## Chairman's Report — 1984

TO THE MEMBERS OF THE MUNICIPAL FINANCE AUTHORITY OF BRITISH COLUMBIA

*Alderman James H. Stuart*  
CHAIRMAN

It is my pleasure and privilege to submit the fourteenth annual report of the Municipal Finance Authority of British Columbia.

In the spring of 1984, there was a great deal of pessimism over two economic factors, the first was inflation and the second interest rates. Economic forecasters seemed doubtful that inflation was in fact "beaten" — some were certain that inflation would rekindle pressed by the buoyant U.S. economy, which, by March of the year, was exceeding everyone's expectations. The concern about interest rates and the effect a rising inflation rate would have on short-term and long-term rates was logical. These concerns heightened by early April, and the slow start to recovery experienced by the Canadian economy, combined to compound the problems of funding our spring issue. Economic forecasts which indicated rising rates through 1984 made investors more and more nervous about long-term financings and they were looking for escape clauses permitting them to sell out and move to higher rates if necessary. This investor nervousness was instru-

mental in persuading the Board of Trustees to be innovative. We launched a \$60,300,000 6-year issue retractable to May 15, 1987 which yielded 12 $\frac{5}{8}$ %. The issue sold very well in an otherwise poor Canadian market.

At that time, other Canadian local governments with similar credit ratings paid as high as 14.10% for eight- to ten-year terms and 13.40% for one- to five-year terms. The retractable feature of the issue was largely responsible for its success, and proved again, the value of a fresh, innovative approach to the market place.

As we moved into summer, rates continued to rise. The U.S. industrial machine continued to forge ahead. Eastern Canada experienced economic recovery, particularly in Ontario and Quebec where the auto industry enhanced the effects of a U.S. recovery. In the West, noticeably B.C. and Alberta, things remained flat. By late August, concerns about inflation and crowding out caused by U.S. and Canadian governments' deficits had reached a fever pitch. Investors

were concerned that industrial demands for funds, when added to the massive requirement for funds by the U.S. and Canadian Federal governments, would cause continued rising rates and renew pressure on the low inflation rate.

At our semi-annual meeting in late September, our members approved a \$30.5 million issue. The Trustees then waited patiently for 20-year rates to improve. By that time there were subtle signs that U.S. industrial growth had begun to slow. Inflation rates had not risen as projected and, in fact, some economists were projecting disinflation as a more likely scenario. Throughout October, economic indicators continued to confirm that the U.S. economy was about to make a soft landing rather than plunge abruptly from high activity to another recession. During the first week of October, 20-year rates crested at 13.70% and started a long process of rising and falling with some dramatic and volatile activity. Rates improved rapidly after the second week in October, and our fall issue was finally launched in Canada at 12:00 noon on October 18th at 13% at par. We obtained a call feature in the 15th year which is increasingly important to us as our sinking funds continue to be retired ahead of schedule. This issue managed to tighten our spread off Ontario Hydro to only 16 basis points, and a 20-year term was welcome after the increasingly shorter terms we have been financing for the last three years.

Annual requirements for funds in 1984 are worthy of mention. In 1982 and 1983, our annual requirements exceeded \$150 million. This year our total annual requirement was \$91 million. The combined effects of the B.C. recession, restraint at the municipal and provincial levels, and a change in the financing structure for water and sewer projects have all contributed to reduced borrowing. This comes at a time when some of our shorter term issues will be rolling over. In 1985, rollovers will add to our current requirements and add to our overall borrowing.

The year 1984 was something of a watershed year for the Municipal Finance Authority. The year ended successfully with a number of promised changes finally resolved. We moved to new quarters on the first floor of our office building which includes a vault and space for our computer hardware.

The conversion to our on-site I.B.M. hardware is now complete and working well. There is a growing

recognition that increasingly our staff's activities are in the area of sinking fund administration. This will result in further enhancement to our existing software so that the management of the various funds can be carried out with greater speed and the same accuracy. In 1985 and 1986, we plan to develop additional programmes to satisfy the needs of our municipalities for information about the status of a particular issue and, more particularly, the maturity of that issue. Recently, an analysis was carried out on each sinking fund which projected an estimate of when each fund would mature.

