

CABLEGRAMS
"MOUNTCLUB MONTREAL"

Opening

Sept 27, 1934

My dear Wilder,

Just a word or
two of admiration, and
still more of affection.

Your great day has
gone brilliantly. You
can, and will, do much
more for Neurology; you
can hardly hope to
attain a greater degree
of esteem and personal

regard on the part of
your fellows or of the
more general medical
crowd than you now
possess. In a sense, you
may even now say you
have dimitis.

Still, with that general
support and that general
affection, you will go
forward on your chosen
path of science. My wish
is that it will be always
a pleasant path, with
many flowers of science
to pick, beautiful

and frequent. Excuse the Plover language,
which, however, is not in any other
to your splendid dinner, it has been long
in my mind to write you word of this sort.

Yours always,

Edward Prescott.
