Chairman's Report — 1985

TO THE MEMBERS OF THE MUNICIPAL FINANCE AUTHORITY OF BRITISH COLUMBIA

Alderman James H. Stuart

CHAIRMAN

It is my pleasure and privilege to submit the fifteenth annual report of the Municipal Finance Authority of British Columbia.

Since 1971, when our first issue was launched, we have seen many changes in the world's financial markets. As electronics link countries, the daily events in Europe, the U.S. and Japan impact on the Canadian economy almost at the same moment they happen many thousands of miles away.

In response to this acceleration of events, our systems at the Municipal Finance Authority grow increasingly more complex.

On the investment side, as the Sinking Funds, Debt Reserve Fund, and the Capital Repayment Equalization Funds continue to grow, matters of interest rates and foreign exchange rates are monitored regularly each day.

Compared with previous decades a great deal of movement occurred throughout the seventies and eighties. Our 1972 Canadian prime rate of 6% rose to 11.5% by 1974, declined to 8.25% by 1977, and peaked at 22.75% in 1981. The general direction since then, year by year, has been downward at least until the close of 1985.

Surprisingly these declines in interest rates since 1981 have not produced a speedy return to prosperity in British Columbia. Timber, pulp and paper and the mining sectors still continue to languish. The excessive interest rates of 1981 have left an indelible mark on the ways that we approach business and government in 1985.

The presently falling oil prices could assist in lowering inflation thus producing lower interest rates. The unfortunate side effect of a \$15 barrel of oil is to place a number of our Canadian energy megaprojects on the endangered species list. Conversely a lower Canadian dollar may have the result of making Canadian energy products more saleable in the United States.

The present volatility in foreign exchange will give us all something to ponder in the years ahead. As a nation we incur some advantages from a lower Canadian dollar as far as our exports to the U.S. are concerned; conversely a lower Canadian dollar means more cost to those municipalities in U.S. loans and, occasionally, raises the threat of protectionist legislation from the U.S. which might impact particularly on our timber products.

In addition to the foregoing variables the eighties have posed new challenges. Our requests for borrowings are down. At one time \$150 to \$200 million was our yearly appetite for current requirements alone. This year we borrowed only about half that amount including refundings. We now pay off more debt annually than what we borrow, and while this is good for local government balance sheets, it has an effect on the liquidity of MFA debenture issues.

During 1985, we raised \$50 million U.S. in Europe plus a total of \$37.3 million in current requirements by way of two new issues. On May 7, 1985, we launched a \$21.8 million, 20 year sinking fund issue in the Canadian domestic market. The issue was priced at par with an interest rate of 12%. We were able to negotiate an optional call feature similar to our last issue which enables us to call the issue at or any time after the 15th year. These call features are very valuable. Our experience with sinking funds over the years has shown that they could be fully funded much earlier than estimated.

On November 5, 1985, we launched a \$15.5 million, 20 year issue in the Canadian domestic market. The bonds were priced at par with an interest rate of 11%. Again, the small size of this issue troubled us somewhat because institutional buyers generally do not support smaller issues. This means that strong demand from retail buyers must be present before we can proceed. During the first week of November, because of a shortage of bonds with long maturities and a strong market caused by investors moving their money from small banks, demand *was* there and the issue was successfully floated.

This particular issue can be reopened in the future if rates and requirements blend to give us the option of expanding the size of a specific issue in the years to come (which could also mean an improvement in liquidity in future years.)

Since becoming Chairman in 1976, I have felt that as much as possible of our new financings should be done in Canadian funds. Since 1977, new financings totalling just over \$1 billion have been raised by the Municipal Finance Authority in the international

financial markets. Approximately 82.7% of this amount has been in Canadian funds with the balance of 17.3% in U.S. funds. Prior to 1977, the \$319 million raised was 30.6% in Canadian funds, 63.9% in U.S. funds and the remaining 5.5% in other currencies.

