# FIFTY-FOURTH ANNUAL REPORT OF THE DIRECTORS

# FOR THE YEAR ENDED 31st DECEMBER 1933

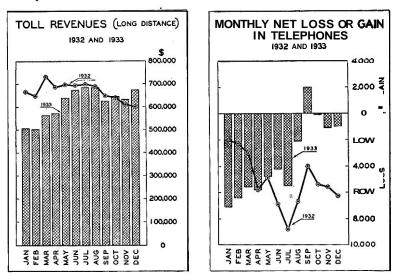

#### To the Shareholders:

Your Directors respectfully submit the following report of the Company's operations for the year **1933** and of its financial position at the end of the year.

There was a continued decrease in the number of telephones in use; 171,773 were **connected** and 213,602 disconnected, a net loss of 41,829 compared with the greater figure of 61,765 in 1932.

It is to be noted that in the first half of **1933**, the number of telephones fell off by **33,833**, and in the second half by **7,996**. This comparison shows not only an improving trend of business but points definitely to the time at which its effect was felt.

The trends of long distance use and revenues have been similar. The gross receipts for this service were less by **\$600,000** than in **1932**, but there was a definite improvement during the last quarter of **1933**.

Active sales work was continued and contributed in large measure to the improvement over **1932.** Thirty per cent of all new business secured was due to the co-operation of the general body of employees with the sales forces.

There were 671,139 telephones in service at the end of 1933, distributed as follows:—

Included in this total were 69,199 extension telephones.

Other telephone systems in Ontario and Quebec with which we interchange service now number 849, serving 137,170 telephones, a decrease of 6,610 during the year.

#### REVENUES

Local service revenue was \$26,955,759, a decrease of seven per cent compared with the year 1932.

Long distance revenue was \$7,400,371, a decrease of approximately eight per cent compared with the year 1932.

Miscellaneous revenues and revenue from outside investments were \$1,339,106, a decrease, after giving effect to certain adjust: ments, of twenty-seven per cent compared with the year 1932.

From all sources, the gross revenue of the year was \$35,-695,236, a decrease of eight per cent from the total of 1932.

#### EXPENSES

Decrease in the volume of business compelled a further spreading of available work, and all officers and employees are on part time, as well as subject to discount from pay. The result of these and other economies has been a reduction of approximately eleven per cent in telephone operating expenses which now include rent and miscellaneous deductions formerly classified as a deduction from gross income.

The net income available for dividend is \$4,329,442, or \$5.62 per share of average outstanding capital stock.

The reduction of dividend to \$1.50 per share made effective the first quarter of 1933 was continued throughout the year, making a total payment of \$6.00 per share as against \$7.25 in 1932. Notwithstanding the reduction in expense above mentioned it was necessary to draw upon surplus to the amount of \$292,277, to provide for the reduced dividend, which amounted to \$4,621,-719.

There has been a further charge to surplus of \$335,135 in connection with repayment of American loans, referred to elsewhere in this report. This, with small miscellaneous deductions, reduces surplus by \$628,596.16.

#### FINANCING

Other than the sale of stock to employees on the instalment plan, no permanent financing was undertaken in **1933**; **743** shares of capital stock, of a total par value of **\$74,300**, were issued to employees who had completed payments on subscriptions under the Employees' Stock Plan.

On December 31, 1932, the amount of United States funds owed by your Company to the American Telephone and Telegraph Company was \$12,245,000. By the end of December, 1933, this indebtedness had been reduced to \$235,000, which has since been repaid. To effect this result United States funds were purchased from time to time at premium rates on a continuously declining scale and finally at a discount. The average premium cost was 5.84 per cent. Appropriations from surplus totalling \$500,000 had been made in previous years to meet this expense and the balance, amounting to \$335,135, is charged to surplus this year.

