Introduction

These tables published annually present a succinct picture of pulp and paper operations, their intimate relationship with the forest resources and the forest crop, and something, too, of the importance of the industry in the economy of Canada.

While the material herein is clearly set forth in the index, it should be noted that Section "B" gives a bird's-eye view of the operations of the industry from its pulpwood harvest to its markets; and that in Section "F" may be found, not only the figures revealing the national significance of the industry, but also general statistics covering its operations as a whole.

Unless otherwise noted, all figures for 1949 and subsequent years include Newfoundland. In most of the newsprint tables in Section "D," which has been compiled by the Newsprint Association of Canada, the Newfoundland statistics have been consolidated with those of Canada for all preceding years. Elsewhere, the figures prior to 1949 have not been consolidated as Newfoundland statistics were not compiled on the same basis as those of the Dominion Bureau of Statistics. The figures covering Newfoundland's production up to Confederation will be found in the appropriate sections of the book in Tables 24, 43, 44, 52 and 76.

The publication of these tables has largely been made possible through the kindly aid of L. J. Pouliot, chief of the Forestry Section of the Dominion Bureau of Statistics; and to him grateful acknowledgment is made.

INDEX

"A" Forests and Pulpwood

Table

1. Forest extent
2. Forest holdings
3. Forest volume
4. Coniferous stands
5. Forest consumption
6. Forest increment
7. Wood used by mills
8. Species used
9. Pulpwood production, cords
10. Pulpwood production, value
11. Cords, cubic feet and board measure

"B" 1950 Figures

12. Pulpwood production
13. Apparent pulpwood production by provinces
14. Pulp supply
15. Total production
16. Output by products
17. Markets
18. Pulp use and sale
19. Paper production
20. Pulp and paper exports

"C" Pulp Statistics

21. Pulp production and exports
22. Chemical pulp production and exports
23. Chemical pulp exports
24. Pulp production in Newfoundland
25. Bleached sulphite pulp
26. Unbleached sulphite pulp
27. Sulphate pulp
28. Mechanical pulp
29. Screenings
30. Defibrated and exploded pulps
31. Other wood-pulps
32. Mechanical pulp utilization
33. Bleached sulphite pulp utilization
34. Unbleached sulphite pulp utilization
35. Sulphate pulp utilization
36. Screenings utilization
37. Defibrated and exploded pulps utilization
38. Other pulps utilization
39. Destination of pulp exports
40. Average values, U.S. imports
41. Canadian pulp in U.S. market
42. World pulp figures
43. Exports of unbleached sulphite pulp from Newfoundland.
44. Exports of mechanical pulp from Newfoundland

"D" Newsprint

45. Canadian annual newsprint capacity and production
46. Shipments and mill stocks
47. Daily capacity and production
48. Overseas shipments
49. Production and exports
50. Value of newsprint production and exports
51. U.S. newsprint production

Table

52. Newfoundland newsprint production
53. Principal newsprint producers overseas
54. Sources of U.S. newsprint supply
55. U.S. newsprint consumption and stocks
56. Consumption by newspapers
57. North American newsprint stocks
58. U.S. newspaper circulation
59. U.S. Newspaper Milline rates
60. Indexes of U.S. advertising
61. U.S. newspaper pages printed
62. U.S. advertising expenditures and national income
63. U.S. newspaper advertising and total advertising expenditures
64. U.S. newspaper, magazine, radio and TV advertising
65. Value of Canadian newsprint and total pulp and paper production
66. U.S. prices and price indexes
67. Newsprint and total Canadian exports to United States

"E" Other Paper and Paperboard

68. Production, tons
69. Production, value
70. Building boards and building papers
71. Exports, tons
72. Exports, value

"F" National Significance

73. Paper production and exports
74. Imports of wood-pulp and paper and paper goods
75. Exports and Canadian trade
76. Products of Newfoundland's pulp and paper mills
77. Production by provinces
78. Exports of Canadian produce to U.S.
79. Production and national income
80. Growth of industry
81. Operations of mills
82. Mill locations
83. Capital expenditures
84. Employees and wages
85. Capital, employees and wages
86. Wages paid and numbers employed
87. Distribution of income dollar
88. Growth in employment and wages
89. Domestic trade
90. Principal expenditures
91. Purchases of mill supplies
92. Fuel purchased
93. Electricity purchased
94. Car loadings
95. Payrolls and weekly earnings
96. Power utilization
97. Exports
98. Canadian exports
99. Pulp and paper and mining
100. Ten leading Canadian industries
101. Gross value of Canadian production

"A"—FORESTS AND PULPWOOD

Table 1.

