

McGILL UNIVERSITY
MONTREAL

FACULTY OF MEDICINE
DEPARTMENT OF SURGERY

June 14th,
1927.

Dr. Wilder Penfield,
Presbyterian Hospital,
New York City, N.Y.

My dear Dr. Penfield:

Thanks for your telegram. I believe there will be the facilities for experimental and pathological work, as well as the operative side. I think there is no fear of starvation. I am submitting your telegram to our Medical Board, all of whom are most sympathetic towards the general proposition. I know also that the Board of Trustees are sympathetic. I shall await further word from you, after the 20th, and could almost promise to run down on any day you might mention after that date.

I am in a great hurry at the moment, as I am just leaving for Toronto. I shall await your wire.

Yours sincerely,

Edward Osler
