MR. A. H. CONEYDEARE	Assistant European Secretary	"

CANADIAN NATIONAL RAILWAYS

Montreal, Que., May 1st, 1924.

To the Hon. Geo. P. Graham, M.P.,
Minister of Railways and Canals.

Sir:—

I have the honour to submit herewith, in behalf of the Board of Directors, the report of the operation and affairs of the Canadian National Railway System for the year ended December 31st, 1923.

MILEAGE

The mileage of lines included in the system is divided into regions, as follows:—

	Miles Owned by Constitu- ent Companies	Miles Under Lease or Contract	Miles Under Trackage Rights	Total Mileage
Atlantic Region	2,580.85	164.25	14.98	2,760.08
Central Region	7,318.25	478.89	33.77	7,830.91
Grand Trunk Western Lines.	841.81	123.67	26.21	991.69
Western Region	9,555.21	681.91	31.09	10,268.21
	20,296.12	1,448.72	106.05	

Total steam-operated lines making up "System Mileage" 21,850.89

Complete details will be found attached.

The operating results for the year are shown in the following summary which compares the principal items of revenue and expenses with corresponding items of the previous year:—

REVENUE	1923	1922	Increase or Decrease
Freight	\$185,240,896.71	\$169,783,721.76	Inc. \$15,457,174.95
Passenger	39,285,318.14	35,486,294.72	Inc. 3,799,023.42
Mail	3,543,078.11	3,673,194.86	Dec. 130,116.75
Miscellaneous	26,857,163.08	25,115,813.71	Inc. 1,741,349.37
	\$254,926,456.04	\$234,059,025.05	Inc. \$20,867,430.99

EXPENSES

Maintenance of Way & Structures	\$ 44,781,775.95	\$ 45,623,536.34	Dec. \$ 841,760.39
Maintenance of Equipment	52,176,320.13	56,160,700.14	Dec. 3,984,380.01
Traffic	5,787,582.66	5,249,901.65	Inc. 537,681.01
Transportation	120,307,796.00	113,653,320.14	Inc. 6,654,475.86
Miscellaneous Operations	4,285,829.57	4,127,733.28	Inc. 158,096.29
General	8,063,390.52	7,248,424.18	Inc. 814,966.34
Transportation for Investment	712,801.88	891,985.00	Dec. 179,183.12
Transportation Water Line		682.77	Dec. 682.77
	\$234,689,892.95	\$231,172,313.50	Inc. \$3,517,579.45
Net Earnings	\$20,236,563.09	\$2,886,711.55	Inc. \$17,349,851.54
Operating ratio			92.06

CANADIAN NATIONAL RAILWAYS

GROSS EARNINGS

The increase in revenues is particularly gratifying, and speaks for itself. An excellent crop contributed materially to this satisfactory showing. The fundamental necessity of the system is to build up its gross earnings to such a figure as will be consistent in some degree with its large mileage, and every effort is being addressed to this objective. Freight and passenger traffic returns for the year both show a material improvement over the previous year. With the single exception of September, when the grain movement was somewhat retarded, each month's gross revenue has shown a satisfactory increase over the corresponding month of 1922. The financial performance of the system will turn very largely upon the constantly increasing gross receipts, and the Board notes with satisfaction the zeal and energy which the traffic department and all in the service of the Company have displayed in this direction.

OPERATING EXPENSES

A comparison of operating expenses shows that there was a reduction of \$841,760 in expenses chargeable to maintenance of way and structures, and of \$3,984,380 in those attributable to maintenance of equipment.

With respect to maintenance of way and structures the saving was largely the result of the performance of work during that season of the year when its accomplishment involved a minimum cost both from the point of view of price of labour and interruptions from traffic. Considerable attention was also given to improvement of work and the maintenance of certain sections of the system at a standard consistent with the character of the traffic. Notwithstanding a reduction in maintenance of way and structures expenses, the general standard of the roadbed has not only been maintained, but an improvement has been accomplished.