Forest Extent

	Square Miles
Forested Areas of Canada*:	1,299,759
All of which, save for 123,000 square miles, lies within the ten provinces.	
Forested Areas Classified as Unproductive:	587,307
Small trees in adverse locations not expected to reach merchantable size.	
Productive Forest Areas:	712,452
Capable of producing continuous crops of timber.	
Productive Forest Not Presently Accessible:	228,643
Accessible Productive Forests:	483,809
Two-fifths of this area bears trees large enough for use; the remainder is younger growth.	
Privately Owned Forests	
Farm wood lots	32,594
Others	64,114
	96,708
Cutting Rights Leased by the Crown:	
Pulp and paper licences	158,125
Saw timber licences	35,135
Timber sales	3,169
Permit berths	791
	197,220

* Excluding Labrador.

Table 6.

Forest Increment

Complete estimates of the rate of growth of Canadian forests have not been compiled, but the following facts are known:

Cubic feet per acre

While there is but a small growth in many areas, over considerable tracts growths have been recorded by the Federal Forestry Branch of: 25—40

Managed forests in Scandinavia produce: 28

Replacement of annual depletion in the accessible productive forest areas requires an annual average growth of: 11

The foregoing figures by no means indicate that there is no cause for anxiety regarding the future maintenance of the forests and their proper conservation for use.

Other factors affecting these figures include:

1. While the annual increment appears to exceed the annual depletion, no comprehensive and proper estimate of forest increment in Canada as a whole has yet been prepared.
2. Insects and diseases in the forests periodically reach epidemic proportions; unless checked they will affect the existing balance between depletion and increment.
3. In many instances the depletion is concentrated in the more accessible areas. Growth that accrues in more remote areas is not used.
4. Repeated fires retard and often make impossible the proper regeneration of the forests.
5. Land tenures are often such that there is no economic or other urge upon some loggers to operate along scientific methods.
6. The fire hazard is greater in the more accessible forests, a situation naturally having a bearing on the cutting methods pursued by owners or operators.

1950	285,762,620	252,664,002	33,589,962	491,344

Apparent production estimated on the basis of consumption plus exports minus imports.

Imports not reported prior to 1928.

All quantities are given in terms of rough or unpeeled wood.

Source: Dominion Bureau of Statistics.

Table 11.

Cords, Cubic Feet, and Board Measure

A standard cord is a stack of wood 4 x 4 x 8 feet containing 128 cubic feet of wood, bark, and interstices. A cord usually contains about 85 cubic feet of solid wood, but the content varies with the size of the logs.

In the lumber industry, wood is usually measured by the board foot. A board foot is the equivalent of a board one inch in thickness and one square foot in surface area. The relationship between board measure and cord measure varies in different sections of the Dominion. Usually, 2 cords are considered to be equivalent to about 1000 feet board measure. But this ratio also varies with the size and type of the wood.

Table 12.

Pulpwood Production 1950

	Cords	Value
Apparent pulpwood production	12,873,476	\$285,762,620
Pulpwood imports	28,220	491,344
Total supply	12,901,696	\$286,253,964
Less pulpwood exports	1,734,898	33,589,962
Pulpwood used in Canadian mills	11,166,798	\$252,664,002

Source: Dominion Bureau of Statistics.

Table 13.

Apparent Pulpwood Production by Provinces 1950

Provinces	Cords (a)	Value
Quebec	6,340,220	\$142,370,309
Ontario	3,196,941	71,444,124
British Columbia	928,650	23,182,324
Other Provinces	2,407,665	48,765,863
Canada	12,873,476	\$285,762,620

a: Quantities are given in terms of rough or unpeeled wood. One cord of peeled pulpwood is equivalent to 1.125 cords of rough or unpeeled wood.

Source: Dominion Bureau of Statistics.

Table 14.

Pulp Supply 1950

The pulpwood used in the mills together with other pulps resulted in the following supply:

	Tons	Value
Groundwood pulp	4,910,803	\$173,035,433
Chemical pulp	3,314,250	323,330,963
Other pulp*	247,961	6,217,529
Total wood pulp production	8,473,014	\$502,583,925
Wood pulp imports	36,583	3,692,274
Other wood fibre used	9,133	56,227
Other fibres and stock used**	428,461	13,073,199
Total supply	8,947,191	\$519,405,625

* Includes screenings, off-quality, semi-chemical, defibrated and exploded pulp.

** Includes rags, straw, leather scrap and wastepaper.

Source: Dominion Bureau of Statistics.

Table 15.

