## THE STEEL COMPANY OF CANADA, LIMITED

---

To the Shareholders:

The Board of Directors submits herewith Consolidated Balance Sheet with statements of Consolidated Profit and Loss and Earned Surplus for the year ended December 31, 1942, certified by the auditors.

After providing for all expenses, depreciation (including special depreciation under certificate of the War Contracts Depreciation Board) and taxes, the manufacturing profits, with those of subsidiary companies, amounted to \$4,724,061.95. Adding the income from investment securities and profits from sales, which combined amounted to \$81,876.12, the total profits for the year were \$4,805,938.07, equal to \$6.68 per share of the combined issued shares of preference and ordinary stock, compared with \$6.17 per share for the previous year, \$5.92 for 1940 and \$6.51 for 1939.

**DIVIDENDS**—During the year the preference shares under their participating rights shared equally with the ordinary shares. Four quarterly dividends at the rate of 75c per share, equal to \$3.00 per annum, were declared on both preference and ordinary shares of the Company.

**PENSION PLAN**—From the profits of the year your Directors have authorized, subject to confirmation by the shareholders, the transfer of \$300,000 to the Trustees of the Pension Trust Fund.

**CONDITIONS**—Throughout the year Blast Furnaces and Open Hearth Departments operated at maximum capacity. Every effort was made to ensure that the fullest measure of support was given to the war programme. Your Company's basic steel production was supplemented by substantial purchases of ingots, blooms and billets, which enabled the finishing mills to operate at an increased rate.

Record figures for both production and sales were again established in the year just closed. Contrasted with 1939, the last pre-war year, which was almost the best in the history of the Company up to that time, total dollar sales (excluding coke and by-products) showed an increase of 120%, and the tonnage of corresponding finished goods shipped increased 112%. Under price stabilization regulations, the margin of profit per unit in the case of many products declined as the result of advancing costs. Total profits were maintained by the increase in tonnage shipped and proportionately greater sales of special quality and more highly manufactured products. Following the report of the Directors appears in chart form a comparison of sales in value and tonnage, also net profits realized, for the years 1939 to 1942 inclusive. It provides striking evidence of the unusual expansion that has occurred due to the increased demands of the war.

The allocation of steel under orders of the Steel Controller gave preference to the production of plates and shell forgings, which, combined, absorbed a tonnage of ingots equal to practically four-fifths of the maximum produced during any pre-war year. It will be appreciated, therefore, that had it not been for the additions made to your steel-making capacity, other finishing departments would have been unable to operate except on an extremely restricted schedule. The essential character of the wide range of products manufactured by your Company determined the rate of finishing operations of the separate departments. Those producing such products as galvanized and barbed wire, farm and chain link fencing, galvanized sheets, etc., suffered seriously due to the necessity of conserving supplies of both steel and zinc. The varied types of processing equipment owned by your Company enabled it to produce a wide range of products needed for the war. The tonnage of steel devoted to prime war requirements, and to essential transportation and other civil needs of high priority, absorbed over 90% of the total steel production. Elsewhere in the report appears a partial list of "STELCO" products contributing to Canada's war needs. Your Company is the largest Canadian producer of alloy steels, including armour-piercing quality, and a wide range of special grades made to exacting specifications.

In view of the fact that your Company has unused rolling capacity even in excess of its expanded steel production, the Government is advancing funds for the installation of a 65-ton electric furnace with additional soaking pits, thereby increasing annual ingot capacity by 75,000 to 100,000 tons, depending upon the character of the steel made. It is expected that the new furnace will be ready to operate in May.

Including subsidiary companies, total wages and salaries disbursed during the year amounted to \$17,742,000.

**PLANTS**—Notwithstanding the continuous operation of many departments, and the shortage of manpower, every effort was made to maintain all properties up to the usual standard. While there were no expenditures of major importance for new plant, the expanding demands for some war products and the necessity for conserving manpower encouraged certain capital investments, either for purposes of increased capacity or improved manufacturing efficiency.

At Hamilton Works a third unloading bridge was installed to provide better despatch in connection with receipts of water borne ore and coal. Additional boiler and blowing capacity, a unit for "bonderizing" light sheets, and annealing furnaces for special shell steel, comprised the more important items. At the finishing plants, heading, forging, threading and wire drawing equipment, besides tool room facilities were provided, and electrical sub-station capacity enlarged. The heavy demand for welding wire also required the expansion of facilities at Dominion Works.