To aid in financing purchases of United States funds, advances of Canadian funds were obtained from the Company's bankers to a maximum amount of \$7,000,000 against which the Company hypothecated as collateral security a like amount of its Series C First Mortgage 5% bonds. To December 31st repayments on account of these loans totalled \$350,000, leaving a net indebtedness to the Company's bankers of \$6,650,000. No new financing on this account is at present in prospect, nor does the construction programme call for any large capital expenditure.

The reduction in loans during the year amounted to \$5,360,-000. For this purpose cash, call loans, and marketable securities on hand at the end of **1932** were utilized in addition to **unex**pended funds from the depreciation reserve.

#### NUMBER OF SHAREHOLDERS

As of December **31**, **1933**, there were **20.531** shareholders. Of this number **19,247**, or **93.8** per cent, live in Canada; **55.9** per cent of the shareholders are women.

Holdings are distributed as fol	llows:—	
In Canada	.3 per cent	
In British Isles and other parts		
of the Empire 4	.8	<b>71.1</b> per cent.
-		
In United States	.4	28.9
		20.7
	1	00.0 per cent.

**3,876** employees are shareholders to the extent of **29,063** shares.

#### PLANT

Gross additions to the Company's plant in **1933** amounted to **\$8,878,000**, of which the principal items were: —

Land and Buildings	\$ 36,000
Central Office Equipment.	1,474,000
Subscribers' Station Equipment	4,685,000
Outside Plant	2,515,000

The original cost of plant retired from service during the year was **\$9,919,000**.

The value of plant retired from service during the year, while high in comparison with the expenditures made for new plant, was some **\$2,200,000** less than in **1932**. The continued loss in telephones, particularly in the early part of the year, necessitated the removal of a large quantity of equipment. This, together with the retirement from service of four large manual offices, as a result of conversion to dial operation, accounted for the major portion of the retirements.

#### Buildings

The only building project carried out during the year was the construction of a garage in London.

#### EQUIPMENT

Dial projects have been proceeded with only where the ultimate operating economies and service advantages have made it desirable. The conversion programme has been continued **in** Montreal, Toronto, and Quebec.

At the end of the year there were **346,448** dial operated telephones in the five cities so served, representing **85** per cent of the total telephones in these cities and 52 per cent of the total Company stations.

A new dial exchange, "LAkeside", was completed in Toronto, and an extension of the dial equipment in Quebec completed the conversion from manual service. Quebec thus became the first city in our territory to be operated wholly on a dial basis.

The first installation in this Company's territory of an unattended dial exchange was made at Oka, Quebec, where a new exchange was opened. Other exchanges of this type are to be installed where suitable.

Extensions of dial equipment were made in "DExter" exchange in Montreal and in "MElrose" exchange in Toronto.

Extension of the dial system involved the retirement from service of the "WAlnut" manual office in Montreal, of the "LAkeside" and "HIllcrest" manual offices in Toronto and the manual office in Quebec.

#### TOLL PLANT

Expenditures on long distance plant were chiefly on account of the necessary reconstruction of pole lines and to repair storm damage.

#### TRANS-CANADA TELEPHONE SYSTEM

Effective operation of the Trans-Canada System, officially opened in January, 1932, continued. The grade of service rendered in this long-haul traffic was highly satisfactory. During the latter half of the year, due to improving business conditions, there was a marked increase in volume.

#### TRANS-ATLANTIC TELEPHONE SERVICE

Traffic over the direct Montreal-London channel continued satisfactory in quality during **1933.** When this service was inaugurated, the traffic was limited to calls between Quebec and Ontario on the Canadian side and to the British Isles. On January **1st**, **1933**, the service was extended via London to points in Europe, Asia, Africa, **and** Australia. On May 1st, **1933**, a further extension of the service was made to include all Canadian points.

There was a substantial increase in traffic during the latter half of **1933.** 

#### Service

In 1933 the high standard of service of recent years was surpassed. The percentage of local calls completed increased 0.8 per cent over 1932 to 83.1 per cent, while the percentage completion on long distance calls increased from 93.7 per cent in 1932 to 93.9 per cent in 1933. The average time for establishing long distance calls was still further reduced, the average for 1933 being 78 seconds per call, as against 83 seconds per call in 1932.