Rating Agencies have an important effect on the cost of our borrowing and, over the years, we have spent a considerable amount of time on updates and explanations to Moody's and Standard and Poor's. Both these Agencies are based in New York. At the present time we maintain a triple A rating from Moody's and a double A+ from Standard and Poor's.

Recently, we were rated by the Canadian Bond Rating Service and our preliminary rating was AA. We plan a further submission to the Canadian Bond Rating Service in 1986 once further statistics on British Columbia municipalities become available.

We have found that although the MFA concept is a difficult one to grasp, it is much appreciated once fully understood. Our trustees and staff continue to devote a great deal of time to explaining the Authority to investors and rating agencies as well as updating them on British Columbia's gradually awakening economy.

As Chairman I have always felt that this is time and money well spent, and I hope to see the CBRS rating gradually improve over the years. The ranks of triple A borrowers are certainly thinner since the recession of 1981.

This year the Board of Trustees grappled with two rollover opportunities. Only about 15% of the Trustees' and staff's time is devoted to pricing, launching, and documenting new issues. Whether the size of the issue is large or small, the procedure remains the same; but the analysis of rollover opportunities for 1985 consumed twice as much time as financing our current requirements. Our most interesting analysis involved the 1981 17% Euro-U.S. Debentures maturing in 1997, which were callable or retractable every four years. It was to our advantage to call the issue.

After much consideration, we launched an issue of \$50 million Euro-U.S. Bonds with an annual interest rate of 11.25% (equivalent to a semi-annual rate of

10.95%). This financing secured the semi-annual rate of 10.95% for 15 years and has call features after the 8th year should we wish to use them.

At the close of 1985, long-term debt outstanding was one billion, one hundred and ninety-one million; during 1985 payments of principal and interest in excess of \$186 million were received from our regional districts and municipalities. At December 31, 1985, investments managed totalled \$158 million, broken down as follows:

Debt Reserve Fund \$31 million.

Sinking and related debt servicing funds

\$127 million.

Interest earnings in 1985 totalled \$16.98 million.

The types of investments which may be held by the Municipal Finance Authority are regulated by our Act. At December 31, 1985 our portfolio consisted of \$42.8 million of securities of or guaranteed by the Government of Canada, \$29 million of securities of or guaranteed by Provincial governments, \$44.7 million of securities of or guaranteed by Canadian chartered banks, \$0.8 million of securities of B.C. credit unions, \$2.5 million of securities of municipal governments in Canada and **\$38.2 million of obligations of the Municipal Finance Authority.**

In 1985 after petitioning the Provincial Government for changes to our legislation, we were delighted to see our Act expanded to enable us to purchase securities of Canadian municipalities outside of British Columbia.

These recent legislative changes also permitted us to appoint registrars or transfer agents for the registration and transfer of our securities. Guaranty Trust Company now represents the Municipal Finance Authority in Toronto and Vancouver for our last debenture issue. This enables holders of the debentures to

exchange and reregister their bonds in either of those two cities, or if they prefer, from our offices in Victoria.

We hope that this will, over time, eliminate the costly business of issuing bearer bonds.

In my last annual report I mentioned I was looking forward to better financing opportunities in 1985. We certainly found that was the case with rates easing by 200 basis points December 1985 over December 1984. I also hoped that we might see some real attempts to cut back the federal deficits in the U.S. and Canada. The market reaction to deficit cutting in Canada has been mixed and we are monitoring the Gramm-Rudman proposal which some expect will have the U.S. Federal deficit cut to zero by the early 1990's.

If these proposals are initially successful, they will have an effect on Canadian rates and the Canadian dollar. If the stage was set in Canada last year for a meaningful deficit cutting exercise, it would seem even more appropriate that this take place now.

The Municipal Finance Authority does not work in isolation, and I would like to record our thanks to the Ministry of Municipal Affairs and the Ministry of Finance who are to be commended for their continuing co-operation and support. Dealing with these Ministries is always a pleasure; formally and informally, the doors are always open. This exchange of information is an important component of our operation.

