—owned in Canada .....	96.3%	96.3%	

## Report of the Directors to the Shareholders

1975 marked the 39th consecutive year in which dividends were earned and paid and in each of the last 20 years the payment per share has exceeded that of the preceding year.

Earnings applicable to common shares increased 31.9%. Consequently, with a somewhat larger number of shares outstanding, earnings per share amounted to \$2.18 as compared to \$1.69 in 1974. Dividends paid per common share were \$1.09 as compared to \$0.98 in the previous year.

As well as a larger asset base, an important factor in the stronger earnings results was a decline in the overall cost of borrowed funds. The average rate was 8.3% as compared to 9.0% in the preceding year.

The Canadian economy, as the result of inflation, high unemployment and poor export markets, experienced stagnation in 1975 after a long period of growth. As a consequence, the level of your Company's sales financing and consumer loan outstandings declined slightly. However, activity continued buoyant in the leasing and mortgage areas, more than offsetting the weaker demand in consumer financing. Consequently, consolidated assets increased by \$251 million, a gain of 11.8%.

The continued progress of your Company was made possible by the loyal and tireless efforts of the people comprising the IAC organization. Your Directors wish to express their warm thanks and appreciation.

Your Directors wish to record the following actions of the Board in 1975, subsequent to the last Annual General Meeting of the Shareholders:

Harold Corrigan, C.A. was elected to the Board, succeeding P.L. Paré who resigned because of other commitments  
D.W. Maloney was elected to the Executive Committee  
D.A. Rattee was appointed a Vice-President  
S.S. Ilacqua was appointed a Vice-President  
C.W. Regan was appointed an Assistant Vice-President

During the year the parent Company issued \$30 million in 9¾% Debentures maturing March 25, 1995. Niagara Finance Company Limited placed \$30 million Secured Notes Series 6, in the U.S. market, bearing interest at 10½% and maturing September 1, 1990.

At a Special General Meeting of Shareholders held on November 3, 1975, the proposed conversion of the Company to a chartered bank was approved. Relative to this objective, Bill S-30, an Act to incorporate Continental Bank of Canada was introduced in Parliament and has subsequently been passed by the Senate and approved, with minor amendments, by the Standing Committee on Finance, Trade and Economic Affairs of the House of Commons. At the date of this report it is awaiting third reading in the House of Commons.

The current outlook for the Canadian economy points to modest though steady economic growth during 1976. One area of considerable uncertainty is business capital spending, but improvement seems likely in housing, consumer spending and external trade. Firm control of the rate of growth of the money supply is likely to be maintained until inflation shows positive evidence of subsiding. In the circumstances, interest rates will probably remain high by historical standards, as will unemployment. However, your Directors feel that reasonable continued progress will be achieved by your Company.

On behalf of the Board

Chairman

President

February 25, 1976

K.H. MacDonald, Chairman of the Board and J.S. Land, President

## General Commentary

This commentary and the accompanying charts provide information supplementary to that presented elsewhere in this report. A better perspective on the results of the past year's operations, and the current financial position of your Company may be obtained from the analytical details and historical comparisons this section contains.

### Gross Income

Net investments in working assets and marketable securities increased 7.3%, while gross income derived from these investments increased 9.7%. This increase in overall yield on investments was achieved despite an increase in the provision for doubtful receivables of \$3.6 million, deducted prior to calculating gross income. The increased provision for doubtful receivables was considered prudent in recognizing the growth of the total portfolio, as well as some current weakness in the economy, notably the high unemployment levels. Losses, as a percentage of outstandings during 1975, at 0.36% were somewhat higher than in the preceding year, but below the average of 0.45% for the past ten years.

The average rate of gross return on investments increased by 2% compared with that of the previous year, despite downward rate adjustments reflecting

lower money cost. This again demonstrates the effect of the time lag between rate adjustments and their impact on income.

### Chart 1 Sources of Gross Income (before provision for doubtful receivables)

All categories of gross income showed growth, but there were disparities in the growth rates of the various categories produced by changes in the overall mix. Consumer loans and sales financing have become proportionately less dominant as sources of income as diversification has progressed.

### Chart 2 Composition of Gross Income Distribution

During 1975, an average of \$45 out of every \$100 of income was paid out as the cost of borrowed funds, a decline from an all-time high of \$51 the previous year. Apart from this change, the distribution of income by categories remained relatively stable. Higher earnings made it possible to increase dividends paid by 13%, without taking a higher proportion from gross income.

