CANADA'S PULP AND PAPER INDUSTRY

1. The Canadian pulp and paper industry is one of the major industrial enterprises of the world.
2. In newsprint paper, Canada has a production five times that of any other country. She provides newsprint for over half the newspaper pages printed throughout the world. Canada is also the leading exporter of pulps in the world; and at the same time has a large production of papers and paperboards of every type and kind.
3. Canada is the greatest exporter of both pulp and of paper in the world. About 82 per cent of her total pulp and paper production moves abroad and 93 per cent of her newsprint is exported.
4. The domestic trade in pulp and paper would alone make the industry a leader in Canadian trade. The fifth of the pulp and paper output sold at home has a value half again as great as Canada's output of gold or of farm implements.
5. Amidst Canadian industry, pulp and paper stands first in employment; first in total wages paid; first in export values; first in value of production; first in capital invested.
6. Canada's output of pulp and paper of about \$1.2 billion a year equals in value Canada's total annual mineral production; it is one and a half times as great as the gross value of production of the automobile industry; and, excluding the bumper crop year of 1952, exceeds in value Canada's output of wheat and all other grains combined.
7. Pulp and paper is exporting at the rate of almost \$1 billion annually. It is the largest item in Canada's trade abroad accounting for 34 per cent of the exports to the United States and 21 per cent of all exports.
8. Fluctuations in the national income closely parallel variations in pulp and paper production. The ups and downs in Canadian exports also closely follow the trend of pulp and paper exports. Prosperity in the industry and in Canada are inseparable.
9. Pulp and paper is the largest industrial buyer of goods and services in the Dominion. In 1951 it paid out \$379 million in wages, \$200 million for transportation, \$210 million for supplies and electricity, and \$115 million for purchases of pulpwood.
10. The annual wage bill of the industry exceeds \$379 million of which \$213 million went to mill workers and the remainder to woods workers. No single industry pays more. No industry has a better labour-management record. Generally, wages and working conditions in the mills are covered by collective labour agreements.
11. In hydro-electric power, Canada is the second nation in the world. Pulp and paper has been largely responsible for the development of Canadian hydro-electric resources. Pulp and paper mills use about one third of all the power generated for industry.
12. There are 86 pulp and paper companies in Canada, some large some small, operating 131 mills in seven provinces. In addition to pulps and newsprint, they have a highly developed production of fine paper, wrapping paper, tissues, paperboard, and other cellulose products.
13. Canada's rag papers, fine papers, specialty papers, wrapping papers, and paperboards are of a quality unsurpassed anywhere. Canada produces a thousand varieties of pulps, papers, paperboards, and specialty pulp and paper products.
14. In the value of its production the pulp and paper industry has headed the list of Canadian peacetime manufacturing industries for a score of years.
15. The value of pulp and paper's annual production is close to six per cent of the gross national product. Thus the operations of the industry generate, directly and indirectly, one of every eight dollars in the income of every Canadian.
16. Including woods operations, pulp and paper produces employment for some 390,000 workers; helps directly to provide a livelihood for a million Canadians; and indirectly supports hundreds of thousands more as one of the chief buyers of transportation, power, fuel, supplies, and equipment.

17. Pulp and paper represents the savings of many thousands of Canadians who, over the years, have received few dividends.

18. The export pulp markets are worth some \$300 million annually to Canada. Paper exports are worth about another \$600 million. Every Canadian has an interest in the maintenance of these markets.

19. The pulp and paper industry has made its own way against world competition without subsidies, price floors, guarantees, or similar forms of public financial assistance. In war or peace, the industry has always been a contributor to — never a drain on — the public treasury. Canada has no better asset, nor any worth more care.

20. The four great sources of Canadian wealth are forests, farms, minerals, and water power. The industry uses the water power to convert the forest crop into dollars of national income chiefly obtained from abroad by exports, and chiefly paid out in wages.

21. Of the average annual forest consumption in the ten years ending 1950, Canadian pulp and paper mills accounted for 20.7 per cent; fuelwood for 20.7 per cent; timber and other products for 38.1 per cent; and fire, insects, and disease for 20.5 per cent.

22. With an investment exceeding \$1¼ billion in plants which cannot be moved and which cannot operate without pulpwood, and as the largest leaseholder of Crown woodlands, pulp and paper has a vital interest in the maintenance of the forests and in their conservation for future use. The industry is engaged in implementing on its limits its declared Forest Policy of perpetual yield.