## THE STEEL COMPANY OF CANADA, LIMITED

---

Over the past four years capital investment in new plant has amounted to practically \$16,000,000. These expenditures, combined with the important outlays on new plant authorized by your Directors during the immediate pre-war period, made it possible to finish and ship during the past year a tonnage over double that reached during any pre-war year, a record from which much satisfaction may be derived as adding greatly to the extent of your Company's contribution to the war effort.

Owing to the centralized character of your Company's plant investment, and other obvious considerations, your Directors deemed it advisable to insure the most important plants of the Company under the War Risk Insurance Act.

**ONTARIO FORGINGS LIMITED**—This subsidiary was formed to operate, on behalf of the Department of Munitions and Supply, a new plant erected by the Government for the manufacture of shell forgings. Production was maintained at full capacity practically throughout the year. As our original proposal envisaged the organization and operation of this Company without fee, no profits have been taken into the consolidated accounts pending final adjustments with the Government departments interested.

**MINING PROPERTIES**—Ore and coal mines increased production, and operations at all properties were maintained at a high rate throughout the season.

**EMPLOYEE RELATIONS**—Your Directors welcome the opportunity afforded by this Annual Report to pay tribute to the loyalty and devotion to duty shown by the employees of the various plants of the Company. Though operations in many departments have been continuous, day and night, since the outbreak of war, all ranks have shown a keen recognition of their war responsibilities, and by their steadfastness have enabled the Company to set up new production records of which all have just reason to be proud.

As the shareholders are aware, the Company has established a Pension Plan and a Sickness and Benefit Plan—the latter including Group Insurance—for the protection of its employees. The Pension Plan, to which no contributions are required from the employees, has provided to date pensions aggregating \$831,252, to a total of 324 former employees, of whom 147 were in receipt of pensions at the date of this report. The capital sums turned over irrevocably to the Trustees for the support of the Pension Fund (including the \$300,000 allocated from the profits of the year) have reached a total of \$3,243,648.

Under the Sickness and Benefit Plan, supported jointly by the Company and the employees, payments were made during the year in 1,043 cases of sickness, while 67 death claims were paid under the group insurance which forms part of the plan. The disbursements for the year amounted to \$108,690.

Vacations with pay were granted during the year to 3,779 pay-roll employees of five years' service or longer, at a cost to the Company of \$162,155.

A special Christmas bonus of \$25 was granted to all wage earners of six months' service or longer, with proportionate amounts to new employees, involving a total payment of \$171,800.

Employees of the Company, men and women, to the number of 1,100, have enlisted in the active services. It is with sincere regret that your Directors report the loss of seven who have given their lives to the cause.

Employees in the service of the Company six months prior to the outbreak of war and who enlisted in the overseas forces are entitled to the privileges of the Military Service Plan. Under this plan their rights and standing in the Pension, Benefit and Group Insurance Plans are maintained at the expense of the Company. They also receive two weeks' pay at the time of enlistment. Upon return to civil life each employee will receive in cash the equivalent of 15% of the amount of his annual earnings at time of enlistment for the period of his military service up to a maximum of \$250 per annum. In the event of death the amount accumulated to his credit is payable to his beneficiary. At the close of the year this rehabilitation fund, less payments already made, amounted to \$122,056.

Your Directors are especially proud of the long service records of so many of the Company's employees. There are 1,011 with a service record of 25 years or more, 688 with 20 to 25 years, 961 with 15 to 20 years, and 657 with 10 to 15 years. Employees who complete 25 years of continuous service with the Company, qualify for membership in the "Quarter Century Club," and are then presented with gold watches suitably inscribed. During the year 123 new members qualified, bringing the total membership of the Club to 1,115 including pensioners now living.

The employees have also made a splendid showing in their support of Canada's War and Victory Loans and Savings Certificate campaigns. During the present war to date their subscriptions for Bonds have totalled \$2,901,340, while purchases of War Savings Certificates have amounted to \$321,558.

For many years your Company has afforded means of collective bargaining with its employees through the medium of its Employee Representation Plan. Members of a Works Council elected by secret ballot hold meetings monthly, at which matters affecting wages, working conditions, etc., are discussed. Minutes of the

# THE STEEL COMPANY OF CANADA, LIMITED

meetings are posted in the various departments for the information of all employees. In addition, there are separate committees which deal with safety measures as well as suggestions for increased production, improvements in methods, tools, and processes, for which prizes are offered by the Company.