At the end of the year the total of long-term debt outstanding was \$1,195.5 million. In terms of currency exposure, the total breaks down as follows: Canadian \$858.3 million or 71.8%, U.S. \$298 million or 24.9%, Swiss francs \$37.2 million or 3.1%, and Deutschmarks \$2 million or 0.2%. This compares favourably to the close of 1976 when the total of long-term debt outstanding was \$312 million, 63.9% of which was denominated in U.S. dollars.

During 1984, payments of principal and interest in excess of \$175 million were received from our regional districts and municipalities. At the close of the year the total of investments managed was \$139.2 million. These investments break down as follows:

Debt Reserve Fund \$29.6 million.

Sinking and related debt servicing funds \$109.6 million.

Interest earnings in 1984 totalled \$15.1 million.

The types of investments which may be held by the Authority are regulated by the Municipal Finance Authority Act. At December 31, 1984 the portfolio consisted of \$24 million of securities of or guaranteed by the Government of Canada, \$22 million of securities of or guaranteed by Provincial governments, \$58.7 million of securities of or guaranteed by Canadian chartered banks, \$1.5 million of securities of B.C. credit unions, \$2.3 million of securities issued directly by B.C. municipalities, regional districts or water and sewer districts and \$30.7 million of obligations of the Municipal Finance Authority of British Columbia.

At this time, I would like to thank the Ministry of Municipal Affairs and the Ministry of Finance for the ongoing support they provide to the Municipal Fi-

nance Authority. The inter-change between the staff of MFABC, Municipal Affairs and Finance has always been a valuable feature of our operation and the usefulness of this arrangement continues to impress me.

It is an opportune time to acknowledge that our previous Secretary-Treasurer, David Wilson left Victoria in February of 1984 to join Wood Gundy Inc., to work out of Toronto as Vice President, Government Finance. The Board of Trustees and myself wish him well and are very appreciative of the eight years that he served the Authority. James Craven assumed the Secretary-Treasurer's responsibilities on May 1, 1984.

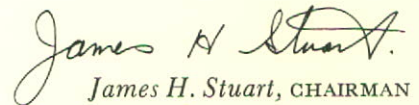

1985 will see many changes on the financial side. Inflation rates still appear to be at a very low level of 4% to 5% in both the U.S. and Canada. It will be interesting to see if the very high real rate of interest (the difference between the inflation rate and the prime rate) can be sustained for yet another year. Although our prime rate has been projected by some to be as low as 9% by the close of 1986, the real rate of interest is still extremely high if inflation stays at 4%.

As telerate screens and computers link up more of the world in second by second communication, it be-

comes increasingly important to respond with speed and proper research when raising money on the international bond market. We are watching the modernization of the Japanese bond markets with increasing interest. Our position at the Authority is clear. We want to do business in Canadian currency and under Canadian law, and our Japanese bankers are extremely active in trying to deliver under those guidelines.

I am encouraged at the progress that both Canada and the U.S. have made in keeping inflation rates low. It would be my hope that in the coming year we will see some real attempt to cut back the deficit in both countries. A lower interest rate in 1985 may allow that to happen with more ease than has been the case in prior years.

We look forward to better financing opportunities in 1985, and, in conclusion, I would like to express my thanks to the Board of Trustees and to the staff for their help during a very interesting year. My role as Chairman has been made much easier as a result of everyone's dedication to their individual jobs.