23. Spurred by self-interest and its responsibilities, pulp and paper employs some hundreds of trained foresters whose aim is the scientific cutting of the forests and their conservation for future use. Selective and other cutting methods pursued encourage natural regrowth. Pulp and paper spends large sums for the protection of the forests from fire and other hazards. The industry operates the best managed forests in Canada.

24. Provincial governments, which control the natural resources, have set up departments to deal with the forests. The Dominion government's expenditures on forest matters have been considerably below the level of expenditures for much less important national assets.

25. Through constant and vigorous research, pulp and paper is discovering new products, using more tree species, eliminating waste, and improving its operations in mills and woods. The Pulp and Paper Research Institute of Canada is recognized as a chief centre of world knowledge on wood, on pulp, and on paper.

26. Over 90 per cent of the Canadian forests are owned by the public. Canada's forests cover an area more than twice that of all her land having a present or potential value for agriculture.

27. Replacement of the annual depletion in the accessible productive forest areas requires an average annual growth of 11 cubic feet per acre. While there is a small growth in many areas, over large tracts the Federal Forestry Branch has recorded growths of from 25 to 40 cubic feet per annum. It appears that the existing forests can supply the present demands made upon them. A reduction in the fire, insect, and disease hazards would permit a substantial development of the forest industries.

28. Through devastation by fire, insects, and disease, about as much of the forest crumbles into decay or goes up in smoke as is used to produce pulp, paper, and paperboard. Unless these ravages be checked, the depletion of the forests will ultimately exceed the increment. Fires often make impossible the proper regeneration of the forests.

29. The forests are and can be maintained as a renewable asset yielding harvests in perpetuity. They are not merely a source of public revenue, they are also a public responsibility demanding adequate expenditures for their maintenance.

30. Because of what pulp and paper means in the economy — in employment, in exports, in expenditures, and in domestic trade — every Canadian benefits from the operations of this great national industry.

Introduction

These tables annually present a succinct picture of pulp and paper operations, their intimate relationship with the forest resources and the forest crop, and something, too, of the importance of the industry in the economy of Canada.

Every effort has been made to include herein as many 1952 figures as possible; but in many instances it has been impossible either to obtain the 1952 figures or to provide informed estimates. Particularly is this so of 1952 dollar value figures many of which will not be available from government sources until the end of 1953.

While the material herein is clearly set forth in the index, it should be noted that in Section "F" may be found, not only the figures revealing the national significance of the industry, but also general statistics covering its operations as a whole.

In most of the newsprint tables in Section "D", the Newfoundland statistics have been consolidated with those of Canada for all preceding years. Elsewhere, the figures prior to 1949 have not been consolidated as Newfoundland statistics were not compiled on the same basis as those of the Dominion Bureau of Statistics. The figures covering Newfoundland's production up to 1948 will be found in Tables 25, 44, 45, 52 and 75.

The publication of these tables has largely been made possible through the kindly aid of L. J. Pouliot, chief of the Forestry Section of the Dominion Bureau of Statistics; and to him grateful acknowledgment is made.

"A"—FORESTS AND PULPWOOD

Table 1.

Forest Extent — 1952

	Square Miles
Forested Areas of Canada*:	1,320,321
All of which, save for 123,000 square miles, lies within the ten provinces.	
Forested Areas Classified as Unproductive:	555,988
Small trees in adverse locations not expected to reach merchantable size.	
Productive Forest Areas:	764,333
Capable of producing continuous crops of timber.	
Productive Forest Not Presently Accessible:	261,000
Accessible Productive Forests:	503,333
Two-fifths of this area bears trees large enough for use; the remainder is younger growth.	
Privately Owned Forests	
Farm wood lots	35,594
Others	63,851
	99,445
Cutting Rights Leased by the Crown:	
Pulp and paper licences	175,895
Saw timber licences	32,536
Timber sales	3,871
Permit berths	691
	212,993

* Excluding Labrador.

Source: Federal Forestry Branch.

Table 2.

Forest Holdings — 1952

	Sq. Miles	Per Cent
Private holdings	99,445	7.5
Crown Lands		
Leased by pulp and paper cos.	175,895	13.3
Leased by others	37,098	2.8
Unoccupied	1,007,883	76.4
Total Forested Land*	1,320,321	100.0

* Excluding Labrador.

