preference shares, first and second series, (currently redeemable at the Company's option at \$50.50 per share) do not presently have voting rights.

Second preference shares, series A, (redeemable at the Company's option after December 15, 1986 at a price of \$25.20 per share, declining to \$25.00 per share after December 15, 1987) do not presently have voting rights.

Third preference shares, series C (redeemable at the Company's option at \$25.00 per share) have voting rights.

The following shares were redeemed for cash during the year:

3,200	First preference shares, first series
470	First preference shares, second series
56,000	Second preference shares, series A
455	Third preference shares, series A
32,145	Third preference shares, series B
46,000	Third preference shares, series C

8. Dividend restrictions

The indentures and agreements relating to the Company's long-term debt obligations contain covenants limiting the payment of dividends.

9. Income taxes

A reconciliation between the statutory and the effective rate of income taxes is provided as follows:

	1986	1985
Income before income taxes	<u>\$42,601</u>	<u>\$43,521</u>
Federal statutory tax rate.	<u>46.0%</u>	<u>46.0%</u>
Computed income taxes.	<u>\$19,596</u>	<u>\$20,020</u>
Increases (decreases) in income taxes resulting from:		
Capital cost allowance deducted for income tax purposes		
in excess of depreciation	(2,221)	(2,486)
Corporate surtax	405	287
Provincial income taxes in excess of federal abatement	1,330	1,729
Non-taxable dividend income	(2,749)	(3,403)
Difference between accounting gains/losses		
and taxable capital gains/losses	35	3,251
Deferred charges and other items claimed for tax purposes		
in the year incurred	(3,836)	(2,907)
Other, net.	(227)	41
Actual income tax expense	<u>\$12,333</u>	<u>\$16,532</u>
Effective tax rate	<u>29.0%</u>	<u>38.0%</u>

10. Pension Plan

The Company has various pension plans available to substantially all permanent full time employees. The Company makes contributions to the plans based on salary levels. The total pension expense for 1986 was \$1,077,000 (\$1,641,000 in 1985), including contributions in respect of unfunded past service benefits. At December 31, 1986 the Company has no unfunded pension liability.

11. Related party transactions

ICG Utilities (Canada) Ltd charged the Company \$4,019,000 (\$1,057,000 in 1985) for services provided.

12. Name change

Effective May 5, 1986, the Company's name was changed to ICG Utilities (Ontario) Ltd from Northern and Central Gas Corporation Limited.
