

**ANNUAL REPORT
of
THE GOODYEAR TIRE & RUBBER
COMPANY OF CANADA, LIMITED**

NEW TORONTO, ONTARIO

1940

The world over,
more people ride
on Goodyear tires
than on any other
kind!

A Goodyear employee, now with the Royal Canadian Artillery, looks over the Goodyear Honor Roll.

ON September 3, 1939, not many hours after Prime Minister Chamberlain had said in sad but steady tones, "We are now at war with Germany", a wire from Goodyear's President A. G. Partridge sped its way to the Prime Minister of Canada.

"We offer you everything Goodyear has"—were the strengthening words which formed the backbone of its message.

From that day to this, those same words have framed the patriotic policy of the Goodyear Company.

Executives and employees alike share this policy, as evidenced in many ways. Dogged application to daily tasks . . . generous and willing contributions to war funds . . . wide purchases of War Saving Certificates . . . numerous enlistments in the armed forces . . . wholehearted co-operation in building government war requirements—these and many other things indicate the spirit of the organization.

Yes . . . Goodyear is indeed "on active service."

ANNUAL REPORT OF THE DIRECTORS OF THE GOODYEAR TIRE & RUBBER COMPANY OF CANADA, LIMITED

February 22, 1941.

TO THE SHAREHOLDERS:—

Your Directors submit a Consolidated Balance Sheet of THE GOODYEAR TIRE & RUBBER COMPANY OF CANADA, LIMITED, and its subsidiary companies, with your auditors' report thereon, which sets forth the result of the operations for the year ended December 31, 1940 and the present financial position of the combined companies.

The operations of the combined companies for the year have resulted in a profit of \$1,960,038.49 after charging all manufacturing, selling and administrative expenses, income and other taxes, but before providing for depreciation; from this amount there has been set aside a reserve of \$568,524.72 for depreciation of buildings and equipment, leaving a net profit of \$1,391,513.77.

A comparison of the operations for 1940 with those of 1939 shows that although there was a substantial increase in sales for the year just ended, there was a reduction on the average in the margin of profit, with the result that after making provision for increased income taxes and for the excess profits tax, the net profits as reflected in the Consolidated Balance Sheet were less than in 1939 by \$260,988.36.

The net earnings for the year were equivalent to \$4.25 per share on the 257,260 shares of common stock outstanding, as compared with \$5.25 a share in 1939; \$7.49 a share in 1938, \$4.14 per share in 1937 and \$4.73 per share in 1936.

The spot market price of No. 1 ribbed smoked sheets in New York fluctuated during the year 1940 between a low of 18½¢ per pound on February 27 and a high of 24½¢ per pound on May 10. The closing spot price on December 31, 1940 was 20¾¢ per pound. The market price of 7/8 middling uplands on the New York Cotton Exchange, reached a high on January 2, 1940 of 11.54¢ per pound, while the low price for the year was 9.48¢ on October 14. The closing market price on December 31, 1940 was 10.43¢.

The customary annual review was made of the stocks of raw materials, work in process and finished goods on hand which are stated in the Balance Sheet on the usual basis of cost or market, whichever was lower.

As in former years, the profits as shown by this Annual Report, include the profits on the export business for the previous fiscal year of 1939, but on the other hand, they do not include the accrued profits on export business for 1940, which have not yet been determined.

The following summary sets out the manner in which the profits for the year have been applied—

FUNDS PROVIDED FROM PROFITS

Consolidated net profits for the year.....	\$1,391,513.77
Add—Provision for depreciation.....	568,524.72
Profits before providing for depreciation.....	<u>\$1,960,038.49</u>

DISPOSITION OF FUNDS

Dividends on 5% Preferred stock.....	\$298,511.25
Dividends on Common stock.....	643,150.00
	—————
	941,661.25
Redemption of 649 shares Preferred stock at \$50.00 each...	32,450.00
Increase in Preferred stock redemption fund.....	25,981.43
Expended for additions to plant and equipment (net).....	661,180.04
Increase in miscellaneous investments.....	4,184.90
Increase in net current assets or working capital.....	306,330.41
	—————
	\$1,971,788.03
Less—Decrease in deferred charges	11,749.54
	—————
Total as above.....	<u>\$1,960,038.49</u>

Adequate reserves have been established to provide for accruing depreciation of buildings and equipment and to meet all probable losses in the realization of accounts receivable. Provision has also been made for all ascertained liabilities.

A review of the consolidated Balance Sheet will disclose the strong financial position of the Company, particularly from the standpoint of working capital, which amounted to \$9,247,127.13 at December 31, 1940 as compared with \$8,940,796.72 at the end of the previous year.