Source: Federal Forestry Branch.

Table 3.

Forest Volume — 1952

In 000,000's of cubic feet of merchantable timber*	
Accessible Forests:	
Conifers	181,423
Broad leaved	51,684
Presently Inaccessible Forests:	
Conifers	104,293
Broad leaved	12,180

* Excluding Labrador.

Table 4.

Coniferous Stands — 1952

Estimated Stands of Accessible Conifers by Provinces		
	Millions of cubic feet	Pulp Production Tons — 1951
Newfoundland*	3,337	†
Prince Edward Island	61	nil
Nova Scotia	2,939	†
New Brunswick	6,100	†
Quebec	45,928	4,282,568
Ontario	54,589	2,484,551
Manitoba	1,004	†
Saskatchewan	5,081	nil
Alberta	7,724	nil
British Columbia	54,660	924,154
Nfld., N.S., N.B. and Manitoba	181,423	1,623,576

† Figures for Nfld., N.S., N.B. and Manitoba are not published separately.

* Excluding Labrador.

Sources: Federal Forestry Branch and Dominion Bureau of Statistics.

Table 5.

Forest Consumption

Average Annual Depletion 1941-1950*			
	000's of cu. ft.	%	%
Logs and bolts for domestic use	1,089,947	30.5	38.3
Logs and bolts for exports	18,686	0.5	0.7
Pulpwood for domestic use	739,365	20.7	26.0
Pulpwood for export	153,503	4.3	5.4
Fuelwood	739,737	20.7	26.0
Ties, poles, pit-props, posts, rails	65,532	1.8	2.3
Miscellaneous	35,917	1.0	1.3
	2,842,687		100.0
Fire	231,524		
Insects and disease	500,000	731,524	20.5
		3,574,211	100.0

* Island of Newfoundland, but not Labrador, included since 1949.

Table 6.

Forest Increment

Complete estimates of the rate of growth of Canadian forests have not been compiled, but the following facts are known:

	Cubic feet per acre
While there is but a small growth in many areas, over considerable tracts growths have been recorded by the Federal Forestry Branch of:	25—40
Managed forests in Scandinavia produce:	28
Replacement of annual depletion in the accessible productive forest areas requires an annual average growth of:	11

The foregoing figures by no means indicate that there is no cause for anxiety regarding the future maintenance of the forests and their proper conservation for use.

Other factors affecting these figures include:

1. While the annual increment appears to exceed the annual depletion, no comprehensive and proper estimate of forest increment in Canada as a whole has yet been prepared.
2. Insects and diseases in the forests periodically reach epidemic proportions; unless checked they will affect the existing balance between depletion and increment.
3. In many instances the depletion is concentrated in the more accessible areas. Growth that accrues in more remote areas is not used.
4. Repeated fires retard and often make impossible the proper regeneration of the forests.
5. Land tenures are often such that there is no economic or other urge upon some loggers to operate along scientific methods.
6. The fire hazard is greater in the more accessible forests, a situation naturally having a bearing on the cutting methods pursued by owners or operators.

1952	14,152,176e	11,689,974e	2,493,262	31,060

e: Canadian Pulp and Paper Association estimate.

Note: Prior to 1946 "Apparent Production" and "Consumption" figures include small quantities of sawmill chips, slabs and edgings, sawdust, butts, and cores.

Apparent production estimated on the basis of consumption plus exports minus imports.

Imports not reported prior to 1928.

All quantities are given in terms of rough or unpeeled wood.

1952	n.a.	n.a.	61,837,059	559,358

n.a.: Not available.

Apparent production estimated on the basis of consumption plus exports minus imports.

Imports not reported prior to 1928.

All quantities are given in terms of rough or unpeeled wood.

Source: Dominion Bureau of Statistics.

Table 11.

Cords, Cubic Feet, and Board Measure

A standard cord is a stack of wood 4 x 4 x 8 feet containing 128 cubic feet of wood, bark, and interstices. A cord usually contains about 85 cubic feet of solid wood, but the content varies with the size of the logs.

In the lumber industry, wood is usually measured by the board foot. A board foot is the equivalent of a board one inch in thickness and one square foot in surface area. The relationship between board measure and cord measure varies in different sections of the Dominion. Usually, 2 cords are considered to be equivalent to about 1000 feet board measure. But this ratio also varies with the size and type of the wood.

