

25th May, 1933

Professor B. Babkin,
Department of Physiology,
McGill University.

Dear Babkin:

In the Neurological Institute we are anxious to have a medallion of Pavlov along with certain other important neurologists to go into a frieze. Have you any photograph of Pavlov which gives him in profile or in semi-profile? Do you know of any such picture? If you do not would you be willing to write to Pavlov to ask him for a profile picture, telling him at the same time that we would be very glad, of course, to pay for the cost of either copying some existing picture or of having a picture taken of him. Sherrington has had a profile view taken for me for this purpose. I hope this will not be too much trouble.

With best regards,

Yours sincerely,

WGP/WS