I will close by thanking the Board of Trustees and the staff of the Municipal Finance Authority for their energy and enthusiasm. It has been a real pleasure working with them throughout this year.

James H. Stuart, CHAIRMAN

Pacific Rim National Park, Alberni-Clayoquot Regional District *Courtesy Tourism B.C.*

“The object of the authority is to provide financing of capital requirements for regional districts and for their member municipalities by the issue of its securities and lending the proceeds from them to the regional district on whose request the financing is undertaken.”

*Municipal Finance
Authority Act,
Revised Statutes of
British Columbia, 1979.*

How the Municipal Finance Authority of British Columbia Functions

Responsibility

The Municipal Finance Authority of British Columbia was established in 1970 by the Municipal Finance Authority of British Columbia Act, Chapter 292, Revised Statutes of British Columbia, 1979.

Regional districts and municipalities in British Columbia finance through the Authority all long-term capital requirements except those met by senior levels of government.

The City of Vancouver is the only municipality in the Province which retains the right to issue its own securities to finance capital projects. Taxable land and improvements within the City of Vancouver are, nevertheless, subject to rates levied by the Municipal Finance Authority.

Representation

The Province of British Columbia is divided into twenty-eight regional districts, each of which is governed by a Regional Board consisting of representatives of its member municipalities and unincorporated areas.

The members of the Municipal Finance Authority are appointed by the Regional Boards; the number of members to which a regional district is entitled is based upon its population.

The executive and administrative powers and duties of the Authority are exercised and performed by a Board of Trustees consisting of the Chairman of the Authority and six other members, elected annually. The Capital Regional District and the Greater Vancouver Regional District must be represented on the Board of Trustees.

Funding

When the municipalities, through the regional districts, and the regional districts on their own behalf, wish to finance their capital projects, they present their approved requests to the Municipal Finance Authority.

Taking into account market and economic conditions pertaining, the members of the Authority may authorize the issue and sale of securities in an amount sufficient to meet the requests.

Securities of the Authority, not exceeding the amount authorized, may then be issued at such rates and pursuant to such terms and conditions and in such markets and currencies as the Board of Trustees may determine. Under the Act, the Authority has power to provide for the creation, management and application of sinking funds or other means of securing the repayment of securities issued by the Authority, including the redemption by call of securities issued subject to redemption in advance of maturity.

A separate account is maintained for each sinking fund security issue and moneys at the credit of a sinking fund which cannot be immediately applied toward paying the debt or discharging the obligation may be invested in:

- (a) securities of the government of Canada or a province of Canada, or
- (b) securities, the principal and interest of which are guaranteed by the government of Canada or a province of Canada, or
- (c) securities of a municipality or regional district in British Columbia, or of a local, municipal or regional government in another province of Canada, maturing not later than the securities for which the sinking fund was created, or

- (d) investments guaranteed by a Canadian chartered bank, or
- (e) deposits in, or shares or other evidences of indebtedness of, a credit union incorporated under the British Columbia Credit Union Act, or
- (f) securities of the Municipal Finance Authority of British Columbia maturing not later than the securities for which the sinking fund was created; however, securities so purchased shall be held to the credit of the sinking fund account and shall not be resold.

Protection for Investors

In British Columbia, the combined credit of all the regional districts and their member municipalities—which together have essentially all the taxable land and improvements in the Province—stands behind the Authority's obligations.

In addition, the Authority has established a debt reserve fund into which each regional district sharing in the proceeds of a security issue having a term to maturity of over two years must contribute an amount equal to one-half the average annual instalment of principal and interest for repayment of the issue; such amount is payable to the Authority at the time of issue either in full or in an amount equal to one percent of the principal amount borrowed with the balance secured by a non-interest bearing demand note of the regional district issued to the Authority. Moneys paid into the debt reserve fund, and interest earned thereon, are obligations of the Authority to the regional districts and must be refunded to them when the final instalments of their loans have been repaid.