  
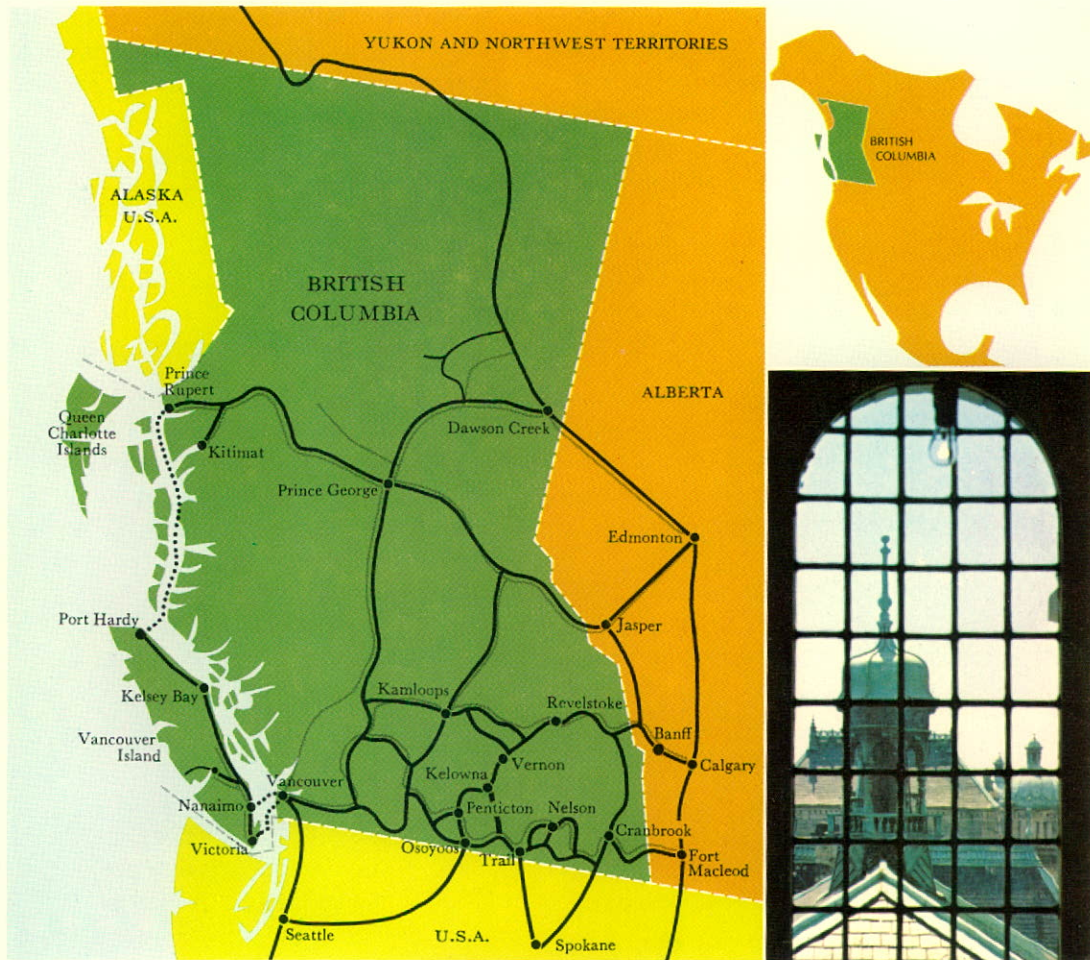

James H. Stuart, CHAIRMAN

Naramata, South of Kelowna *Courtesy Tourism B.C.*

"The object of the authority is to provide financing of capital requirements for regional districts and for their member municipalities by the issue of its debentures, or other evidence of indebtedness, and lending the proceeds from them to the regional district on whose request the financing is undertaken."

*Municipal Finance  
Authority Act,  
Revised Statutes of  
British Columbia, 1979.*

## How the Municipal Finance Authority of British Columbia Functions

---

### Responsibility

The Municipal Finance Authority of British Columbia was created in 1970 by the Municipal Finance Authority of British Columbia Act of the Legislative Assembly of the Province of British Columbia. The Act was amended in 1971, 1972, 1973, 1977, 1981 and 1983.

Regional districts and municipalities in British Columbia finance through the Authority all long-term capital requirements except those met by senior levels of government.

The City of Vancouver is the only municipality in the Province which retains the right to issue its own debentures to finance capital projects. Taxable land and improvements within the City of Vancouver are, nevertheless, subject to rates levied by the Municipal Finance Authority.

### Representation

The Province of British Columbia is divided into twenty-eight regional districts, each of which is governed by a Regional Board consisting of representatives of its member municipalities and unincorporated areas.

The members of the Municipal Finance Authority are appointed by the Regional Boards; the number of members to which a regional district is entitled is based upon its population.

The executive and administrative powers and duties of the Authority are exercised and performed by a Board of Trustees elected annually by the members and consisting of the Chairman of the Authority and six other members. The Capital Regional District and the Greater Vancouver Regional District must be represented on the Board of Trustees.

### Funding

When the municipalities, through the regional districts, and the regional districts on their own behalf, wish to finance their capital projects, they present their approved requests to the Municipal Finance Authority.

Taking into account market and economic conditions pertaining, the members of the Authority may authorize the issue and sale of debentures in an amount sufficient to meet the requests.

