NATURAL GAS
COMPANY LTD**

1979 ANNUAL REPORT

ALBERTA NATURAL GAS COMPANY LTD

240 - 4th Avenue S.W.,
Calgary, Alberta T2P 0H5

CORPORATE INFORMATION

ANNUAL MEETING

THE ANNUAL MEETING of Shareholders will be held in the Bonavista Room, Calgary Inn, Calgary, Alberta, on Friday, the 25th day of April, 1980, at 9:30 a.m.

The notice of meeting and proxy form are being mailed with this report to all shareholders of record.

COVER: Aerial view of Flathead Ridge through the Canadian Rockies, in southeast British Columbia, over which Alberta Natural's pipeline traverses.

DIRECTORS

John F. Bonner,
San Francisco, California
Executive Consultant, Director, former President and Chief Executive Officer, Pacific Gas and Electric Company

Harry Booth,
Calgary, Alberta
President and Chief Executive Officer, Alberta and Southern Gas Co. Ltd.

D. R. Fenton,
Calgary, Alberta
Senior Vice-President, Alberta and Southern Gas Co. Ltd.

H. L. Lepape,
Los Angeles, California
President, Pacific Interstate Transmission Company

R. A. MacKimmie, Q.C.,
Calgary, Alberta
Partner, MacKimmie Matthews

C. O. Nickle,
Calgary, Alberta
President, Conventures Limited

R. H. Peterson,

REVIEW OF OPERATIONS

FINANCIAL

The Company's net income for 1979 was \$10,057,000 or \$8.43 per common share outstanding. The comparable net income for 1978 was \$7,271,000 or \$6.10 per common share.

Operation of the new ethane facility and profits arising from participation in the downstream sale of natural gas liquids contributed substantially to the 38% increase in net income over 1978.

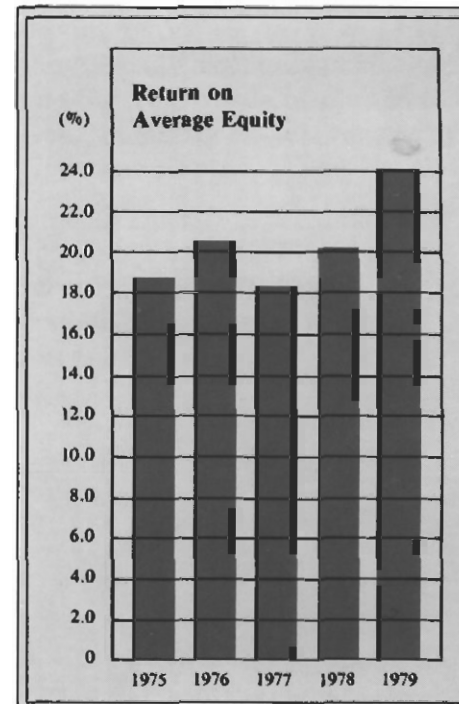

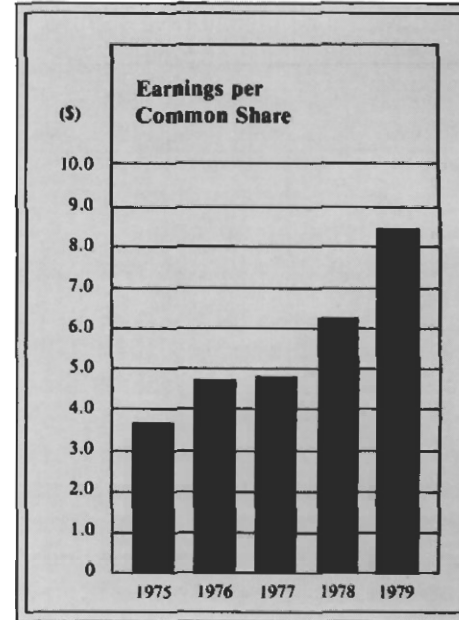

On March 5, 1980, the Board of Directors resolved to recommend to the shareholders of the Company that the outstanding common shares of the Company be split on a five for one basis. It is believed that this action would result in a broader and more diversified market for the Company's common shares. The split would have no effect on any shareholders' proportionate equity in the

*The top of the water cooling tower
between fan housings.*

Company. At the annual meeting on April 25, 1980, the shareholders will be asked to approve such recommendation.

