Sixty-fourth Annual Report of the Directors

FOR THE YEAR ENDED DECEMBER 31, 1943

To the Shareholders:

Rigid conservation of telephone material throughout 1943, in order to provide for essential services, resulted in a marked reduction in the installation of new telephones. New construction was substantially below that of the previous year, being limited to the more urgent extensions of long distance facilities. We were sorry to have to disappoint many applicants for service but very few failed to appreciate the circumstances which made it necessary.

Telephones connected during the year totalled 134,059 and 103,360 were disconnected, a net increase of 30,699. In 1942 the net increase was 37,066.

There were 956,113 telephones in service at December 31, of which 333,314 were business and 622,799 residence instruments.

Other telephone systems in Ontario and Quebec with which we interchange service now number 926, serving 169,801 telephones.

The Income Statement and Balance Sheet, with comparative data, are submitted herewith.

Revenues

Local service revenue was \$39,027,612, an increase of 3.3 per cent over 1942.

Long distance revenue was \$18,277,995, an increase of 16.2 per cent.

Miscellaneous revenue amounted to \$2,917,207, a decrease of 3.9 per cent.

The gross revenue from all sources amounted to \$60,222,814, an increase of \$3,682,807 or 6.5 per cent.

Expenses

The cost of living bonus paid to employees was increased on July 1, 1943 to the maximum amount allowable under government regulations. Prior to that date the cost of living bonus paid amounted to one-half the rate allowed by government regulations. There were further adjustments of wage schedules together with an increase in the number of female employees which more than offset the reduction in male force. These factors are reflected in Operation expense which shows an increase of \$1,953,751 or 12.3 per cent. Despite increases in the cost of living bonus, adjustment in wage schedules and charges on account of severe storm damage, Maintenance expense was only slightly greater than last year. This result is due to the shortage of manpower and of many items of material and is consistent with the Company's policy of avoiding expenditures not absolutely essential under present war conditions.

Taxes applicable to the year 1943, excluding the refundable portion of the Excess Profits Tax, amounted to \$11,955,000, an increase of \$1,951,000 or 19.5 per cent. This reflects the application of the present Excess Profits Tax for a full year as compared with only one-half of the year 1942. There are various questions under discussion with the Dominion Income Tax

Department concerning a number of items, the taxability of which under both the Dominion Income and the Excess Profits Tax Acts is in doubt. The aggregate amount of tax involved in regard to these items is approximately \$500,000 relating to past operations.

The refundable portion of the Excess Profits Tax applicable to the year 1943 amounts to \$1,654,000. Under the provisions of the Act this amount will be refunded to the Company, without interest, three years after the cessation of hostilities.

In addition to the taxes payable by the Company amounting to \$13,609,000 the Company collected \$7,046,000 in taxes for the various governments of which \$3,144,000 was directly from telephone users, and \$3,902,000 from employees and the owners of the Company's outstanding bonds and shares.

Net Income and Dividends

Net Income, after provision for Fixed Charges, amounted to \$7,539,808. After the reservation of \$1,654,000, being the refundable portion of the Excess Profits Tax, the balance available for dividends amounted to \$5,885,808 or \$6.95 per share of average outstanding capital stock. Quarterly dividends at the rate of \$2.00 per share were paid and it was necessary to draw upon Surplus to the extent of \$893,381 in order to pay the total dividends to shareholders of \$6,779,189.

Financing

The only permanent financing during 1943 was the issue of 9,049 shares of capital stock, of a par value of \$904,900, to employees who had completed instal-

ment payments on subscriptions under the Employees' Stock Plan.

Distribution of Stock

For the fourth successive year the number of shareholders has increased, and at December 31, 1943 was 24,491. This is 534 higher than a year ago and 3,907 more than at December 31, 1939.

Shareholders living in Canada number 23,288, or 95.1 per cent, and hold 72.1 per cent of the outstanding stock. There are now more shareholders in Canada and they hold a greater proportion of the stock than at any previous time in the Company's history.

The last four years have witnessed a yearly drop in the percentage of shareholders residing outside of Canada. This group holds 27.9 per cent of the stock, inclusive of the 22 per cent held by the American Telephone and Telegraph Company.

The average holding per shareholder (excluding the American Telephone and Telegraph Company) is 27 shares.

Employees and pensioners numbering 4,684 hold 63,318 shares, representing 7.4 per cent of the outstanding stock.