The reduction in expenses chargeable to maintenance of equipment is largely due to the fact that in the year 1922 a deferred maintenance of equipment reserve was created by charges amounting to \$4,490,000, whereas in 1923 charges under this heading amounted to \$801,402. The difference in these charges in 1923 as compared with 1922, amounted to \$3,688,598. All deferred maintenance of equipment charges may now be considered as either having been overtaken or provided for in the above-mentioned reserve. The balance of the saving in maintenance of equipment expenses may be attributed to more economical working.

For the twelve months ended December 31st, 1923, the average number of freight cars awaiting repairs represented 6.2% of the total freight car equipment, as compared with an average of 8.2% for what are termed "Class 1" railways in the United States. With respect to locomotives awaiting repairs on the Canadian National Railways, the average figure for 1923 was 22.88%, while for "Class 1" American railways it was 21.35%. From this it will be seen that the general condition of equipment on the Canadian National Railways was comparable with the better class railways across the border, and it is a reasonable deduction that expenses chargeable to maintenance of equipment are ample.

Attached will be found a statement of additions to and retirements from the system's motive power and rolling stock made during the year.

TRANSPORTATION EXPENSES

Transportation expenses increased by \$6,654,475 and absorbed 47.18% of the gross earnings as compared with 48.57% in 1922, in the face of an increase in the gross earnings of \$20,867,430. That is to say, gross earnings increased 8.9% and expenses chargeable to moving the traffic increased 5.8%. While these figures are indicative of a healthy improvement, a fruitful field for further reductions exists which will be cultivated with energy throughout the year 1924.

Transportation expenses vary with gross earnings, and the larger the volume of business the greater is the amount consumed in its movement. While such increases are inevitable the objective to be sought is a minimum increase in transportation expenses as gross receipts increase.

In the consideration of transportation expenses efficiency of organization plays a large part and it is fair to point out that the present transportation organization did not begin to function as an entity in all of its details until the latter part of the year. This is abundantly demonstrated by the fact that in the latter months of 1923 and the early months of 1924 the percentage of gross earnings absorbed by transportation expenses represented a constantly decreasing figure. It is not unreasonable to assume that these expenses in 1924 will show material improvement.

CANADIAN NATIONAL RAILWAYS

TRAFFIC EXPENSES

Traffic expenses increased by \$537,681. This was largely due to a more aggressive policy in the solicitation of business, advertising, and similar items. In view of the large increase in gross earnings, the increase in expenses chargeable to traffic is modest; indeed it is believed that a further increase in such expenses would be productive of a larger gross revenue. It is the intention of the administration actively to pursue this policy and, where an adequate return is assured, unhesitatingly to assume expense.

Prior to the consolidation certain expenditures required for developing traffic were postponed. These expenditures as well as those in connection with the new Colonization and Development Department were undertaken during the year and partly account for the increase in traffic expenses.

GENERAL EXPENSES

General expenses increased by \$814,966. A large proportion of this was due to re-organization, the preparation and establishment of new offices, the moving of officers and employees to their new headquarters, much of which would naturally be expected in the adjustment of the new organization and will not be recurrent. Increases in law expenses, including litigation costs, and pensions accounted for about half of the increase in general expenses.

The other items of increases in expenses are relatively unimportant.

INCOME ITEMS

In an examination of the income statement, a decrease of \$2,170,286 will be observed in total non-operating income.

In 1922 substantial profits were made in exchange on purchase of sterling funds. In 1923 the profit was less by \$1,000,000. In order to comply with the requirements of the Interstate Commerce Commission in connection with a settlement with the United States Government for the guarantee period 1920 a debit of \$1,457,562 was made against Income Account, with no corresponding entry for 1922. These two amounts were the main items producing the above decrease.

