#### TWENTY-FIFTH ANNUAL REPORT

OF THE

#### BOARD OF DIRECTORS TO THE SHAREHOLDERS

For the Year ended 31st December, 1937.

THE Board of Directors beg to submit their Twenty-fifth Annual Report and Accounts, together with a report by the President on the enterprises in Brazil.

The revenue of the Company resulting from the year's operations was as follows:

Revenue from Operating Companies \$11,375,104.10	
Interest on Investments and other Miscellaneous Income 212,427.04	*** *** *** ***
General and Administration Expenses \$ 401,249.94	\$11,587,531.14
Provision for General Amortization 303,000.00	701,249.94
Net Revenue	\$10,886,281.20
Four Quarterly Dividends on Preference Shares \$ 23,604.00	
Dividends on Ordinary Shares:	
50 cents per share paid 10th July, 1937 - \$3,511,957,72	
50 cents per share declared December, 1937, payable 25th January, 1938 3,512,133.38 7,024,091 10	7,047,695.10
Balance	\$ 3,838,586.10

The net revenue shown in the above statement (less the dividends paid on the preference shares), is equivalent to

approximately  $\$1.54\frac{1}{2}$  per share on the outstanding ordinary share capital at the end of the year.

The following comparative statement shows the combined earnings and charges of the operating companies and of this Company, and the resulting net income of this Company for the past four years.

Excluding Inter-Company Items		Year ended 3	1st December	
	1934	1935.	1936.	1937

During 1937 Brazilian exchange showed an improvement on the average as compared with 1936 with consequent benefit in the operating results when expressed in dollars. As will be seen by reference to the statistics appended to this report increases in the volume of business were again recorded during 1937 in all services of the operating companies.

During the first part of 1937 there was a marked improvement in the exchange value of the milreis quoted on the free market and early in August the rate reached 6.70 cents for sight drafts on New York but commencing in the latter part of August a decline set in which continued to the end of the year. At the close of 1936 the rates on the free market for sight drafts on New York and London were respectively 5.95 cents and 2-29/32d. as compared with 5.71 eents and 2-3/4d. at the close of 1937, the last mentioned rates however being largely nominal due to restrictions in force. While general control of exchange through the Bank of Brazil as explained in previous reports continued during 1937 the restrictions governing exchange transactions which had been to a large extent relaxed during the early part of the year were in the latter part of September again tightened, the rates quoted thereafter being largely nominal with limited exchange available even for payment of imports. In November as an aid to coffee and other exports the exchange quota of 35% at the official rate applicable to most export bills, retained by the Bank of Brazil for official purposes, was abolished by decree and in the latter part of December under a further decree the Bank of Brazil was given a monopoly of foreign exchange for distribution under certain conditions and a tax of 3% was imposed on all remittances abroad for imports or other purposes, the proceeds of such tax to be credited to an exchange fund at the disposition of the government. After the end of the year there was some improvement in the situation and exchange was gradually made available to meet the arrears of payments for imports. At present payments for current imports only are being met although somewhat delayed but it is hoped that within a reasonable time exchange for remittances for other purposes will become available.

All payments have been punctually made to date under the agreement dated 29th June, 1933, referred to in previous reports, between the Bank of Brazil on behalf of the Government and N. M. Rothschild & Sons, providing for the liquidation in sterling by monthly instalments over six years, of certain milreis accumulations deposited with the Bank of Brazil by the participants in the arrangement including our companies.

The rates for certain services arbitrarily fixed by the authorities as described in previous reports still remain in effect and the Board regret they are unable to report any substantial progress in the adjustment of this situation.

The current assets and liabilities of the operating companies in Brazil were valued at the end of the year in dollars at the closing sight rate of exchange on New York at which the Bank of Brazil accepted deposits against exchange for payment of imports. The combined earnings in dollars of the operating companies for the year which were published monthly and appear in total in the tabulated statement on page 4 of this report, represent the milreis figures calculated at the officially published average sight rates for exchange transactions on New York.

