#### **REPORT TO SHAREHOLDERS**

The year ending June 30, 1973 was very good for Alberta Eastern. The comparative statistics for the years 1971, 1972 and 1973 presented in the highlights of this report demonstrate this. There are a number of factors which should contribute to continued growth in the future and these are explained in more detail below:

#### FINANCIAL

Gas and oil sales revenue after royalty increased from \$859,000 in 1972 to \$1,819,000 in current fiscal year, an increase of 112 percent. Cash flow from operations increased from \$263,000 to \$1,247,000 or 375 percent.

Net earnings after provision for deferred income tax and before an extraordinary profit on the sale of Redcliff properties, increased from \$62,000 to \$665,000 or from 2¢ to 15¢ per share.

As a result of property sales and equity financing, working capital increased from a deficit of \$1,157,000 to a surplus of \$3,633,000.

#### GAS CONTRACT NEGOTIATIONS

In early August, 1973, the Company and Trans-Canada Pipe Lines Limited completed renegotiation of gas contracts covering lands in southeastern Alberta. Under the new terms of these contracts, the price rises from 19.75 cents to 26 cents per Mcf on November 1, 1973 and escalates 1 cent per Mcf annually thereafter. In addition, Milk River zone gas will be subject to price redetermination on November 1, 1975 and every two years thereafter. Gas from other zones, the Medicine Hat, Second White Specks and others will be subject to redetermination on November 1, 1974 and each odd numbered year thereafter. These revisions will apply to about 97 percent of the Company's gas sales.

These new terms are of great importance in view of the shorter price redetermination periods and the Alberta Government's policy to price natural gas at its commodity value in relation to competitive fuels.

As a result of these contract renegotiations, the proposed Tilley area development loan of \$3,000,000 from another buyer, which was dependent upon Alberta Government approval of certain provincial gas export permit revisions, has been cancelled by mutual agreement. Our Tilley area gas, which is on production, will be sold exclusively to Trans-Canada Pipe Lines Limited at the increased prices.

#### PRODUCTION

The Company presently has about 60 shut-in gas wells with a deliverability in the order of 10 million cubic feet per day ready for connection and production. These wells will be added to the producing systems by November 1, 1973. In addition, development has been commenced in the Patricia Area and is expected to go on stream about January 1, 1974 at about 5 million cubic feet per day of which the Company's share is 62%. As a result of the connection of additional wells and the gas price change, it is expected that the Company's net cash flow for the next fiscal year will substantially exceed that of the year ended June 30, 1973.

Under the new terms of our gas contract with Trans-Canada Pipe Lines Limited, the Company plans extensive development in 1974 and 1975 of its present shallow gas holdings.

#### SASKATCHEWAN PROPERTIES

During 1973 the Company and partners drilled 15 additional widely spaced wells on these properties to satisfy Saskatchewan Government work requirements and to further evaluate the property for potential development. In the course of this drilling, the Company and partners earned a further 13,900 acres of natural gas rights; bringing our net holdings to 198,000 acres in Saskatchewan. The results obtained from these new wells were very satisfactory. In our opinion, the majority of our Saskatchewan lands is economic to develop at current Alberta gas prices.

#### GENERAL EXPLORATION

In the general foothills region of Alberta and British Columbia your Company now holds an interest in 433,000 gross acres, as shown on page 4. In this project, the program may be expanded to spend an estimated \$15,000,000 gross for lease rights acquisition and exploratory drilling costs, in which the Company earns a 15 percent Working Interest by paying 7.5 percent of the program costs. Two deep wells, KM AEG Chiefco Brazeau 7-18-43-17-W5 and KM AEG Mast d-80-A are in progress, the former nearing total depth at present. The latter well gave multiple gas shows on drillstem test, which are being evaluated by completion of the well. Two additional wells are planned for the second quarter of the fiscal year, one of which will be located on lands in the Grizzly area.

The Company holds working interests of 100 percent in over 16,000 acres in the East Drumheller area and has a further 45,000 acres under option in which it can earn 50 percent working interest by performing certain drilling operations. Other acreage is available for further expansion of the play. All of these lands are shown on the general map of Alberta, N.E. British Columbia and Saskatchewan.

#### RESERVES

The Company's latest outside engineering reserve report by James A. Lewis Engineering Co. Ltd., September 1, 1972, estimated Company reserves at 896 billion cubic feet of proven gas reserves and 897 billion cubic feet of probable reserves. Since that date, in the order of 40 successful extension or stepout wells have been drilled on our shallow gas lands, which results would have the effect of changing probable reserves to proven reserves and in some cases to place certain lands which had been given neither proven or probable reserves into the proven and probable category.

The Company has an interest in two oil wells which have been assigned reserves of 75,000 barrels by Company engineers.