The proportion of earnings retained in the business, provision for doubtful receivables and general and administrative expenses each showed modest increases over 1974.

### Chart 3

- Earnings per share \$
- Dividends per share \$

The 49¢ increase in earnings per common share achieved in 1975 represents the largest one-year increase in the history of your Company. The improvement is all the more gratifying in light of the fact that, during the year, there was an increase of over 300,000 shares in the average number outstanding.

The dividend payment in 1975 exceeded that of the previous year, as it has for each of the past 20 years.

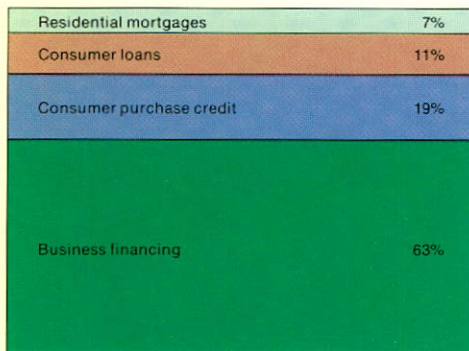

**Chart 4**

■ Shareholders' Equity \$000's  
■ Book Value per Common Share \$

Retained earnings increased almost 11%, while capital stock increased only 0.5%, resulting in an overall increase in shareholders' equity of over 7% for the year. Return on average common equity climbed to 15.2%, which is the highest level achieved in any of the past 10 years.

**1973 Total \$1,775,134,000 (100%)**

**1974 Total \$2,061,035,000 (116%)**

**1975 Total \$2,294,945,000 (129%)**

**Chart 5 Receivables and their Composition**

As anticipated at this time last year, the Canadian economy developed weakening trends in some areas during 1975, with the result that growth in receivables at 11.3% for the year did not match the rapid pace of the early 70's. Nevertheless, growth during the past three years amounted to 29%, or a dollar increase of over \$500 million.

The composition of receivables reflects the shifting pattern of the Company's activity over the past years: slower growth in the consumer sector was offset by more rapid expansion in business financing, while residential mortgages advanced at a rate consistent with the overall growth of the total portfolio. The net result was a further increase in the proportion of the total represented by business financing.

### Summary

Your Company's performance continues to be sound and secure by any measure. The diversification which commenced a decade ago and which is still proceeding has resulted in a corporate business base sufficiently broad to provide reasonable insulation against cyclical trends in any given sector of the economy. During the past year, when consumer spending was sluggish and some markets showed little or no growth, your Company not only retained its traditional market share, but also achieved offsetting growth in newer markets.

## Consolidated Statement of Earnings

# Notes to Consolidated Financial Statements

for the year ended December 31, 1975

## 1. Significant Accounting Policies

### (a) Principles of consolidation

The statements consolidate the accounts of the company and its subsidiaries with the exception of those of The Sovereign Life Assurance Company of Canada. The accounting practices of this subsidiary are in accordance with the requirements of the insurance laws of Canada and therefore consolidation of its accounts is considered to be inappropriate. The investment in its shares is stated at cost plus the parent company's portion of increase in unassigned surplus of the subsidiary since acquisition.

The company's 40% investment in shares of The Sovereign Mortgage Insurance Company has been accounted for on the equity method.

### (b) Recognition of revenue

Precomputed charges on sales financing retail receivables for terms for less than forty-eight months and on consumer loan receivables are taken into income using the sum-of-the-digits method on an account by account basis. Because this method does not maintain the original yield over longer terms, on sales financing retail contracts written for terms in excess of forty-eight months, unearned income is taken into earnings on the actuarial yield basis.

Discount on residential mortgages purchased is brought into income over the remaining term of the mortgage using the actuarial yield method.

Leasing transactions are reported in accordance with the financing method of accounting. The excess of aggregate rentals over the cost of the leased asset is recorded as unearned income at the time of the transaction. Income is taken up over the term of the lease pro rata to the declining balance of the investment. Gains arising from residual values of leased assets are reflected in earnings only when realized. Contractual disposal proceeds negotiated at the inception of the lease are included in unearned income and taken up as described above.

Unearned casualty insurance premiums are taken into income on a straight-line basis. On policies sold directly to the public, 20% of the premium is recorded as income in the first month, to offset acquisition expenses. The remaining 80% and the total unearned insurance premium on policies sold to customers using the parent company's financing facilities is taken into income over the life of the policy.