As a result of studies made by the management in Brazil the basis for the annual provision for depreciation of physical properties has been revised and under the modified scale now adopted there has been set aside by the operating companies in the past year the aggregate sum of \$6,809,016. On the other hand, it has been considered prudent to provide larger sums for general amortization and therefore the aggregate amount set aside for this purpose for the year has been increased to \$1,000,000.

The cash expenditure on the properties of the operating companies during the year amounted to approximately \$15,400,000, representing additions, improvements and replacements essential to the proper carrying on of the services. The necessary adjustments have been made in plant and depreciation accounts in respect of works renewed or replaced.

It is with deep regret that the Board record the death on 30th October, 1937, of Mr. R. C. Brown, director and vice-president of this Company and of a number of its subsidiaries and associated companies. Mr. Brown's association dates back to the inception of the enterprise as he was the first general manager of The São Paulo Tramway, Light and Power Company, Limited, following its organization in 1899. He retired from that position in 1901. In 1915 he became a member of the Board of Brazilian Traction, Light and Power Company, Limited, subsequently becoming a vice-president of that and the other companies above mentioned. The Board desire to acknowledge their appreciation of the valuable services rendered by Mr. Brown during the long period of his association with the companies and to express the high esteem in which he was held by all his colleagues.

The Board regret to report the resignation as a director of the Company of Mr. J. W. McConnell who, on assuming the presidency of the Montreal Star Company, Limited, decided to retire from the boards of practically all of the corporations with which he was associated, and on his retirement the Board express their appreciation of his services and deep interest in the Company's affairs.

Your directors desire to express their continued sense of appreciation of the loyal and efficient services rendered by all of the executive officers, heads of departments and other officials of the operating companies in Brazil.

A map showing the operating companies' properties in Brazil and statistics and charts showing the growth of the different services are also appended.

By Order of the Board,

A. W. Adams,

Toronto, Canada,

Secretary.

May 5th, 1938.

#### REPORT OF THE PRESIDENT.

To the Board of Directors of the Brazilian Traction, Light and Power Company, Limited.

#### Transportation.

As in previous years no progress was made in negotiations for the reform of the companies' franchises for transportation services which at present fares are unsatisfactory and unremunerative.

The management of The São Paulo Tramway, Light and Power Company, Limited with the approval of the Board have informed the authorities of the city of São Paulo that the company will not be prepared to continue the tramway service in the city after the termination of its exclusive privilege in 1941.

#### Tramways.

Various small track extensions were made and certain track removed, with the result that at the end of the year there was a net decrease of 1.83 miles of track in operation. This decrease is due largely to the rerouting and withdrawal of the trams from certain congested areas in the city of São Paulo carried out in agreement with the municipal authorities. 19.49 miles of track were reconstructed.

38 passenger cars were added to the companies' tramway rolling stock, all of which were built in the companies' shops, and 2 old service cars were withdrawn from service, making a net increase of 36 cars.

#### Buses.

The combined fleet at the end of the year numbered 149 buses, a decrease of 15 vehicles accounted for by the discon-

tinuance as from April 14th, 1937 of the bus service in Santos due to the unsatisfactory conditions of operation in that city.

#### SHOPS AND STORES.

The companies continue the policy of extending the scope of manufacture in the shops of articles required for the various services operated by the companies, thereby increasing employment in Brazil and reducing imports.

#### ELECTRIC LIGHT AND POWER.

#### Generating Plants.

Construction of the Serra development near São Paulo continues to keep pace with the growth of load in the area served. The installation of the 4th generating unit nearly identical with the 3rd unit at the Serra power house is almost completed. During the year a 5th generating unit of similar size was put in hand and the penstock erection therefor was begun in December. When the 5th unit is in operation scheduled for the end of 1938 this station will have a capacity of about a third of a million horse power. The rectification work on the Grande, Guarapiranga and Pinheiros rivers progressed satisfactorily during the year.

#### Distribution System.

During the year the connected transformer capacity was increased by the addition of 150,158 K.V.A. bringing the total up to 1,284,219 K.V.A. The construction of new duct lines and extensions of the underground cable system during the year increased the totals to 1,249.12 and 1,343.69 miles respectively.