The annual dividend rate on Alberta Natural's common shares was increased to \$3.40 per share from \$2.40 per share effective with the quarterly dividend payment in September, 1979, and was further increased to \$4.20 per share effective with the quarterly payment in March, 1980.

At the Annual Meeting of Shareholders in April, 1979, a special resolution was passed authorizing the Company's application for a Certificate of Continuance to continue as required by the Canada Business Corporations Act and the revision to certain by-laws of the Company to conform with that statute. The Certificate of Continuance was issued May 14, 1979.

EXTRACTION OPERATIONS

On March 2, 1979, production at the Cochrane plant was reduced as a result of a fire in a large process heater. Repairs to this equipment required replacement of all of the internal elements. In addition, on March 13, in an unrelated incident, a mechanical failure of a residue gas compressor coupling occurred which required a complete plant shutdown. The mechanical failure was repaired and that portion of the plant was returned to service on April 1, 1979. The entire plant was back in full operation on April 14, 1979. Despite these problems, the plant achieved an operating efficiency of 91% for the year 1979.

The increase in average daily production during this year, indicated by the graph, was attributable to the increase in quantities of gas available for processing, which more than offset the reduction due to the operating problems.

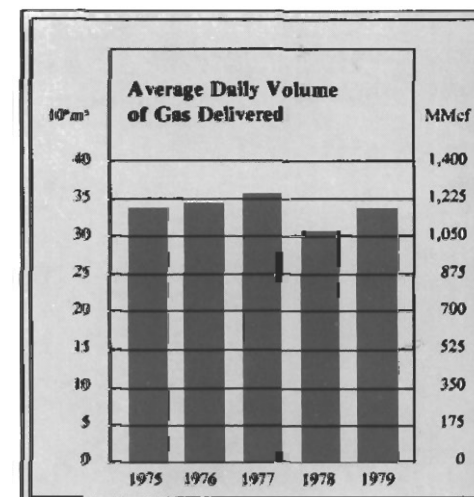

Capital expenditures for additions and modifications to the Cochrane plant in 1979 amounted to \$4,864,000.

PIPELINE OPERATIONS

The pipeline transmission system operated successfully over the past year with turbine driven compressor units achieving over 99% availability, and maintaining record operating periods between major overhauls.

As indicated by the graph, during 1979, daily deliveries of natural gas averaged $33.94 \times 10^6 \text{ m}^3$ (1,200 MMcf) compared with $30.57 \times 10^6 \text{ m}^3$ (1,079 MMcf) in 1978. The increase in average daily deliveries resulted from an increase in requirements in market areas serviced by the major shipper, Alberta and Southern Gas Co. Ltd.. The 1979 level of delivery represented an annual quantity of approximately 104% of its nominal licenced volume compared to 92% in 1978.

Capital expenditures for minor additions and modifications to the pipeline during 1979 amounted to \$209,000.

FOOTHILLS PIPELINE PROJECT

During 1979, the National Energy Board heard several applications requesting authority to export surplus Alberta gas and released its decision in December. Pan-Alberta Gas Ltd. was authorized to export natural gas through the pre-built sections of the Alaska Highway gas pipeline project. Your Company's affiliate and major transmission customer, Alberta and Southern Gas Co. Ltd., was also an applicant at the hearings and received authorizations to extend two of its export licences which expire in 1985 and 1986, by two years and one year respectively. Alberta and Southern is also supporting Pan-Alberta's project with an agreement to sell to Pan-Alberta up to 5.6 10⁶m³ (200 MMcf) per day. Deliveries under this agreement are expected to commence in late 1980, or early 1981, and to continue for six years.

The management of construction and the operation of the southeastern British Columbia portion of the pre-built western leg of the Alaska Highway project will be undertaken by Alberta Natural. The pre-building phase involves approximately 88.5 km (55 miles) of loop connected to Alberta Natural's existing pipeline system. The new facilities will be owned by Foothills Pipe Lines (South B.C.) Ltd.. A 49% interest in the shares to be issued by that company will be owned by Alberta Natural. During the year, representatives of Alberta Natural participated in National Energy Board hearings relating to the tariff and to preliminary expenditures with respect to the project.