### (c) Allowance for doubtful receivables

For IAC sales financing, dealer loans, commercial loans and leasing, such allowance is established by evaluating individual accounts. For consumer loans, sales financing by Niagara Finance Company Limited and residential mortgage receivables such allowance is set up as a percentage of total receivables. In all companies, after collection possibilities have been exhausted, any balance remaining on an account is written off.

### (d) Translation of foreign currencies

Unhedged assets and liabilities are translated to Canadian funds at current exchange rates. Fully hedged borrowings are recorded at exchange rates established under forward exchange contracts. Realized exchange gains and losses are reflected in the current year's statement of earnings.

### (e) Amortization of debt discount and expense

Debt discount and expense is amortized over the term of the related debt instrument. If the debt is prepayable or exchangeable at the holder's option the amortization is calculated to the first optional maturity date. When a debt obligation is redeemed prior to maturity, the related unamortized charges are written off in the month of redemption.

### (f) Methods of depreciation

Buildings are depreciated on a straight-line basis at the rate of 2.5% per annum. All other physical assets are depreciated at the maximum rates allowed by the regulations of the Canadian Income Tax Act for claiming capital cost allowance.

Leasehold improvements are amortized in accordance with the regulations of the same Act over the term of the respective leases.

## 2. Gross Income

	1975 \$000's	1974 \$000's	Increase (decrease) \$000's %	
Sales financing and dealer loans	127,612	121,523	6,089	5.0

Aggregate remuneration of the IAC Limited officers as directors of:			
Niagara Finance Company Limited		10,050	7,748
The Sovereign General Insurance Company		4,500	3,725
The Sovereign Life Assurance Company of Canada		5,200	4,800
		<u>19,750</u>	<u>16,273</u>
Number of IAC Limited officers		<u>24</u>	<u>22</u>
Number of IAC Limited officers who were also directors		<u>3</u>	<u>4</u>

**4. Tax Relief Available for Future Years**

A subsidiary has an excess of undepreciated capital cost for tax purposes over the net book value of fixed assets of \$190,000. This amount may be applied to

reduce taxable income in future years.

In addition, there is a capital loss of approximately \$19,600 which is available for application against future taxable capital gains.

**5. Retained Earnings—Statutory Appropriation**

As at December 31, 1975 an amount of \$7,082,000, equal to the par value of

preferred shares purchased for cancellation, had been set aside in the accounts out of retained earnings (1974—\$6,605,000).

**6. Fully Diluted Common Stock Earnings per Share**

Assuming that all conversion rights outstanding at December 31, 1975 had actually been exercised at the beginning of the year, fully diluted earnings for the year ended December 31, 1975 would have been \$2.07 (1974—\$1.65) per share. The

calculation assumes that earnings applicable to common shares were increased:

(a) by \$22,000 representing the elimination of interest, net of income taxes, attributable to the 7% convertible subordinated debentures, and

(b) by \$1,135,000 representing the elimination of interest, net of income taxes, attributable to the 9½% convertible subordinated debentures.

**7. Maturities of Gross Receivables and Payables**

	(in millions of dollars)							Total

\*Allocation not adjusted for sinking fund and purchase fund requirements. (See note 10).

**8. Marketable Securities**

Marketable securities include those held by the casualty insurance subsidiary, at cost plus accrued income, amounting to \$14,196,000 (1974—\$14,736,000) (quoted value 1975—\$12,228,000; 1974—\$12,487,000).

**9. Unrealized Foreign Exchange Gain**

Such gains or losses derive from the accounting policies described in note 1(d).

The net unrealized exchange gain results from the difference between the current exchange rate and the exchange rate at date the proceeds of unhedged borrowings payable in U.S. funds were received.

**10. Sinking Fund and Purchase Fund Requirements**

The sinking fund requirements for the five years ending December 31, 1976 to 1980 are as follows:

		\$000's		
1976	1977	1978	1979	1980
1,973	2,899	3,124	3,124	3,124

Certain issues have purchase fund requirements which are non-cumulative and under which the IAC companies are required to redeem only debt instruments offered to them subject to limitations as to price and aggregate annual amounts. It is not possible to predict the amounts that will be offered by holders. The maximum purchase fund requirements for the years ending December 31 are as follows:

Years ending December 31  
(In millions of dollars)

1976	\$13.2
1977	\$13.8
1978	\$13.1
1979	\$12.0
1980	\$ 9.4
1981 to 1985	\$32.2
after 1985	\$33.8

**11. Accounts Payable and Accrued Liabilities**

Accounts payable include 6% unsecured term note of U.S. \$1,874,000 (at the Canadian equivalent of \$1,904,000) of a subsidiary repayable in equal semi-annual instalments until 1981.