"B"—PRODUCTION AND MARKETS

Table 13.

Pulpwood Production 1951

	Cords	Value
Apparent pulpwood production	15,053,910	\$381,920,846
Pulpwood imports	46,634	756,278
Total supply	15,100,544	\$382,677,124
Less pulpwood exports	2,871,173	66,077,108
Pulpwood used in Canadian mills	12,229,371	\$316,600,016

Source: Dominion Bureau of Statistics.

Table 14.

Apparent Pulpwood Production by Provinces 1951

Provinces	Cords (a)	Value
Quebec	7,099,215	\$186,312,719
Ontario	3,706,147	87,117,822
British Columbia	860,016	28,184,354
Other Provinces	3,388,532	80,305,951
Canada	15,053,910	\$381,920,846

a: Quantities are given in terms of rough or unpeeled wood. One cord of peeled pulpwood is equivalent to 1.125 cords of rough or unpeeled wood.

Source: Dominion Bureau of Statistics.

Table 15.

Pulp Supply 1951

The pulpwood used in the mills together with other pulps resulted in the following supply:

	Tons	Value
Groundwood pulp	5,172,465	\$213,953,064
Chemical pulp	3,814,086	503,997,803
Other pulp*	328,298	9,929,138
Total wood pulp production	9,314,849	\$727,880,005
Wood pulp imports	36,416	4,546,204
Other wood fibre used	12,843	163,187
Other fibres and stock used**	487,509	19,171,143
Total supply	9,851,617	\$751,760,539

* Includes screenings, off-quality, semi-chemical, defibrated and exploded pulp.

** Includes rags, straw, leather scrap and wastepaper.

Source: Dominion Bureau of Statistics.

Table 16.

Total Production 1951

From the foregoing supply of pulps flowed the industry's production as follows:

Pulp Exported	Tons	Value
Mechanical	322,706	\$ 26,741,965
Bleached sulphite	607,315	112,339,792
Unbleached sulphite	555,045	90,017,185
Sulphate	709,467	130,166,335
Other wood pulp	32,958	5,277,337
Chemical pulp screenings	10,020	492,496
Mechanical pulp screenings	5,796	97,774
	2,243,307	\$365,132,884
Pulp for Domestic Use	483,967a	48,698,362b
Total	2,727,274	\$413,831,246

Paper Production

For domestic market	1,865,968	\$254,202,961
Exported	5,359,303c	569,826,688
	7,225,271	\$824,029,649
Gross Production	9,952,545d	\$1,237,860,895

a: Total production less exports and pulp made for mills own use. Some of this tonnage was made for affiliated mills.

b: Gross value of production less pulp for paper production and pulp exports.

c: Excludes tonnage of bags, cartons, and other paper products having value of \$4,279,518.

d: As most of the pulp for domestic sale was utilized in the manufacture of paper, there is some duplication in this figure.

Source: Dominion Bureau of Statistics.

Table 18.

Markets 1951

These figures show the relation between pulp supply and export markets:

Pulp Exports

	Tons	Value
To U.S.A.	1,831,410	\$276,760,578
To U.K.	217,250	37,770,627
Elsewhere	194,647	50,601,679

Total pulp exports	2,243,307	\$365,132,884
Pulp and other paper stock for domestic use	7,608,310	386,627,655

9,851,617 \$751,760,539

Of the 7,608,310 tons of pulp and other paper stock for domestic use, about 484,000 tons of pulp were sold on the domestic market and 7,124,343 tons of pulp and other paper stock valued at \$337,929,293 were converted into 7,225,271 tons of paper and paper board valued at \$824,029,649. The exports from this production, including paper products, were as follows:

Newsprint Exports (a)

To U.S.A.	4,814,590	\$500,525,110
To U.K.	75,626	7,807,575
To other countries	265,938	32,163,887

5,156,154 \$540,496,572

Other Paper Exports

To U.S.A.	135,734	\$ 15,213,096
To U.K.	18,145	3,292,511
To other countries	49,270	10,824,509

203,149 \$ 29,330,116

Paper Products Exports (b)

To U.S.A.	—	\$ 1,846,238
To U.K.	—	131,969
To other countries	—	2,301,311

— \$ 4,279,518

Paper Exports	5,359,303	\$574,106,206
Pulp and Paper Exports	7,602,610	\$939,239,090

a: Includes mutilated newsprint.

b: Includes bags, box, hanging paper, and miscellaneous paper products.