#### FOREIGN

The Company has taken a nominal 5 to 10 percent position in several consortia who are actively engaged in attempting to acquire exploration licences in various sedimentary basins outside of Canada. Our goal is to gain general exposure in new frontier areas through this approach.

#### GENERAL

The Directors are pleased to recognize the fine support given by the employees of Alberta Eastern Gas Limited over the past year. A management group, all with previously proven capabilities in the industry, has been recruited and will be expanded as the Company's activities grow.

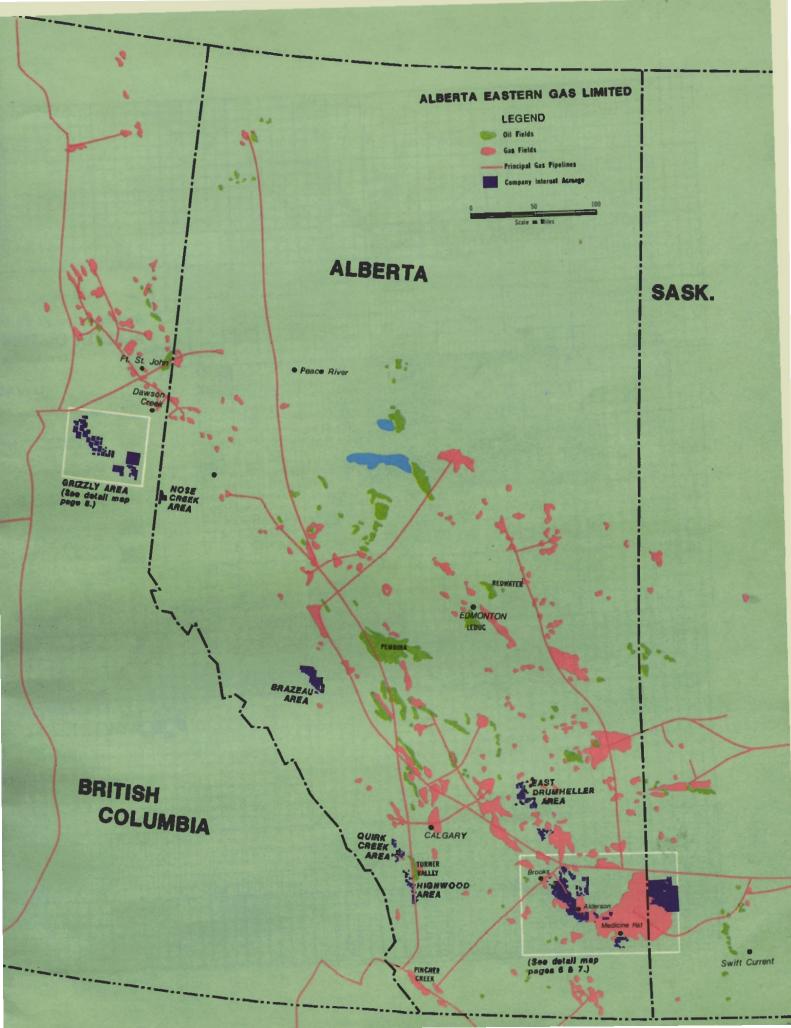

As at August 10, 1973 the Company had 1,671 registered shareholders of which 1,626 were Canadian residents who held 4,662,782 common shares of the Company, representing about 96 percent of the stock outstanding.

