M^C GILL UNIVERSITY
MONTREAL

FACULTY OF MEDICINE
OFFICE OF THE DEAN

7th February, 1929.

Dr. Wilder Penfield,
Dept. of Neuro-surgery,
431, Pine Avenue West,
M o n t r e a l.

My dear Penfield,

Many thanks for your letter, with copy of one from Pearce. It is certainly very much what I expected, but did not like to discourage you. There are many other ways of approaching the subject, and I think, as your Department progresses, our Governors will be more and more stimulated to do something to put Neuro-surgery on a larger, broader and better plane.

We can talk about this on Sunday if, as I hope, you will be coming to the meeting in Tait's Laboratory.

Sincerely yours,

C. S. Martin