Debentures, not exceeding the amount authorized, may then be issued at such rates and pursuant to such terms and conditions and in such markets and currencies as the Trustees may determine.

Both serial and sinking fund debentures may be issued. In the case of sinking fund debentures, the Act provides for the creation, management and application of sinking funds to secure the repayment of the debentures including the redemption of debentures issued subject to redemption in advance of maturity.

A separate account is maintained for each sinking fund debenture issue and moneys at the credit of a sinking fund which cannot be immediately applied toward paying the debt or discharging the obligation may be invested or reinvested in:

- (a) securities of the government of Canada or a province of Canada, or
  - (b) securities, the principal and interest of which are guaranteed by the government of Canada or a province of Canada, or
-

- 
- (c) securities of a regional district or municipality in British Columbia maturing not later than the debentures for which the sinking fund was created, or
  - (d) investments guaranteed by a Canadian chartered bank, or
  - (e) deposits in, or shares or other evidences of indebtedness of, a credit union incorporated under the British Columbia Credit Union Act, or
  - (f) securities of the Municipal Finance Authority of British Columbia maturing not later than the debentures for which the sinking fund was created; however, debentures so purchased must be held to the credit of the sinking fund account and cannot be resold.

#### **Protection for Investors**

In British Columbia, the combined credit of all the regional districts and their member municipalities — which together have essentially all the taxable land and improvements in the Province — stands behind the Authority's obligations.

In addition, the Authority has established a debt reserve fund into which all borrowers from the proceeds of debt issues having a term to maturity of over two years must contribute an amount equal to one-half the average annual instalment of principal and interest for repayment of each issue; such amount is payable to the Authority at the time of issue either in full or in an amount equal to one percent of the principal amount borrowed with the balance secured by a non-interest bearing demand note of the regional district issued to the Authority. Moneys paid into the debt reserve fund, and interest earned thereon, are obligations of the Authority to the regional districts and must be refunded to them when the final instalments of their loans have been repaid.

If, at any time, the Authority lacks sufficient funds to meet principal, interest or sinking fund payments due on its obligations, it must utilize the debt reserve fund, all or any part of which is available to satisfy the Authority's obligations, regardless of the sources of the moneys in the fund. In the event that payments are made from the debt reserve fund, the Authority will recover such payments from the regional districts involved in order to restore the debt reserve fund. If the Trustees are of the opinion that payments made from the debt reserve fund will not be recovered within a reasonable period, they may levy upon all taxable land and improvements in the Province a tax sufficient to restore the fund to its required amount. It is mandatory for the Trustees to levy such a tax when the balance in the debt reserve fund is less than fifty percent of the required amount. The Trustees' power to impose taxes does not require the permission or approval of any other governmental authority. Pending the receipt of such taxes, the Authority may borrow an equivalent amount to meet its obligations to debenture holders.

The provincial government has undertaken to assure that the debt reserve fund will be maintained in accordance with the Municipal Finance Authority Act and the Inspector of Municipalities may inspect the fund from time to time and issue a certificate that it has been maintained at the proper level.

---

---

Moneys in the debt reserve fund may be invested or reinvested in:

- (a) securities of the government of Canada or a province of Canada, or
- (b) securities, the principal and interest of which is guaranteed by the government of Canada or a province of Canada, or
- (c) deposits in, or investments guaranteed by a Canadian chartered bank, or
- (d) deposits in, or shares or other evidences of indebtedness of, a credit union incorporated under the British Columbia Credit Union Act.

Such investments must mature or be callable within five years and at least twenty-five percent of the fund must be callable within ninety days.

**Additional  
Protection for Investors**

Regional districts and their member municipalities financing through the Municipal Finance Authority must obtain the same provincial approvals as would be required if they were issuing their own debentures. In this way, all the safeguards imposed by the Provincial Legislature on the incurring of indebtedness by regional and municipal governments are retained. Such safeguards include the requirement that the Inspector of Municipalities approve the debt and user charges, if any, and other taxes to service the debt. In addition, sewer and water projects require the issuance of a certificate of self-liquidation by the Inspector of Municipalities.

Limitations on the borrowing power of a regional district for each function may be specified in its letters patent. The total indebtedness which a municipality may contract is limited to a percentage of the assessed value for general municipal purposes of the taxable land and improvements within the municipality and the value of the utility systems and other municipal enterprises for which the municipality has a subsisting certificate of self-liquidation granted by the Inspector of Municipalities.