Phases I, II, and III of the Foothills Pipe Lines (Yukon) Ltd. tariff hearing before the National Energy Board have been completed and decisions rendered. The Phase I and II decisions approved in principle the form and content of a full cost of service tariff including both a Gas Transportation Agreement and an Operating Agreement between Foothills (South B.C.) and Alberta Natural. The Board's Phase III decision related to the appropriate incentive rate of return for the Foothills segment companies. Phase IV dealt primarily with the financing of the "pre-build" facilities including possible project modifications that may be necessary for successful financing. This phase was heard during February, 1980, and no decision has yet been rendered.

Major field work conducted during the year on the Foothills project in southeastern British Columbia included surveying and an archaeological study. Company personnel were involved with the Foothills group of companies, the Northern Pipeline Agency and the Province of British Columbia in many areas including the preparation of environmental and socio-economic terms and conditions which should be finalized early in 1980.

PERSONNEL

Following the Annual Meeting in April, 1979, Mr. J. E. Goudie was appointed to the position of Senior Vice-President and Mr. G. T. Noland was appointed Vice-President, Planning and Development.

The Company believes that the well-being of its employees is of paramount importance in its effective operations. In 1979, the employees of Alberta Natural through their skill, expertise, and dedication have once again contributed significantly to the progress of the Company. Awards won by the operations departments in 1979 reflect the concern for safety that is of primary interest to both management and employees. The Canadian Natural Gas Processors' Association award representing eight consecutive years without a lost-time accident was won by Cochrane plant personnel. Safety awards were also presented from the Canadian Gas Association (for both the pipeline and Cochrane personnel) for an accident-free safe driving record for 1979, and from the Alberta Occupational Health and Safety Division of the Labor Department for no lost time at the Cochrane plant.

Pipeline operating personnel also achieved a commendable safety record during 1979 having completed four years without a lost-time accident.

SUMMARY OF ACCOUNTING POLICIES

December 31, 1979

OPERATIONS:

Alberta Natural owns and operates a 36-inch pipeline from a point near Coleman, Alberta to Kingsgate, on the British Columbia-Idaho border for the transportation of gas owned by Alberta and Southern Gas Co. Ltd. and Westcoast Transmission Company Limited. Alberta Natural also owns and operates an extraction plant near Cochrane, Alberta, which removes propane and heavier liquids (NGL) and ethane from the gas stream of Alberta and Southern.

The gas transportation contract with the gas shippers and the sale agreements with the purchasers of NGL and ethane provide for the full recovery of all operating expenses, depreciation, property and income taxes, together with a return on the unrecovered investment. In addition, Alberta Natural is entitled to 25% of the cumulative net marketing profits arising from the sale of the NGL by each of the buyers, Dome Petroleum Limited and Amoco Canada Petroleum Company Ltd., and a share of the annual net profit realized by the buyer, The Alberta Gas Ethylene Company Ltd., on the sale outside Alberta of ethane surplus to ethylene plant requirements.

REGULATION:

The gas transmission segment of Alberta Natural's operations is subject to the National Energy Board Act and to the jurisdiction of the Board created thereby. This Board regulates accounting matters, export of gas, construction and operation of gas pipelines and rates, tolls and tariffs charged for such operations. In response to a request from the Board, Alberta Natural has filed material to permit the determination of the justness and reasonableness of its tariff. The Board has set March 11, 1980 as the date that it will commence its public inquiry into this matter.

PLANT, PROPERTY AND EQUIPMENT:

Plant, property and equipment is carried at cost.

An allowance for funds used during construction is capitalized for plant under construction. The rate

used is normally equivalent to the annual rate of return. Any such allowance recorded is included in other income.

Gas transmission plant is being amortized at an annual rate (approximately 5.14%) equal to the proportion that the annual volume of throughput authorized for export by the shippers bears to the total volume remaining under the licences granted by the National Energy Board.