Total Production 1950

From the foregoing supply of pulps flowed the industry's production as follows:

Pulp Exported	Tons	Value
Mechanical	247,556	\$ 14,037,566
Bleached sulphite	557,858	77,855,345
Unbleached sulphite	411,482	41,842,295
Sulphate	581,994	70,244,716
Other wood pulp	33,059	4,286,212
Chemical pulp screenings	7,758	211,034
Mechanical pulp screenings	6,436	78,381
	1,846,143	\$208,555,549
Pulp for Domestic Use	405,431a	35,364,398b
Total	2,251,574	\$243,919,947

Paper Production

For domestic market	1,693,618	\$207,499,864
Exported	5,118,417c	502,653,962
	6,812,035	\$710,153,826
Gross Production	9,063,609d	\$954,073,773

a: Total production less exports and pulp made for mills own use. Some of this tonnage was made for affiliated mills.

b: Gross value of production less pulp for paper production and pulp exports.

c: Excludes tonnage of bags, cartons, and other paper products having value of \$2,660,280.

d: As most of the pulp for domestic sale was utilized in the manufacture of paper, there is some duplication in this figure.

Source: Dominion Bureau of Statistics.

Table 16.

Output by Products 1950

	000' tons	%	000,000' \$	%
Market pulp*	2,251.6	24.8	243.9	25.6
Newsprint	5,319.0	58.7	507.0	53.1
Paperboard	876.9	9.7	92.5	9.7
Other Papers	616.1	6.8	110.7	11.6
	9,063.6	100.	\$954.1	100.

* See Note d of Table 15.

Table 17.

Markets 1950

These figures show the relation between pulp supply and export markets:

Pulp Exports	Tons	Value
To U.S.A.	1,694,444	\$191,005,507
To U.K.	117,921	13,128,894
Elsewhere	33,778	4,421,148
Total pulp exports	1,846,143	\$208,555,549
Pulp and other paper stock for domestic use	7,101,048	310,850,076
	8,947,191	\$519,405,625

Of the 7,101,048 tons of pulp and other paper stock for domestic use, about 405,000 tons of pulp were sold on the domestic market and 6,695,617 tons of pulp and other paper stock valued at \$275,485,678 were converted into 6,812,035 tons of paper and paper board valued at \$710,153,826. The exports from this production, including paper products, were as follows:

Newsprint Exports (a)	Tons	Value
To U.S.A.	4,760,116	\$465,288,267
To U.K.	19,095	1,861,980
To other countries	194,037	20,728,407
	4,973,248	\$487,878,654

Other Paper Exports	Tons	Value
To U.S.A.	117,753	\$ 10,391,519
To U.K.	2,758	425,188
To other countries	24,658	3,958,601
	145,169	\$ 14,775,308

Paper Products Exports (b)	Tons	Value
To U.S.A.	—	\$ 1,409,049
To U.K.	—	66,230
To other countries	—	1,185,001
	—	\$ 2,660,280

Paper Exports	5,118,417	\$505,314,242
Pulp and Paper Exports	6,964,560	\$713,869,791

a: Includes mutilated newsprint.

b: Includes bags, box, hanging paper, and miscellaneous paper products.

a: Estimated on basis of known quantity and value "made for export" prior to 1946.

b: Estimated on basis of production plus imports minus exports.

c: Exports not available prior to 1927.

Note: Screenings were not reported separately prior to 1923. It is assumed that these were included with "Other wood-pulps".

Source: Dominion Bureau of Statistics.

Table 30.

Defibrated and Exploded Pulps

	Tons	Production	Apparent	Consumption (a)	Exports	Tons	Value	Tons	Imports
		Value		Value					Value

Table 40.

Average Values of U.S. Pulp Imports

Because each type of pulp is manufactured in a variety of grades, and because Canadian pulps differ from those manufactured elsewhere, the following figures are useful merely to indicate past trends:

Per ton	Rayon & Special Chemical Grades	Bleached Sulphite Other Than Rayon & Special Chemical	Unbleached Sulphite	Bleached Sulphate	Unbleached Sulphate	Mechanical
1937 . . .	\$ 71.82	\$ 54.38	\$ 37.69	\$ 62.71	\$ 35.78	\$19.88

Table 41.

Canadian Pulp in U.S. Market

The following figures cover all grades of pulp including mechanical and screenings. Over the war years imports of mechanical pulp by the United States have averaged some 17 per cent of total pulp imports.

Tons	U.S. Pulp Production	Total U.S. Imports	U.S. Imports from Canada	U.S. Exports	U.S. Net Imports
1925 . .	3,962,217	1,663,614	880,453	37,995	1,625,619
1926 . .	4,394,766	1,731,413	864,333	34,220	1,697,193

1946	308	15,068	14,630
1947	308	15,353	15,650
1948	309	15,803	16,126
1949	308	16,601	16,806
1950	307	17,025	17,194

Because of variations in the number of workdays in a year or a month, daily capacity provides the most accurate measurement of changes in capacity.

