1930 Chestnut St., Philadelphia,

February 20, 1934.

Dr. Wilder Penfield,
Royal Victoria Hospital,
Montreal, Canada.

My dear Penfield:

I think very well of your idea. For a long time I have been wanting to publish historical notes of distinguished neurologists and psychiatrists. In fact, I asked Viets of Boston to undertake this and he has promised to do so and has sent me one article which is in course of publication now but it is not altogether what I want.

I like your list very much but should like to add Charles K. Mills from the U.S.A., but that is, of course, an individual preference. I do not mean that he should take Weir Mitchell's place by any means.

If you will let me have your material promptly I can have it published before October.

With kindest regards,

Sincerely yours,

T. H. Weisenburg

P.S. According to our records the Journal of Cellular and Comparative Physiology is being sent directly to Dr. Cone for abstracting purposes and the Annals of Surgery, Surg., Gyn. and Obstet. to Dr. Elvidge or one of your men but up to date we have received no abstracts. We cannot afford to continue these exchanges unless the journals are abstracted. Won't you check this matter up and let me hear from you. Does anyone get the Archives of Surgery?