---

## The Growth and Stability of British Columbia's Municipalities

### ASSESSMENT

The British Columbia Assessment Authority, a provincially-appointed body, is responsible for assessment throughout the Province.

The fundamental principle underlying the Assessment Act is that land and improvements must be valued at their actual value (i.e., fair market value).

The actual value totals for the Province in the years 1979 to 1984 were as follows:

1979	\$ 81.5 billion	1982	\$ 157.1 billion
1980	\$ 94.1 billion	1983	\$ 138.3 billion
1981	\$ 123.1 billion	1984	\$ 140.8 billion

Property is segregated by type or use into property classes prescribed by the Lieutenant Governor in Council.

The value subject to taxation after applicable exemptions is referred to as the net taxable value.

A variable tax rate system was introduced in 1984 which transferred the variability factor from the assessed value to the taxation process controlled by each taxing authority. Municipal and other taxing authorities now set tax rates for each class of property to produce the level of taxation desired.

## Auditors' Report — 1984

TO THE MEMBERS OF THE MUNICIPAL FINANCE AUTHORITY OF BRITISH COLUMBIA

---

Peat, Marwick, Mitchell & Co.  
Chartered Accountants  
2400-1055 West Georgia Street  
P.O. Box 11150, Royal Centre  
Vancouver, B.C. V6E 3P3  
(604) 662-5500

We have examined the balance sheets of the Operating Fund, Debt Fund, Capital Repayment Equalization Fund, Debt Reserve Fund and Market Development Fund of Municipal Finance Authority of British Columbia and the combined balance sheet of these funds as at December 31, 1984, the statements of revenue, expenditure and surplus of each of these funds, the combined statement of revenue, expenditure and surplus of these funds and the Debt Fund statement of debt financing for the year then ended. Our examination was made in accordance with generally accepted auditing standards, and accordingly included a general review of the accounting procedures and such tests of accounting records and other supporting evidence as we considered necessary in the circumstances.

In our opinion, these financial statements present fairly the financial position of the Authority as at December 31, 1984, and the results of its operations and the acquisition and application of its financing for the year then ended in accordance with accounting principles described in Note 1 to the financial statements applied on a basis consistent with that of the preceding year.

Vancouver, British Columbia, Canada

## Notes to Financial Statements — All Funds

DECEMBER 31, 1984

## 1

### Organization of Municipal Finance Authority of British Columbia and significant accounting policies

The Municipal Finance Authority of British Columbia (the "Authority"), created in 1970 by the Municipal Finance Authority of British Columbia Act (the "Act"), is the central borrowing agency for financing of capital requirements (other than for schools and hospitals) for regional districts and their member municipalities in the Province of British Columbia (the "Province"). The Authority issues its own debentures or other evidence of indebtedness and lends the proceeds to the regional districts on whose request the financing is undertaken. Obligations of the Authority are not obligations of the Province and are not directly or indirectly guaranteed by the Province.

The Authority follows the normal practice in local government accounting and maintains its accounts according to the principles of fund accounting, a technique by which its financial resources are segregated for specific activities or to attain certain objectives. Five funds are maintained. A brief description of each fund and its purpose is as follows:

#### OPERATING FUND

The Act provides for the establishment of an operating fund to meet the annual operating budget. For this purpose, the Authority may impose, annually, rates not exceeding the prescribed rates on all taxable land and improvements within the Province.

#### DEBT FUND

The Authority's financing activities on behalf of the regional districts in the Province are recorded in the Debt Fund.

#### CAPITAL REPAYMENT EQUALIZATION FUND

The Capital Repayment Equalization Fund is a repository for repayments from the regional districts under their loan agreements in advance of the Authority's requirements on its related indebtedness. Transfers, not exceeding the amount available in respect of each issue, are made to the Debt Fund to meet the Authority's obligations when due.

#### DEBT RESERVE FUND

Under the Act, the Authority is required to establish a Debt Reserve Fund. Each regional district sharing in the proceeds of a debt issue is required to pay into the Debt Reserve Fund an amount equal to one-half the average annual instalment of principal and interest in respect of its own borrowing together with one-half the average annual instalment of principal and interest as set out in the agreements entered into with the regional district by member municipalities in respect of their borrowings; such amount is payable either in full or in an amount equal to 1% of the principal amount borrowed with the balance secured by a non-interest bearing demand note.