If, at any time, the Authority lacks sufficient funds to meet principal, interest or sinking fund payments due on its obligations, it must utilize the debt reserve fund, all or any part of which is available to satisfy the Authority's obligations, regardless of the sources of the moneys in the fund. In the event that payments are made from the debt reserve fund, the Authority will recover such payments from the regional districts involved in order to restore the debt reserve fund. If the Trustees are of the opinion that payments made from the debt reserve fund will not be recovered within a reasonable period, they may levy upon all taxable land and improvements in the Province a tax sufficient to restore the fund to its required amount. It is mandatory for the Trustees to levy such a tax when the balance in the debt reserve fund is less than fifty percent of the required amount. The Trustees' power to impose taxes does not require the permission or approval of any other governmental authority. Pending the receipt of such taxes, the Authority may borrow an equivalent amount to meet its obligations.

The provincial government has undertaken to assure that the debt reserve fund will be maintained in accordance with the Municipal Finance Authority Act and the Inspector of Municipalities may inspect the fund from time to time and issue a certificate that it has been maintained at the proper level.

Moneys in the debt reserve fund may be invested in:

- (a) securities of the government of Canada or a province of Canada, or
- (b) securities, the principal and interest of which are guaranteed by the government of Canada or a province of Canada, or
- (c) deposits in, or investments guaranteed by a Canadian chartered bank, or
- (d) deposits in, or shares or other evidences of indebtedness of, a credit union incorporated under the British Columbia Credit Union Act.

Such investments must mature or be callable within five years and at least twenty-five percent of the fund must be callable within ninety days.

**Additional
Protection for Investors**

Regional districts and their member municipalities financing through the Municipal Finance Authority must obtain the same provincial approvals as would be required if they were issuing their own securities. In this way, all the safeguards imposed by the Provincial Legislature on the incurring of indebtedness by regional and municipal governments are retained. Such safeguards include the requirement that the Inspector of Municipalities approve the debt and user charges, if any, and other taxes to service the debt. In addition, sewer and water projects require the issuance of a certificate of self-liquidation by the Inspector of Municipalities.

Limitations on the borrowing power of a regional district for each function may be specified in its letters patent. The total indebtedness which a municipality may contract is limited to a percentage of the assessed value for general municipal purposes of the taxable land and improvements within the municipality and the value of the utility systems and other municipal enterprises for which the municipality has a subsisting certificate of self-liquidation granted by the Inspector of Municipalities.

The Growth and Stability of British Columbia's Municipalities

ASSESSMENT

The British Columbia Assessment Authority, a provincially-appointed body, is responsible for assessment throughout the Province.

The fundamental principle underlying the Assessment Act is that land and improvements must be valued at their actual value (i.e., fair market value).

The actual value totals for the Province in the years 1980 to 1985 were as follows:

1980	\$ 94.1 billion	1983	\$ 138.3 billion
1981	\$ 123.1 billion	1984	\$ 140.8 billion
1982	\$ 157.1 billion	1985	\$ 145.7 billion

Property is segregated by type or use into property classes prescribed by the Lieutenant Governor in Council.

The value subject to taxation after applicable exemptions is referred to as the net taxable value.

A variable tax rate system was introduced in 1984 which transferred the variability factor from the assessed value to the taxation process controlled by each taxing authority. Municipal and other taxing authorities now set tax rates for each class of property to produce the level of taxation desired.