Hire of Freight Cars—Debit Balance

The assembling of cars for the western crop movement, and the inevitable delay resulting to coal cars used in accumulating a large reserve of fuel (which indications of a miners' strike made a proper precaution) necessarily resulted in a large increase in the amount paid to other carriers for use of cars. The results obtained, however, amply justified this course of action and the expenditure involved. Available car supply through this means was increased by 7.6%. The service obtained per car per day was increased by 5.6%, permitting additional freight tonnage to be handled, which, notwithstanding the lower average of freight rates, produced increased freight earnings of \$15,457,000.

It is expected that still greater efficiency in car service will be obtained during the coming year, but this will not prevent a further increase in adverse per diem balance if revenue traffic continues to increase.

BALANCE SHEET

A consolidated balance sheet has been prepared which includes the capital accounts of the railways and subsidiary companies comprising the national system.

There are securities in the hands of the public of a total par value of \$823,099,056. In addition to this, there is an amount expended by the Government to construct and equip the Intercolonial and the Transcontinental, and to purchase various branches in the Province of Quebec and in the Maritime Provinces which form the old Canadian Government Railways, the capital investment of which is duly set forth in the system consolidated balance sheet.

As shown in the income statement, fixed charges for the year total \$65,199,323, being an increase of \$5,798,847 over 1922, practically all of which was on account of interest charged by the Government. Of the total fixed charges mentioned above, \$35,041,380 was paid to the public.

Consideration is being given to the policy to be followed with respect to the capitalization of the system, and the extent to which, if at all, the advances made and capital held by the Government should be written down to a figure which may be regarded as consistent with the earning prospects of the railway. In the consideration of such a problem, the interests of the Government, which is to say the people of Canada, must be given due weight. On the other hand it would seem unreasonable to burden the Canadian National Railways with a load which is beyond its conceivable earning capacity. The directors have this problem under consideration but before any definite recommendations can be made, a careful survey must be made of the capital position of the Company, not only with a view to meeting the difficulty explained in this paragraph but also to simplifying and consolidating a variety of securities outstanding.

CANADIAN NATIONAL RAILWAYS

The following statement gives a concise picture of the position:

Securities held by public	\$823,099,056.10
" " " Dominion Government	33,048,000.00
Receiver's Certificates re Grand Trunk Pacific	53,177,668.18
Loans from Dominion Government including interest	580,314,081.34
Appropriations account Canadian Government Railways	447,643,526.03
Governmental grants in aid of construction	16,204,520.40
	\$1,953,486,852.05

FINANCE

Of the \$74,550,000 voted by Parliament for the fiscal year ended March 31st, 1924, there was advanced in cash by the Government to the Company \$24,550,000, the balance being represented by the \$50,000,000 of Thirty-Year 5% Guaranteed Bonds issued in February, 1924. As of August 1st last an issue was made of \$22,500,000 of the Company's Fifteen-Year 5% Bonds guaranteed by the Dominion Government, but additionally secured by \$30,000,000 worth of equipment in connection with which the bonds were issued.

TRAFFIC MOVEMENT

Freight tonnage increased by 18.2% or 8,925,416 tons. The average freight train load increased from 475 tons in 1922 to 504 tons in 1923. This was produced by operating efficiency and resulted in lower transportation costs. The volume of freight traffic movement increased 13.28% namely from 16,432,787,616 ton miles in 1922 to 18,615,107,256 in 1923. As a result of organized preparation the Company's share in moving the largest grain crop in the history of the country was performed satisfactorily and without any serious car shortage. The number of car loads of grain handled over the national lines to Vancouver increased by over 72%. Business in Central Canada was relatively good and on the United States lines of the system the freight traffic was particularly heavy during the year.

The increase in revenue tonnage handled was largely made up of increases in bituminous and anthracite coal and other mineral products. There were also increases in forest products and in unclassified manufactures and miscellaneous goods.

The lifting of the British embargo on Canadian cattle which permitted their admission for feeding purposes after April 1st, had an appreciable effect on stock movements from the west, and while the business is handled at low rates, the extension of the market for Canadian cattle is expected to prove of considerable value.