Plant

New construction during 1943 amounted to \$6,200,000 which is less than half the figure for the previous year. This reflects measures taken to limit construction to essential services in accordance with the various restrictive orders issued by the Federal authorities. Most of the expenditure was to provide additional long distance circuits necessitated by activities arising

out of the war. Extensions and replacements of local exchange plant were at a low level.

After deducting the original cost of plant removed from service and not re-used, net additions to the Company's Fixed Capital accounts amounted to \$4,332,000 compared with \$9,168,000 in the previous year.

Buildings

Building activity during the year was restricted. The extension to the O'Connor Street building in Ottawa, started during the previous year, was completed. Construction of a new toll building at Belleville was begun and four small repeater stations were erected in connection with the Montreal-Ottawa-Toronto toll cable project.

Equipment

As a result of limitations placed on new construction, equipment extensions were restricted during the year. Some small extensions to existing dial and manual exchanges started during the previous year were completed and a few new projects were undertaken. There were no manual offices converted to dial operation.

At the end of the year dial-operated telephones totalled 690,082 constituting 72 per cent of the total company telephones. Extensions to the toll switchboards at Toronto and London were necessary due to the continued expansion in long distance traffic. Carrier equipment was installed at a number of locations to provide additional toll circuits. The repeater installations associated with the Montreal-Ottawa toll cable were completed.

Long Distance Plant

Progress was made with the construction of the long distance cable between Montreal, Ottawa and Toronto to provide additional circuits and to safeguard service on these important routes. The cable between Montreal and Ottawa was placed in service. Installation of long distance cable extending east from Toronto was completed to Port Hope and was well advanced in the Port Hope-Kingston section.

Some increase in our long distance circuits was provided by installing carrier systems which afforded additional channels over existing open wire facilities, thus conserving essential materials.

Storm Damage

Early in the year severe damage was done to open wire long distance and exchange facilities in the area between Montreal and Ottawa by a heavy sleet storm. The full resources of the Company were needed to restore service at the earliest possible date. Emergency use of the long distance cable between Montreal and Ottawa, then approaching completion, made it possible to restore service quickly between the two cities.

Supplies

The supplies problem continued to be acute. Government controls with respect to the use of metals and other materials required for war purposes were more restrictive. The Company intensified its programme of conserving strategic materials and of making the maximum use of existing facilities. An example is the use of new copper which was reduced from 2,250 tons

in 1941 to approximately 400 tons in 1943. The quantity used in 1943 was more than offset by old copper recovered from our plant and turned over to the government's stock.

Trans-Canada Telephone System

Growth in the traffic handled over the Trans-Canada System continued at a rapid rate and amounted to about 28 per cent increase over the 1942 volume. Three additional circuits were provided from Montreal to Halifax by the installation of a carrier system. Loads on the Trans-Canada circuits were very heavy. The speed of service was somewhat lower than in 1942.

Maintenance

The Company's plant and equipment has been maintained generally in good operating condition subject however to the deferment of some upkeep work due to war time conditions. Upon release of material and men from requirements of the war this deferred upkeep work will have to be undertaken. Troubles reported by customers amounted to 68 per 100 telephones as compared with 76 for 1942. Troubles on long distance lines were at a reasonably low level and were cleared promptly.

Service

The telephone service furnished by the Company has been kept at a satisfactory standard. Continuing heavy demands for service combined with a large staff turnover and a difficult supply situation imposed severe operating problems. Eighty-nine per cent of long distance calls filed were completed as compared with 91 per cent in 1942. The average time required to estab-

lish long distance connections was 124 seconds which was 22 seconds longer than for the previous year, and the proportion of calls handled while the customer remained at the telephone was 88 per cent as against 90 per cent in 1942.

Installation of telephones was carried out with reasonable promptness during the year. Nearly 42 per cent of all subscribers' orders were completed by the end of the first business day from receipt of the order.

Post-War Planning

A committee is making a survey of conditions likely to confront the company in the post-war period. Plans are being developed which contemplate expanding employment, a construction programme to meet post-war service demands, a return to pre-war service levels and the restoration of normal margins of plant.

Employees' Pension and Benefit Plan

The Plan for Employees' Pensions, Disability Benefits and Death Benefits has operated as a valuable aid to the business since its adoption over twenty-six years ago—on July 1, 1917. The Plan is provided without cost to the employees. Payments thereunder are included in expenses as incurred with the exception of service pensions which are provided for in advance on an actuarial basis with payments made semi-annually into a Trust Fund established and irrevocably dedicated to service pension purposes. The actuarial basis of the Plan is reviewed at intervals not exceeding five years, the latest study being as of December 31, 1942.