Auditors' Report—1985

TO THE MEMBERS OF THE MUNICIPAL FINANCE AUTHORITY OF BRITISH COLUMBIA

Peat, Marwick, Mitchell & Co.
Chartered Accountants
2400 - 1055 West Georgia Street
P.O. Box 11150, Royal Centre
Vancouver, B.C. V6E 3P3
Telephone: (604) 662-5500
Telecopier: (604) 662-5576
Telex: 0454218

We have examined the balance sheets of the Operating Fund, Debt Fund, Capital Repayment Equalization Fund, Debt Reserve Fund and Market Development Fund of Municipal Finance Authority of British Columbia and the combined balance sheet of these funds as at December 31, 1985, the statements of revenue, expenditure and surplus of each of these funds, the combined statement of revenue, expenditure and surplus of these funds and the Debt Fund statement of debt financing for the year then ended. Our examination was made in accordance with generally accepted auditing standards, and accordingly included a general review of the accounting procedures and such tests of accounting records and other supporting evidence as we considered necessary in the circumstances.

In our opinion, these financial statements present fairly the financial position of the Authority as at December 31, 1985, and the results of its operations and the acquisition and application of its financing for the year then ended in accordance with accounting principles described in Note 1 to the financial statements applied on a basis consistent with that of the preceding year.

Vancouver, British Columbia, Canada
January 30, 1986

MUNICIPAL FINANCE AUTHORITY OF BRITISH COLUMBIA

Notes to Financial Statements — All Funds

DECEMBER 31, 1985

1**Organization of Municipal Finance Authority of British Columbia and significant accounting policies**

The Municipal Finance Authority of British Columbia (the "Authority"), created in 1970 by the Municipal Finance Authority of British Columbia Act (the "Act"), is the central borrowing agency for financing of capital requirements (other than for schools and hospitals) for regional districts and their member municipalities in the Province of British Columbia (the "Province"). The Authority issues its own securities and lends the proceeds to the regional districts on whose request the financing is undertaken. Obligations of the Authority are not obligations of the Province and are not directly or indirectly guaranteed by the Province.

The Authority follows the normal practice in local government accounting and maintains its accounts according to the principles of fund accounting, a technique by which its financial resources are segregated for specific activities or to attain certain objectives. Five funds are maintained. A brief description of each fund and its purpose is as follows:

OPERATING FUND

The Act provides for the establishment of an operating fund to meet the annual operating budget. For this purpose, the Authority may impose, annually, rates not exceeding the prescribed rates on all taxable land and improvements in the Province.

DEBT FUND

The Authority's financing activities on behalf of the regional districts in the Province are recorded in the Debt Fund.

CAPITAL REPAYMENT EQUALIZATION FUND

The Capital Repayment Equalization Fund is a repository for repayments from the regional districts under their loan agreements in advance of the Authority's requirements on its related indebtedness. Transfers, not exceeding the amount available in respect of each issue, are made to the Debt Fund to meet the Authority's obligations when due.

DEBT RESERVE FUND

Under the Act, the Authority is required to establish a Debt Reserve Fund. Each regional district sharing in the proceeds of a debt issue is required to pay into the Debt Reserve Fund an amount equal to one-half the average annual instalment of principal and interest in respect of its own borrowing together with one-half the average annual instalment of principal and interest as set out in the agreements entered into with the regional district by member municipalities in respect of their borrowings; such amount is payable either in full or in an amount equal to 1% of the principal amount borrowed with the balance secured by a non-interest bearing demand note.

If, at any time, the Authority does not have sufficient funds to meet payments or sinking fund contributions due on its obligations, the payments or sinking fund contributions shall be made from the Debt Reserve Fund.

MUNICIPAL FINANCE AUTHORITY OF BRITISH COLUMBIA

Notes to Financial Statements — All Funds / continued

DECEMBER 31, 1985

MARKET DEVELOPMENT FUND

The development of markets for the Authority's securities issues is segregated in the Market Development Fund. It is funded by transfers from the Operating Fund.

A summary of significant accounting policies is as follows:

PRIOR YEAR'S SURPLUS

The Authority appropriates the prior year's surpluses to current revenue except the Debt Fund surplus which relates to the sinking funds.