The Governments of Ontario and Alberta made an effort to substitute Alberta coal for United States anthracite consumed in Ontario, and in order to assist in the experiment the railway handled certain quantities at \$7.00 and \$9.00 per ton; the regular published rate being \$12.70 per ton. It was hoped that this would provoke reductions in other items contributing to the cost of coal and result in effective competition with coal from the United States. The desired result was not achieved. Inasmuch as the \$9.00 rate represented the bare out-of-pocket cost of transportation, the railway has been obliged to decline any reductions from the tariff rate which, if brought into effect, would materially deplete its gross earnings.

There was a slight increase in the number of passengers carried, but the attached statement shows a substantial increase in length of haul. Steamship business by maritime ports shows a gratifying increase. The motor car is affecting the railway's short journey traffic considerably and while self-propelled units are being put in where justified, there is no doubt that a certain amount of business is lost to the railways through the growing use of motor cars, irrespective of the service given. The same applies to competition experienced by the express department from the use of motor trucks.

RATE REDUCTIONS

The decrease in average freight receipts per ton per mile from 1.033c. in 1922 to .995c. in 1923 is largely due to decreased freight rates, and partly to the relative quantities of commodities handled. This decline has seriously affected the net returns of the national system, the difference in the rate for the two years representing a loss in net revenue of \$7,000,000.

The principal rate reductions which affected revenue in 1923 were as follows:

- Application of Crows Nest Pass basis of rates on grain and grain products, eastbound to head of Lakes (reduction of approximately 33 1-3%), effective July 6th, 1922;
- Reduction of 6% in Eastern Canada and 6¼% in Western Canada in rates on basic commodities, effective August 1st, 1922;
- Reduction of 20% in rates to Vancouver on export grain, effective August 1st, 1922, and a further reduction of 10% effective October 10th, 1923;
- Reduction in export rates on grain milled in transit of 2½c. per 100 lbs. from lower lake ports, effective May 15th, 1923;
- Removal of "Halifax Differential" of 1c. per 100 lbs. on overseas traffic in and out of Halifax, effective October 1st, 1923;
- Adjustment in rates in Prince Edward Island and other Maritime Provinces, effective on various dates beginning May 29th, 1923.

CANADIAN NATIONAL RAILWAYS

Railway freight rates in Canada are and have been for many years the lowest in the world. The average freight receipt per ton per mile for Canadian Railways in 1914 was 0.742c. War time increases forced this unit of earning up to a point approximately 75% over the pre-war level. The series of reductions which began January 1st, 1921, have substantially reduced this average so that in 1923 it stood at 0.980 or 32% above the pre-war level. In contrast to this the average prices of labor, material and supplies prevailing in 1923 were somewhat in excess of 90% over the pre-war scale.

The Canadian National Railway System is the property of the people of Canada, and it is for the people, through their duly elected parliamentary representatives and the Board of Railway Commissioners, to determine what the freight and passenger rate policy of the Dominion in its relation to the Canadian National Railway System shall be; but there is no way by which freight and passenger rates can be continually reduced and net earnings at the same time increased; and, moreover, restricted net earnings must inevitably mean additional taxes to provide for annual deficits. *THE ADMINISTRATION OF THE CANADIAN NATIONAL RAILWAYS SYSTEM IS THE TRUSTEE OF THE PEOPLE'S PROPERTY. THAT ADMINISTRATION CANNOT AND HAS NO DESIRE TO DICTATE POLICIES, BUT IT WOULD BE LACKING IN THE FULFILMENT OF ITS PUBLIC DUTIES IF IT DID NOT MAKE THESE FACTS CLEAR TO THE PEOPLE OF CANADA.*

BETTERMENTS

During the year important progress was made on the general improvement programme which has been carried on during the period of government control. The expenditures have been large, but have not been out of proportion to the corresponding expenditures made by other large systems on this continent, and the improved operating results could not have been obtained without such expenditures and the acquisition of additional rolling stock and motive power. The properties of the system have been brought up to a standard which will enable the handling of increased traffic in the future with normal expenditures, except so far as affected by new business developments.