During the year 1943, benefits and pensions amounting to \$891,622, were paid in 3,634 cases under the Plan, divided as follows:

	No. of Cases	Amount
Pensions:		
Service.....	636	\$422,105
Disability.....	97	30,133
Accident Benefits (including expenses).....	234	18,514
Sickness Benefits.....	2,556	341,880
Death Benefits.....	111	78,990

Employees' Stock Plan

Of 10,585 employees eligible to subscribe for stock under the Plan, 4,232 are now subscribing for 28,027 shares.

Life Insurance and Annuities

At December 31, 1943, 3,012 employees were carrying \$11,635,000 of Life Insurance under the Plan—an average of \$3,863 per insured employee.

Effective October 1, 1943, a pay roll deduction plan was inaugurated for the payment of premiums on Canadian Government Annuities purchased by employees.

Blue Cross Hospital Service Plan

The Company has entered into arrangements with the Quebec Hospital Service Association and the Ontario Plan for Hospital Care which makes available hospital care of employees and their families under a pay roll deduction plan. Some 5,450 employees have already taken advantage of these plans.

War Savings Certificates and Victory Loan Bonds

War Savings Certificates with a face value of \$2,993,000 have been purchased by employees since the adoption of the pay roll deduction plan in July, 1940. The face value of certificates purchased during the year 1943 was \$972,000. Sales of War Savings Stamps and Certificates to telephone customers by employees amounted to \$210,100 during the year 1943 bringing the cumulative sales to a total of \$534,600 since July, 1940. Subscriptions by employees in 1943 for Fourth and Fifth Victory Loan Bonds amounted to \$1,861,000. In connection with both of these issues of Victory Loan Bonds, payment by instalments through a pay roll deduction plan was made available to employees.

In Memoriam

Lewis Brown McFarlane, who became an official of the Company at its inception in 1880, and who served as President from 1915 to 1925 and as Chairman of the Board from 1925 to 1930, died on June 9. He was in his 92nd year. The story of Mr. McFarlane's outstanding contribution to the telephone industry in Canada has often been told. His career, first in the telegraph field and then in telephone service, compassed the entire era of electrical communication in this country. It is appropriate here again to pay tribute to his high character, his great ability, and his invaluable service to this Company.

Staff

Of our staff, 1,998 men and 201 women have enlisted for war service. Of these 101 have returned and 22 have given their lives. During the past two years

upwards of 5,400 new employees have been engaged to offset resignations and losses to the war services, necessitating an extensive programme of staff training. Problems facing all departments through the difficult conditions imposed by the war have been met with commendable resourcefulness and efficiency. Your Directors record their sincere appreciation.

For the Board of Directors,

C. F. SISE,

MONTREAL, February 7, 1944.

President.

AUDITORS' REPORT

TO THE SHAREHOLDERS OF
THE BELL TELEPHONE COMPANY OF CANADA,
MONTREAL.

We have made an examination of the Balance Sheet of The Bell Telephone Company of Canada as at December 31, 1943, and the related Income Statement for the year then ended. In connection therewith we examined or tested accounting records of the Company and supporting evidence and made a general review of its accounting methods, but we did not examine the details of all transactions. We have obtained all the information and explanations we have required.

The Balance Sheet and the Income Statement of The Bell Telephone Company of Canada herewith submitted do not include the assets, liabilities or the operating results of the Subsidiary Companies otherwise than as investments and through inclusion of dividends received. The operations of the Subsidiary Companies for the year ended December 31, 1943, resulted in an aggregate net profit.

We are informed that several matters concerning Income and Excess Profits Taxes are now under discussion with the Income Tax Department, upon which no assessment has been received. Provision for additional taxes which may be imposed in respect thereof has not been made in the attached Balance Sheet.

In our opinion, based upon such examination, and subject to the foregoing, the attached Balance Sheet and Income Statement are drawn up in accordance with accepted principles of accounting consistently maintained by the Company during the year under review so as to exhibit a correct view of the financial position of the Company at December 31, 1943, and of the results from operations for the year ended that date according to the information and explanations received by us and as shown by the books of the Company.

(Signed) P. S. ROSS & SONS,
*Chartered Accountants,
Auditors.*