Depreciation on the portion of the extraction plant used for the removal of NGL is calculated at an annual rate of 2.5% on a straight-line basis. The ethane portion of the extraction facility is being depreciated at an initial rate of approximately 6.25% decreasing to 1.25% after 15 years.

INVENTORIES:

Inventories of materials and supplies are carried at cost.

INCOME TAXES:

Alberta Natural follows the tax allocation basis of recording income taxes on all income except for gas transportation and liquids extraction operations which are subject to cost of service contracts. Income taxes are provided on this source of income only to the extent that they are included in costs of service under such contracts.

UNAMORTIZED DEBT EXPENSES:

Debt expenses applicable to each series of bonds is being amortized over the term of such series.

UNAMORTIZED ORGANIZATION AND CAPITAL STOCK EXPENSE:

Organization and capital stock expense is being amortized over the life of the last expiring export licence (presently October 31, 1993).

DEFERRED CHARGES:

Project costs are initially recorded as deferred charges pending evaluation of the projects. Deferred charges applicable to projects which have been terminated are expensed.

NOTES TO THE FINANCIAL STATEMENTS

December 31, 1979

(Tabular amounts shown in thousands of dollars)

1. PLANT, PROPERTY AND EQUIPMENT:

	<u>1979</u>	<u>1978</u>
Gas Transmission Plant	\$ 54,812	\$ 54,656
Extraction Plant	61,905	57,132
Other Plant	2,631	2,623
Plant Under Construction	101	8
	<u>119,449</u>	<u>114,419</u>
Less: Accumulated Depreciation	41,141	35,307
Net Plant, Property and Equipment .	<u>\$ 78,308</u>	<u>\$ 79,112</u>

2. DEFERRED CHARGES:

	<u>1979</u>	<u>1978</u>
Foothills Alaska Highway Project ...	\$ 2,821	\$ 2,586
Unamortized debt expense	467	508
Unamortized organization and capital stock expense	108	116
Other	55	—
	<u>\$ 3,451</u>	<u>\$ 3,210</u>

Foothills Alaska Highway Project charges include Gas Arctic costs in the amount of \$1,923,000. These costs have been approved by the National Energy Board for inclusion in the rate base of the Foothills group of companies at such time as the costs are actually transferred to the books of account of these companies.

3. SHAREHOLDERS' EQUITY:

On May 14, 1979, Alberta Natural was continued as a corporation pursuant to the provisions of the Canada Business Corporations Act. Under the Act, shares cannot have a par value. Accordingly, shares previously with a par value are now designated as without par value.

The classes of shares Alberta Natural is authorized to issue consist of an unlimited number of preference shares, having such rights and privileges attached to them as the Directors may by resolution determine, and an unlimited number of common shares.

Restriction on the payment of cash dividends under certain circumstances are contained in the Deed of Mortgage and Trust securing Alberta Natural's bonds. At December 31, 1979 \$3,082,000 otherwise available for dividends was restricted in this manner.

4. LONG TERM DEBT:

First Mortgage Pipe Line Bonds:

	<u>Year Issued</u>	<u>Maturity</u>	<u>1979</u>	<u>1978</u>
5¼% Series A	1961	1986	\$ 7,065	\$ 8,152
8¼% Series B (\$6,000,000 U.S.) .	1969/70	1991	6,437	6,973
8½% Series C	1971	1992	9,000	9,750
			<u>22,502</u>	<u>24,875</u>
Less sinking fund instalments due within one year			1,623	1,623
			<u>\$20,879</u>	<u>\$23,252</u>

The Series A Bonds are payable in United States dollars. As provided by the gas transportation contract, Alberta Natural is required to accept from the gas shippers in substitution for an equal number of Canadian dollars, the number of United States dollars required to make the annual principal and interest payments on the bonds. Accordingly, the principal amount of the Series A Bonds and associated interest expense are recorded in Alberta Natural's accounts on the basis of the two currencies being equal in value.

The Series B Bonds are payable in United States dollars. The principal amount of the Series B Bonds is recorded in Alberta Natural's accounts at the amount of Canadian funds received on conversion of United States funds received on issue.