INCOME RECOGNITION

The annual operating levy is recognized as revenue in the Operating Fund when the rates have been set by the Authority in March of each year. It is collected on behalf of the Authority by the municipalities in the Province and the Provincial Surveyor of Taxes and is payable to the Authority on August 1 each year.

OFFICE FURNITURE, FIXTURES AND EQUIPMENT

Office furniture, fixtures and equipment are written off in the year of acquisition.

INTEREST ACCRUALS

Interest is accrued only on investments. Accrued interest receivable from the regional districts under the loan agreements and accrued interest payable on the long-term debt are not recorded, except for unpaid matured interest coupons on coupon debentures which are recognized as accounts payable in the Debt Fund.

AMORTIZATION OF ISSUE AND REFUNDING COSTS

The issue and refunding costs are being amortized on a straight-line basis over the average lives of the securities issues to which they relate.

FOREIGN CURRENCY TRANSACTIONS

The long-term debt payable in foreign currencies is recorded in equivalent Canadian dollars at the exchange rates prevailing when the debt was incurred except the debt payable in U.S. dollars which is stated at the rate of U.S. \$1 equals Canadian \$1.

The Authority does not adjust its assets and liabilities denominated in foreign currencies to reflect the exchange rates at the balance sheet date since, in the opinion of the Authority, its foreign exchange exposure is fully hedged by virtue of its contractual arrangements with the regional districts on whose behalf the financing is undertaken and/or by the application of certain sections of the Act which, essentially, provide that all monetary risks, including foreign currency risks, are obligations of the regional districts.

MUNICIPAL FINANCE AUTHORITY OF BRITISH COLUMBIA

Notes to Financial Statements — All Funds / continued

DECEMBER 31, 1985

INVESTMENTS

Investments are carried at cost, adjusted for amortization of premiums and accretion of discounts on a yield basis, except the investments in its own securities which are carried at par value.

SINKING FUNDS

Under the Act, obligations of the Authority purchased for a sinking fund account together with interest, premium, or exchange derived from them shall be held to the credit of that sinking fund account and shall not be resold.

However, securities purchased in anticipation of mandatory annual redemptions for sinking fund purposes are cancelled immediately in accordance with the terms of such issues.

2

Investments

Investments consist of securities of:

	1985			1984		
	Par value	Book value		Book value		Book value

DECEMBER 31, 1985

3

**Loans to
Regional Districts**

Loans to regional districts include \$294,320,381 (1984 - \$308,790,274) denominated in U.S. dollars.

Under the Act, each regional district sharing in the proceeds of a securities issue must pay over to the Authority such sums as are required to discharge its obligations to the Authority in respect of such securities issue, but if the scheduled payments provided for under the loan agreement are not sufficient to meet the Authority's obligations in respect of that securities issue, the deficiency is a liability of the regional district to the Authority.

At the exchange rates prevailing at December 31, 1985, the scheduled payments under the agreements with the regional districts in respect of the securities payable in Swiss francs and Deutschemarks will not provide sufficient funds to meet the Authority's related obligations when due. Such deficiencies may be met from the Debt Reserve Fund (see Note 6).

The aggregate principal payments recoverable from the regional districts in each of the next five years are as follows:

	<u>1985</u>	<u>1984</u>
	(THOUSANDS OF DOLLARS)	
1985	\$	41,895
1986	43,225	41,829
1987	43,587	42,192
1988	44,986	43,590
1989	46,538	45,143
1990	47,992	

4

**Deferred receivables
from Regional Districts**

In 1978, the Authority redeemed the 6% bond issue of Swiss francs 50,000,000 from the proceeds of a bank loan in the amount of Swiss francs 51,600,000. As a result, the Authority incurred an exchange loss of \$23,055,505, being the difference between the Canadian dollar equivalent of Swiss francs 50,000,000 at the date of borrowing in 1972 and the Canadian dollar equivalent of Swiss francs 50,000,000 used from the proceeds of the bank loan to finance the redemption.