(a) Production figures include relatively small quantities of hanging paper, poster paper, and side runs for pulping.

(b) Balance consists of Canada's home consumption, plus or minus changes in stocks held by manufacturers and distortion caused by irregular freight movement at successive year ends.

Figures for 1919-1948 do not include Newfoundland.

1948	850,000	867,494	857,540	9,309	866,840
1949	876,000	899,528	883,657	14,003	897,660
1950	992,000	1,014,703	1,002,125	15,151	1,017,276

These figures are compiled from U.S. mill reports and shipments to overseas show only exports direct from mills. They do not include tonnage delivered to U.S. buyers and subsequently resold for exports, such tonnage being included in shipments to U.S.A. Exports as reported by U.S. Department of Commerce are thus higher than mill reports; in 1950, the Department showed exports of 43,967 tons versus 15,151 tons reported by the mills.

* End of each year.

U.S. total consumption is based on consumption reported by the American Newspaper Publishers Association group. For each year the percentage of total U.S. supply taken by this group is assumed to represent the percentage of total consumption consumed by the group. Total consumption is obtained by extending ANPA consumption by this percentage.

Total consumers' stocks are computed each month by taking stock at the beginning of the month plus supplies received in the month less total consumption in that month.

Table 71.

Exports of Paper (Except Newsprint) — Volume

In the past, the basis and classification upon which exports of paper other than newsprint have been compiled have been modified from time to time. Consequently, only figures covering recent years are included in this and in the succeeding table.

Moreover, because they are compiled on a somewhat different basis, the two tables which follow are not comparable to the production figures in tables 68 and 69.

Also, some of the exports go through a converting plant before shipment. Thus, many of the exports have a value enhanced by the conversion or packaging process, whereas the production figures show the valuation at the basic rate.

Again, the tonnage figures for certain paper products exported are not available. The dollar figures covering these exports will be found in the succeeding table under the heading "Paper Products".

—: Unfavourable balance.

Domestic exports cover exports of Canadian produce. In the last 20 years, domestic exports cover approximately 98 per cent or more of total Canadian exports.

Pulp and paper export figures 1919-1930 estimated by DBS from fiscal year figures.

1950	954,137,651	17,791*†	511,142,983	14,308*†

* Preliminary figures.

† Excluding Newfoundland for which figures are not available. National income in Newfoundland in 1948 is estimated at \$120 million.

All National Income figures from 1926 have been compiled on a revised basis in September, 1948, and those from 1942 were further revised in October, 1950. Figures for years prior to 1926 are not comparable.

a: The "national income" is the total of all incomes earned by Canadians in the production of goods and services during the calendar year. The "gross national product" is the market value of all goods and services produced by Canadians. It is obtained by adding to the national income two items which are not "income" but which are part of the final cost of all goods and services — namely, allowances for depreciation of plant and equipment, and indirect taxes less subsidies.

b: The "net value of production" or value added by manufacture is computed by subtracting the cost of fuel and electricity as well as the cost of materials from the gross value of the products.

The figures for the years prior to 1926, when the National Income figures were compiled on a different basis and for which the gross National product figures are not available, were as follows:

	Gross Production of Industry	Net Production of Industry	National Income
1921	\$151,003,165	\$73,765,200	\$3,507
1922	158,950,956	81,258,232	3,671
1923	184,821,511	95,076,985	3,847
1924	179,259,504	89,629,253	3,865
1925	193,092,937	99,071,212	4,239

Source: Dominion Bureau of Statistics.

Table 80.
Growth of Industry

	Paper and Paper Mills (a)	Total Employees	Total Production
1871	21	760	\$ 1,071,651
1881	41	1,588	2,509,993
1891	58	2,817	3,633,257
1901	53	6,236	8,627,557
1911	72	9,766	23,226,479
1921	100	24,619	151,003,165
1931	103	26,669	174,733,954
1941	106	37,154	334,726,175
1945	109	39,996	398,804,515
1946	113	44,967	527,814,916
1947	115	49,946	706,971,628
1948	117	51,924	825,857,664
1949	123	52,050	836,148,393
1950	123	52,343	954,137,651b

a: Number of mills operated during year.

b: Includes products other than pulp or paper valued at \$63,878.

Note: At the close of 1951 there were altogether 130 pulp and paper mills in Canada, of which 129 were active during all or part of the year and one was under construction. This total includes two asbestos paper mills which, for statistical purposes report in the Asbestos Products industry only.

