To The Shareholders of Abitibi Power & Paper Company, Limited:

This is the first report on the operations of the Company and its subsidiaries to be published since the receivership ended. It is therefore a document of some historic importance. It marks the beginning of a new era in the history of the Company; it is being published at the opening of what should be a great era in the history of pulp and paper-making in Canada.

The Company is a major unit in the Canadian pulp and paper industry. In 1946, 14.7% of all the newsprint produced in Canada was manufactured in the Company's mills. The well-being of the Company is therefore of major importance to the whole industry and hence to the whole Canadian economy.

It seems fit and proper that at this time a tribute be paid to the Receiver and Manager who for almost 14 years guided the destinies of the Company through the stormiest years the world has ever known. Mr. G. T. Clarkson faithfully conserved the assets of the Company in times of great difficulties and so made possible the building of a new organization upon the foundations of the old.

The resignation of Mr. L. R. Wilson, for many years Vice-President and Managing Director of the Company, who retired as of May 1st last, was accepted with great regret.

### ARNINGS

The consolidated statement of profit and loss has been prepared in a form to show the results of the operations from May 1st, 1946, the date on which the present Board of Directors assumed responsibility for the Company's affairs.

For the year ending December 31st, 1946, profits were \$5,600,205.61, of which \$1,453,652.87 were realized during the first 4 months of the year under receivership. This latter amount was credited to deficit account as at the termination of receivership on April 30th, 1946. The remainder, \$4,146,552.74, was realized from operations conducted under the present Management and has been credited to earned surplus as shown on the Balance Sheet.

The sharp increase in the rate of earnings was due to substantial increases in the prices of newsprint and sulphite pulp and to an increased rate of production at all the Company's mills since May 1st, 1946.

The accompanying chart shows the distribution of the sales dollar received by the Company during the year. It should be noted that out of every dollar paid to the Company by its customers 16.66 cents were provided for Income and Excess Profits Taxes.

### ALANCE SHEET . . .

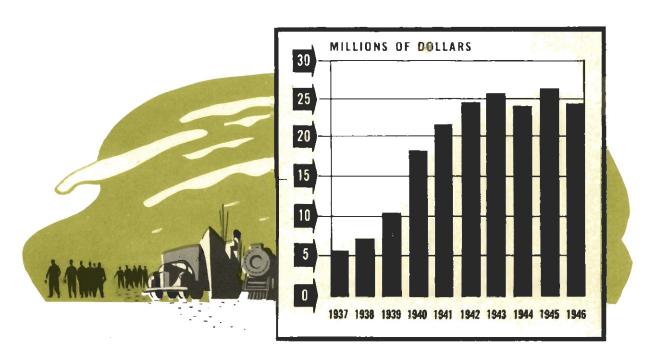

On taking office the Directors considered that, in view of all the circumstances, it was essential that a report be obtained from a competent firm of engineers on the values of the Company's fixed assets (not including timber areas) as at April 30th, 1946. Messrs. Coverdale & Colpitts, Consulting Engineers of New York City, were engaged to undertake this work and the values of the properties, plant and equipment have been restated on the books at the valuations made by them. In the accom-

panying financial statements and in the notes and exhibits thereto more detailed reference is made to this restatement of values.

On referring to these statements and the report of the Company's auditors, Messrs. Price, Waterhouse & Co., it will be noted that by resolution of the Directors the consolidated deficit resulting from operations to the end of the receivership period on the 30th April, 1946, amounting to \$12,227,635, was charged to surplus arising from the restatement of the book values of the properties, plant and equipment as at the 30th April, 1946, and the balance of \$8,197,419 of such surplus was applied in writing down the consolidated gross book values of timber concessions, agreements and licences and waterpower rights.

### ORKING CAPITAL.

The following chart shows how the working capital of the Company has increased in recent years.

It is evident that the increased activity of business in general as a result of the war contributed in a decisive way towards establishing an adequate working capital position. Beginning from so sound a base it will be possible for the present Management to undertake the reconstruction of the Company in all its phases, human, financial and physical, with every prospect of success.

# EFUNDING OF FIRST MORTGAGE 5% BONDS DUE 1965

The problem of reducing the funded indebtedness of the Company and of bringing the interest rate down to the current level for sound industrial bonds has occupied the attention of the Directors for many mouths. By the time this report is distributed the refunding of the Company's bonded indebtedness will have been substantially accomplished.

This operation was made possible by the fact that adequate working capital was available, a part of which was used to pay off approximately \$8,000,000 of the old 5% Bonds.

The redemption of the presently outstanding \$53,093,700 of 5% Bonds, and the issue of \$45,000,000 of  $3\frac{1}{2}\%$  Bonds will result in a saving in annual interest charges of \$1,079,685. When the mills are running at full capacity the interest on the new bond issue will amount to approximately \$2.00 per ton of product—a very moderate first charge on the gross earnings.