**12. Unearned Income**

Unearned income comprises:

	1975 \$000's	1974 \$000's
Unearned service charges relating to sales financing-retail receivables	116,371	122,639
Unearned service charges relating to consumer loans	37,435	37,134
Deferred income relating to residential mortgages	4,153	3,407
Unearned income relating to leasing receivables	242,382	146,077
Unearned casualty insurance premiums	5,664	5,510
	<u>406,005</u>	<u>314,767</u>

**13. Deferred Income Taxes**

Deferred income taxes arise from timing differences relating to the treatment for income tax purposes of income and expenses associated with the following:

	1975 \$000's	1974 \$000's
Residential mortgages	765	667
Unamortized debt discount and expense	1,130	2,714
Premises and equipment	195	206
Unearned casualty insurance premiums	676	654
Leasing receivables	122,369	97,751
	<u>125,135</u>	<u>101,992</u>

**14. Common Shares**Shares reserved  
**1975**      **1974**

Common shares are reserved for issue as follows:

(a) Personnel stock purchase plan — This was a continuing plan available after three years of service to all employees, certain of whom were directors, at \$15.30 per share during 1975 allocated on a formula based on annual remuneration. This plan was terminated in anticipation	of the passage by Parliament of the private members bill which provides for the conversion of the company into a chartered bank (note 17). This bill includes a provision making the section of the Bank Act prohibiting such plans applicable to the company. ....	—	130,554
(b) Stock option plan, expiring November 30, 1976 — This was a plan available to officers and certain senior personnel as determined by the Board of Directors at a price not less than 90% of the last board lot sale on The Toronto Stock Exchange on the	business day next preceding the date upon which the option was granted. For the reasons described in (a) above, this plan was also terminated following an agreement with all individuals holding outstanding options .....	—	117,150
(c) Conversion right exercisable until October 31, 1977 at 70 shares (equivalent to \$14.285 per share) for each \$1,000 of	principal of the 1967 7% convertible subordinated debentures .....	<b>44,100</b>	57,890
(d) Conversion right exercisable until July 14, 1979 at 50 shares (equivalent to \$20 per share) and thereafter, until July 14, 1984 at 46 shares (equivalent to \$21.74 per	share) for each \$1,000 of principal of the 1974 9½% convertible subordinated debentures .....	<b>1,195,000</b> <b>1,239,100</b>	1,195,000 1,500,594

**15. Commitments under Leases**

The companies have leases on office premises used for their business, requiring rental payments as follows:

Years	Approximate annual rental \$
1976 .....	2,589,000
1977 .....	2,025,000
1978 .....	1,721,000
1979 .....	1,258,000
1980 .....	657,000
The aggregate rentals for 1981 and thereafter amount to \$2,185,000.	

**16. Contingent Liabilities**

IAC and some of its subsidiaries are parties to certain litigation incidental to the kind of business conducted. In the opinion

of management, the ultimate liability, if any, will not materially affect the companies' consolidated financial position or results of operations.

**17. Conversion to a Chartered Bank**

The directors and shareholders of the company have approved the conversion of the company into a chartered bank. A private

members bill currently before Parliament must be passed before conversion can commence.

**18. Anti-Inflation Act**

The company and its subsidiaries are subject to the provisions of the Federal Anti-Inflation legislation which became effective October 14, 1975. The impact thereof on the companies' profit margins, prices and compensation arrangements cannot be accurately determined at the

present time because of uncertainties in the interpretation and application of certain provisions and definitions contained in the Act and Regulations and the fact that specific Regulations respecting financial institutions have not yet been issued. However, based on preliminary computations, it appears that the legislation has no adverse

effect on the consolidated financial position or results of operations for the 1975 year.

Under the legislation it appears that the amount of dividends which the company can declare or pay on its common shares for the quarters ending March 31, 1976, June 30, 1976 and September 30, 1976, will be limited to 28.5¢ per share per quarter.

Series "37" 8¼% 1979 notes may be exchanged at maturity for either 8½% 1984 notes or 8¾% 1989 notes.

Holders of Series "38" notes have the right to prepayment on June 1, 1980 or 1985.