A statement of classified expenditures made during the year is attached.

To obtain proper results from operating as a single system lines which previously were in competition, it was necessary to build a number of connecting lines and cut-offs, the construction of which has permitted short and economical routing of traffic, joint use of terminals, stations, offices and other facilities with consequent reduction in operating expense, increased capacity for handling the volume of business and ability to give improved service to the public. During the period of improvement, various grade reductions have been undertaken; water supply, particularly in Western Canada, has been greatly improved; terminals have been enlarged and modernized; some sections of the railway have been double-tracked; signals have been installed; a great many tie plates have been applied; heavier rails have been laid; bridges, trestles and culverts have been strengthened, renewed or replaced with permanent work; tie renewals have been brought up to a proper basis and a start has been made on the use of treated ties. Much ballasting has been undertaken, although much remains to be done. A number of station buildings have been constructed; some enlarged or replaced. Telegraph and telephone communications have been bettered.

In addition to the cars purchased, there were a number rebuilt, reinforced and in other ways improved. Various items of special equipment were applied to locomotives such as feed water heaters, automatic stokers, boosters, superheaters, etc., and a number of locomotives were converted or rebuilt. The gradual use of heavier power over the various lines as their physical condition permits, and as traffic is developed, tends more and more to efficient operation.

LAND SALES

Conditions in the farming industry in Western Canada are not yet such as encourage the ready sale of lands. 61,994 acres were sold in 1923 at an average price of \$15.66 per acre, amounting to \$970,952. 9,025 acres were sold in 1922 at an average price of \$16.67 per acre, amounting to \$150,531.14.

When cancellations of purchase contracts are considered, the showing is still more favorable. In 1923 the cancellations represented 59,190 acres as against 114,056 acres in 1922. Fewer cancellations are expected in 1924.

WAGES AND LABOUR

Various demands were made by employees during the year for increases in wages and improvements in working conditions. Several requests for increases are under consideration at the present time. There was no loss of time by reason of strikes among the railways' employees during the year. General good feeling prevails in all classes.

The total expenditure for labour during the year chargeable to operating expenses was \$136,463,470 representing 58.15% of such expenses, as compared with 54.99% in 1922.

CANADIAN NATIONAL RAILWAYS

PURCHASES AND STORES

All purchases for the Canadian National Railways and subsidiaries, including the Canadian Government Merchant Marine, are under the jurisdiction of the Purchasing Department, with headquarters in Montreal. There are purchasing agents located in the various regions to handle local buying. In the work of the department is included the custody and distribution of stores and materials. The reclamation of material and the sale of scrap, through which very substantial savings are effected, also comes under the Purchasing and Stores Department.

EXPRESS

This service is now carried on by the railway company itself instead of by the express company. Economies and other advantages have resulted from the change. The gross express receipts and the expenses of the express department are included in the system's revenue and expense accounts, whereas, generally speaking, other railways show only the net earnings earned by transporting express matter.

The operations of the express department present a large and fruitful field which merits a progressive and aggressive policy. It is the intention of the Company during the coming year to expand the activities of the express department into foreign fields, not only with the view of securing a large volume of traffic, but also in the provision of travellers' cheques and various other financial arrangements necessary to the comfort and welfare of tourists.

Details of the operation of the express department will be found attached.

TELEGRAPHS

The Canadian National Telegraphs operate commercial telegraph lines throughout the Dominion west of Moncton, N.B., and have charge of the maintenance of all telegraph and telephone lines used for railway purposes.

Material improvement has been made in the efficiency of the telegraph department during the year. Better and more satisfactory offices have been provided at several places, the messenger service has been smartened and every effort is being made to provide a standard of service which will excite a greater business. Other detailed information in connection with this department will be found attached.