Under the terms of the loan agreements with the regional districts which participated in the original issue, the exchange loss is a liability of the regional districts to the Authority. Accordingly, it has been recorded in the accounts as deferred receivables from Regional Districts.

For the remainder of the term of the loan agreements, the Authority will recover additional amounts, on a sinking fund basis, from the regional districts so that, at the end of the term of such loan agreements, a fund, the contributions to which will have been adjusted for exchange rate variations on a cumulative basis, will be available to retire the related foreign currency debt. The additional payments from the regional districts are credited to the deferred receivables from Regional Districts account.

MUNICIPAL FINANCE AUTHORITY OF BRITISH COLUMBIA

Notes to Financial Statements — All Funds / continued

DECEMBER 31, 1985

5**Due to sinking
and other funds**

The Authority may invest sinking fund and Capital Repayment Equalization Fund monies in its own securities maturing not later than the securities for which the sinking or Capital Repayment Equalization Fund account was created.

In addition to its own securities purchased under this provision, loans to the Debt Fund totalling \$6,306,088 (1984 - \$456,032) together with accrued interest of \$56,727 (1984 - \$7,815) were outstanding at December 31, 1985. Like the securities, the loans are included in the sinking fund assets and in investments and receivables in the Capital Repayment Equalization Fund and they have not been eliminated in the combined statements.

6

Debt Reserve Fund

The amounts due to the regional districts will be repaid to them when they have made the final payment under their respective loan agreements. If, at any time, the Authority does not have sufficient funds to meet payments or sinking fund contributions due on its obligations, the payments or sinking fund contributions must be made from the Debt Reserve Fund. During 1985, deficiencies of \$3,237,045 (1984 - \$489,132) in the amounts of funds available to meet the principal and interest payments on the Deutschemark loan and the interest and sinking fund payments on the Swiss franc loan have been met by transfers from the Debt Reserve Fund. Such deficiencies are recovered in the following year from the participating regional districts under the terms of their loan agreements.

The Board of Trustees of the Authority may levy or impose upon substantially all taxable land and improvements in the Province rates sufficient to maintain the Debt Reserve Fund at a level not exceeding the amount which would have been in the fund had no such payments been made. Further, the Board of Trustees must impose such rates when the balance in the fund is less than fifty percent of the amount that would have been in the fund had no such payments been made.

MUNICIPAL FINANCE AUTHORITY OF BRITISH COLUMBIA

Notes to Financial Statements — All Funds / continued

DECEMBER 31, 1985

7

Long-term debt

The aggregate long-term debt maturities and sinking fund requirements in each of the next five years are as follows (including the debt payable in European currencies at the exchange rates prevailing at December 31, 1985 and provision for early redemptions at the option of the bondholder):

	<u>1985</u>	<u>1984</u>
	(THOUSANDS OF DOLLARS)	
1985	\$ 100,051	
1986	168,585	167,871
1987	222,718	212,153
1988	131,767	124,718
1989	52,078	50,370
1990	29,735	

Since the maturities of certain of the Authority's securities issues and the related loans to the regional districts do not coincide, refunding of all, or a portion, of such securities issues will be required in future years.

8

Foreign currencies

The long-term debt payable includes the following amounts payable in foreign currencies:

		<u>1985</u>	<u>1984</u>
United States dollars	US\$	284,349,000	297,988,000
Swiss francs	SFr	51,600,000	51,600,000
Deutschmarks	DM	5,775,000	6,600,000

No exchange gains or losses accrue to the Authority in respect of the debt payable in U.S. dollars since the related loans to the regional districts are denominated in U.S. dollars and the loan agreements provide for repayment to the Authority in U.S. dollars. In the case of other long-term debt denominated in European currencies, the Authority is not at exchange risk (see Note 1).

9

Sinking funds

The annual deposits to the sinking funds for issues payable in Canadian dollars are based on an interest rate of 5% per annum, capitalized yearly.

