TEMPORARY WAR ADDRESS: H. MALCOLM HUBBARD, REPRESENTATIVE,

99, THE DRIVE, HOVE, SUSSEX, ENGLAND

BRAZILIAN TRACTION, LIGHT AND POWER COMPANY, LIMITED

THIRTY SECOND ANNUAL REPORT

To the Shareholders:

Your directors submit herewith the following report on the Company's affairs, together with the audited accounts for the year 1944 including the consolidated balance sheet of the Company and its operating subsidiary companies in Brazil as at 31st December, 1944.

As will be seen from the statistics and charts on pages 14 and 15, all the services of the Company with the exception of gas continue to show expansion in spite of restrictions in materials available, shortage in manpower and other conditions arising from the war. Sales of gas, which continue to be rationed, show a small increase only over 1943.

Comparative Statement of Earnings 1941-1944

The following statement shows the combined earnings and charges of the operating companies and of Brazilian Traction for the past four years. Unless otherwise indicated all figures in the report expressed in dollars are in United States currency.

The balance of revenue (before deducting capital charges) expressed as a percentage on the companies' investment in plant plus working capital shows an increase from 6.14% in 1943 to 6.69% in the year under review.

Excluding Inter-Company Items	1941	Year ended 3 1942	1st December 1943	1944
Gross Earnings from operation	\$42,77 0,608 655,488	\$46,570,250 1,270,243	\$52,162,244 803,175	\$58,842,514 359,503
Total Revenue of operating companies	\$43,426,096	\$47,840,493	\$52,965,419	\$58,702,017
Less: Operating expenses	\$19,736,952 7,197,250 700,000	\$21,710,503 6,839,512 700,000	\$24,090,982 6,484,567 700,000	\$27,572,384 6,227,040 700,000
Total Operating expenses, depreciation and amortizatiou -	\$27,634,202	\$29,250,015	\$31,275,549	\$34,499,424
Balance of Revenue before capital charges expressed as	\$15,791,894	\$18,590,478	\$21,689,870	\$24,202,593
percentage on companies' investment in plant plus working capital employed in Brazil	4.71%	5.44%	6.14%	6.69%
Less: Bond interest	\$ 1,548,711 624,385	\$ 1,537,610 603,852	\$ 1,511,927 745,598	\$ 1,483,700 742,251
Total Capital charges (excluding interest on temporary advances from Brazilian Traction)	\$ 2,168,096	\$ 2,141,462	\$ 2,257,525	\$ 2,225,951
Balance, being Revenue to Brazilian Traction Miscellaneous Revenue of Brazilian Traction	\$13,623,798 105,818	\$16,449,016 179,450	\$19,432,345 \$00,371	\$21,976,642 471,184
	813,729,616	\$16,628,466	\$19,732,716	822,447,826
Less: General and administration expenses General amortization	\$ 280,932 300,000	\$ 262,376 300,000	\$ 280,504 800,000	\$ 213,608 300,000
	\$ 580,932	\$ 562,376	\$ 580,504	\$ 513,608
Net Revenue, Brazilian Traction • • • • • • •	\$18,148,684	\$16,066,090	\$19,152,212	\$21,934,218

The increase in gross earnings for 1944 over 1943 of the companies operating in Brazil amounted to 11.85% as compared with an increase of 12.01% for 1943 over 1942.

Operating expenses for 1944 increased by 14.45% over 1943 as compared with 10.96% for 1943 over 1942. As in 1943, the increase in operating expenses for 1944 was principally due to continually rising labour costs.

While both gross revenue and net earnings for 1944 are the highest in the Company's history the increase in earnings per share is by no means commensurate with the large amounts which have been invested in properties, plant, etc. during recent years.

The earnings per share on the average outstanding ordinary shares for 1944 are \$3.12 as compared with \$2.72 in 1943.

Capital Expenditure

The cash expenditure on capital account by the operating companies during the past five years is as follows:—

1940	1941	1942	1943	1944
\$11,840,488	\$11,036,103	\$9,219,239	\$13,773,168	\$11,944,742

The average annual expenditure over the above five year period is \$11,562,748.

Depreciation and Amortization

An amount of \$6,227,040 has been set aside by the operating companies for depreciation in the year 1944.

As in previous years, \$1,000,000 has been allocated for general amortization.

Brazilian Exchange-1944

Exchange rates underwent slight modification during the year 1944. Control of exchange through the Bank of Brazil continued in effect. The closing rates in the "free market" (where purchases are limited to payment for imports) for sight drafts on New York and London respectively were 5.13 cents and 3-11/256d. (sterling area) on 31st December, 1944, as compared with 5.09 cents and 3-1/64d. at the close of 1943.