### AXES

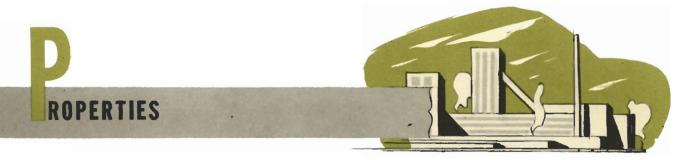

The income and excess profits tax problems of the Company, which have been the subject of a great deal of negotiation with the Dominion Government in recent years, have been settled. The Company's standard profits have been fixed and all such taxes owing have been paid up to and including the year 1945.

Of the total profits for the year 1946, after providing for depreciation, depletion and bond interest, an amount of \$8,275,000, or about sixty percent., has been set aside as a reserve for income and excess profits taxes.

This very large sum is much more than interest on borrowed capital, provision for depreciation and the pension plan payment taken together.

It is to be hoped that the taxing authorities will find some means for lightening the burden of taxation on the industry so that there may be adequate funds available for development and research programmes and for the carrying out of enlightened reforestation and forest management policies.

Without progressive thinking and resolute action backed by adequate expenditures for the development of the industry there can be no guarantee that it will continue to play its present outstanding part in the economy of the nation.

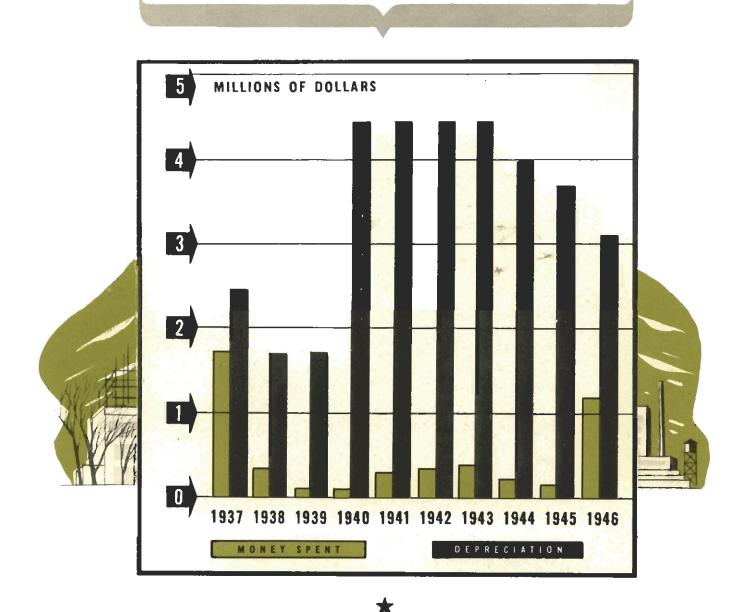

The principal mills of the Company and its subsidiaries with their capacities and type of product are listed below:

Location	Product	Annual Capacity
Inoquois Falls, Ont	Newsprint Wrapper,	.195.700 tons ) 12,000 tons
SMOOTE ROCK FALLS, ONT.	Bleached Sulphite	63,000 tons
STURGEON FALLS, ONT	Corrugating Board (b	) 30,000 tons
Sault Ste. Marie. Ont.	Newsprint Unbleached Sulphite	94,800 tons 30,000 tons
PORT ARTHUR, ONT.	Newsprint	88,000  tons
FORT WILLIAM, ONT	Newsprint	60,500 tons
PINE FALLS, MANITOBA	Newsprint	. 88,900 tons
Beaupré, Quebec Georgetown, Ont, Mille Roches, Ont.	Newsprint	95,800 tons
PORT ARTHUR, ONT. THOROLD, ONT.	Fine Papers	56,000 tons

- (a) Largely for inter-company use.
- (b) Formerly idle, this mill is now being converted to manufacture Corrugating Board.
- (e) Owned by Provincial Paper, Limited.

During approximately 14 years of receivership only minor sums were spent on capital additions to these plants and the Company therefore faces as to all of them the urgent need for modernization. The following chart shows how the amounts set aside for depreciation compare with the amounts spent on capital additions and improvements to the Company's properties during the past ten years.

### COMPARISON BETWEEN DEPRECIATION AND CAPITAL EXPENDITURE

The above will give some idea of the accumulated need for capital expenditures in the next few years.

With this situation before them, the Directors have authorized the first stages of a thorough modernization programme which includes the following projects which are presently under way:-

1. New grinder room at the Port Arthur newsprint mill.

2. New caustic extraction stage at the Smooth Rock Falls bleached sulphite mill

3. Sturgeon Falls mill conversion to the manufacture of corrugating board.

4. Increase in capacity of Iroquois Falls wrapper machine.

5. New storey on the Toronto office building.

In addition to the above, plans are in the process of being finally drafted for the speeding up of several of the mills, for the construction of a modern research laboratory and for the construction of much needed hotels, hospitals and office buildings in the Company's townsites.