Certain securities issues are subject to specific annual redemptions for sinking fund purposes. By purchasing the securities at discount in the open market in anticipation of the sinking fund requirements, the Authority has, to December 31, 1985, retired \$13,113,000 (1984 - \$17,037,000) of such debt in advance of the scheduled redemptions for sinking fund purposes.

MUNICIPAL FINANCE AUTHORITY OF BRITISH COLUMBIA

Notes to Financial Statements — All Funds / continued

DECEMBER 31, 1985

Debt Fund — References to Schedule of Long-Term Debt

DECEMBER 31, 1985

- 1 Non-callable except for sinking fund purposes.
- 2 The sinking fund has been calculated to provide for retirement of the issue at maturity.
- 3 Callable on October 1, 1986 and annually thereafter at 101.50% reducing to 100.25% in 1991. Callable annually, also, at 101% in 1986 reducing to 100% in 1991, upon the imposition of withholding taxes.
- 4 Non-callable prior to maturity.
- 5 Non-callable prior to January 15, 1990 except for sinking fund purposes. Callable on January 15, 1990 and thereafter at any time at 103.50% reducing to 100% on or after January 16, 1999.
- 6 The sinking fund to provide for retirement of the issue at maturity will begin in 1986.
- 7 Non-callable prior to November 1, 1990 except for sinking fund purposes. Callable on November 1, 1990 and thereafter at any time at 103.25% reducing to 100% on or after November 2, 1998.
- 8 Non-callable prior to May 1, 1991 except for sinking fund purposes. Callable on May 1, 1991 and thereafter at any time at 102.75% reducing to 100% on or after May 2, 1999.
- 9 Non-callable prior to October 15, 1991 except for sinking fund purposes. Callable on October 15, 1991 and thereafter at any time at 102.75% reducing to 100% on or after October 16, 1999.
- 10 Redeemable at holder's option on June 1, 1988, 1991 or 1994. Callable upon the imposition of withholding taxes at 101.50% reducing to 100.25% over the remainder of the term to maturity.
- 11 Redeemable at holder's option on May 15, 1989 or 1994. Callable on May 15, 1986 and annually thereafter at 101% if called on or before May 15, 1994 and at 100.50% thereafter. Callable also, at any time, upon the imposition of withholding taxes, at 101% if called on or before May 15, 1994 and at 100.50% thereafter.
- 12 Non-callable prior to December 6, 1994 except for sinking fund purposes. Callable on December 6, 1994 and thereafter at any time at 100%.

MUNICIPAL FINANCE AUTHORITY OF BRITISH COLUMBIA

Debt Fund—References to Schedule of Long-Term Debt/continued

DECEMBER 31, 1985

- 13 Callable on December 6, 1997 and thereafter at any time at 100%.
- 14 Non-callable prior to December 1, 1995 except for sinking fund purposes. Callable on December 1, 1995 and thereafter at any time at 105.02% reducing to 100% on or after December 1, 2004.
- 15 Exchangeable at holder's option for bonds maturing on April 29, 2001 and bearing interest at the rate of 14% per annum from April 29, 1986. Holders of bonds totalling \$91,362,000 have exercised their option to exchange. The extended bonds will be issued after April 29, 1986.
- 16 Called on October 28, 1985.
- 17 Non-callable prior to maturity unless lender so agrees.
- 18 Redeemable at holder's option on May 15, 1987.
- 19 Non-callable prior to December 5, 1999 except for sinking fund purposes. Callable on December 5, 1999 and thereafter at 100%.
- 20 Callable on June 12, 2000 and thereafter at any time at 100%.
- 21 Redeemable at holder's option on October 28, 2000. Callable on October 28, 1993 and thereafter at 103% reducing to 100% from October 28, 1999 to October 28, 2000. Callable also, at any time, upon the imposition of withholding taxes, at 100%. The interest rate is effective until October 28, 2000; it will be reset by the Authority from October 29, 2000.
- 22 Callable on December 12, 2000 and thereafter at any time at 100%.