During **1933**, **92.4** per cent of all long distance connections were handled while the subcriber remained at the telephone.

#### MAINTENANCE

The condition of the Company's plant was maintained at a high standard, comparing favourably with previous years.

The number of troubles reported by subscribers continued at the low level of **1932.** When troubles did occur they were cleared promptly, **85.4** per cent on business telephones within two hours, and **94.8** per cent on residence telephones within four hours.

#### STORM DAMAGE

Wire communication systems are never free from the danger of storm damage. While in recent years the greatly increased use of cable on long distance lines, replacing open wire, has done much to lessen this, the annual toll taken by sleet on wire plant is still heavy. Total expenditures in **1933** on this account were approximately \$500,000,—somewhat less than for **1932.** Last year's damage occurred mainly in the Eastern end of the Company's territory where destructive storms have been usually less frequent than in the Central and Western sections.

#### EMPLOYEES' BENEFIT PLAN

During 1933 benefits and pensions were paid in 2,172 cases under the Plan for Employees' Pensions, Disability Benefits and Death Benefits, amounting to \$397,492, divided as follows:

	No. of cases	Amount
Pensions	262	\$165,498
Accident Benefits (including expenses)	163	12,976
Sickness Benefits	1,690	167,211
Death Benefits	57	51,807

#### EMPLOYEES' STOCK PLAN

Of **10,010** employees eligible to subscribe for stock in the Company, **4,596** are now subscribing for **19,179** shares.

#### LIFE INSURANCE

Under the Employees' Life Insurance Plan adopted in **1927**, whereby premiums are paid through monthly deductions from pay, **2,396** employees are carrying **\$7,504,200** of life insurance.

#### STAFF

The high standard of service which the public expects has **been** maintained. This has been possible through the effective co-operation of all employees. The problems of this difficult time are being met by them with courage and understanding. The directors wish once more to record appreciation of the work done and of the spirit in which it has been undertaken, in trying circumstances.

For the Board of Directors,

C. F. SISE, *President.* 

Montreal. February 12th, 1934.

E. PALM, Vice-president & Comptroller.

MONTREAL, QUE., January 30,1934

## AUDITOR'S CERTIFICATE

# THE BELL TELEPHONE COMPANY OF CANADA, MONTREAL.

I have examined the books and records of The Bell Telephone Company of Canada for the year ended December **31**, **1933**, and have obtained all the information and explanations required by me.

In my opinion the attached Balance Sheet and Income Statement are properly drawn up so as to exhibit a true and correct view of the financial position of the Company at December **31**, **1933**, according to the information and explanations received by me and as shown by the books of the Company.

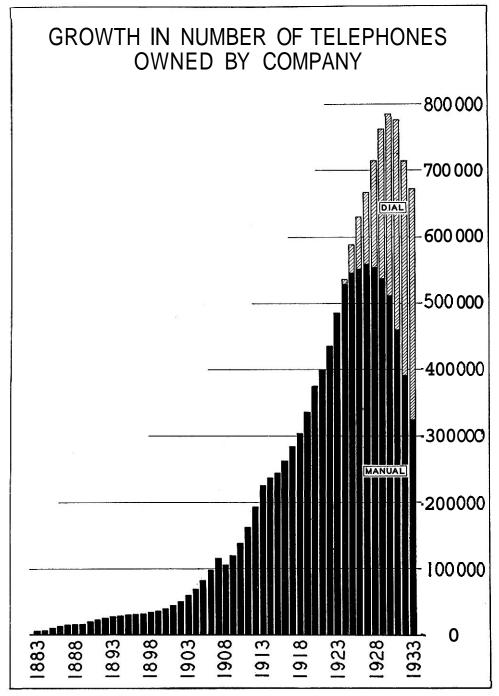

> (Signed) JAS. G. ROSS, Chartered Accountant, Auditor