INSURANCE

The Insurance Department was reorganized in March, 1923, and placed under the control of a Director of Insurance. At the same time the Company decided to extend over the whole system the principle of self-insurance which had previously been in effect to a limited extent on parts of the system. The wisdom of this policy has been amply justified, as although there was paid into the fund approximately \$250,000 less than had previously been paid to underwriters, a surplus of \$1,014,014 was accumulated from April 1st to December 31st.

This surplus together with the previous surplus amounted in the aggregate as of December 31st, 1923, to \$3,133,735, practically all of which is invested in Dominion Government securities. The intention is to build up this fund as rapidly as possible.

An entirely new recording system has been devised which results in a determination of the exact status of the insurance fund with respect to premiums and losses on the various classes of risks insured therein.

A fire prevention and inspection staff has been organized under the direction of a competent fire prevention engineer, and is concentrating its efforts towards a reduction in losses. Various other steps have been taken to reduce fire losses, and it is anticipated that within the next year the system will have a fire insurance, prevention and inspection system second to none.

CANADIAN NATIONAL RAILWAYS

COLONIZATION AND DEVELOPMENT

During the past year the matter of immigration has been receiving very close attention in governmental and railway circles. Its success depends first, upon the choice of suitable immigrants; secondly, upon the suitable location of such immigrants; and, thirdly, upon the supervision and assistance of them till they become self-supporting. Having this in view it was decided to open in London, England, a special office under the jurisdiction of the Department of Colonization and Development Dr. W. J. Black who, after many years of special experience in agriculture and immigration, held the position of Deputy Minister of Immigration at Ottawa, has been appointed European Manager of such office. Prior to his leaving for England recently, special meetings were held in Montreal at which there were present representatives of the Dominion Government, the national railways and allied steamship companies—the desire being to determine a policy of which all interested parties would approve, and which would be carried out in a spirit of co-operation.

The present work of colonization and development of natural resources is being carried on from centres such as Montreal, Winnipeg, Edmonton, London, England, and Paris, France, with branches at St. Paul, Seattle and Boston in the United States. It embraces advertising of lands and business opportunities, the distribution of information in the public press and by lectures, folders, pamphlets, maps, etc., the answering of inquiries, etc., advising and assisting incoming settlers in regard to choice of lands and the obtaining of employment. The work in the New England States has resulted in the repatriation of French Canadians in Western Canada, Quebec and Northern Ontario. Up to the present time satisfactory results have been produced in spite of the recent agricultural depression, but the more important part of the work done during the past year was the establishment of a suitable organization which will be able to assist in completing the work expected to result from the intensive immigration policy now being carried on and which includes the group settlement arrangements made with the Overseas Settlement Board.

The following represents the broad principles upon which it is intended to carry on with vigour the colonization work of the Canadian National Railway System:

1. To influence the immigration and satisfactory settlement in Canada of the largest possible number of people of productive capacity which the country can absorb and assimilate;
2. To contribute to the dissemination of information concerning the vast and extensive natural resources of the Dominion and the widespread opportunities for industrial development, so that capital may be attracted from other countries and invested where enterprise will be legitimately rewarded;
3. To promote the land settlement of new Canadians under conditions that will ensure the maximum success in their farming operations and enable them to enjoy such social and religious institutions as are necessary to individual happiness and contentment;
4. So to encourage improvement in agriculture that more diversified methods may be used in farming, and that crop, livestock and dairy production may be increased in accordance with market demands and prospects;
5. To assist by organized effort in the immigration of young people of desirable type and character, especially from Great Britain, and in their placement in respectable rural homes, where they may become qualified to participate in constructive activities and acquire citizenship of distinct value to Canada;
6. To aid in the development of new opportunities for service and to facilitate every effective means of selecting immigrants physically fit and anxious for work;
7. To co-operate with the federal and provincial governments and business organizations throughout the Dominion in promoting all measures calculated to contribute toward an increase in immigration of adaptable people and in their settlement under the most favorable conditions possible.