## ROVINCIAL PAPER, LIMITED

All of the common stock of this company is owned by Abitibi Power & Paper Company, Limited.

During the year under review all of the previously outstanding 5½% bonds, amounting to \$2,740,000, and all of the previously outstanding 7% preferred shares, amounting to \$3,500,000, were redeemed. Funds for this purpose were secured partly from the liquid resources of Provincial Paper, Limited, partly from the

proceeds of sale of 250,000 common shares of Provincial Paper, Limited to Abitibi Power & Paper Company, Limited for the sum of \$4,000,000, and partly from the proceeds of sale to the public of a new issue of \$1,000,000 par value 4% Preference Shares of Provincial Paper, Limited.

The resignation, due to ill health, of Mr. S. F. Duncan, for many years President of Provincial Paper, Limited, is here recorded with great regret. Mr. Duncan's resignation made necessary a reorganization of the Provincial Board of Directors. This was carried out and the present Board consists of:—

The Officers of Provincial Paper, Limited are:-

President - - - - D. W. Ambridge

Vice-President - - - - - W. H. Smith

Secretary-Treasurer - - - - W. S. Barber

The need for extensive expenditures on the mills of Provincial Paper, Limited is urgent and a comprehensive programme of rehabilitation has been drawn up and is being put into effect. Funds for this purpose will be taken out of current earnings.

The results of the operations of Provincial Paper, Limited for 1946 are shown in the statements attached as part of this report.

# RODUCTION IN ABITIBI MILLS

Newsprint production for the year 1946 was the highest in the history of the Company. The following tables show the figures for production of the various products of the Company for the past 10 years.

All of the 19 paper machines are now in operation and are running at their highest practicable speed. Every effort is being made to further increase production and it is expected that if the necessary equipment becomes available newsprint production in 1947 will be substantially higher than it was in 1946.

In July, 1946, an idle machine for drying unbleached sulphite was brought into production at Sault Ste. Marie and produced a total of 13,416 tons during the remainder of the year.

		NEWSPRINT Paper	BLEACHED SULPHITE PULP	UNBLEACHED SULPHITE PULP
1	937 📫	485,217 TONS	57,734 TONS	12,494 TONS

1	946 📫	610,683	57,090	28,394

## ALES

A new wholly owned subsidiary of the Company, Abitibi Sales Company Limited has been incorporated for the purpose of handling the sales of the Company. The offices of this subsidiary will be in Toronto and in due course the present sales subsidiary, The G. H. Mead Company with headquarters in Dayton, Ohio, will be wound up. This procedure will place the direction of the Company's sales under the general management in Toronto.

### NDUSTRIAL RELATIONS

The Company has a long history of satisfactory relations with the various lahour unions involved in its operations.

In order to foster and promote the growth of sound employee relations a new plan of retirement income for all the Company's regular employees became effective on December 31st, 1946. This plan compares favourably with similar plans which are in effect for the benefit of the employees of other large pulp and paper manufacturing concerns in Canada.

Constant efforts are being made to implement a sound and broad personnel policy so that the employees of the Company may have available to them opportunities for progress, equitable remuneration and security in retirement.

The Directors wish to express their appreciation to all employees—whether in woodlands, on lakes and rivers, in pulp mills, paper mills, townsites, railroads, electric power developments, the many offices, or other branches of the Company's operations—of their loyalty and co-operation which have made it possible to achieve the results mentioned in this report.

On behalf of the Board,

Swambridg President

APPROVED ON BEHALF OF THE BOARD:		
Swambridge		

\$124,868,639,08

### OTES TO CONSOLIDATED BALANCE SHEET AS AT DECEMBER 31, 1946

As stated on the consolidated balance sheet the companies' properties, plant and equipment (exclusive of freehold timber areas, timber concessions, agreements and licenses, and waterpower rights) are shown at valuations as at April 30, 1946, made by Messrs. Coverdale & Colpitts, Consulting Engineers, New York, plus subsequent additions at cost. These valuations compare with the book values as at April 30, 1946, before adjustment as follows:

Particulars	Book values before adjustment	Valuations made by Coverdale & Colpitts
Gross values	\$ 99,324,967	\$108,376,000
Accrued depreciation	53,241,021	41,867,000
NET VALUES	<b>\$</b> 46,083,946	\$ 66,509,000

The amount of \$20,425,054 representing the surplus arising from the restatement of these assets at the valuations made by Messrs. Coverdale & Colpitts was applied in absorbing the deficit of \$12,227,635 in profit and loss as at the termination of the receivership of the company on April 30, 1946, leaving a balance of this surplus of \$8,197,419 which was applied in reduction of the consolidated gross book values of timber concessions, agreements and licenses, and waterpower rights.

