## THE BLASTED PHEASANT.

The bird was found 90 feet from the edge of a bomb crater 12 hours after two large bombs had been dropped. It did not move when approached and could be placed in any position and so remain until moved. It closely resembled the catatonic patient.

1 A. Section through forebrain showing hemorrhagic areas.

1 B. Sections of right and left lungs showing hemorrhagic consolidation.

The Lancet Feb. 8/41. Page 172, Capt. O.W.Stewart, Lt.Col. C.E. Russell, Lt. Col. W.V.Cone.

1 C, D, E, F & G. Photographs made on Oct. 8/40.