PENSIONS

Various plans are now in effect on different parts of the system. A pension scheme for the whole system is under consideration and temporary arrangements are in effect on parts of the system which have not previously had a pension plan.

The total number of pensioners at December 31st, 1923, was 2,078, and the total amount paid for pensions in 1923 was \$925,173.

FIRST AID

For many years this work was carried on over the lines of the Grand Trunk System. It will in future be undertaken on all the national lines. For this purpose a Director of Safety First and First Aid was appointed in general charge of the work in January, 1924.

CANADIAN NATIONAL RAILWAYS

ECONOMICS

In order that special consideration may be given to various economic problems which arise from time to time in regard to operation and development matters, a Bureau of Economics was organized in March, 1923, as a special department.

RADIO DEPARTMENT

A Radio Department was organized during the latter part of 1923 under the control of a radio engineer and an assistant. The work undertaken during the year was largely experimental, and principally in connection with the operation of radio on moving trains. Various tests having been made and excellent results obtained, wireless receiving instruments are now being installed upon the principal trans-continental trains, and similar sets are being placed in a number of the Company's hotels. It is the intention, in the introduction of radio telephony on the lines of the Canadian National Railways, to provide a ready means of communication between the executive officers of the railway and the public, to advertise Canada and the Canadian National Railways, to furnish entertainment to passengers on long distance trains and guests at the Company's hotels, and generally to make the service of the railway more attractive to the travelling and shipping public. But more important still is the desire to establish that human contact between the officers of the Company and the employees which it is considered is essential to the maintenance of loyalty and efficiency. The Company has arranged for wireless receiving sets to be procured by its employees at a reasonable price and on easy terms. Considerable advantage has already been taken of this, and in the course of a comparatively short time it is hoped that it will be possible for the executive officers of the Company to address personally a large proportion of the employees in their own homes. As an advertising medium radio telephony is unsurpassed, and the administration believes that in the establishment of a radio department it has taken a unique and constructive step in railway operation.

ORGANIZATION

When the present Board of Directors took charge of the property represented by the Canadian National Railway System, two separate organizations existed, namely the Grand Trunk Railway and the Canadian National Railways of that day. Within the limitations imposed by conditions much co-ordination had already been accomplished and many improvements and economies introduced. The administrative work performed by these two organizations laid the foundation for what was to follow, and the present Board desires to record its recognition of the valuable work performed by the boards of directors and officers of the previous organizations.

The task, however, of determining the organization best suited for the administration of so large a property, extending from the Atlantic to the Pacific and including telegraph and express companies, as well as a Merchant Marine, can only be characterized as formidable. All of the great railway systems of North America and Europe have been the result of decades of growth and development in which ample time was afforded for the development of an organization and the education and trial of those who have subsequently become trusted and capable officers. To a large degree the Board of Directors was obliged to evolve within a few months a consolidated organization appropriate to the needs of the widely-flung system committed to its charge. Officers were obliged to acquaint themselves not only with the new territories, but with each other. New channels for the flow of reports and instructions had to be provided, a system of statistical information developed which would readily reveal the operating results of the various departments and the danger points to be guarded against, and many other important details which will at once be apparent to those familiar with the organization of a large undertaking. It would be remarkable if the accomplishment of such a task were unaccompanied by mistakes; but if such mistakes have been made they have been of relatively small importance, and have not materially affected the general result for the year. No doubt as months go by errors will be detected and improvements made.

Perhaps the most gratifying feature of the year's operations has been the development of a fine spirit of loyalty, co-operation and pride in the undertaking amongst officers and employees alike. Much of the satisfactory financial performance has been due to this spirit. Those employees and officers of the company who come in contact with the travelling and shipping public have assisted greatly in establishing an excellent feeling by their courtesy and attention to the patrons of the system. The principle that the passenger is always to be regarded as the guest of the Company has been splendidly maintained by all. The Board has much pleasure in congratulating all in the employ of the Company upon the efficiency of their efforts, and cordially thanks them for their loyal support.