The mileage of transmission lines in service at the end of the year totalled 1,913.16 miles. Overhead distribution lines showed an increase of 1,326.72 miles, the total mileage in service at the end of the year being 24,855.26 miles.

The total number of poles set at the end of the year was 199,925, compared with 192,409 in 1936.

In the Federal District of Rio de Janeiro 1,171 electric lamps were added to the public illumination system, bringing the total number connected at the end of the year to 33,103.

In the city of São Paulo the net gain in electric lamps for public illumination was 1,798, the total number in service at the end of the year being 18,059. The substitution of electric lighting for gas was practically concluded, 829 gas lamps having been disconnected.

The new electric service was inaugurated on July 10th on suburban trains of the Central Railway of Brazil (the important Federal Government railway) between Rio de Janeiro and Madureira and in February, 1938 this service was extended from Madureira to Nova Ignassú and was at the same time inaugurated on the branch line to Bangú. As stated in last year's report, the electrical energy for the operation of the electrified sections is supplied by The Rio de Janeiro Tramway, Light and Power Company, Limited under contract signed in December, 1936.

GAS.

In the Rio de Janeiro gas works expenditures were confined to certain additions and improvements necessary to maintain the efficiency of the service.

In São Paulo added improvements were installed to facilitate storing, loading and distributing coke including the erection of a new coke screening plant. Additional mains laid in São Paulo totalled 6.32 miles.

In the Santos area 3.58 miles of additional mains were laid during the year.

#### Telephones.

The increase in the number of telephones in service during 1937 was 16,988.

In the Federal District of Rio de Janeiro the crection of a one storey building to accommodate the Piedade automatic exchange was completed and two floors were added to the present Villa automatic exchange building.

In the state of Rio de Janeiro the exchange equipment in Nietheroy was increased by the installation of 15 additional switchboard positions which provided for 700 further subscribers lines and increased the local common battery equipment to 5,440 lines.

In the state of Minas Geraes the exchange buildings in Varginha and São Sebastião do Paraiso, referred to in last year's report, were completed and both the installations reconstructed and amplified. The local plants at Leopoldina and Mar de Hespanha were also reconstructed and new magneto equipment installed in the former.

In the city of São Paulo the new general office building in Rua 7 de Abril commenced in 1936 was well advanced and it is expected that it will be completed in 1938. The re-modelling and extension of the Sant'Anna exchange building was completed during the year and a 700 line automatic unit installed to replace the existing 320 line manual switchboard. At the Jardim and Palmeiras exchanges the installation of 1,000 additional lines of automatic equipment in each was completed. The installation of a new 40 position dial toll switchboard was completed and all toll lines entering São Paulo were cut-over from the old to the new toll board resulting in considerably speeding up the toll call service.

In the state of São Paulo additional automatic equipment was installed in Santos, a new local plant constructed at Gallia and the plant at Queluz completely reconstructed.

The number of automatic telephones in service on the company's system at the end of the year was 112,484, an increase of 12,496 over 1936. During the year, throughout the area served by the company, the net increase in toll line extensions

placed in service totalled 5,846.71 miles, underground conduit constructed 137.2 miles, underground cable laid 94.3 miles and 69.5 miles of aerial cable strung. The net increase in the number of poles set at the end of the year was 10,692.

The international radio telephone service was by agreement with the local authorities made available in two additional municipalities in the state of São Paulo, namely Bragança and Amparo.

#### GENERAL.

The combined companies' services continued to show growth. Compared with 1936 there was an increase in passengers carried by the transportation services of 3.49% and in kilowatthours sold an increase of 9.45% while the gas sales and telephone services showed increases of 7.62% and 10.24% respectively. While these indications of growth are in themselves satisfactory it must be borne in mind that the low rates imposed in certain of the services, together with increasing costs of operation, notably in the gas enterprises, have considerably affected the operating results of these services.