If, at any time, the Authority does not have sufficient funds to meet payments or sinking fund contributions due on its obligations, the payments or sinking fund contributions shall be made from the Debt Reserve Fund.

**Notes to Financial Statements — All Funds / continued**

DECEMBER 31, 1984

---

<b>MARKET DEVELOPMENT FUND</b>	<p>The development of markets for the Authority's debt issues is segregated in the Market Development Fund. It is funded by transfers from the Operating Fund.</p>
	<p>A summary of significant accounting policies is as follows:</p>
<b>PRIOR YEAR'S SURPLUS</b>	<p>The Authority appropriates the prior year's surpluses to current revenue except the Debt Fund surplus which relates to the sinking funds.</p>
<b>INCOME RECOGNITION</b>	<p>The annual operating levy is recognized as revenue in the Operating Fund when the rates have been set by the Authority in March of each year. It is collected on behalf of the Authority by the municipalities in the Province and the Provincial Surveyor of Taxes and is payable to the Authority on August 1 each year.</p>
<b>OFFICE FURNITURE, FIXTURES AND EQUIPMENT</b>	<p>Office furniture, fixtures and equipment are written off in the year of acquisition.</p>
<b>INTEREST ACCRUALS</b>	<p>Interest is accrued only on investments. Accrued interest receivable from the regional districts under the loan agreements and accrued interest payable on the long-term debt are not recorded, except for unpaid matured interest coupons on coupon debentures which are recognized as accounts payable in the Debt Fund.</p>
<b>AMORTIZATION OF ISSUE COSTS</b>	<p>The issue costs are being amortized on a straight-line basis over the average lives of the debt issues to which they relate.</p>
<b>FOREIGN CURRENCY TRANSACTIONS</b>	<p>The long-term debt payable in foreign currencies is recorded in equivalent Canadian dollars at the exchange rates prevailing when the debt was incurred except the debt payable in U.S. dollars which is stated at the rate of \$1 U.S. equals \$1 Canadian.</p> <p>The Authority does not adjust its assets and liabilities denominated in foreign currencies to reflect the exchange rates at the balance sheet date since, in the opinion of the Authority, its foreign exchange exposure is fully hedged by virtue of its contractual arrangements with the regional districts on whose behalf the financing is undertaken and/or by the application of certain sections of the Act which, essentially, provide that all monetary risks, including foreign currency risks, are obligations of the regional districts.</p>
<b>INVESTMENTS</b>	<p>Investments are carried at cost adjusted for amortization of premiums and accretion of discounts on a yield basis, except the investments in its own debentures which are carried at par value.</p>

---

**Notes to Financial Statements — All Funds / continued**

DECEMBER 31, 1984

**SINKING FUNDS**

Under the Act, obligations of the Authority purchased for a sinking fund account together with interest, premium, or exchange derived from them shall be held to the credit of that sinking fund account and shall not be resold.

However, debentures purchased in anticipation of mandatory annual redemptions for sinking fund purposes are cancelled immediately in accordance with the terms of such issues.

**2****Investments**

Investments consist of securities of:

	<b>1984</b>		<b>1983</b>
	<b>Par Value</b>	<b>Book Value</b>	<b>Book value</b>
<b>(THOUSANDS OF DOLLARS)</b>

	<u>\$ 30,083</u>	<u>29,620</u>	<u>25,229</u>

**Notes to Financial Statements — All Funds / continued**

DECEMBER 31, 1984

**3****Loans to  
Regional Districts**

Loans to regional districts include \$308,790,274 (1983 — \$322,389,629) denominated in U.S. dollars.

Under the Act, each regional district sharing in the proceeds of a debt issue must pay over to the Authority such sums as are required to discharge its obligations to the Authority in respect of such debt issue, but if the scheduled payments provided for under the loan agreement are not sufficient to meet the Authority's obligations in respect of that debt issue, the deficiency is a liability of the regional district to the Authority.

At the exchange rates prevailing at December 31, 1984, the scheduled payments under the agreements with the regional districts in respect of the debts payable in Swiss francs and Deutschmarks will not provide sufficient funds to meet the Authority's related obligations when due. Such deficiencies may be met from the Debt Reserve Fund.

