June 28, 1929.

Dear Dr. Penfield:

Have delayed writing you in the hope that I should have something definite to report but at present nothing new has happened in William's case.

He has been feeling well and everybody mentions how much better he looks this summer. During the very hot weather we had a short time ago, we continued to play 18 holes each day with no bad results. You, no doubt, already know the food he eats, what is your opinion in such matter? He has about ten or eleven hours rest at night and one and one-half hours rest after lunch. During the evenings we usually read, sometimes going to the movies.

Mrs. Altman I believe is improving quite rapidly at the hospital and will probably join us here later. She always speaks with the utmost faith in you.

I have read the book on "Epilepsy" which you mentioned by Cobb and Lennox - it has given me much information on the subject. If there is anything I can do for you, please let me know and I shall do my best. I am enjoying the summer very much and wish to thank you for giving me the opportunity.

Very sincerely,

Gordon Petrie.