Table 42.

Canadian Pulp in U.S. Market

The following figures cover all grades of pulp including mechanical and screenings. Over the war years imports of mechanical pulp by the United States have averaged some 17 per cent of total pulp imports.

Tons	U.S. Pulp Production	Total U.S. Imports	U.S. Imports from Canada	U.S. Exports	U.S. Net Imports
1925	3,962,217	1,663,614	880,453	37,995	1,625,619

1948	4,883,127	102.0	4,982,834
1949	5,113,108	101.2	5,176,327
1950	5,226,675	101.0	5,278,585
1951	5,359,816	102.9	5,516,279
1952	5,510,397	103.2	5,687,051

Figures for 1913-17 cover fiscal years.

Sources: Newsprint Association of Canada and Newsprint Service Bureau.

Table 48.

Newsprint Capacity and Production

All figures include Newfoundland.			
Tons	Number of Work Days	Capacity Per Day	Production Per Day
1935	310	13,752	9,945
1936	310	13,606	11,405
1937	309	13,627	12,938
1938	309	14,676	9,362
1939	308	15,042	10,307
1940	310	15,213	12,161
1941	309	15,219	12,203
1942	309	15,415	11,180
1943	309	15,139	10,417
1944	309	15,296	10,565
1945	309	15,120	11,624
1946	308	15,068	14,630
1947	308	15,353	15,650
1948	309	15,803	16,126
1949	308	16,601	16,806
1950	307	17,025	17,194
1951	308	17,402	17,910
1952	309	17,833	18,405

Because of variations in the number of workdays in a year or a month, daily capacity provides the most accurate measurement of changes in capacity.

1951	1,050,000	1,124,748	1,107,552	1,125,421
1952	1,165,000	1,146,864	1,075,540	1,142,706

These figures are compiled from U.S. mill reports and shipments to overseas show only exports direct from mills. They do not include tonnage delivered to U.S. buyers and subsequently resold for exports, such tonnage being included in shipments to U.S.A. Exports as reported by U.S. Department of Commerce are thus higher than mill reports; in 1951, the Department showed exports of 71,345 tons versus 17,869 tons reported by the mills.

* End of Each Year.

† U.S. total consumption is based on consumption reported by the ANPA group. For each year the percentage of total U.S. supply taken by this group is assumed to represent the percentage of total consumption consumed by the group. Total consumption is obtained by extending ANPA consumption by this percentage. Total consumers' stocks are computed each month by taking stock at the beginning of the month plus supplies received in the month less total consumption in that month.

Table 70.

Exports of Paper (Except Newsprint) — Volume

In the past, the basis and classification upon which exports of paper other than newsprint have been compiled have been modified from time to time. Consequently, only figures covering recent years are included in this and in the succeeding table.

Moreover, because they are compiled on a somewhat different basis, the two tables which follow are not comparable to the production figures in tables 67 and 68.

Tons	1952	1951	1950	1949	1948	1947	1946	1945	1944

Source: Dominion Bureau of Statistics.

Also, some of the exports go through a converting plant before shipment. Thus, many of the exports have a value enhanced by the conversion or packaging process, whereas the production figures show the valuation at the basis rate.

Again, the tonnage figures for certain paper products exported are not available. The dollar figures covering these exports will be found in the succeeding table under the heading "Paper Products".

—: Unfavourable balance.

Domestic exports cover exports of Canadian produce. In the last 20 years, domestic exports cover approximately 98 per cent or more of total Canadian exports.

Pulp and paper export figures 1919-1930 estimated by DBS from fiscal year figures.

* Preliminary figures.

† Includes Newfoundland since 1949. In 1948, the last year before accession, Newfoundland's Gross National Product was about \$175 million.

All National Income figures from 1926 have been compiled on a revised basis in December, 1951. Figures for years prior to 1926 are not comparable.

a: The "national income" is the total of all incomes earned by Canadians in the production of goods and services during the calendar year. The "gross national product" is the market value of all goods and services produced by Canadians. It is obtained by adding to the national income two items which are not "income" but which are part of the final cost of all goods and services—namely, allowances for depreciation of plant and equipment, and indirect taxes less subsidies.

b: The "net value of production" or value added by manufacture is computed by subtracting the cost of fuel and electricity as well as the cost of materials from the gross value of the products.

