

January 26, 1960

Dr. William Feindel,
M.N.I.

Dear Bill:

This is the reply of the Wellcome Foundation. I am afraid we had to expect this because our application was in a most unusual form, but I think, nevertheless, it was in the only form that would really serve the purposes of neurology that we had described to them.

It is quite clear that they would be open to suggestions for fellowships in either direction for one of us or for someone we want to bring here, and now would be the time to put in a request.

As ever yours,

W.P.