The corresponding "special free market" rates for general remittances duly authorized by the Bank of Brazil were five cents and 3-11/256d. (sterling area) at the end of the year as compared with 4.93 cents and 3-1/64d. (sterling area) at the close of 1043.

The five per cent tax charged on all remittances is excluded from the rates quoted above.

The current assets and liabilities of the operating companies in Brazil were valued at the end of the year in dollars at the closing sight rate on the special free market for exchange on New York.

The combined earnings of the operating companies, expressed in dollars, which are published monthly and which appear in total in the tabulated statement on page 3 of this report are calculated at the remittance rate for the month in which the earnings were made, due provision being made for the remittance tax.

Dividends Paid

In addition to the usual quarterly dividends on the small outstanding balance of the preference shares, two dividends were paid during the year on the ordinary shares of the Company, viz:—\$1.00 on 15th June and \$1.00 on 1st December (Canadian funds).

Labour Costs-Wage Rates

Brazil is experiencing to a marked degree the rising cost of living and since September 1942 has endeavoured to control selling prices of all foodstuffs. In spite of wage increases and adjustments, however, the situation became so critical towards the end of 1944 that it was decided additional financial help must in some way be given at least to employees of the lower paid classes, to be applicable to all the companies. A provisional war bonus on a sliding scale, commencing 1st January, 1945, was therefore added on all wages below a certain figure. The bonus was estimated to involve an increase in expenditure during 1945 of approximately \$2,200,000.

This was insufficient to remedy the situation, and as a result of further demands and of consequent representations by our companies to the Federal Government, decree-law 7,524 issued 5th May, 1945, creates, from 15th May, 1945, a 10% additional charge on the rates for electrical energy, gas, water and telephone services, and also authorizes an increase of 10 centavos (one-half cent) per passenger on collective urban transport fares. The decree provides that the proceeds from these increases shall be used to defray the cost of specified increases in wages over those ruling in December, 1944. The application of any balances over said costs is to be agreed upon with the conceding authority in each case, it being expected that these will be expended in betterments to the corresponding systems. The net increase in wages now ordered by the decree amounts to more than double the provisional war bonus above mentioned.

The shortage of labour has continued to be accentuated by competitive bidding for skilled help by concerns whose selling prices are not subject to the restrictions applied to a public utility company.

The total number of employees in the Company's service in Brazil at the end of the year was 43,690 as compared with 42,187 in 1943.

Electric Power Supply

In spite of increased difficulties resulting from the war this service has been well maintained although under some restrictions. The extremely dry period now being experienced in the Rio region, coupled with the great growth of load under war conditions, has required rationing of electrical energy in that area and it is expected that this will continue for at least the rest of 1945.

To help relieve this situation, while the capacity of the hydro-electric plants is being increased, and to take care of increasing power demands in the zone traversed, the construction of a 230,000 volt transmission line 205 miles long from the Serra do Cubatão plant of the São Paulo system to the Ribeirão das Lages plant has been authorized and is under way but its completion, under existing conditions, cannot be expected before the latter part of 1946.

At the Serra do Cubatão plant the connection of the existing units to the new tunnel and surge tank, nearly completed, will give 55,000 K.W. additional capacity. The manufacture and

installation of another 67,000 K.W. unit is under way but it will be about August, 1946 before this can be ready for service. The Brazilian authorities have authorized still another 67,000 K.W. unit and every effort is being made in Washington to expedite its authorization and manufacture.

The rectification of the Pinheiros river is progressing slowly; authorization to manufacture the 18,000 H.P. pump for the second unit at the Pedreira pumping plant has now been obtained. This, when installed, will complete the unit for service. The additional pumping capacity is needed to increase the water supply to the Serra plant.

At the Ribeirão das Lages plant of the Rio System the raising of the dam, driving and lining of the large tunnels and erection of the third of the new units of nominally 35,000 K.W. each are proceeding, but progress has been slow on account of war conditions.

An important concession has been approved and published 12th May, 1945, which permits supplementing the water supply of the Ribeirão das Lages plant by pumping from the Pirai and Paraiba rivers; this authorizes a progressive power development for the Rio region, corresponding to the Serra do Cubatão supply for the São Paulo region. As soon as the close of the war permits the necessary construction, this, and the transmission line above mentioned, will eliminate the difficulties in the Rio power supply.

In order to expedite the more urgent work above mentioned the construction of the Lages Auxiliary plant of the Rio System, referred to in last year's report, has been postponed.

