

M^C GILL UNIVERSITY
MONTREAL

FACULTY OF MEDICINE
OFFICE OF THE DEAN

July 29th,
1931.

Dr. Wilder Penfield,
Royal Victoria Hospital,
Montreal.

Dear Dr. Penfield,

I understand that Gage and Chorobski have been working in the Department^{of}/Experimental Surgery, and I would be very glad to get a few lines as to what they have done, so that I can report on it to the Rockefeller.

If there is anything of yours or Cone's to add, which would swell the importance of the work (and I know it would), by all means add it to the list of experimental work.

Sorry to trouble you.

Sincerely yours,

F. C. Martin

DEAN.