The most important change in the Balance Sheet presented herewith in comparison with that of one year ago, is a reduction of approximately \$2,300,000.00 in the total amount of the cash and government bonds and the investment of this money in inventories of raw materials, goods in process and finished goods, which show an increase of \$2,401,214.25 in comparison with the inventories at December 31, 1939.

A substantial proportion of this increase in inventories is represented by an increase in the stock of raw rubber on hand. Inasmuch as all of your company's supply of this

raw material has to be imported from the Far East, it was considered a wise policy to build up our stocks.

In addition to building up its own inventory, your company has cooperated with the Canadian government and the rubber industry in securing and storing a substantial quantity of raw rubber, so as to ensure a continuity in the production of rubber articles for war requirements.

The companies have no bank indebtedness. The financial position as referred to herein, is after paying dividends aggregating \$941,661.25 represented by 5% or \$298,511.25 on the Preferred stock and the usual dividends aggregating \$2.50 per share on 257,260 shares of Common stock, amounting to \$643,150.00.

The total current assets amount to \$10,385,347.42 compared with the current liabilities of \$1,138,220.29.

The total amount of all taxes paid or to be paid by or through your companies and applicable to the year 1940, amounted to \$2,503,188.74 in comparison with \$1,291,563.80 in 1939.

During the past year your companies have continued their policy of making improvements in their plants and equipment at New Toronto, Bowmanville and St. Hyacinthe, with a view to extending the companies' productive facilities and effecting economies in their operations. During 1940 these expenditures were made chiefly in connection with the new power plant at New Toronto and for additional equipment at New Toronto, Bowmanville and St. Hyacinthe.

At the outbreak of war, your company advised the federal government that it was prepared to assist in the production of war requirements to the fullest possible extent and, during the past year, a large portion of your company's production facilities has been devoted to the manufacture of rubber products, chiefly tires, for both the Canadian and British governments, on a basis only slightly in excess of the cost of production. The problems attending the necessary tooling up and changes in equipment involved in the supply of these materials, have been many and varied, but your company has at all times been well ahead of the required schedules and has endeavored in this way to make its contributions to Canada's war effort.

Your Board wishes to record its appreciation of the loyalty, cooperation and effort of the personnel of the organization which has made possible the satisfactory results of the year's operations.

The cooperation of our shareholders has been continued and is much appreciated.

A. G. PARTRIDGE,
President.

On behalf of the Board.

Chartered Accountants

ROYAL BANK BUILDING

TORONTO, CANADA

February 6, 1941.

To the Shareholders of

THE GOODYEAR TIRE & RUBBER COMPANY
OF CANADA, LIMITED:

We have made an examination of the consolidated balance sheet of The Goodyear Tire & Rubber Company of Canada, Limited and its subsidiary companies as at December 31, 1940. In connection therewith, we examined or tested accounting records and other supporting evidence, and obtained all the information and explanations which we required; we also made a general review of the accounting methods and of the operating and income accounts for the year, but our audit of the detailed transactions was confined to limited tests thereof.

We satisfied ourselves that all charges to property accounts are in respect of actual additions, and sufficient provision has been made for accruing depreciation. The stocks on hand or contracted for have been taken and valued by the companies at cost or market prices, whichever were lower; the bad debt reserve is considered sufficient to provide for all doubtful accounts; the bank balances and government bonds were confirmed by certificates and we have taken all reasonable precautions to satisfy ourselves that all liabilities as at December 31, 1940 are included in the balance sheet.

In our opinion, based upon such examination, the annexed consolidated balance sheet is drawn up so as to exhibit a true and correct view of the state of the affairs of the combined companies as at December 31, 1940, and the results from the operations for the year ending on that date, according to the best of our information and the explanations given to us, and as shown by the books of the companies.

PRICE, WATERHOUSE & CO.,
Chartered Accountants.

GOODYEAR *leads* IN ADVERTISING

A potent force in moving goods, Goodyear advertising has long played a major roll in maintaining Goodyear leadership.

Much of its success can be traced to the sense of partnership that exists between the organization and its dealers. Following the Company example, retailers handling our products make sure that they, too, lead in this important field—and subscribe to a wide variety of campaigns that are available on a co-operative basis.

Net result is a complete coverage of the market that fully lives up to Goodyear's principle of leadership—in all fields.

GOODYEAR *leads*

The umbrella is made from Goodyear Pliofilm, from which is fabricated a variety of products such as packaging material, shower curtains, bridge table covers, garment bags, rain capes, etc. Many new applications of Pliofilm were developed in 1940.