The figures for the years prior to 1926, when the National Income figures were compiled on a different basis and for which the gross National product figures are not available, were as follows:

	Gross Production of Industry	Net Production of Industry	National Income
1921 . . .	\$151,003,165	\$73,765,200	\$3,507
1922 . . .	158,950,956	81,258,232	3,671
1923 . . .	184,821,511	95,076,985	3,847
1924 . . .	179,259,504	89,629,253	3,865
1925 . . .	193,092,937	99,071,212	4,239

1891 . . .	58	2,817	5,633,257
1901 . . .	53	6,236	8,627,557
1911 . . .	72	9,766	23,226,479
1921 . . .	100	24,619	151,003,165
1931 . . .	103	26,669	174,733,954
1941 . . .	106	37,154	334,726,175
1945 . . .	109	39,996	398,804,515
1946 . . .	113	44,967	527,814,916
1947 . . .	115	49,946	706,971,628
1948 . . .	117	51,924	825,857,664
1949 . . .	123	52,050	836,148,393
1950 . . .	123	52,343	954,137,651
1951 . . .	126	57,291	1,237,897,470b

a: Number of mills operated during year.

b: Includes products other than pulp or paper valued at \$36,575.

Note: At the close of 1952 there were altogether 131 pulp and paper mills in Canada, which were active during all or part of the year. This total includes two asbestos paper mills which, for statistical purposes report in the Asbestos Products industry only.

Manufacturers of moulded pulp products and of laminated, coated or impregnated papers and paperboards are classed in the Paper Goods industry or in the Roofing Paper industry only, unless they produce the pulp or paper used, in which case separate returns are made covering pulp and paper manufacture and paper conversion.

Table 83.
Capital Expenditures

For the years 1946 to 1952, annual surveys of the Department of Trade & Commerce, covering some 95 per cent of the industry, show the following capital expenditures:

Year	Millions of \$
1946 . . .	49.5
1947 . . .	77.7
1948 . . .	79.9
1949 . . .	71.8
1950 . . .	68.6
1951 . . .	102.1*
1952 . . .	129.1*
	578.7

* Preliminary.

The foregoing figures do not include capital expenditures made on the woodlands nor, of course, expenditures for maintenance and renewals.

Woods labour is not included.

a: 1943 was the last year in which the Dominion Bureau of Statistics compiled the figures on capital investment. The figures for 1946-51 are Canadian Pulp and Paper Association estimates. These may be conservative, for Taxation Statistics, 1950, of the Department of National Revenue, covering the 1949 taxation year, show that 68 pulp and paper companies had total assets of \$1,707,530,000. Current liabilities were \$258,241,000. On this basis, the capital employed in these 68 companies was \$1,449,289,000 in 1949. While the taxation statistics cover 68 pulp and paper companies, there are a few other companies not included in the statistics.

Seasonal woods workers on manufacturers' limits east of the Rockies	218,000
Permanent woods workers on manufacturers' limits east of the Rockies	5,400
Woods workers in B.C., mostly permanent	5,000
Woods workers cutting wood for sale to manufacturers	104,900
	333,300
Mill Workers, permanent	57,291
	390,591

* Includes an estimated \$41,462,000 to the 104,900 woods workers cutting pulpwood for sale to the mills. Includes also those working for contractors cutting pulpwood on pulp and paper company limits. The terms of pulpwood cutting contracts are of an infinite variety ranging from those in which the contractor and his men are company employees to those in which the contractor is a free agent. Some companies cut all the wood required from their own limits.

Merchandise, L.C.L.	819,562	19.70	2,270,184	1.81
Total Revenue Cars Loaded	4,160,199	100.	125,343,398	100.

* Loaded at stations in Canada.

Note: Car loadings of pulp and paper and pulpwood in 1952 were equivalent to 676 cars and 753 cars respectively, every day in the year. A proportion of the pulpwood car loadings included pulpwood for export. Deducting an estimate for pulpwood shipped abroad, the pulp and paper industry's car loadings of pulpwood and finished products were equivalent to over eleven trains of 100 cars daily. Annual loadings of pulpwood for the mills and of finished products would thus fill a train 3,465 miles in length. In addition, the pulp and paper industry creates a vast rail traffic of coal, chemicals, and other supplies required for the operations at the mills and in the woods.