Notes issued individually and payable in U.S. funds for U.S. \$7 million par value maturing in 1976 and \$2 million par value maturing in 1977 have been converted to Canadian funds at exchange rates established under forward exchange contracts. All other notes issued individually and in series payable in U.S. funds have been converted at current exchange rates (note 10).

The interest rate on Series "A" notes increased to 9¾% on December 15, 1975. Holders have the right to prepayment on December 15, 1980 or 1985.

Holders of Series "B" notes have the right to prepayment on December 15, 1978.

Holders of Series "D" notes have the right to prepayment on May 15, 1980. Holders of Series "E" notes have the right to prepayment on March 1, 1980. The parent company has guaranteed Series "A", "B", "C", "D", "E" and "F" notes as to principal, interest and redemption premiums, if any.

\*These notes have purchase fund provisions (note 10).

\*\*These notes have a sinking fund provision (note 10).

## Auditors' Report to the Shareholders

We have examined the consolidated balance sheet of IAC Limited and subsidiaries as at December 31, 1975 and the consolidated statements of earnings, retained earnings and changes in financial position for the year then ended. Our examination included a general review of the

accounting procedures and such tests of accounting records and other supporting evidence as we considered necessary in the circumstances.

In our opinion these consolidated financial statements present fairly the financial position of the companies as

at December 31, 1975 and the results of their operations and the changes in their financial position for the year then ended, in accordance with generally accepted accounting principles applied on a basis consistent with that of the preceding year.

Toronto, February 11, 1976

Coopers & Lybrand  
Chartered Accountants

## Policies and Other Data

### Accounting Policies

Accounting policies relating to principles of consolidation, recognition of revenue, allowance for doubtful receivables, translation of foreign currencies, amortization of debt discount and expenses and methods of depreciation are presented in note 1 of the notes to the consolidated financial statements, page 11. The accounting practices of the non-consolidated wholly owned life insurance subsidiary are in accordance with the requirements of the insurance laws of Canada.

### Anti-Inflation Guidelines

The company and its subsidiaries are subject to the provisions of the Federal Anti-Inflation legislation which became effective October 14, 1975. Note 18 of the notes to the consolidated financial statements, page 14, comments on this subject.

### Branch Start-Up Expenses

Start-up expenses of new branches are charged to current earnings as and when incurred.

### Delinquencies

Delinquent accounts are those on which the lesser of \$25 or half of an instalment is past due one month or more.

Renewed accounts are analysed on the basis of the current payment schedule and extended accounts on the basis of the extended schedule. "Renewal" is a new contract entered into before the expiry of the old for the purpose of reducing the amount of the instalments originally agreed to by the customer. An "extension" means the postponement of all or a part of a current instalment.

The prerequisites for granting renewals or extensions are strictly determined and renewed or extended accounts are carefully controlled. Partial payments, no matter how recent, will not remove an account from delinquent status. The Supplement to this Annual Report contains detailed information.

### Intercompany Borrowing

IAC, the parent company, does not borrow from subsidiaries. Subsidiaries are not permitted to invest in IAC securities either by way of debt instruments or of preferred or common stock.

### Offices

The total number of offices at year-end was 751 (1974: 758). These numbers reflect the total of offices where the various financial and insurance services of IAC and its subsidiaries were available. In several instances, more than one office is located in the same premises. In such situations the service of certain employees may be shared and other operational benefits are also derived. The branch network is spread in Canada from coast-to-coast and there are 24 (1974: 18) branches of Niagara Finance Company Limited in the United Kingdom.

### Pension Funds

IAC has a contributory pension plan (based on retirement at age 62) covering all permanent employees with over one year of service, except those of the life assurance company. The pension plan is based on the highest average remuneration received over a period of five consecutive years prior to retirement to equal a 'final earnings' plan. This is the result of a change in the pension plan, effective December 31, 1971 which eliminates the need for any updating. The company's contribution for 1975 amounted to \$1,217,000 (1974: \$1,103,000). In addition the company contributed \$315,000 (1974: \$282,000) to various government pension plans.

The Sovereign Life Assurance Company of Canada has its own pension plan based on retirement at age 65 for employees in service at December 31, 1970 and at age 62 for staff engaged thereafter.

### Personnel

The total staff employed at year-end was 3,049 (1974: 3,016).

## Ten Year Operating and Statistical Summary\*

# Niagara Finance Company Limited

Your Company's largest subsidiary, Niagara Finance Company Limited, is also the largest all-Canadian consumer loan company. It provides personal cash loans and finances the purchase and leasing of household durables. The Company is also engaged in the leasing of commercial and industrial equipment to major business corporations. Through 256 offices in Canada and 24 in the United Kingdom, it serves over 215,000 customers.