Official Brazilian foreign trade statistics for the year 1937 show a net balance of trade in Brazil's favour expressed on a gold basis of £1,922,253 as against £9,003,523 in 1936, a decrease of £7,081,270 or 78.65%, while expressed on a sterling paper basis the corresponding figures were £3,329,325 and £14,811,589 a decrease of £11,482,264 or 77.52%. This decrease is principally due to an increase in the sterling gold value of imports as compared with 1936 of 35.06% whereas exports only increased 8.86%.

Exports of raw cotton from Brazil in 1937 continued to increase steadily both in volume and value there being an increase over the 1936 figures of 35,868 tons or 17.91% and £563,000 gold or 7.55%. Expressed as a percentage of Brazil's total exports the sterling gold value was 18.85%.

Shipments of oranges, hides, frozen meat, manganese ore, precious stones and other products of Brazil during the year also showed considerable increase compared with the year 1936.

The quantity of coffee exported during the year amounted to 12,122,809 bags, a decrease of 2,062,697 bags or 14.54% as compared with 1936. Due however, to higher prices during the first half of the year the total value of coffee exported during 1937 showed a slight increase of £102,000 or 0.57% in sterling gold compared with 1936. Expressed as a percentage of Brazil's total exports, coffee represented in gold value 42.06% in 1937, 45.52% in 1936, 52.63% in 1935 and 73.12% in 1933. It will be seen from these figures that coffee's predominant position in Brazil's exports is gradually becoming less marked due partly to the increased exportation of other products, particularly cotton. During the year 17,196,428 bags of coffee were destroyed, bringing the total quantity climinated up to December 31st, 1937 to 56,728,914 bags.

On November 13th, following an announcement on November 3rd of the Government's intention to modify its coffee policy, a Decree-law was signed by the President of the Republic determining, among other measures, the reduction of the 15 shillings (45 milreis) per bag export tax to 12 milreis per bag. The Brazilian coffee exchanges were closed to prevent speculation and as was to be expected, the price of coffee in foreign markets fell sharply, seriously affecting Brazil's balance of trade for the last two months of the year. It is hoped however that the drop in price will result in an increase of coffee shipments from Brazil.

In November, 1937 a new constitution was promulgated, substituting that of 1934 and is to be submitted to a national plebiseite, the date for which has not yet been fixed. Dr. Getulio Vargas who has been head of the government since 1930 continues as President with widened powers. It is felt that these changes should not adversely affect the interests of our companies.

Miller Lash, President.

April 26th, 1938.

#### AUDITORS' REPORT.

To the Shareholders of the Brazilian Traction, Light and Power Company, Limited:

We have audited the Head Office accounts of the Brazilian Traction, Light and Power Company, Limited, The Rio de Janeiro Tramway, Light and Power Company, Limited (and its subsidiary, Brazilian Telephone Company), The São Paulo Tramway, Light and Power Company, Limited, São Paulo Electric Company, Limited (and its subsidiary, The San Paulo Gas Company, Limited), The City of Santos Improvements Company, Limited and Brazilian Hydro Electric Company, Limited, and have examined the certified reports and statements of Messrs, McAuliffe, Turquand, Youngs & Co., (formerly McAuliffe, Davis, Bell & Co.) Chartered Accountants, in connection with all the subsidiary companies above enumerated except The City of Santos Improvements Company, Limited, in respect of which company we have examined the certified report and statement of Messrs. Deloitte, Plender, Griffiths & Co., Chartered Accountants, covering the capital and revenue accounts and provisions for depreciation in Brazil for the year ended 31st December, 1937. We have obtained all the information and explanations which we have required. Subject to the foregoing we report that, in our opinion, the attached Consolidated Balance Sheet is properly drawn up so as to exhibit a true and correct view of the state of the combined companies' affairs at that date, according to the best of our information, the explanations given to us and as disclosed by the books of the companies.

The net revenues of the operating companies owned or controlled by Brazilian Traction, Light and Power Company, Limited, after provision for or payment of all losses, expenses and charges including depreciation, bond interest and sinking funds, as provided under contracts with them, are payable to and are included in the profit and loss account of the Brazilian Traction, Light and Power Company, Limited.

CLARKSON, GORDON, DILWORTH AND NASH, Chartered Accountants, Auditors.

Toronto, May 2nd, 1938.