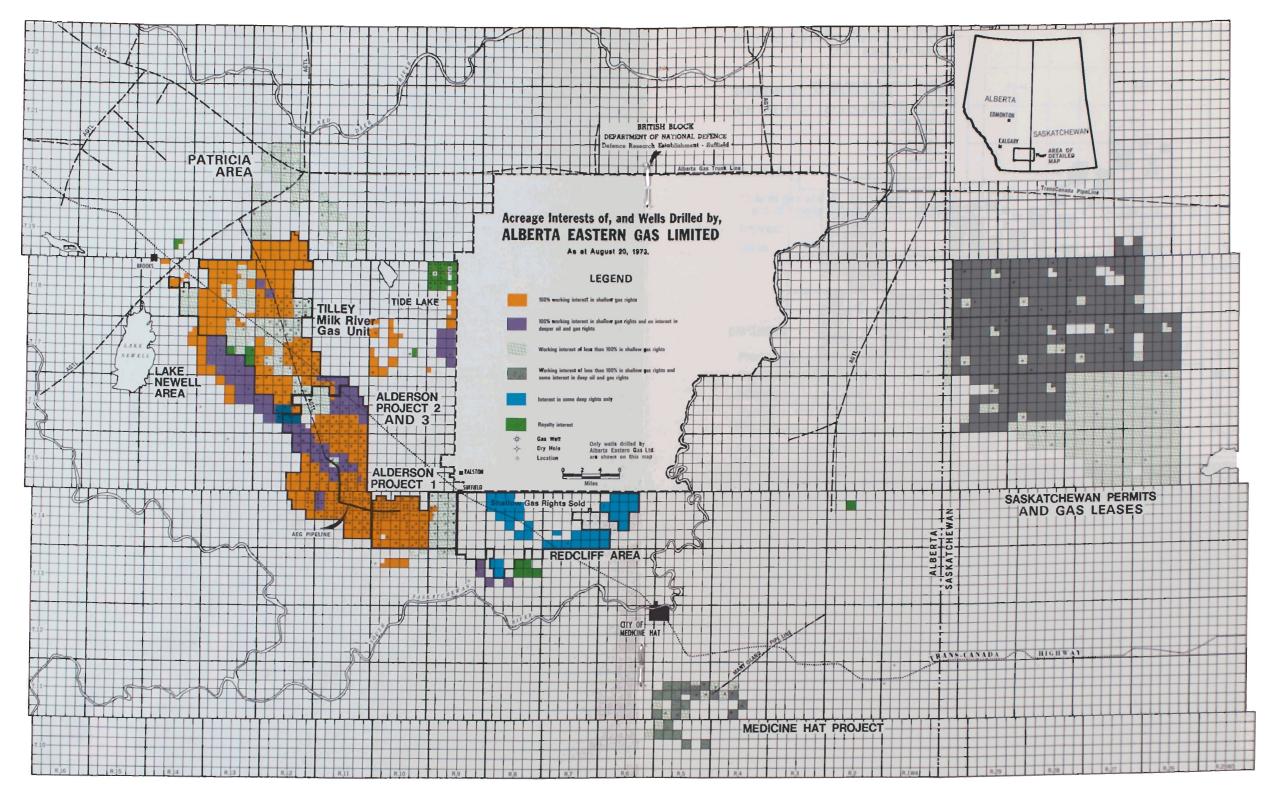

We are looking forward to continuing progress in all areas in the future.

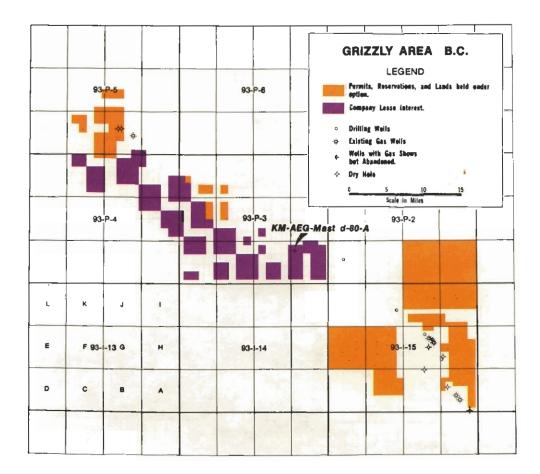

On behalf of the Board of Directors,

F. G. Vetsch, President and Chief Executive Officer

Calgary September 20, 1973

#### **AUDITORS' REPORT**

#### To the Shareholders Alberta Eastern Gas Limited

We have examined the balance sheet of Alberta Eastern Gas Limited as at June 30, 1973 and the statements of earnings, retained earnings and source and application of funds for the year then ended. Our examination included a general review of the accounting procedures and such tests of accounting records and other supporting evidence as we considered necessary in the circumstances.

In our opinion these financial statements present fairly the financial position of the company as at June 30, 1973 and the results of its operations and the source and application of its funds for the year then ended, in accordance with generally accepted accounting principles applied on a basis consistent with that of the preceding year.

Calgary, Alberta August 23, 1973. RIDDELL, STEAD & CO. Chartered Accountants

#### NOTES TO 1973 FINANCIAL STATEMENTS

#### NOTE 1 ACCOUNTING POLICIES

The company follows the full cost method of accounting whereby all costs of exploration for and development of its gas and oil reserves are capitalized by project area. Costs associated with producing areas are amortized using the unit of production method based upon estimated recoverable reserves of gas and oil within each project area as determined by the company and its consulting engineers. If exploration activities within a project area prove unsuccessful, costs accumulated therein are written off to income.

#### NOTE 2 CAPITAL STOCK

During the year, the company sold 940,000 common shares to the public for \$6,777,400 (before share issue expenses of \$63,639), and issued 24,000 common shares for \$100,800 on exercise of options.

At June 30, 1973, 36,000 common shares were reserved under stock options granted to employees. The options are exercisable in varying amounts at \$4.20 to \$4.50 per share until 1976.

#### NOTE 3 INCOME TAXES

The company provides for deferred income taxes to the extent that current income taxes are reduced or eliminated by claiming capital cost allowances and exploration and development costs in excess of the amounts provided for depreciation and depletion in the financial statements.

#### NOTE 4 REMUNERATION OF DIRECTORS AND SENIOR OFFICERS

Remuneration paid during the year to directors and senior officers totalled \$118,320. No directors' fees were paid.