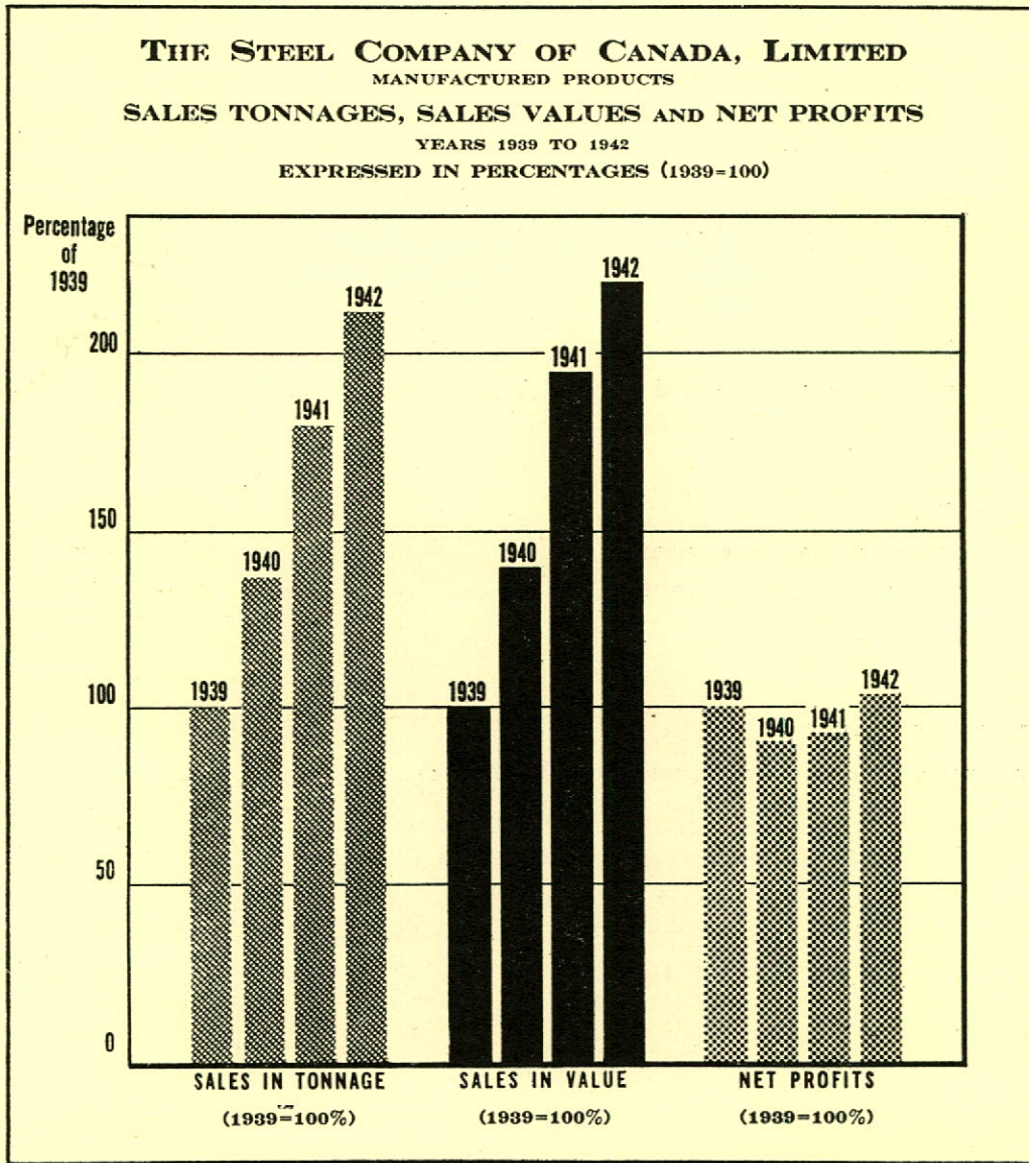

**SHAREHOLDERS**—The Preference stock of the Company is held by 2,651 shareholders, and the Ordinary stock by 6,249. Since 808 hold stock of both classes, the net total number of shareholders is 8,092. The average per shareholder is 89 shares, 84% holding less than 100 shares each. Shareholders who are resident in Canada represent 92%.

The pressure of wartime problems and demands continue to bear heavily on officers and staff. By the results accomplished they have made a fine contribution to the war effort, and your Directors extend to them on their own behalf and that of the shareholders sincere appreciation and thanks.

Submitted on behalf of the Board of Directors.

ROSS H. McMASTER,  
President.

Hamilton, Ontario, February 27, 1943.