The aggregate principal payments recoverable from the regional districts in each of the next five years are as follows:

	<u>1984</u>	<u>1983</u>
	(THOUSANDS OF DOLLARS)	
1984	\$	37,870
1985	41,895	38,859
1986	41,829	38,793
1987	42,192	39,156
1988	43,590	40,554
1989	45,143	
	<u>\$ 214,649</u>	<u>195,232</u>

**4****Deferred receivables  
from Regional Districts**

In 1978, the Authority redeemed the 6% bond issue of Swiss francs 50,000,000 from the proceeds of a bank loan in the amount of Swiss francs 51,600,000. As a result, the Authority incurred an exchange loss of \$23,055,505, being the difference between the Canadian dollar equivalent of Swiss francs 50,000,000 at the date of borrowing in 1972 and the Canadian dollar equivalent of Swiss francs 50,000,000 used from the proceeds of the bank loan to finance the redemption.

Under the terms of the loan agreements with the regional districts which participated in the original issue, the exchange loss is a liability of the regional districts to the Authority. Accordingly, it has been recorded in the accounts as Deferred receivables from Regional Districts.

For the remainder of the term of the loan agreements, the Authority will recover additional amounts, on a sinking fund basis, from the regional districts so that, at the end of the term of such loan agreements, a fund, the contributions to which will have been adjusted for exchange rate variations on a cumulative basis, will be available to retire the related foreign currency debt. The additional payments from the regional districts are credited to the Deferred receivables from Regional Districts account.

**Notes to Financial Statements — All Funds / continued**

DECEMBER 31, 1984

**5****Due to sinking  
and other funds**

The Authority may invest sinking fund and Capital Repayment Equalization Fund monies in its own securities maturing not later than the debentures for which the sinking fund or Capital Repayment Equalization Fund account was created.

In addition to its own debentures purchased under this provision, loans to the Debt Fund totalling \$456,032 (1983 — \$562,483) together with accrued interest of \$7,815 (1983 — \$2,242) were outstanding at December 31, 1984. Like the debentures, the loans are included in the sinking fund assets and in investments and receivables in the Capital Repayment Equalization Fund and they have not been eliminated in the combined statements.

**6****Debt Reserve Fund**

The amounts due to the regional districts will be repaid to them when they have made the final payment under their respective loan agreements. If, at any time, the Authority does not have sufficient funds to meet payments or sinking fund contributions due on its obligations, the payments or sinking fund contributions must be made from the Debt Reserve Fund. During 1984, deficiencies of \$489,132 (1983 — \$735,144) in the amounts of funds available to meet the principal and interest payments on the Deutschmark loan and the interest payment on the Swiss franc loan have been met by transfers from the Debt Reserve Fund. Such deficiencies are recovered in the following year from the participating regional districts under the terms of their loan agreements.

The Board of Trustees of the Authority may levy or impose upon substantially all taxable land and improvements within the Province a rate sufficient to maintain the Debt Reserve Fund at a level not exceeding the amount which would have been in the fund had no such payments been made. Further, the Board of Trustees must impose such rate when the balance in the fund is less than fifty percent of the amount that would have been in the fund had no such payments been made.

**Notes to Financial Statements — All Funds / continued**

DECEMBER 31, 1984

**7****Long-term debt**

The aggregate long-term debt maturities and sinking fund requirements in each of the next five years are as follows (including the debt payable in European currencies at the exchange rates prevailing at December 31, 1984 and provision for early redemptions at the option of the bondholder):

	<u>1984</u>	<u>1983</u>
	(THOUSANDS OF DOLLARS)	
1984	\$	17,329
1985	100,051	104,967
1986	167,871	168,003
1987	212,153	155,136
1988	124,718	124,750
1989	50,370	
	<u>\$ 655,163</u>	<u>570,185</u>

Since the maturities of certain of the Authority's debt issues and the related loans to the regional districts do not coincide, refunding of all, or a portion, of such debt issues will be required in future years.

**8****Foreign currencies**

The long-term debt payable includes the following amounts payable in foreign currencies:

	<u>1984</u>	<u>1983</u>
United States dollars	U.S.\$ 297,988,000	312,883,000
Swiss francs	SFr 51,600,000	51,600,000
Deutschemarks	DM 6,600,000	7,425,000

No exchange gains or losses accrue to the Authority in respect of the debt payable in U.S. dollars since the related loans to the regional districts are denominated in U.S. dollars and the loan agreements provide for repayment to the Authority in U.S. dollars. In the case of other long-term debt denominated in European currencies, the Authority is not at exchange risk (see Note 1).

