

14th March 1934.

Dr. Donald McEachern,
Cardiac Laboratory,
Johns Hopkins Hospital,
Baltimore, Md.

Dear McEachern,

I am wondering when you expect to reach Montreal. Dr. Petersen has been getting the other biographies going and we are anxious to have a first reading of at least three before long. Your biography of Jackson could be one of those three. We are anxious to get the whole lot through before June if possible. Dr. Weisenburg is very much pleased with the idea of publishing them in the Archives of Neurology and Psychiatry.

Please let me know as soon as you can when you expect to arrive so that Dr. Petersen can make plans for the first meeting. Things are progressing slowly at the Institute.

Yours sincerely,

WGP/HL.