Manufacturers of moulded pulp products and of laminated, coated or impregnated papers and paperboards are classed in the Paper Goods industry or in the Roofing Paper industry only, unless they produce the pulp or paper used, in which case separate returns are made covering pulp and paper manufacture and paper conversion.

Table 83.
Capital Expenditures

For the years 1946 to 1951, annual surveys of the Department of Trade & Commerce, covering some 95 per cent of the industry, show the following capital expenditures:

Year	Millions of \$
1946	49.5
1947	77.7
1948	79.9
1949	71.8
1950	62.5
1951	82.9
	424.3

The foregoing figures do not include capital expenditures made on the woodlands nor, of course, expenditures for maintenance and renewals.

Woods labour is not included.

a: 1943 was the last year in which the Dominion Bureau of Statistics compiled the figures on capital investment. The figures in 1946-50 are Canadian Pulp and Paper Association estimates. These may be conservative for Taxation Statistics, 1950, of the Department of National Revenue covering the 1948 taxation year show that 75 pulp and paper companies had total assets of \$1,702,110,000. Current liabilities were \$289,924,000. On this basis, the capital employed in these 75 companies was \$1,412,186,000 in 1948. While the taxation statistics cover 75 pulp and paper companies, there are a few other companies not included in the statistics.

Table 86.

Estimated Wages Paid and Numbers
Employed in 1950

Wages

Mill Workers	\$169,246,531
Wood Workers*	100,784,000
	\$270,030,531

Workers

Seasonal woods workers on manufacturers' limits east of the Rockies	147,800
Permanent woods workers on manufacturers' limits east of the Rockies	5,300
Woods workers in B.C., mostly permanent	5,000
Woods workers cutting wood for sale to manufacturers	66,600
	224,700
Mill Workers, permanent	52,343
	277,043

* Includes an estimated \$27,984,000 to the 66,600 woods workers cutting pulpwood for sale to the mills. Includes also those working for contractors cutting pulpwood on pulp and paper company limits. The terms of pulpwood cutting contracts are of an infinite variety ranging from those in which the contractor and his men are company employees to those in which the contractor is a free agent. Some companies cut all the wood required from their own limits.

Table 87.
Distribution of Income Dollar

Covering 1950 operations, Consolidated Paper Corporation Limited published the following breakdown of its income dollar:

Payrolls (including labour in pulpwood) and employee benefits	37.4¢
Materials and miscellaneous	18.3
Taxes	13.3
Power and fuel	8.2
Depreciation and depletion	6.0
Bond interest	1.2
Dividends	7.4
Sinking fund instalment for redemption of bonds	5.4
Surplus remaining in business for working capital, etc.	2.8
	100.0¢

Table 88.
Growth in Employment and Wages

	1915	1950	% increase
Mill workers	15,300	52,343	242
Wages and salaries paid	\$11,000,000	\$169,246,531	1,439

The average wage paid mill workers in 1950 was \$3,051 while the average salary was \$4,165.

Other Agricultural Products	88,777	2.27	4,289,798	2.98
	531,567	13.61	24,310,822	16.88
Animal Products	123,141	3.15	2,300,651	1.60
Mineral Products				
Coal	322,829	8.27	23,740,566	16.48
Coke	34,793	0.89	1,899,872	1.32
Ores and Concentrates	179,026	4.58	12,385,748	8.60
Sand, Stone, Gravel, Plaster, Lime, Brick, Cement, Sewer, Pipe, Tile	215,676	5.52	9,805,527	6.81
Other Mineral Products	115,024	2.95	8,822,765	6.13
	867,348	22.21	56,654,478	39.34
Gasoline, Petroleum Oils and Products	275,077	7.04	8,673,978	6.02
Iron & Steel products, implements, machines, boilers, autos and parts, canned food & sugar, fertilizer	275,284	7.05	11,234,935	7.80
Other Products of Manufacturers and miscellaneous	285,157	7.30	14,143,372	9.82
Merchandise, L.C.L.	855,996	21.92	3,317,635	2.30
Total Revenue Cars Loaded	3,905,667	100.	144,030,623	100.

Note: Car loadings of pulp and paper and pulpwood in 1950 were equivalent to 618 cars and 448 cars respectively, every day in the year. A proportion of the pulpwood car loadings included pulpwood for export. Deducting an estimate for pulpwood shipped abroad, the pulp and paper industry's car loadings of pulpwood and finished products were equivalent to ten trains of 100 cars daily. Annual loadings of pulpwood for the mills and of finished products would thus fill a train 3,670 miles in length. In addition, the pulp and paper industry creates a vast rail traffic of coal, chemicals, and other supplies required for the operations at the mills and in the woods.

Table 96.