The adoption for accounting purposes of the valuations made by Messrs. Coverdale & Colpitts as above, will not affect the amount of the provisions for accruing depreciation of capital assets allowable for income and excess profits tax purposes; the annual provisions allowable in respect of the assets existing at April 30, 1946, will for the next six years amount to approximately \$2,600,000 and will thereafter be reduced.

II The amount of \$18,377,232 shown on the consolidated balance sheet for the gross book values of timber concessions, agreements and licenses, and waterpower rights is comprised of the following:

On the basis of valuations placed thereon in the books of Abitibi	
Power & Paper Company, Limited, Manitoba Paper Company,	
Limited and St. Anne Power Company or their predecessor	
companies in 1927 or prior (less amounts written off)	\$23,996,446
At cost of acquisition in 1929 by purchase of the issued capital	
stock of Baie St. Paul Lumber Company, Limited	553,900
Excess of book value of investment in capital stock of Thunder	
Bay Paper Co., Limited over net tangible assets of that Com-	
pany, considered as representing cost of that company's timber	
concessions on a consolidated basis	2,024,305
	\$26,574,651

${\it Deduct}$ —Amount transferred from surplus arising from restate-	
ment as at April 30, 1946, of properties, plant and equipment	
at valuations made by Messrs. Coverdale & Colpitts, Consult-	
ing Engineers, New York	8,197,419

\$18,377,232

The First Mortgage 5% Bonds due 1965 are payable as to principal and interest in lawful money of the Dominion of Canada or, at the holder's option, in currency forming legal tender in the United States of America, or, at the holder's option, in sterling money of Great Britain at the fixed rate of exchange of \$4.86% to the pound sterling.

The First Mortgage 5% Bonds due 1965 contain a statement providing as follows:

"Of the principal of this Bond the amount of \$\frac{1}{2}\text{represents}\$

unpaid interest accrued on the first day of June, 1944, on the First Mort-

gage Gold Bond(s) Series A, 5%, due 1953, of the Company, in substitution for and in modification of which Bond(s) this Bond has been issued. The Taxation Division of the Department of National Revenue (Canada) has ruled that on payment at maturity or on prior redemption of this Bond such amount will be treated for purposes of Canadian Income Tax as income in the hands of the then holder.

Note: Amounts are as follows: \$1,000 Bond — \$522.727; \$500 Bond — \$261.36; \$100 Bond — \$52.27; \$50 Bond — \$26,136.

It has been currently indicated in the press that the Minister of Finance of the Dominion of Canada has announced that legislation is proposed to be passed which will change the ruling previously given upon which the above statement was based.

IV The 5% Preferred Shares are redeemable at, and in a liquidation, dissolution or winding up the holders of such shares are entitled to receive, the amount paid up thereon together with all unpaid cumulative dividends. Dividends upon these shares accrue from January 1, 1946, at the rate of 5% per annum upon the capital paid up thereon respectively from time to time; at December 31, 1946, such accrued and unpaid dividends amounted to \$47.

The Prior Preferred Shares are redeemable at, and in a liquidation, dissolution or winding up the holders of such shares are entitled to receive, \$37.50 per share together with all unpaid cumulative dividends. Dividends upon these shares accrue from January 1, 1945, at the rate of \$2.50 per share per annum; at December 31, 1946, such accrued and unpaid dividends amounted to \$250,000.

The Preferred Shares are redeemable at, and in a liquidation, dissolution or winding up the holders of such shares are entitled to receive, \$25.00 per share together with all unpaid eumulative dividends; dividends are to accrue from and after the next quarterly dividend date after the date on which the principal amount of the bonds shall have been reduced to or below \$35,000,000 or January 1,1947, whichever is the earlier, at the rate of \$1.50 per share per annum.

The Amended Indenture securing the outstanding First Mortgage 5% Bonds due 1965, which as stated in the balance sheet it is proposed to redeem on or about April 1, 1947, provides that no dividends are to be declared or paid so long as the principal amount of such bonds outstanding thercunder shall exceed \$35,000,000; and when the principal of the bonds shall have been reduced to \$35,000,000, and so long as any bonds are outstanding thercunder, no dividends shall be declared or paid unless the consolidated net current assets as defined by the Amended Indenture exceeds \$17,500,000 by an amount sufficient at least to provide for such dividends, after setting aside the amounts required to be set aside under Clause 48 of the Amended Indenture. These restrictions will become inoperative on the redemption of the First Mortgage 5% Bonds due 1965, and the Deed of Trust and Mortgage to be executed by the Company in connection with the \$45,000,000 principal amount of  $3\frac{1}{2}$ % First Mortgage Serial and Twenty-year Bonds to be dated April 1, 1947, will contain certain restrictions on the payment of dividends and redemption of capital stock.