**9****Sinking funds**

The annual deposits to the sinking funds for issues payable in Canadian dollars are based on an interest rate of 5% per annum, capitalized yearly.

Certain debt issues are subject to specific annual redemptions for sinking fund purposes. By purchasing the debentures at discount in the open market in anticipation of the sinking fund requirements, the Authority has, to December 31, 1984, retired \$17,037,000 (1983 — \$14,612,000) of such debt in advance of the scheduled redemptions for sinking fund purposes.

**Notes to Financial Statements — All Funds / continued**

DECEMBER 31, 1984

The assets and the surpluses of the sinking funds are as follows:

	1984		1983
	Par Value	Book Value	Book Value
(THOUSANDS OF DOLLARS)			
Securities of:

**Debt Fund — References to Schedule of Long-Term Debt**

DECEMBER 31, 1984

- 
- 1 Non-callable except for sinking fund purposes.
  - 2 The sinking fund has been calculated to provide for retirement of the issue at maturity.
  - 3 Callable on October 1, 1985 and annually thereafter at 101.75% reducing to 100.25% in 1991. Callable annually, also, at 101% in 1985 reducing to 100% in 1991, upon the imposition of withholding taxes.
  - 4 Non-callable prior to maturity.
  - 5 Non-callable prior to January 15, 1990 except for sinking fund purposes. Callable on January 15, 1990 and thereafter at any time at 103.50% reducing to 100% on or after January 16, 1999.
  - 6 The sinking fund to provide for retirement of the issue at maturity will begin in 1986.
  - 7 Non-callable prior to November 1, 1990 except for sinking fund purposes. Callable on November 1, 1990 and thereafter at any time at 103.25% reducing to 100% on or after November 2, 1998.
  - 8 Non-callable prior to May 1, 1991 except for sinking fund purposes. Callable on May 1, 1991 and thereafter at any time at 102.75% reducing to 100% on or after May 2, 1999.
  - 9 Non-callable prior to October 15, 1991 except for sinking fund purposes. Callable on October 15, 1991 and thereafter at any time at 102.75% reducing to 100% on or after October 16, 1999.
  - 10 Redeemable at holder's option on June 1, 1985, 1988, 1991 or 1994. Callable upon the imposition of withholding taxes at 101.50% reducing to 100.25% over the remainder of the term to maturity.
  - 11 Redeemable at holder's option on May 15, 1989 or 1994. Callable on May 15, 1985 and annually thereafter at 101% if called on or before May 15, 1994 and at 100.50% thereafter. Callable also, at any time, upon the imposition of withholding taxes, at 101% if called on or before May 15, 1994 and at 100.50% thereafter.
  - 12 Non-callable prior to December 6, 1994 except for sinking fund purposes. Callable on December 6, 1994 and thereafter at any time at 100%.
-

**Debt Fund — References to Schedule of Long-Term Debt / continued**

DECEMBER 31, 1984

- 
- |    |  |
|----|--|
| 13 | Callable on December 6, 1997 and thereafter at any time at 100%.   |
| 14 | Callable at 101.75% on June 2, 1985.   |
| 15 | Non-callable prior to December 1, 1995 except for sinking fund purposes. Callable on December 1, 1995 and thereafter at any time at 105.02% reducing to 100% on or after December 1, 2004.   |
| 16 | Exchangeable at holder's option for bonds maturing on April 29, 2001 and bearing interest at the rate of 14% per annum from April 29, 1986.  |
| 17 | Redeemable at 100% at holder's option on October 28, 1985, 1989 or 1993; callable at 100% on October 28, 1985, 1989 or 1993. Callable also at 100%, at any time, upon the imposition of withholding taxes. The interest rate is effective until October 28, 1985. It will be reset by the Authority on that date and on October 28, 1989 and 1993. |
| 18 | Non-callable prior to maturity unless lender so agrees.  |
| 19 | Redeemable at holder's option on May 15, 1987.   |
| 20 | Non-callable prior to December 5, 1999 except for sinking fund purposes. Callable on December 5, 1999 and thereafter at 100%.  |