Recessionary conditions in the Canadian economy were reflected in a

slight decline in consumer type outstandings. However, overall receivables increased by \$7.1 million to a new high of \$317 million.

Higher average assets, with no increases in the cost of service to customers, produced modestly higher gross income. This, with a decline in the average cost of borrowed funds from 9.8% in the previous year to 8.9%, resulted in a 6.4% increase in earnings to a record of \$5.9 million.

The Company's receivables are in sound

condition. Net losses at 1.75% were higher than in the preceding year, but below the average in the industry. In recognition of the current incidence of unemployment and work stoppages in many sectors of the economy, the provision for doubtful receivables was increased by \$1.4 million.

The generally anticipated improvement in consumer demand in 1976 should ensure continued progress in the Company's results.

## Notes to Financial Statements

for the year ended December 31, 1975

**1. Significant Accounting Policies***(a) Recognition of revenue*

Precomputed charges on 'other' loans and on sales financing retail receivables are taken into income using the sum-of-the-digits method on an account by account basis.

Leasing transactions are reported in accordance with the financing method of accounting. The excess of aggregate rentals over the cost of the leased asset is recorded as unearned income at the time of the transaction. Income is taken up over the term of the lease pro rata to the declining balance of the investment. Gains arising from residual values of the leased assets are reflected in earnings only when realized. Contractual disposal proceeds negotiated at the inception of the lease are included in unearned income and taken up as described above.

*(b) Allowance for doubtful receivables*

For loans and sales finance receivables such allowance is set up as a percentage of the total of these receivables. After collection possibilities have been exhausted, any balance remaining on an account is written off.

*(c) Translation of foreign currencies*

Unhedged assets or liabilities are translated to Canadian funds at current exchange rates. Fully hedged borrowings are recorded at exchange rates established under forward exchange contracts. Realized exchange gains and losses are reflected in the current year's statement of earnings.

*(d) Amortization of debt discount and expense*

Debt discount and expense is amortized over the term of the related debt instrument. If the debt is prepayable at the holder's option the amortization is calculated to the first optional maturity date. When a debt obligation is redeemed prior to maturity, the related unamortized charges are written off in the month of redemption.

*(e) Methods of depreciation*

Physical assets are depreciated at the maximum rates allowed by the regulations of the Canadian Income Tax Act for claiming capital cost allowance.

Leasehold improvements are amortized in accordance with the same Act over the term of the respective leases.

# Niagara Realty of Canada Limited and Subsidiary

Niagara Finance Company Limited administers the affairs of these companies which provide first and second mortgage loans, primarily on residential property. In addition, existing mortgages are purchased on both an individual and portfolio basis. These services are available through 264 Niagara branches across Canada, including 8 specialized mortgage branches.

Principally as a result of the higher asset base, earnings increased by 53.9% to \$3.4 million.

The condition of the portfolio is sound. Losses represented only 0.07% of average receivables.

The outlook for the year 1976, considering the likely upturn in residential construction, appears to be favourable.

Buoyant demand resulted in continued progress in 1975, with receivables increasing by 15.1% to \$202 million.

## Notes to Consolidated Financial Statements

for the year ended December 31, 1975

**1. Significant Accounting Policies***(a) Principles of consolidation*

The financial statements include the accounts of the company and its subsidiary, Niagara Realty Limited.

*(b) Allowance for doubtful receivables*

For residential mortgages such allowance is set up as a percentage of total residential mortgage receivables.

*(c) Amortization of debt discount and expense*

Debt discount and expense is amortized over the term of the related debt instrument. If the debt is prepayable at the holder's option, the amortization is calculated to the first optional maturity date. When a debt obligation is redeemed prior to maturity, the related unamortized charges are written off in the month of redemption.

*(d) Depreciation and amortization*

Physical assets are depreciated at the maximum rates allowed by the regulations of the Canadian Income Tax Act for claiming capital cost allowance.

*(e) Deferred income*

Deferred income arises from mortgages purchased at a discount and is taken into income over the remaining term of the mortgage on the actuarial yield method.