Power Utilization

in 000's of kwh including off-peak power			
	1948	1949	1950
Generated by Central Electric Stations for			
Pulp and paper industry	8,022,261	7,967,897	8,456,863
Other industries	18,786,181	19,635,194	a
Mining companies	1,909,506	2,030,016	a
Domestic customers (homes and farms)	4,984,280	5,678,847	a
Commercial customers, street lighting and free service	2,478,470	2,776,474	a
Export	1,743,108	1,756,752	1,925,780
Line losses, etc.	4,465,875	4,573,393	a
Generated for own use by	42,389,681	44,418,573	a
Pulp and paper industry	2,327,304	3,778,110	3,949,244
Other industries	2,263,373	2,120,280	a
Mining companies	283,589	263,835	a
Total electricity generated	47,263,947	50,580,798	a
Less: Exports	1,743,108	1,756,752	1,924,428
Line losses, etc.	4,465,875	4,573,393	a
	41,054,964	44,250,653	a
Plus: Imports	86,391	31,205	1,350
Canadian consumption	41,141,355	44,281,858	a

a: Not available.

Note: The power consumption of the pulp and paper mills accounts for about 33 per cent of all the power generated for industry and for mining. Of the power generated by industry for its own use, the pulp and paper mills accounted for 50.7 per cent in 1948 and 64.1 per cent in 1949. Of the total consumption of electricity in Canada, the pulp and paper mills accounted for 25.2 per cent in 1948 and 26.3 per cent in 1949. There are several single paper mills which alone consume more electric power than all the domestic customers in Montreal combined, indeed which use more power than is required to provide light for the city and all its residents. There are single pulp and paper mills which use half as much power as that consumed by all the industries in the Montreal area.

Table 100.

Ten Leading Canadian Industries 1949

	Gross Value of Production		Salaries and Wages		Employment		Net Value of Production	
	'000 \$	Rank b	'000 \$	Rank b	No.	Rank	'000 \$	Rank b
Pulp and Paper	\$836,148	1	\$157,703a	1	52,050a	2	\$423,375	1
Slaughtering and Meat Packing	697,950	2	52,136	12	20,586	16	108,059	8
Non-ferrous Metal Smelting and Refining	599,188	3	55,133	10	19,150	20	181,907	4
Motor Vehicles	485,756	4	76,684	5	27,022	9	182,055	3
Petroleum Products	436,796	5	26,142	27	9,413	31	82,971	19
Sawmills	396,415	6	97,449	2	55,032	1	186,120	2
Butter and Cheese	355,004	7	41,612	22	22,479	12	74,705	25
Primary Iron and Steel	305,734	8	82,958	3	29,097	7	136,152	5
Railway Rolling Stock	296,754	9	82,135	4	32,410	4	109,228	7
Flour Mills	245,274	10	11,965	38	5,033	39	28,342	38

a: Covers only mill workers; the inclusion of the 10,300 men permanently employed in the woods places pulp and paper first, instead of second, in employment.

b: Rank in Canadian industry as a whole.

Table 101.

Gross Value of Canadian Production

		1949	1950			1949	1950e
PRIMARY PRODUCTION:				MANUFACTURES:		'000\$	'000\$
Agriculture	\$ 2,710,430,000	\$ 2,629,439,000e		Paper Products		1,093,060	1,248,484
Wheat	639,202,000	450,373,000e		*Pulp and paper		836,148	954,138
All grains (including wheat)	749,641,000	691,353,000e		Paper boxes and bags		120,321	139,759
Forestry	1,793,975,656			Wood Products		840,355	1,000,011
Operations in the woods	561,412,062			*Sawmills		396,415	492,962
Fisheries	190,137,072			Furniture (including mattresses & springs)		157,122	172,908
Trapping	15,296,615			Sash, door and planing mills		137,717	176,639
Mining	1,384,300,847	1,040,887,611e		Printing, Publishing and Allied Industries		377,908	417,606
Mineral production	901,110,026			Food and Beverages		2,882,581	3,018,804
Electric Power	280,311,624			Slaughtering and meat packing		697,950	754,855
Less Duplication (Forest production on farms)	—130,457,000			Butter and cheese		355,004	331,559
Total, Primary Production	\$ 6,243,994,814			Flour mills		245,274	256,609
SECONDARY PRODUCTION:				Bread and other bakery products		203,720	216,770
Manufactures	\$12,479,593,300	\$13,781,220,000e		*Fish curing and packing		111,919	118,968
Construction	2,220,775,000			Iron and Steel Products		1,419,145	1,499,927
Custom and Repair	430,741,000			Primary iron and steel		305,734	335,098
Total, Secondary Production	\$15,131,109,300			Machinery		148,156	155,705
Less Duplication in Manufactures (See Notes below)	—2,015,177,223			Agricultural implements		176,970	149,643
Grand Total	\$19,359,926,891			Transportation Equipment		1,063,211	1,252,860
				Motor vehicles		485,756	675,867
				Railway rolling stock		246,754	202,489
				Non-ferrous Metal Products		867,043	959,491
				*Non-ferrous metal smelting and refining		599,188	669,883
				Brass and copper products		115,407	126,241
				Clothing (Textile and Fur)		727,498	728,532
				Men's factory clothing		220,701	222,700
				Women's factory clothing		202,412	194,582
				Textile Products (Except Clothing)		636,824	737,138
				Cotton yarn and cloth		211,384	257,384
				Synthetic textiles and silk		124,125	147,048
				Chemical and Allied Products		587,398	635,991
				Paints and varnishes		82,860	90,707
				Medicinal and pharmaceutical preparations		71,502	75,541
				Acids, alkalies and salts		74,411	85,180
				Fertilizers		67,428	69,243
				Soaps, washing compounds, etc.		62,398	64,295
				Products of Petroleum and Coal		533,731	618,287
				Petroleum products		436,796	514,055
				Electrical Apparatus and Supplies		486,286	580,578
				Non-metallic Mineral Products		246,457	281,277
				Glass products		42,398	49,577
				*Cement		35,065	38,201
				Abrasive products		27,700	32,409
				*Clay products from domestic clay		17,981	21,009
				*Lime		11,796	12,730
				*Salt		6,621	8,100

