Dr. C.F. Martin,
Medical Building,
McGill University,
MONTREAL.

Dear Dr. Martin,

The following book edited by Dr. Penfield will be published shortly:-
The Cytology and Cellular Pathology of the Nervous System. Hoeber.
I have been asked to give four lectures in the Department
of Surgery, one of which will be delivered by Dr. Cone.

During the past year Dr. Dorothy Russell and Dr. Ottiwell
Jones have been working as post-graduate students in the Laboratory.
Each has now returned home.

This year Dr. Patterson-Smyth has begun a post-graduate
series of experiments in the Laboratory. Because of ill-health
however, he had to give it up expecting to return before the year
is over.

Dr. J.P. Evans of Harvard is at present doing post-graduate
work in the Laboratory. In addition to that two internes, Dr. Brodie
and Dr. Barrera are carrying out research undertakings in the Labora-
tory.

The publications are as follows:-

Dr. Penfield.

The Field of Neurosurgery, - Canadian Medical Association Journal.

Neuroglia and Microglia (The Metallic Methods). With Dr. Cone.
(This is a chapter in the book on Histological Technique, edited by
McClung, in Philadelphia.)

The Scope of Neurology, - Cushing Memorial Volume, Archives of Surgery.

Cerebral Calcification Epilepsy. With Dr. Geyelin. Archives of Neuro-
logy and Psychiatry.

Diencephalic Autonomic Epilepsy. Archives of Neurology and Psychiatry.

WGP/H.L.

Observations on the Nature of von Recklinghausen's Disease and the Tumors Associated with it. With Dr. Young. To appear shortly in the Archives of Neurology and Psychiatry.

The Radical Treatment of Traumatic Epilepsy and its Rationale. With Dr. O.W. Foerster. To appear shortly in the Zeitschrift fur die gesamte Neurologie und Psychiatrie.

The following book edited by Dr. Penfield will go to press shortly: The Cytology and Cellular pathology of the Nervous System. Hooper, New York. Have been asked to give four lectures in the Department of Surgery, one of which will be delivered by Dr. Cone.

During the past year Dr. Dorothy Russell has been working as post-graduate student in the laboratory. Each has now returned home. This year Dr. Patterson-Smith has begun a post-graduate series of experiments in the laboratory. (To appear shortly). However, he had to give it up expecting to return before the year is over.

Dr. O.W. Jones.

Dr. J.P. Evans of Harvard is at present doing post-graduate work in the laboratory. Dr. Barrera are carrying out research in the laboratory.

Dr. Cone.

Histology and Histopathology of the Optic Nerve. With Dr. J. A. McMillan. (To appear shortly in the Cytology and Cellular pathology of the Nervous System, as one of the chapters.)

The Tumors of the Nervous System. (To appear shortly as one portion of a book on the Pathology of the Tumors, the rest of which is being written by Dr. A.P. Stout.)

Neuroglia and Microglia (The Metallic Methods). With Dr. Penfield. The Journal of Neurology, - Graham Memorial Volume, Archives of Surgery.

Cerebral Calcification Epilepsy. With Dr. Gevelin. Archives of Neurology. Please forgive the delay in answering your letter and I hope that this is satisfactory.

Meningeal Arteriovenous Epilepsy. Archives of Neurology and Psychiatry.

Yours sincerely,
