

August 6th 1934.

Dr. Colin Russel,
Lac Violon,
Ivry North, P.Q.

Dear Colin,

I am enclosing a note from Fetherstonhaugh. You could do this very much better than I could and I think it would be a good idea to have an authoratative description and account of the Institute, the physical set up and what its service to the community will be or should be in the "News". Will you undertake this? You will probably hear from Fetherstonhaugh.

I have a letter from Holmes saying that he will arrive on the Empress of Australia which reaches Quebec on September 17th or 18th and will come on then to Montreal. He will be staying with us in Montreal. You spoke of inviting him up to Ivry. I have no fixed plans for him as yet. We will be back in town long before that and I suppose that Greenfield and his little girl will be staying with us also. You can let me know sometime what plans you would like to make for Holmes and we will fit our plans together.

I hope that you and Evelyn are having a proper holiday. I am back here for a few days only.

We lost out on the passage from the bridge to the main corridor of the hospital!

Ever yours,

WGP/MD
Encl.