**2. Gross Income**

	1975 \$000's	1974 \$000's
Earned income on mortgages .....	27,312	20,977
Less: Provision for doubtful receivables .....	328	410
	<u>26,984</u>	<u>20,567</u>

**3. General and Administrative Expenses**

	1975	1974
General and administrative expenses include:		
Depreciation of office equipment and automobiles .....	\$10,000	\$12,000
Remuneration of directors and officers —		
Aggregate remuneration of directors as directors .....	NIL	NIL
Number of directors .....	7	5
Aggregate remuneration of officers as officers .....	\$27,000	\$23,000
Number of officers .....	9	9
Number of officers who are also directors .....	4	3

The affairs of the companies are largely administered by Niagara Finance Company Limited.

**4. Secured Term Notes**

Year of issue	Series	Rate %	Maturity date	1975 \$000's	1974 \$000's
1970	"A"	9¾ *	December 15, 1990 .....	4,710	10,000
1971	"B"	7⅞ **	December 15, 1986 .....	19,156	19,522
1972	"C"	8¼	August 15, 1982 .....	13,541	13,807
1973	"D"	7⅞ ***	May 15, 1988 .....	19,331	19,803
1974	"E"	9 ****	March 1, 1994 .....	23,994	24,673
1974	"F"	10¼	June 18, 1981 .....	9,834	10,000
1974	"F"	10⅜	December 18, 1984 .....	13,649	15,000
				<u>104,215</u>	<u>112,805</u>

\*Holders have the right to prepayment on December 15, 1980 and 1985.

\*\*Holders have the right to prepayment on December 15, 1978.

\*\*\*Holders have the right to prepayment on May 15, 1980.

\*\*\*\*Holders have the right to prepayment on March 1, 1980.

Series "A", "B", "C", "D", and "E" notes and series "F" notes maturing in 1981, have purchase fund provisions.

Series "F" notes maturing in 1984 have a sinking fund provision.

IAC Limited has guaranteed all Series notes as to principal, interest and redemption premiums, if any.

**5. Deferred Income Taxes**

Deferred income taxes arise from timing differences relating to the treatment for income tax purposes of income or expenses associated with the following balance sheet items:

	1975	1974
	\$000's	\$000's
Residential mortgages .....	765	666
Unamortized debt discount and expense .....	(62)	887
	<u>703</u>	<u>1,553</u>

**6. Capital Stock**

During the year the company obtained Supplementary Letters Patent increasing its

authorized share capital by the creation of 2,000,000 8% non-cumulative redeemable preferred shares of \$5 par value.

**7. Sinking Fund and Purchase Fund Requirements**

The sinking fund requirements for the five years ending December 31, 1976 to 1980 are as follows:

	1976	1977	1978	1979	1980
\$000's	149	750	750	750	750

Certain issues have purchase fund requirements which are non-cumulative and under which the company is required to redeem only debt instruments offered to it subject to limitations as to price and aggregate annual amounts. It is not possible to predict the amounts that will be offered by holders. The maximum purchase fund requirements for the years ending December 31, 1976 and thereafter are as follows:

Years ending December 31	\$000's
1976 .....	2,561
1977 .....	2,891
1978 .....	2,866
1979 .....	2,291
1980 .....	1,272
1981 .....	312

**8. Anti-Inflation Act**

The company is subject to the provisions of the Federal Anti-Inflation legislation which became effective October 14, 1975. The impact thereof on the company's profit margins, prices and compensation arrangements cannot be accurately

determined at the present time because of uncertainties in the interpretation and application of certain provisions and definitions contained in the Act and Regulations and the fact that specific Regulations respecting financial institutions

have not yet been issued. However, based on preliminary computations, it appears that the legislation has no adverse effect on the financial position or results of operations for the 1975 year.

## Auditors' Report to the Shareholders

We have examined the consolidated balance sheet of Niagara Realty of Canada Limited and subsidiary as at December 31, 1975 and the consolidated statements of earnings, retained earnings, and changes in financial position for the year then ended. Our examination included a general review

of the accounting procedures and such tests of accounting records and other supporting evidence as we considered necessary in the circumstances.

In our opinion these consolidated statements present fairly the financial position of the companies as at

December 31, 1975 and the results of their operations and the changes in their financial position for the year then ended, in accordance with generally accepted accounting principles applied on a basis consistent with that of the preceding year.

# The Sovereign General Insurance Company

In 1975 results showed improvement over those of the preceding year. Premium writings increased to \$15.4 million (1974—\$13.1 million).

Claim loss ratios improved slightly at 74.3% (1974—74.8%). The results of your Company, in common with the industry, have been seriously affected by the impact of inflation on claim settlements, despite some increase in premium rates during the year. All fire insurance policies are now being written on a one year basis which will maintain a more current relationship between premium rate levels and claim costs.