While business and industrial conditions in their relation to and effect upon the national railway system in all sections of the Dominion have received thoughtful and sympathetic consideration, the position in the Maritime Provinces seems to call for special comment.

CANADIAN NATIONAL RAILWAYS

In those provinces there appears to exist a feeling of disappointment and dissatisfaction in a way, which is not clearly revealed, that the provinces have not obtained that advantage from Confederation which they had been led to expect. The consideration of such a problem is obviously beyond the scope and responsibilities of the administration of the national railway system, but when dissatisfaction in any section of the Dominion reaches such proportions as to involve a possible effect upon the Company's operations, it is desirable that at least some attention should be given and it is for this reason that the subject is mentioned in this report.

With a view to improving the position in the Maritime Provinces, the efforts of the traffic department of the railway have been addressed in various directions, and as a result the sailings from the port of Halifax have been increased from 491 in 1922 to 768 in 1923. The Canadian National Railways recognize the importance of the ports of St. John and Halifax, and the useful part they should both play in the development of Canadian marine traffic. Nothing within reason will be left undone to promote increased business through these gateways. For some time there had been a differential of one cent per hundred pounds against the port of Halifax on export and import freight and this has been removed, Halifax being now on the same basis as all other Atlantic ports served by the Canadian National Railways. In addition to the removal of this differential, tariffs covering certain contemplated reductions of class rates are now in the course of preparation. These reductions in some cases will run as high as 15%. During the past twelve months a revision of freight rates to and from Prince Edward Island has been completed, placing them on the same basis as is applicable to the mainland, while formerly a somewhat higher scale was applied. Certain other minor reductions in other freights were also made.

These matters are mentioned in order that it may be understood that the Canadian National Railways are, within the limits of their ability, endeavoring to do everything possible to better transportation conditions in the Maritime Provinces. The recent visit to the Eastern Provinces of a number of members of parliament from Western Canada will, it is hoped, have a good effect in enabling the people from the extreme parts of Canada to become better acquainted with the difficulties which confront both Eastern and Western Canada.

The business done through the Canadian Atlantic ports is capable of much greater expansion, in the accomplishment of which expansion mutual understanding between the Eastern, Western and Central portions of Canada is essential. Several suggestions have been made to the Canadian National Railways management as to how this desired result might best be brought about, but as the province of the management of the railway system is to deal solely with transportation this larger question of policy must be left to the Government and to parliament.

OBITUARY NOTICES

As the preparation of this report was nearing completion the death occurred suddenly in Montreal on 2nd April, 1924, of Mr. L. S. Brown, General Manager of the Atlantic Region, with office at Moncton, N.B. The Board desires to express its regret at the death of Mr. Brown who was an esteemed and capable officer.

It is fitting that reference should be made also to the recent death of Sir William Mackenzie who with Sir Donald Mann founded the Canadian Northern Railway System, aggregating nearly 10,000 miles. For two men to have established a transcontinental system in Canada was a feat unrivalled in the annals of railway construction in the world. Sir William Mackenzie had a genius for originating big projects and for financing. Apart from his development of other public utilities in different parts of Canada and elsewhere his work as a railroad builder in Canada entitles him to a high rank among the great men the Dominion has produced.

J. M. ROSEVEAR,
General Comptroller.

We have examined the books and records of the Companies comprising the Canadian National Railway System for the twelve months ended the 31st December, 1923. The investments in Road and Equipment appearing on the books of the Companies at the 1st January, 1923, were accepted by us. We certify that in our opinion the above Balance Sheet is properly drawn up so as to exhibit a true and correct view of the affairs of such Companies, as consolidated, at 31st December, 1923.

GEORGE A. TOUCHE & CO.,
Chartered Accountants,
Auditors.

1st May, 1924.