The water level at the Ilha dos Pombos plant has been raised only, one meter of the 3.5 meters authorized because the alterations of the large sluice gates and the raising of the automatic sector gates (which weigh 2200 tons each) necessary to achieve the full height can be done only after the close of the war.

The companies are still under orders from the authorities to supply other distributing companies which are short of power, mention of which has been made in previous reports. This, together with the increased demand from its regular consumers is depleting the reserve capacity which the Company has always endeavoured to maintain so as to meet fully the demands upon the service throughout the territory served.

Railway Electrification

The initial step in the electrification of the Sorocabana Railway from São Paulo to Santo Antonio, a distance of 87 miles was inaugurated on the 8th December, 1944, power being supplied by The São Paulo Tramway, Light & Power Company, Limited, under a contract signed with the railway on the 23rd October, 1942.

By decree-law 7,221 of 30th December, 1944, the Minister for Public Works and Transport was authorized to enter into an agreement with the São Paulo Railway for the electrification of its line from São Paulo to Jundiai, a distance of 37.28 miles. The corresponding power contract with The São Paulo Tramway, Light & Power Company, Limited is being negotiated.

Transportation—Tranways

With the continued shortage of motor fuels for buses and private motor cars, as well as other factors resulting from the war, riding on the tramways has continued abnormally heavy. The available means for coping with this overload have been further taxed by the increasing shortage of essential materials and of labour.

The service in São Paulo has continued to be operated in accordance with the decree signed by the President of the Republic in June 1941, to which reference was made in the Annual Report for that year.

Telephone Service

Owing to the continued shortage of materials and equipment from which all countries are suffering, it has not been possible to meet the increasing demand for the Company's service in Brazil, although some equipment has been received and is at present being installed, which will to some extent alleviate the situation.

Arrangements have been made for 35,950 additional lines of equipment; the number of prospective subscribers awaiting connections at the end of the year was 38,699.

The Company's existing concessions, authorizations and licences for intermunicipal service in the State of São Paulo, the term of which has been extended year by year since December 1942, were further extended to 31st December, 1945, by decree-law 14,514 of 7th February, 1945, signed by the State Interventor. The same decree likewise approved the toll rates in force, together with their application since June 1940, when the Company first put them into effect.

Gas Service

Although gas rationing continued in force throughout the year by order of the Authorities, the combined output in the three citics served was almost 11% higher than in 1943, but was 16% below that of the year 1941 when the service was not rationed.

Brazilian coal used by our gas companies amounted to approximately 30% of the total consumption. The amount available to us during the coming year may, however, diminish in consequence of the requirements of the new steel plant at Volta Redonda.

The arrangement under which the price of gas to consumers varies in accordance with the eost of coal delivered at the works, continued in force throughout the year in all three cities served.

A decree-law signed 14th July, 1943, extended the Rio Company's contract expiring 15th September, 1945, for an indeterminate period pending the return to normal conditions following the war after which a new contract is to be negotiated.

Industrial Sufficiency in Brazil

In addition to the larger and heavier industries sponsored by the Government, many small plants and factories have been established during recent years, all of which are naturally drawing on the limited technical personnel and skilled labour available in the country. It is estimated that the total volume of industrial production in Brazil for the year 1944 was at least 50% above pre-war.

Among the industrial events of the year were the start of production of steel rails by the Companhia Siderurgica Belgo Mineira and the commencement of partial production at the Federal owned National Motors Factory.

Foreign Trade of Brazil

The following table shows Exports and Imports (in thousands of cruzeiros) for the years 1940 to 1944 inclusive:

	1940	1941	1942	1943	1944
Exports	4,961,518	6,725,401	7,499,556	8,728,569	10,726,509
Imports	4,964,149	5,514,417	4,644,348	6,161,741	7,965,141
Dalaman at too da	0.001	1 010 004	2.055.000	0.500.000	2.501.000
Balance of trade	2,631	1,210,984	2,855,208	2,566,828	2,761,368

Note: To facilitate consideration by those not familiar with Brazilian currency, the approximate equivalent of 1000 cruzeiros may be taken as \$50.00 U.S.

In tonnage, imports increased 14.4% and the average price per ton increased by 13% over 1943. In the case of exports, however, there was a decrease in tonnage of 1%, but an increase of 24% in the average price which accounts for the larger monetary total. Comparing 1944 with 1938 the falling off in tonnage was 23% for imports and 32.1% for exports.

Shipments of coffee were greater in 1944 than in 1943. Last year Brazil exported a total of 13,558,122 bags as compared with 10,115,969 in the year 1943, or an increase of 34%. Of this total no less than 11,641,440 bags were shipped to the U.S.A. which constitutes an all-time record. The value of coffee exported was Cr\$3,869,700,000 in 1944, as against Cr\$2,803,768,087 in 1943.