General expenses at \$4.3 million were up 10%. Strict budgetary controls are being maintained.

After providing for income taxes, earnings increased to \$460,000 from \$57,000 in 1974. As constructive steps which have been taken become more fully reflected in results and, hopefully, inflationary conditions ease, further improvement may reasonably be anticipated.

## Notes to Financial Statements

for the year ended December 31, 1975

---

### 1. Anti-Inflation Act

The company is subject to the provisions of the Federal Anti-Inflation legislation which became effective October 14, 1975. The

impact thereof on the company's profit margins, prices and compensation arrangements cannot be accurately determined at the present time because of

uncertainties in the interpretation and application of certain provisions and definitions contained in the Act and Regulations.

---

### 2. Income Taxes

Depreciation and amortization of approximately \$190,000 in excess of amounts claimed for income tax purposes has been

recorded in the accounts in 1975 and prior years. This excess is available to reduce taxable income in future years.

In addition, there is a capital loss of

approximately \$19,600 which is available for application against future taxable capital gains.

---

## Auditors' Report to the Shareholders

We have examined the balance sheet of The Sovereign General Insurance Company as at December 31, 1975 and the statements of earnings and retained earnings for the year then ended. Our examination included a general review of the accounting procedures and such

tests of accounting records and other supporting evidence as we considered necessary in the circumstances.

In our opinion these statements present fairly the financial position of the company as at December 31, 1975 and

the results of its operations for the year then ended, in accordance with generally accepted accounting principles applied on a basis consistent with that of the preceding year.

# The Sovereign Life Assurance Company of Canada

New ordinary insurance and annuities issued in 1975 totalled \$98.7 million, up 16.9% over the previous year, and this represented the highest level of sales in the Company's history. The annual premium value of new insurance and annuity sales was \$1,255,000.

Revenue, consisting of premium and investment earnings including interest, dividends and rents, amounted to \$17,002,000 (1974—\$18,449,000). Premium income resumed normal levels, as contrasted with 1974 when a large one-time group premium payment inflated revenue in that year.

Investment earnings increased significantly. A net yield of 7.49% (1974—7.28%) on a larger investment portfolio accounted for this improvement.

In 1975 total payments to policyholders and beneficiaries, including the amount set aside to increase actuarial reserves, were \$11,732,000 (1974—\$13,546,000). Dividends to policyholders amounted to \$904,000, based on the current dividend scale.

Operating revenue, after provision for all policyholder payments and other expenditures, increased to \$664,000 (1974—\$197,000). The combined total of capital, surplus, and reserve accounts was \$11,572,000, equal to 13.8% of assets, which provides a substantial margin of protection for all policyholders.

Copies of the Annual Report of The Sovereign Life Assurance Company of Canada are available from the Secretary of Sovereign or of IAC.

# Notes to Financial Statements

for the year ended December 31, 1975

	1975	1974
	\$	\$
<b>1. Valuation of Bonds, Debentures and Preferred and Common Stocks</b>		
Value stated in the balance sheet .....	30,162,147	27,917,786
Estimated market value .....	25,412,855	22,452,196
Maximum value at which these securities may be carried as prescribed by the insurance laws of Canada .....	27,670,703	26,317,398

## 2. Provision for Income Taxes

This provision includes \$135,000 in respect of prior years.

## 3. Unassigned Surplus

The shareholders' portion of the unassigned surplus amounts to \$5,202,131 (1974—\$4,403,824) of which \$798,307

(1974—\$771,409) represents the shareholders' share of the net increase in unassigned surplus for the year.

# Auditors' Report to the Policyholders and Shareholders

We have examined the balance sheet of The Sovereign Life Assurance Company of Canada as at December 31, 1975 and the statements of revenue and unassigned surplus for the year then ended. Our examination included verification of the cash and investments in bonds and stocks by certificates from the depositories, a general review of the accounting procedures and such

tests of the accounting records and other supporting evidence as we considered necessary in the circumstances. The reserves and other liabilities under the various assurance and annuity contracts are stated at amounts certified by the company's actuary.

In our opinion, based upon our

examination and upon the certificate of the company's actuary, these financial statements present fairly the financial position of the company as at December 31, 1975 and the results of its operations for the year then ended, in accordance with accounting practices appropriate to the insurance laws of Canada applied on a basis consistent with that of the preceding year.