				Tobacco and Tobacco Products		172,420	188,330
				Miscellaneous Manufacturing Industries		156,363	164,304
				Total		12,479,593	13,781,220

* Industries included both in primary and secondary production.

e: Preliminary estimates. Other figures not yet available.

NOTES: The gross value of commodity production figures given above are not comparable with those of the "gross national product" given in Table 79. The methods used are entirely different and the "gross national product" comprises, in addition, depreciation allowances, similar business costs, and indirect taxes less subsidies.

While the statistics of gross production are of interest as indicating the amount of revenue produced by the corporations and other operators in the field, the total includes a large element of duplication: often the products of one industry become the materials of other industries. The net value of production obtained by deducting the cost of materials, fuel and electricity is a more accurate measure of the contribution to the national economy.

The value of agricultural production includes forest products produced on farmers' wood lots. As such products are also reported under forestry, the amount of duplication is deducted.

A survey of production must differentiate between the more important branches and at the same time present a grand total that will be free from overlapping. For example, the products of pulp and paper and sawmills are included in forestry production as being the first finished products of commercial value resulting from the productive process. They may, however, be classified under manufactures in view of the nature of the production process—either allocation being quite correct according to the point of view. Production of such industries is regarded both as primary and as secondary, but the duplication is eliminated from the grand total.

A break-down of the manufactures figures is given for the seventeen industrial groups in the adjoining column, which also gives the value of production of the principal industries in each group as well as that of all industries (marked *) included both in the primary and secondary production figures.

CANADA'S PULP AND PAPER INDUSTRY

1. The Canadian pulp and paper industry is one of the major industrial enterprises of the world.
2. In newsprint paper, Canada has a production five times that of any other country. She provides almost three of every five newspaper pages printed throughout the world. Canada is the second greatest producer and exporter of pulps in the world; and at the same time has a large production of papers and paperboards of every type and kind.
3. Canada is the greatest exporter of pulp and paper in the world. Some 75 per cent of the total pulp and paper production moves abroad and 94 per cent of her newsprint is exported.
4. The domestic trade in pulp and paper would alone make the industry a leader in Canadian trade. The quarter of the pulp and paper output sold at home has a value far exceeding Canada's output of gold and of farm implements.
5. Amidst Canadian industry, pulp and paper stands first in employment; first in total wages paid; first in export values; first in value of production; first in capital invested.
6. Canada's pulp and paper output is currently some \$1.1 billion a year. In value it exceeds Canada's output of wheat and all other grains combined; it is almost twice as great as the gross value of production of the automobile industry; and it about equals Canada's total annual mineral production.
7. Pulp and paper is exporting at the rate of \$900 million annually. It is the largest item in Canada's trade abroad accounting for 35 per cent of the exports to the United States and 24 per cent of all exports.
8. Fluctuations in the national income closely parallel variations in pulp and paper production. The ups and downs in Canadian exports also closely follow the trend of pulp and paper exports. Prosperity in the industry and in Canada are inseparable.
9. Pulp and paper is the largest industrial buyer of goods and services in the Dominion. In 1950 it paid out \$270 million in wages, \$172 million for transportation, and \$173 million for supplies and electricity, and \$77 million for purchases of pulpwood.
10. The annual wage bill of the industry exceeds \$270 million of which \$169 million went to mill workers and the remainder to woods workers. No single industry pays more. No industry has a better labour-management record. Generally, wages and working conditions in the mills are covered by collective labour agreements.
11. In hydro-electric power, Canada is the second nation in the world. Pulp and paper has been largely responsible for the development of Canadian hydro-electric resources. Pulp and paper mills use over 33 per cent of all the power generated for industry.
12. There are 85 pulp and paper companies in Canada, some large some small, operating 130 mills in seven provinces. In addition to pulps and newsprint, they have a highly developed production of fine paper, wrapping paper, tissues, paperboard, and other cellulose products.
13. Canada's rag papers, fine papers, specialty papers, wrapping papers, and paperboards are of a quality unsurpassed anywhere. Canada produces a thousand varieties of pulps, papers, paperboards, and specialty pulp and paper products.
14. In the value of its production the pulp and paper industry has headed the list of Canadian peacetime manufacturing industries for a score of years.
15. In 1950 the industry took pulpwood valued at \$255 million and converted it into products having a gross value of \$954 million. The industry thus increases by $3\frac{1}{2}$ times the value of the wood which it uses.