Brazil in the War

In the Spring of 1944 Brazil took her place at the side of her Allies on the battle front by sending expeditionary forces to Italy. The exploits of her sons there have been worthy of the high cause for which they fought.

Sir Herbert Couzens, K.B.E., 1877-1944

A grievous loss was sustained by the Company and its Subsidiaries through the death of their President, Sir Herbert Couzens, K.B.E., in England on November 17th, 1944, after a very valiant but losing fight.

Following a distinguished career in the public utility field during which he was for over twelve years in charge of the Company's operations in Brazil, Sir Herbert retired to England in 1937, remaining there until 1941 when, following the death of Mr. Miller Lash, he was persuaded to accept the Presidency of this Company and its Subsidiaries. These offices he filled with outstanding efficiency and devotion until the illness, which overtook him last summer and which ultimately proved fatal, compelled him to retire from all active duties.

During his long tenure of office, Sir Herbert was indefatigable in furthering the interests of the Companies under his charge and the value of his services cannot be overestimated. He was scrupulously just and fair in all his dealings and commanded the respect and esteem of the Authorities in Brazil under circumstances that were often difficult and trying. He was ever ready to assist and advise all with whom he came in contact and his kindness and thoughtfulness endeared him to associates and employees alike. He was a man of exceptional attainments in every way and, although he has now passed on, the memory of what he was and of his outstanding accomplishments will long endure.

Election of New President and Chairman of the Board

Following the death of Sir Herbert Couzens, the Board unanimously elected Mr. A. W. K. Billings as President of the Company. Similar action had already been taken by the subsidiaries consequent upon Sir Herbert's illness.

Mr. Billings being ordinarily resident in Brazil, it was decided to revive the office of Chairman of the Board in Toronto and Colonel Walter Gow, K.C., was elected Chairman on 23rd November, 1944. Hon. G. Howard Ferguson, K.C. was appointed a Vice-President.

Since the last annual meeting, vacancies on the Board have been filled by the election of Messrs. Norman D. Wilson, E. C. Fox and G. R. F. Troop, all of Toronto. Mr. Wilson, a well-known traffic expert, has an intimate first hand knowledge of the Company's traffic problems in Rio, São Paulo and Santos. Mr. Fox is a Director of The Canadian Bank of Commerce and President of Canadian Cottons Limited of Montreal. Mr. Troop is Treasurer of the Company.

Staff

Grateful acknowledgment is made to the employees of the Associated Companies for their continued loyalty, enterprise and efficiency under the heavy demands with which they have been confronted. Without their combined efforts and cooperation the results of the past years could not have been accomplished.

For the Board of Directors,

A. W. K. BILLINGS, President.

TORONTO, 22ND MAY, 1945.

AUDITORS' REPORT

To the Shareholders of Brazilian Traction, Light and Power Company, Limited:

We have audited the Head Office accounts of Brazilian Traction, Light and Power Company, Limited, The Rio de Janeiro Tramway, Light and Power Company, Limited (and its subsidiary, Brazilian Telephone Company), The São Paulo Tramway, Light and Power Company, Limited, São Paulo Electric Company, Limited (and its subsidiary, The San Paulo Gas Company, Limited), The City of Santos Improvements Company, Limited and Brazilian Hydro Electric Company, Limited, and have examined the certified reports and statements of other Chartered Accountants covering the capital and revenue accounts and provisions for depreciation in Brazil for the year ended 31st December, 1944. We have obtained all the information and explanations which we have required.

The net revenues of the operating companies owned or controlled by Brazilian Traction, Light and Power Company, Limited, after provision for or payment of all losses, expenses and charges including depreciation, bond interest and sinking funds, as provided under contracts with them are payable to and are included in the profit and loss account of Brazilian Traction, Light and Power Company, Limited.

Subject to the foregoing we report that, in our opinion, the attached Comparative Consolidated Balance Sheet, Comparative Profit and Loss Account and Profit and Loss Surplus Account are properly drawn up so as to exhibit a true and correct view of the state of the combined companies' affairs at 31st December, 1944, and of their operations for the year ended on that date, according to the best of our information, the explanations given to us, the certified reports of the auditors in Brazil and as disclosed by the books of the companies.

Clarkson, Gordon, Dilworth and Nash, Chartered Accountants,

Toronto, May 21st, 1945.

BRAZILIAN TRACTION, LIGHT AND POWER COMPANY, LIMITED