Sinking fund requirements amount to approximately \$2,337,000 (\$1,587,000 (U.S.) and \$750,000 (Cdn.)) in each of the years 1981 to 1984. The 1980 sinking fund requirement for the Series C Bonds has been provided for by the purchase and cancellation of \$750,000 principal amount of such bonds and consequently the liability for sinking fund instalments due within one year has been reduced by this amount.

Substantially all of the properties of Alberta Natural are pledged under the Deed of Mortgage and Trust securing the bonds.

5. CLASSES OF BUSINESS OPERATIONS:

At a duly convened Directors' meeting, the minutes of which have been recorded, the Directors of Alberta Natural have determined the following as the classes of business presently being conducted by the company:

	Natural Gas Processing		Pipeline Transport	
	1979	1978	1979	1978
Operating Revenue .	\$84,433	\$40,326	\$25,294	\$21,443
Operating Expenses:				
Operating and maintenance	65,836	32,038	14,443	10,714
Administrative	1,203	545	946	919
Depreciation	2,942	1,056	2,899	2,912
Property taxes	552	218	1,249	1,093
	<u>\$70,533</u>	<u>\$33,857</u>	<u>\$19,537</u>	<u>\$15,638</u>
Operating Income .	<u>\$13,900</u>	<u>\$ 6,469</u>	<u>\$ 5,757</u>	<u>\$ 5,805</u>

6. RELATED PARTY TRANSACTIONS:

Alberta Natural is related to Pacific Gas Transmission Company, which company owns 45% of Alberta Natural's outstanding capital stock. Pacific Gas Transmission in turn is a subsidiary of Pacific Gas and Electric Company, which company owns 53% of the outstanding capital stock of Pacific Gas Transmission. Alberta and Southern Gas Co. Ltd. is a wholly owned subsidiary of Pacific Gas and Electric Company. Significant transactions with these related companies, not disclosed in the accompanying financial statements, were as follows:

(1) Net charges for personnel and related administrative costs from:

	1979	1978
Alberta and Southern	\$ 1,298	\$ 1,118
Pacific Gas Transmission	108	100
Pacific Gas and Electric	16	13

(2) Charges for liquids extraction feedstock and fuel from:

Alberta and Southern	62,957	30,429
--------------------------------	--------	--------

(3) Net charge for transportation of gas to:

Alberta and Southern	13,026	12,288
--------------------------------	--------	--------

(4) Amounts outstanding at December 31:

Payable to:		
Alberta and Southern	7,700	6,029
Receivable from:		
Alberta and Southern	2,138	1,816

7. DIRECTORS AND OFFICERS:

At December 31, 1979 Alberta Natural had nine directors and eleven officers. Three of the officers were also directors. Directors' fees of \$42,300 were paid in 1979 (1978 - \$17,400) which represents the only remuneration received from Alberta Natural by the directors and officers. In respect of services rendered to it by some of its officers who are also officers of a related company, Alberta Natural pays a service charge to the related company.

8. COMMITMENT:

Alberta Natural will construct and operate the segment of the Foothills Alaska Highway Project in southeastern British Columbia parallel to the Alberta Natural pipeline and has undertaken to subscribe for 49% of the shares to be issued by Foothills Pipe Lines (South B.C.) Ltd., which company will own that segment of the Foothills Alaska line. The amount of this investment is not yet determinable.

9. CLASSIFICATIONS:

Certain of the prior year's figures, provided for purpose of comparison have been reclassified in conformity with the current year's presentation.

AUDITORS' REPORT

**To the Shareholders of
Alberta Natural Gas Company Ltd:**

We have examined the balance sheet of Alberta Natural Gas Company Ltd as at December 31, 1979 and the statements of reinvested earnings, income and changes in financial position for the year then ended. Our examination was made in accordance with generally accepted auditing standards, and accordingly included such tests and other procedures as we considered necessary in the circumstances.

In our opinion, these financial statements present fairly the financial position of the Company as at December 31, 1979 and the results of its operations and the changes in its financial position for the year then ended in accordance with generally accepted accounting principles applied on a basis consistent with that of the preceding year.