16. Including woods operations, pulp and paper produces employment for some 277,000 workers; helps directly to provide a livelihood for a million Canadians; and indirectly supports hundreds of thousands more as one of the chief buyers of transportation, power, fuel, supplies, and equipment.

17. Pulp and paper represents the savings of many thousands of Canadians who, over the years, have received few dividends.

18. The export pulp markets are worth \$350 million annually to Canada. Paper exports are worth another \$550 million. Every Canadian has an interest in the maintenance of these markets.

19. The pulp and paper industry has made its own way against world competition without subsidies, price floors, guarantees, or similar forms of public financial assistance. The industry has at times disappointed investors but, in war or peace, it has always been a contributor to—never a drain on—the public treasury. Canada has no better asset, nor any worth more care.

20. The four great sources of Canadian wealth are forests, farms, minerals, and water power. The industry uses the water power to convert the forest crop into dollars of national income chiefly obtained from abroad by exports, and chiefly paid out in wages.

21. Of the average annual forest consumption in the ten years ending 1949, Canadian pulp and paper mills accounted for 20.1 per cent, fuelwood for 20.8 per cent, timber and other products for 38.1 per cent, and fire, insect, and disease for 21 per cent.

22. With an investment exceeding \$1¼ billion in plants which cannot be moved and which cannot operate without pulpwood, and as the largest leaseholder of Crown woodlands, pulp and paper has a vital interest in the maintenance of the forests and in their conservation for future use. The industry is engaged in implementing on its limits its declared Forest Policy of perpetual yield.

23. Spurred by self-interest and its responsibilities, pulp and paper employs some hundreds of trained foresters whose aim is the scientific cutting of the forests and their conservation for future use. Selective and other cutting methods pursued encourage natural regrowth. Pulp and paper spends large sums for the protection of the forests from fire and other

hazards. The industry operates the best managed forests in Canada.

24. Provincial governments, which control the natural resources, have set up departments to deal with the forests. The Dominion government's expenditures on forest matters have been considerably below the level of expenditures for much less important national assets.

25. Through pulp and paper operations have been created vast sources of government revenue. For many years the Dominion Government has operated departments for agriculture and fisheries. No such recognition has been given to the forest industries.

26. Over 90 per cent of the Canadian forests are owned by the public. In area, the forests more than double the land in Canada classed as having a present or potential value for agriculture. Pulp and paper development roughly parallels the extent of the forests in the various provinces.

27. Replacement of the annual depletion in the accessible productive forest areas requires an average annual growth of 11 cubic feet per acre. While there is a small growth in many areas, over large tracts the Federal Forestry Branch has recorded growths of from 25 to 40 cubic feet per annum. It appears that the existing forests can supply the present demands made upon them. A reduction in the fire, insect, and disease hazards would permit a substantial development of forest industries.

28. Through devastation by fire, insects, and disease, much more of the forest crumbles into decay or goes up in smoke than is used to produce pulp, paper, and paperboard. Unless these ravages be checked, the depletion of the forests will ultimately exceed the increment. Fires often make impossible the proper regeneration of the forests.

29. The forests are and can be maintained as a renewable asset yielding harvests in perpetuity. They are not merely a source of public revenue, they are also a public responsibility demanding adequate expenditures for their maintenance.

30. Because of what pulp and paper means in the economy—in employment, in exports, in expenditures, and in domestic trade—every Canadian benefits from the operations of this great national industry.
