EDWARD A. STRECKER, M. D.  
WILLIAM A. WHITE, M. D.

FIELD REPRESENTATIVE

NOLAN D. C. LEWIS, M. D.

—  
TELEPHONE  
CIRCLE 7-0250

Dr. Wilder Penfield  
Montreal Neurological Institute  
3801 University Street  
Montreal, Canada

Dear Doctor Penfield:

In reply to your recent letter concerning research projects, I should state that I am personally strongly in favor of giving support to these two problems, and at the next meeting of the Advisory Committee, which will probably take place sometime in July, I shall present the matter for consideration.

Before this meeting is called, I should have a brief plan of each problem (hormone problem and biopsy work), which should include a rough estimate of the amount of money needed yearly to do the work in a satisfactory manner. These plans will be confidential, treated ethically, seen only by the members of the Committee, and needed merely for a clear orientation in the working hypotheses. The submitting of this brief formulation of the projects is the next step in the situation. They are intriguing leads and certainly deserve investigation.

Sincerely,

*Nolan D. C. Lewis*