As fast as is humanly and mechanically possible, Goodyear army tires are streaming into service. Those above will cushion the bumps, give grip to the wheels of a military vehicle nearing the end of a Canadian plant's production line.

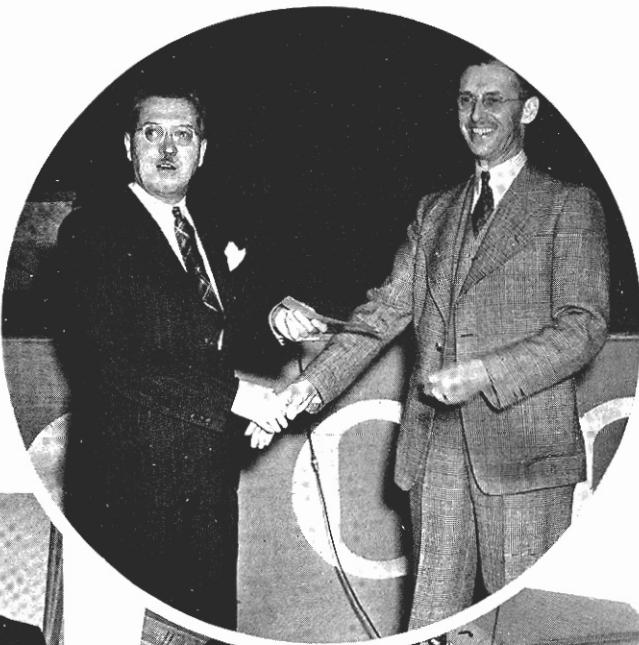

Goodyear aeroplane tires—being manufactured in ever increasing numbers at New Toronto—catch a prominent spot—along with the crew of this bomber in that most indefinite of places "somewhere in England." Long a pioneer in the manufacture of aeroplane tires, Goodyear's experience and production facilities have been decided boons to the government.

On these pages are random views of Goodyear men and Goodyear products caught in the spotlight during the past year. Each one

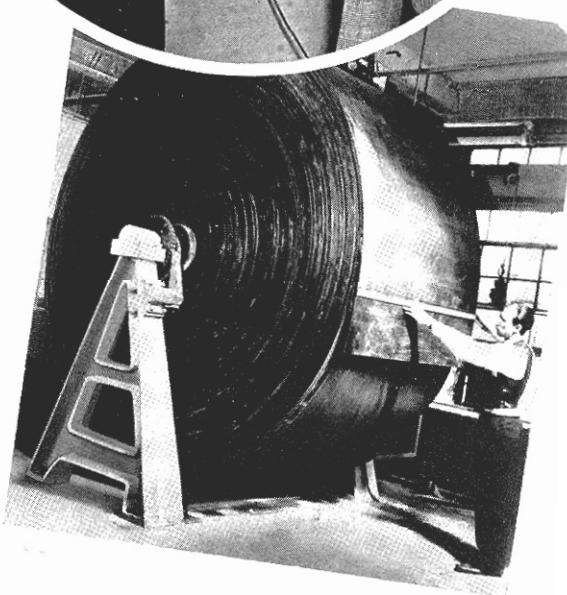

IN MANY FIELDS

adds its weight to the fact that no matter where you go—or how far—you'll find staunch evidence of . . . Goodyear leadership.

Another concrete example of Goodyear's resolve to "do her bit" was the Company's \$1500.00 donation to the Toronto Telegram British War Victims' Fund. To make this gift possible, employees gave up their Annual Service Pin Dinner in honour of those completing 25 years' service with the company. The Telegram's news commentator, Jim Hunter, is shown here receiving the check from Goodyear's General Manager and Treasurer, Mr. R. C. Berkinshaw.

Goodyear veterans of the last war distinguished themselves in fine fashion in the Warrior's Day Parade at the Canadian National Exhibition, by carrying off the Canon Scott trophy (shown above). It was awarded for first prize in dress, smartness and drill.

A definite achievement in rubber manufacture was accomplished by Goodyear with the building of this huge conveyor belt. Weighing 28,000 pounds, it is the heaviest belt ever built in Canada. It will see service in a large Ontario mine.

When news flashed from Davenport, Iowa, that a Canadian entrant, Fred Timbers of Stouffville, had won the world's championship plowing contest, there was much elation in the Goodyear organization. Farm-tire-minded Goodyear representatives had persuaded Fred to try for the title, and needless to say, he plowed to glory on Goodyear Sure-Grip Farm Tractor Tires.