Mining companies	2,030,016	2,265,868	a
Domestic customers (homes and farms)	5,678,847	6,750,303	a
Commercial customers, street lighting and free service	2,776,474	3,980,196	a
Export	1,756,752	1,925,867	2,375,420
Line losses, etc.	4,573,393	4,914,367	a
	44,418,573	48,493,718	a
Generated for own use by			
Pulp and paper industry	3,778,110	3,949,244	3,932,662
Other industries	2,120,280	2,316,807	a
Mining companies	263,835	264,232	a
Total electricity generated	50,580,798	55,024,001	a
Less: Exports	1,756,752	1,925,867	2,375,420
Line losses, etc.	4,573,393	4,914,367	a
	44,250,653	48,183,767	a
Plus: Imports	31,205	1,350	7,677
Canadian consumption	44,281,858	48,185,117	a

a: Not available.

Note: The power consumption of the pulp and paper mills accounts for over 27 per cent of all the power generated for industry and for mining. Of the power generated by industry for its own use, the pulp and paper mills accounted for 64.1 per cent in 1949 and 64.9 per cent in 1950. Of the total consumption of electricity in Canada, the pulp and paper mills accounted for 26.5 per cent in 1949 and 25.7 per cent in 1950. There are several single paper mills which alone consume more electric power than all the domestic customers in Montreal combined, indeed which use more power than is required to provide light for the city and all its residents. There are single pulp and paper mills which use half as much power as that consumed by all the industries in the Montreal area.

Mineral production	1,045,450	1,245,484	Food and Beverages	3,029,810	3,450,031
Electric Power	323,833		Slaughtering and meat packing	757,043	892,091
Less Duplication (Forest production on farms)	—139,434		Butter and cheese	330,709	373,746
Total, Primary Production	6,697,163		Flour mills	247,108	280,867
SECONDARY PRODUCTION:			Bread and other bakery products	214,587	245,288
Manufactures	13,817,520	16,270,931e	*Fish curing and packing	128,424	163,010
Construction	2,727,968		Iron and Steel Products	1,524,384	1,904,650
Custom and Repair	464,546		Primary iron and steel	340,540	464,587
Total, Secondary Production	17,010,034		Machinery	160,391	201,990
Less Duplication in Manufactures (See Notes below)	—2,330,312		Agricultural implements	149,500	171,172
Grand Total	21,376,885		Transportation Equipment	1,239,579	1,541,590
* Industries included both in primary and secondary production.			Motor vehicles	675,867	742,896
e: Preliminary estimates. Other figures not yet available.			Railway rolling stock	194,286	300,627
Notes: The gross value of production figures given above, being limited to the annual production of commodities, are not comparable with those of the "gross national product" given in Table 79, which includes transportation, communication, trade, finance and service activities. The methods used are entirely different and the "gross national product" comprises, in addition, depreciation allowances, similar business costs, and indirect taxes less subsidies.			Non-ferrous Metal Products	960,751	1,253,599
While the statistics of gross production are of interest as indicating the amount of revenue produced by the corporations and other operators in the field, the total includes a large element of duplication: often the products of one industry become the materials of other industries. The net value of production obtained by deducting the cost of materials, fuel and electricity is a more accurate measure of the contribution to the national economy.			*Non ferrous metal smelting and refining	669,883	861,316
The value of agricultural production includes forest products produced on farmers' wood lots. As such products are also reported under forestry, the amount of duplication is deducted.			Brass and copper products	126,201	179,998
A survey of production must differentiate between the more important branches and at the same time present a grand total that will be free from overlapping. For example, the products of pulp and paper and sawmills are included in forestry production as being the first finished products of commercial value resulting from the productive process. They may, however, be classified under manufactures in view of the nature of the production process — either allocation being quite correct according to the point of view. Production of such industries is regarded both as primary and as secondary, but the duplication is eliminated from the grand total.			Clothing (Textile and Fur)	734,214	762,999e
A break-down of the manufactures figures is given for the seventeen industrial groups in the adjoining column, which also gives the value of production of the principal industries in each group as well as that of all industries (marked*) included both in the primary and secondary production figures.
