

25th July 1934.

Dr. Robert A. Lambert,
The Rockefeller Foundation,
49 West 49th Street,
New York City.

Dear Dr. Lambert,

Your welcome letter of the 19th was very reassuring and I hope you will understand how deeply we appreciate the generous attitude of the Foundation, and your very sympathetic treatment of the whole misunderstanding.

I delayed answering your letter to make sure that Mr. Beatty sent off the proper notification to Mr. Max Mason. On Saturday when your letter came he was in St. John but his letter went off yesterday so I hope that all the formal steps have been taken.

As shortly following August 1st as possible we will send you a statement of expenses incurred by the Department of Neurology and Neurosurgery between the July 1st 1933 and August 1st 1934.

The dispatch with which you have secured a ruling for us and allayed our fears in regard to the scientific work for the coming year, makes it possible for us to go ahead with that work, and all of us in the Department feel a debt of gratitude to the Foundation for the spirit in which this was done.

I had a card from Dr. Martin saying he was very sorry to have missed Dr. Gregg in Paris. I hope Gregg is getting a much earned holiday.

Gratefully yours,

WGP/NL.
